Bureau of Finance & Contracts
March 25, 2015

Her Excellency, Governor Margaret Wood Hassan
and the Honorable Council
State House
Concord, NH 03301

INFORMATIONAL ITEM

In accordance with the requirements approved by Governor and Council March 12, 2014, Item #62, the Department of Transportation is to submit on an annual basis a summary of contracts with various private contractors to assist with winter maintenance activities, emergency repair of infrastructure due to flooding or other unexpected natural disasters, along with highway and bridge maintenance efforts. Attached please find a detail reporting for the fiscal year ending June 30, 2014.

EXPLANATION

The upper section of the report reflects the rented equipment that was processed through the Payroll MATS System (\$10,794,605.80). The lower section of the report reflects the rented equipment that was only processed through the Accounts Payable System (\$2,236,284.99). The total for all the rented equipment associated with private contractors is \$13,030,890.79.

Since its creation, the Department of Transportation has rented and the Legislature has funded, privately owned equipment to assist with the maintenance of the state's roadway system. Over the course of this time there have been numerous versions of administrative rules, all noting (as in the current TRA 102.05)(a)(03) that the Department's "Bureau of Mechanical Services shall be responsible for ...the setting of rental rates and approval of private equipment rental by this or any other department." The most current rental rates were published by the Department in 1999, with an update in 2005 for plow trucks rates. Any rental rates that either exceed the current published rates, or are required for a piece of equipment not detailed within the current rates, must be approved at the Director of Operations level or Commissioner level.

Chapter 144:12 Laws of 2013 states "any state agency or department is authorized, with the prior approval of the Department of Administrative Services, to enter into agreements to rent, lease, or lease-purchase vehicles and equipment from any outside vendor or to rent or lease vehicles and equipment from any other state agency or department". For many years the Department has hired privately owned equipment to assist with maintenance and emergency repair efforts. Chapter 144:12 added the requirement for Administrative Services to review and approve this process.

The Department of Transportation has met with representatives from the Department of Administrative Services and specifically discussed the issue of rental of equipment. As part of this review it was agreed by both Departments that the Department of Transportation request approval from the Governor and Executive Council for continued use of Rental contracts. As part of the adopted process, an informational item would be presented to the Governor and Executive Council on an annual basis which would provide the detail of the contracts which were entered into and used.

It is respectfully requested that this item be approved.

Sincerely,

A handwritten signature in black ink, appearing to read 'David J. Brillhart', written over the printed name.

David J. Brillhart
Acting Commissioner

THE STATE OF NEW HAMPSHIRE
DEPARTMENT OF TRANSPORTATION

CHRISTOPHER D. CLEMENT, SR.
COMMISSIONER

JEFF BRILLHART, P.E.
ASSISTANT COMMISSIONER

Bureau of Mechanical Services
February 24, 2014

Her Excellency, Governor Margaret Wood Hassan
and the Honorable Council
State House
Concord, NH 03301

REQUESTED ACTION

Authorize the Department of Transportation, Bureau of Mechanical Services, to contract with various private contractors to assist with winter maintenance activities, emergency repair of infrastructure due to flooding or other unexpected natural disasters, along with highway and bridge maintenance efforts, to be effective upon Governor and Executive Council approval through June 30, 2015.

EXPLANATION

Since its creation, the Department of Transportation has rented and the Legislature has funded, privately owned equipment to assist with the maintenance of the state's roadway system. Over the course of this time there have been numerous versions of administrative rules, all noting (as in the current TRA 102.05)(a)(03) that the Department's "Bureau of Mechanical Services shall be responsible for ...the setting of rental rates and approval of private equipment rental by this or any other department." The most current rental rates were published by the Department in 1999, with an update in 2005 for plow trucks rates. Any rental rates that either exceed the current published rates, or are required for a piece of equipment not detailed within the current rates, must be approved at the Director of Operations level or Commissioner level.

Chapter 144:12 Laws of 2013 states "any state agency or department is authorized, with the prior approval of the Department of Administrative Services, to enter into agreements to rent, lease, or lease-purchase vehicles and equipment from any outside vendor or to rent or lease vehicles and equipment from any other state agency or department". For many years the Department has hired privately owned equipment to assist with maintenance and emergency repair efforts. Chapter 144:12 added the requirement for Administrative Services to review and approve this process.

The Department of Transportation has met with representatives from the Department of Administrative Services and specifically discussed the issue of rental of equipment. As part of this review it was agreed by both Departments that the Department of Transportation request approval from the Governor and Executive Council for continued use of Rental contracts. As part of the adopted process, an informational item would be presented to the Governor and Executive Council on an annual basis which would provide the detail of the contracts which were entered into and used.

Administrative rule TRA 102.05(a) (03) empowers the Department to set rental rates. When making this determination consideration is given to the type of equipment, its availability, and the need for the particular piece of equipment. Vendors who are willing to rent their equipment for the determined rate enter into an Equipment Contract Rental Agreement with the Department. This agreement is "at will"; there is no commitment from the vendor to provide equipment to the Department. Equipment can be rented by the hour, day, week or month, and also can be hired with or without an operator.

When a need for equipment arises, the availability, duration of use and location of assignment are determined. Selection of one vendor over another is often based on logistics, availability, performance and cost. Vendors who fail to perform due to equipment failures or vendor operator issues are dismissed and replaced as necessary.

The flexibility for this type of contract is critical to the nature of the work done by the Department. The vast majority of these contracts are used for winter maintenance operations (approximately 75%) and disaster recovery. These types of operations are very much unknown until they occur, and when they do, timeliness is absolutely critical to restoring the roadway system to a safe and passable condition.

To assure the oversight of the Governor and Council of these types of service contracts, the Department will submit to the Governor and Council a report annually that will detail the contracts which were entered into during the previous fiscal year. Below is a summary of the number of Contract Rental Agreements used by the Department for FY2011, 2012 and 2013. The summary identifies the equipment solely used for winter operations, "Plow Trucks". It is important to note that the equipment such as loaders and loader/backhoes that are used in both the summer and winter months are considered under "Other Equipment".

Contract Rental Agreements Fiscal Year Summary

	<u>FY 2011</u>	<u>FY 2012</u>	<u>FY 2013</u>
Total Agreements	6,806	6,285	5,870
Agreements Used	1,610	1,647	1,343
Plow Truck Agreements	797	689	690
Other Equipment Agreements	813	958	653

Total Expenditures, Contract Rental Agreements

	<u>FY 2011</u>	<u>FY 2012</u>	<u>FY 2013</u>
Winter	\$9,386,711	\$5,133,951	\$7,176,621
Summer	\$3,220,732	\$3,600,772	\$1,599,079
Betterment	\$1,885,919	\$2,197,037	\$1,631,277

The Department's approach to using Equipment Contract Rental Agreements has worked well over many past years. The use of these agreements has allowed the Department to leverage the needed equipment and services necessary to keep the State's transportation system operational and help meet the expectations of New Hampshire's travelers. We believe the reporting system being proposed will further assist the Department and the Governor and Executive Council to further understand this hired equipment component of the Department's work.

It is respectfully requested that this item be approved.

Sincerely,

Christopher Clement, Sr.
Commissioner
