REQUESTED ACTION

Authorize The Adjutant General's Department to execute the second of two (2) contract renewal options with Tighe & Bond, Inc. (vendor code #223259), 53 Southampton Road, Westfield, Massachusetts, 01085, for Professional Civil/Environmental Engineering & Master Planning Services for planning and design of various projects as necessary and required, for the period of July 1, 2018 through June 30, 2019. The contract was originally approved on June 10, 2015, item #41 and extended on August 2, 2017, Item #15. The amount to be expended under this agreement shall not exceed \$400,000.00.

EXPLANATION

Three (3) different vendors were selected to perform these specific engineering services, with each project being funded from accounts specific to each particular project. The majority of projects needing this type of work are maintenance/repair and Capital Budget projects. The Department wishes to execute this contract renewal with Tighe & Bond, to continue to expedite the project workload and provide appropriate technical expertise as required for specific future projects. The contract has effectively enabled the Department to respond quickly to unscheduled project requests and possible architectural and building issues.

The request for qualifications used to identify the chosen vendor(s) and the selection process utilized by the Department for this project is in accordance with RSA 21-I:22, "*Selection of Engineers, Architects and Surveyors*", as many of the projects need a professional engineering or surveying stamp to be legally sufficient. The Department negotiated with the vendor(s) to establish the rates of compensation. The rates were compared with New Hampshire Bureau of Public Works contracts for these services and a number of Federal Government General Services Administration contracts. The Adjutant General's Department determined that the negotiated rates are fair and reasonable. The Request for Qualifications was advertised with an initial base contract period with the option for two (2) one-year renewal periods subject to the agreement of both parties and the additional Governor and Council approval of such contract renewal(s).

His Excellency Governor Christopher T. Sununu
And the Honorable Executive Council

Federal Funds may be used to pay for these contract services and are provided to the State of New Hampshire - Adjutant General's Department by the National Guard Bureau pursuant to a Federal-State Master Cooperative Agreement for the mutual support of the New Hampshire Army National Guard. The contract agreement has been approved by the New Hampshire Department of Justice as to form, substance and execution.

Your approval is respectfully requested.

Respectfully Submitted,

Notice: This agreement and all of its attachments shall become public upon submission to Governor and Executive Council for approval. Any information that is private, confidential or proprietary must be clearly identified to the agency and agreed to in writing prior to signing the contract.

THE ADJUTANT GENERAL'S DEPARTMENT**

P-37 AGREEMENT

EXHIBIT A: SCOPE OF SERVICES

Professional Civil Engineering, Environmental and Master Planning Services

GENERAL: The contractor shall furnish all labor, materials, and services as needed to perform consultant services as necessary in regard to site/civil design, development, environmental and investigations, landscape planning, master planning and cost estimating. The Contractor shall comply with all applicable federal, state and local laws, rules and regulations.

CONTRACT PERIOD: The contract period will be from the date of Governor & Council approval, or July 1, 2018 (whichever date is later) through June 30, 2019.

BACKGROUND: The Adjutant General's Department has approximately fifteen (15) Readiness Centers (RC), four (4) field maintenance shops (FMS), a combined surface maintenance shop (CSMS), a State Military Reservation (SMR), a 100-acre training site, a Regional Training Institute (RTI), an Army Aviation Support Facility (AASF), and other ancillary facilities statewide that are used for the training and support of the New Hampshire Army National Guard (NHARNG). The NHARNG Facilities Management (FMO) located in Concord on the SMR has chief responsibility for providing for all infrastructure support to include master planning, site development and design, review and facilities maintenance. Most facilities are approximately 50-years old where minimal site improvements have occurred to meet our changing transformation from a strategic reserve to an operational force. New force structure and equipment fielding are compromising mission success at our facilities due to the following reasons: inadequate privately owned vehicles (POV) parking, inadequate motor pool space for current military equipment fielding, lighting and security fencing that do not meet current anti-terrorism/force protection measures, a shortage of storage facilities, property encroachments, utilities requiring upgrades, and occasional storm water/drainage/environmental issues. The FMO is looking to obtain site designs of small projects in accordance with current state statute, as well as complete surveys, photometric site plans, master plans and other deliverables for our facilities in order to correct current deficiencies and meet future operational requirements.

LIST OF POTENTIAL PROJECTS WITH GENERAL DESCRIPTIONS:

The following is a list of potential projects to be performed under this contract. The Adjutant General's Department may request the consultant to perform other services not specified that it determines are within the scope of the Agreement and the consultant has the technical qualifications to perform.

Site/Civil Design: Site/civil designs at our Readiness Centers will consist of landscaping improvements, roadway and parking pavement design to increase parking for privately owned vehicles (POVs) as well as new fencing for military vehicle motor pools. Utility infrastructure (to include water, sewer, power and communications systems) design will consist of the replacement of failed systems (i.e., Berlin sewer line collapse in 2010), as well as floor drain/wastewater sampling design. Drainage issues may encompass storm water runoff, catch basin/culvert repair(s), retaining wall(s), and other similar type construction required for controlling surface water run-off. Some structural work may be required for concrete slab design to support portable vaults, communications towers, conex containers, hazardous materials (HAZMAT huts, and pole barns/vehicle covered parking throughout the state. Photometric site plans are needed at most of our facilities where lack of adequate lighting exists to meet current Anti-Terrorism/Force Protection (AT/FP) security measures. Additional AT/FP work may include fencing, walls, passive vehicle barriers or other items applied along the perimeter of a facility to create a protective standoff and obscure vision, hinder personnel access and hinder or prevent unauthorized vehicular access.

Environmental Permitting/Compliance: Positions at the firm should fulfill 40 CFR 213.10 (b) Environmental Professional qualifications. Storm water pollution prevention plan (SWPPP) and alteration of terrain (AoT) permits are occasionally required when cumulative work at some of our larger facilities exceed New Hampshire Department of Environmental Services (NHDES) requirements. Additional design/permitting to accommodate NHDES requirements in wastewater, wetlands identification and other environmental programs that could relate to project execution may be required. Examples of other programs may consist of Environmental Condition of Property (ECOP) reports, pre-construction assessments, Phase I Environmental Site Assessments (ESAs) that conform to applicable ASTM standards and 40 CFR 312 (All Appropriate Inquiries Final Rule), and Phase II ESAs if needed to evaluate Recognized Environmental Conditions (RECs). Review and assess Spill Prevention Control and Countermeasure Plans (SPCCP) and Integrated Contingency Plans (ICP). Review or develop documents IAW NEPA. Perform investigations or analysis IAW US EPA regulations, NH Code of Administrative Rules and other regulatory agencies. Ability to perform and supervise hazardous material surveys and abatement design/work plans.

Master planning: The Adjutant General's Department is currently short 400,000-square feet of Readiness Center space for the approximately 1,800 soldiers in the New Hampshire Army National Guard, as well as over 27,000 acres of training land which requires complex master planning functions for the orderly development of NHARNG. An example of some of the functions expected as a part of the contract include auditing and analysis of the data bases of record which include Army Stationing Installation Planning (ASIP) and Real Property Planning and Analysis System (RPLANS), review and development of the Range Complex Master Plan (RCMP); oversight and review of the Real Property Development Plan (RPDP), assistance preparing or editing other planning documents as required, and assistance or preparation of build-out analysis of current and potential future land acquisitions. Familiarity with planning regulations such as the National Guard Pamphlet (NG PAM) 415-10, and NG PAM 415-12 would be beneficial.

Consultant Services: Provide opinions of cost for projects in design or under construction.

Topographic/GIS Surveys: Readiness Centers throughout the state lack accurate surveys to determine if encroachments have occurred on our properties. Land survey plats are needed to decide encroachment issues, determine property lines in regard to erecting new motor pool fencing, etc. As the Adjutant General's Department expands its GIS-capabilities, linking land survey plats with GIS will be required and must meet National Guard Bureau (NGB) requirements. All deliverables should be georeferenced using NH State Plane 1983 coordinates with 2 foot contour intervals. Firms should have the capability to delineate wetlands on our properties.

Project Management and Delivery Instruction:

Once the firm(s) is/are selected, the general anticipated project execution methodology will be:

1. The Adjutant General's Department shall determine project needs and develop a scope of work, or collaborate with the contractor to develop a scope of work. The scope of work shall include as a minimum: general project information, tasks to be completed, deliverables to be provided and a timetable for completion.
2. The Adjutant General's Department may request a short proposal and project fee estimate from the contractor(s).
3. The contractor(s) shall prepare a cost proposal. Cost proposals will be based on the time and materials rates (and overhead and profit if broken out separately) based on the approved rates established during negotiations.
4. The Adjutant General's Department will technically evaluate the cost proposal and determine the reasonableness of the cost proposal. If the proposal is determined to be reasonable, the Adjutant General's Department will issue a Notice to Proceed memorandum. If the project cost proposal is not determined to be reasonable, the Adjutant General's Department will request a justified modification from the contractor. Once an agreed upon cost proposal is established, the owner will issue a notice to proceed memorandum. The notice to proceed will include copies of the approved project scope of work and cost proposal.
5. The owner and the contractor shall attend a project kick-off meeting to clarify the manner of conducting the project, to review a proposed project schedule, a proposed outline of the project tasks to be executed and confirmation of expected deliverables.
6. The Adjutant General's Department may request monthly status reports for any project that exceeds one month in length, and/or between deliverables for specific project tasks. Status report will include: the specific project task that were completed, funds spent, a general outline of work to be completed in the coming month, and any issues that need to be addressed.
7. The contractor will submit invoices as specific project tasks and deliverables are completed and delivered to the owner's project manager. Invoicing for projects costs beyond the approved proposal cannot be issued without prior approval, and a written notice of cost increase approval is required. Invoicing and payment is further outlined in Exhibit B.
8. The contractor completes projects when all project tasks are accomplished in accordance with the project scope of work as determined by the owner.

STATE OF NEW HAMPSHIRE
THE ADJUTANT GENERAL'S DEPARTMENT

EXHIBIT D - Environmental Management System
Notice for Contractors and Contractor employees

The New Hampshire Army National Guard (NHARNG) has implemented an environmental Management System (eMS), in accordance with Executive Orders 13423 and 13514, to guide its operations in an environmentally sound manner. Under its eMS, the NHARNG has identified significant activities, products or services that can interact with the environment (known as aspects) and potential environmental impacts from its operations. The significant environmental aspects are listed below:

- Energy Use
- Vehicle Travel (fleet) Between Work Stations

These significant aspects and their associated impacts are closely monitored by the NHARNG. Further, the NHARNG is tracking the success of the implementation plans established to achieve the NHARNG's objectives.

For the purposes of this notice, applicability is limited to those actions that the contractor or subsequent employees are likely to perform on NHARNG properties.

The primary purpose of this notice is to communicate the three basic tenets of the NHARNG's eMS policy:

- eMS (ISO 14001) is the management system the NHARNG uses to implement the Adjutant General's Environmental Policy;
- The eMS Environmental Policy commits the NHARNG to comply with environmental laws and regulations, to prevent pollution and to promote continual improvement of the eMS; and
- Contractors are responsible for knowing the environmental impacts of their services, and must understand the management requirements for any activities that could affect any of NHARNG's significant aspects, or that could result in potential environmental impacts.

Energy Use

The NHARNG is committed to reducing its consumption of energy. Reducing energy consumption may be realized by turning off electrical equipment when not in use, or reducing heating temperatures/increasing cooling temperatures, using alternative fuels (if available, such as E85 or biodiesel), etc. Contracts that include the use or installation of equipment will seek the most energy efficient technology within the scope of the contract.

Vehicle Travel (fleet) Between Work Stations

The NHARNG is committed to preventing pollution through monitoring of Federal GSA Fleet vehicle usage. Usage of fleet vehicles by contractors is prohibited.

Significant aspects likely to be affected by contractor's activities, products, or services:

REQUESTED ACTION

Authorize The Adjutant General's Department to **retroactively** execute the first of two (2) contract renewal options with Tighe & Bond, Inc. (vendor code #223259), 53 Southampton Road, Westfield, Massachusetts 01085, for Professional Civil/Environmental Engineering & Master Planning Services for planning and design of various projects as necessary and required by the Department. The contract will be effective July 1, 2017, upon Governor and Council approval, through June 30, 2018. The contract was originally approved on June 10, 2015, item #41. The amount to be expended under this agreement shall not exceed \$400,000.00.

EXPLANATION

This contract is **retroactive** due to the time it took to obtain the necessary documents from the vendor. Three (3) different vendors were selected to perform these specific engineering services, with each project being funded from accounts specific to each particular project. The majority of projects needing this type of work are maintenance/repair and Capital Budget projects. The Department wishes to execute this contract renewal with Tighe & Bond, to continue to expedite the project workload and provide appropriate technical expertise as required for specific future projects. The contract has effectively enabled the Department to respond quickly to unscheduled project requests and possible architectural and building issues.

The request for qualifications used to identify the chosen vendor(s) and the selection process utilized by the Department for this project is in accordance with RSA 21-I:22, "*Selection of Engineers, Architects and Surveyors*", as many of the projects need a professional engineering or surveying stamp to be legally sufficient. The Department negotiated with the vendor(s) to establish the rates of compensation. The rates were compared with New Hampshire Bureau of Public Works contracts for these services and a number of Federal Government General Services Administration contracts. The Adjutant General's Department determined that the negotiated rates are fair and reasonable. The Request for Qualifications was advertised with an initial base contract period with the option for two (2) one-year renewal periods subject to the agreement of both parties and the additional Governor and Council approval of such contract renewal(s).

His Excellency Governor Christopher T. Sununu
And the Honorable Executive Council

and the Honorable Council
State House

REQUESTED ACTION

Authorize The Adjutant General's Department to enter into a contract agreement with Tighe & Bond, Inc. (vendor code #223259), 53 Southampton Road, Westfield, MA 01085, for Professional Civil/Environmental Engineering & Master Planning Services for planning and design of various projects as necessary and required by the Department. The contract period is from July 1, 2015 through June 30, 2017. The amount to be expended under this agreement shall not exceed \$400,000.00.

EXPLANATION

Three (3) different vendors have been selected to perform these contract services, and each project will be funded from accounts specific to each particular project. The majority of projects needing this type of work are maintenance/repair and Capital Budget projects.

The Department proposes to retain the firm of Tighe & Bond, Inc. to expedite the project workload and provide appropriate technical expertise as required for specific future projects. This contract will enable the Department to respond quickly to unscheduled project requests and possible emergencies regarding engineering and surveying issues. The decision as to which projects will be assigned will be made on a case-by-case basis, depending on the particular expertise required and the firm's current workload.

The request for qualifications used to identify the chosen vendor(s) and the selection process utilized by the Department for this project is in accordance with RSA 21-I:22, "Selection of Engineers, Architects and Surveyors", as many of these projects will need to have a professional engineering or surveying stamp to be legally sufficient.

A rating panel made up of employees from The Adjutant General's Department and the New Hampshire Army National Guard was formed and tasked with rating the proposals submitted. The rating panel members all brought different strengths and knowledge to the table which allowed for independent evaluation during the scoring process, thorough discussion, and weighing the different perspectives during the final rating process.

A Legal Notice was published in the New Hampshire Union Leader newspaper and on the Public Notices web site seeking Requests for Proposals (Letters of Intent) to provide these services. The bid transmittal letter noted that more than one firm may be selected to perform these services. Sixteen (16) vendors submitted letters of interest and eight (8) firms submitted Qualification Packets. Those eight (8) packets were all rated by the panel based on clarity of proposal, comprehension of assignment, work history with similar projects, capacity to do work in a timely manner, quality and experience of project managers and team members, overall suitability to the assignment, quality assurance protocols, and letters of reference.

The eight (8) firms with the highest rated scores were chosen to come in to make a comprehensive oral presentation to the rating panel addressing each of the specific topic areas on the rating checklist. Three (3) firms were subsequently chosen as the finalists based on the total combined score from their initial rating and the oral presentation score. The references provided by these three (3) vendors were then contacted to validate information provided, and the three (3) finalists were confirmed as selected.

The Adjutant General's Department negotiated with the vendor(s) to establish the rates of compensation. The rates were compared with recent New Hampshire Bureau of Public Works contracts for engineering services and a number of Federal Government General Services Administration Engineering and Environmental contracts. The Adjutant General's Department determined that the negotiated rates are fair and reasonable. The Request for Qualifications was advertised with an initial base contract period of two (2) years with the option for two (2) one-year renewal periods subject to the agreement of both parties and additional Governor and Council approval of such contract renewal(s).

A rating summary of Tighe & Bond, Inc. is attached, along with the rating of all firms who submitted a proposal for these services.

Federal Funds may be used to pay for these contract services and are provided to the State of New Hampshire - Adjutant General's Department by the National Guard Bureau pursuant to a Federal-State Master Cooperative Agreement for the mutual support of the New Hampshire National Guard. The contract agreement has been approved by the New Hampshire Department of Justice as to form, substance and execution.

Your approval is respectfully requested.

Respectfully Submitted,

Bid/Management Summary

The procedures used to identify the three (3) firms chosen followed the requirements pursuant to RSA 21-I: 22, "Selection of Engineers, Architects, and Surveyors."

A solicitation was placed in the Union Leader newspaper seeking Requests for Proposals (RFP)/Letters of Intent. The RFP specified that more than one firm could possibly be chosen to perform these services.

Sixteen (16) firms expressed interest, eight (8) firms submitted Qualification Packets and three (3) firms were chosen to perform these services.

Eight (8) were reviewed individually by a Rating Panel which comprised of four (4) professionals specializing in this discipline (see *Rater's Bios*).

Packets were rated on clarity of proposal, comprehension of assignment, work history with similar projects, capacity to do work in a timely manner, quality and experience of project manager and team, overall suitability for the assignment, and quality assurance protocols.

The Rating Panel then reviewed Qualification Packet Point totals by firm and assigned 1 through 5 points, rated in order of precedence where 5 = 1st choice, 4 = 2nd choice, etc. (see *Scorecard by Points*).

Three (3) firms chosen to perform these services are Jacobs Engineering, VHB, and Tighe & Bond.
