EXHIBIT D - Environmental Management System
Notice for Contractors and Contractor employees

The New Hampshire Army National Guard (NHARNG) has implemented an environmental Management System (eMS), in accordance with Federal Executive Orders 13423 and 13514, to guide its operations in an environmentally sound manner. Under its eMS, the NHARNG has identified significant activities, products or services that can interact with the environment (known as aspects) and potential environmental impacts from its operations.

The significant environmental aspects are listed below:

HVAC (heating, ventilation & a/c)	Endangered species management
Ground vehicle maintenance & repair	AASF JP-8 use and storage
Vehicle travel (fleet) between work stations	

These five (5) significant aspects and their associated impacts will be closely monitored by the NHARNG. Objectives and associated target completion dates have been developed to reduce the environmental impacts from the two (2) shaded aspects. Further, the NHARNG is tracking the success of the implementation plans established to achieve the NHARNG's objectives.

For the purposes of this notice, applicability is limited to those actions that the contractor or subsequent employees are likely to perform on NHARNG properties.

The primary purpose of this notice is to communicate the three basic tenets of the NHARNG's eMS policy:

- eMS (ISO 14001) is the management system the NHARNG uses to implement the Adjutant General's Environmental Policy;
- The eMS Environmental Policy commits the NHARNG to comply with environmental laws and regulations, to prevent pollution and to promote continual improvement of the eMS; and
- Contractors are responsible for knowing the environmental impacts of their services, and must understand the management requirements for any activities that could affect any of NHARNG's significant aspects, or that could result in potential environmental impacts.

AASF JP-8 Use and Storage

The NHARNG is committed to reducing environmental impacts from fueling operations. If you perform on-site fueling activities at the AASF, you must be aware that this facility is covered by an Integrated Contingency Plan (ICP). Spills of fuel must be reported as indicated on the Spill Chart and Hazardous Waste Emergency Notification Form. Fueling activities may only be performed by personnel who have been trained according the functions performed. Personnel dispensing fuels are responsible for cleaning up any spills that occur during fueling activities.

HVAC (Heating, Ventilation, and A/C)

The NHARNG is committed to reducing its consumption of energy from HVAC. Reducing energy consumption from HVAC may be realized by turning off electrical equipment when not in use, or reducing heating temperatures/increasing cooling temperatures, using alternative fuels (if available, such as E85 or biodiesel), etc. Contracts that include the use or installation of HVAC Equipment will seek the most energy efficient technology within the scope of the contract.

Ground Vehicle Maintenance and Repair

The NHARNG is committed to reducing hazardous waste generation by ground vehicle maintenance and repair through pollution prevention and waste minimization. Hazardous wastes generated by your vehicle maintenance and repair activities must be disposed in accordance with contract provisions and regulatory requirements.

Endangered Species Management

The NHARNG is committed to preserving and restoring habitat and threatened and endangered species. The federally endangered Karner Blue Butterfly (KBB) is known to occur on the State Military Reservation, and habitation restoration areas are only for authorized uses. Signage is present on the SMR to identify the habitat restoration area. Use of this area is prohibited by contractors unless specifically included in your contract.

Vehicle Travel (fleet) Between Work Stations

The NHARNG is committed to preventing pollution through monitoring of Federal GSA Fleet vehicle usage. Usage of fleet vehicles by contractors is prohibited.

Significant aspects likely to be affected by contractor's activities, products, or services:

Subject: Water main leak SMR North of Building F

Location: SMR Concord NH

The water main valve that services building F & L is leaking and collecting in the parking lot north of building F. State Maintenance has worked the valve to try and seat it but it will not stop leaking.

State maintenance called the city of Concord Water Works Department and spoke to a Kevin Demers to ask if they can repair the leaking valve. This valve is on the SMR and belongs to the The Adjutant General's Department.

State Maintenance looked into getting the valve in the parking lot repaired. To be able to repair the valve in the parking lot will require cutting up the parking lot and trenching to the city meter pit. The piping is very old and will need to be replaced from the valve to the street. The piping to the buildings from valve in the parking area would not be changed.

The cost of removing and replacing the water line from the valve to the street would be cost prohibitive. The old piping from the valve in the parking lot to buildings F & L will still be old and could leak in the future.

Installing Taps before the sprinkler curb stops at buildings F & L will be more cost effective and there will be very little disruption to the water service at buildings F & L.

Please see exhibit A for details.

EXPLANATION

This proposed contract is to perform repairs due a damaged water valve and old piping/water lines. The valve is the main water valve that services Buildings F and L on the State Military Reservation. The work that is needed to repair this problem involves cutting up pavement, cutting into concrete floors of the State Maintenance garage and Warehouse Buildings, trenching into the city meter pit, replacing the very old piping from the valve to the street, back filling loam and reseeding the grounds. The City of Concord Water Resources Department was called to see if they were able to, or should be the ones to perform the repairs, but because the valve is on our property and belongs to the State of New Hampshire, the City is unable to perform the repairs.

The vendor, The Dirt Doctors, was identified through Requests for Quotations where three (3) local vendors submitted quotations for this work. The Dirt Doctors submitted the lowest cost proposal of all three (3) quotes received.

The Federal Funds to pay for this Contract are provided to the Adjutant General's Department by the National Guard Bureau pursuant to a Federal-State Master Cooperative Agreement for the mutual support of the New Hampshire Army National Guard. The cost of this contract shall be reimbursed to the State by the Federal government at a rate of 100%. In the event that federal funds are not available, general funds will not be requested to support this program.

The Contract has been approved for form, substance and execution by the Attorney General's Office.

Respectfully Submitted,

William N. Reddel, III
Major General, NH National Guard
The Adjutant General
