THE STATE OF NEW HAMPSHIRE
DEPARTMENT OF TRANSPORTATION

Victoria F. Sheehan
Commissioner

William Cass, P.E.
Assistant Commissioner

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
State House
Concord, New Hampshire 03301

Bureau of Construction
December 12, 2018

REQUESTED ACTION

1. Authorize the Department of Transportation to enter into a contract with C.L.H. & Son, Inc. (Vendor 153124) of Auburn, ME on the basis of a low bid of \$177,713.80 for culvert rehabilitation carrying un-named streams under NH Route 104 in Alexandria, from the date of Governor and Council approval through August 23, 2019 unless extended by the Department in accordance with the Standard Specifications. 100% Federal Funds.

Funding is available in State Fiscal Year 2019 and is contingent upon the availability and continued appropriation of funds in Fiscal Year 2020 as follows, with the ability to adjust encumbrances through the Budget Office between State Fiscal Years if needed and justified:

Funding is available as follows:	<u>FY 2019</u>	<u>FY 2020</u>
04-96-96-963515-3054		
Consolidated Federal Aid		
400-500870 Highway Contract Payments	\$100,000.00	\$77,713.80

2. Further authorize that a contingency in the amount of \$17,771.38 be approved for payment of latent conditions, which may appear during the construction of the project. The contingency requested is 10% of the contract amount.

Funding is available as follows:	<u>FY 2019</u>	<u>FY 2020</u>
04-96-96-963515-3054		
Consolidated Federal Aid		
400-500870 Highway Contract Payments		\$17,771.38

EXPLANATION

This project is part of the State's Ten Year Transportation Improvement Plan under Culvert Replacement Rehabilitation and Drainage Repair Program (CRDR). The project will rehabilitate two existing corrugated aluminum culverts carrying un-named streams under NH Route 104 in Alexandria. Location 1 is a 60" diameter x 128' long culvert located 850' east of Bog Road. Location 2 is a 66" diameter x 86' long culvert located 275' west of Karl Gordon/Berry Road. The two locations are about 1,850' apart. The proposed treatment for both culverts is slip lining with a corrugated metal liner. Incidental work includes repair of headwalls and placement of stone aprons at inlets and outlets.

Page 2

The purpose of this project is culvert rehabilitation. The subject culverts are corrugated aluminum, constructed in 1963. The tops of the pipes are experiencing severe corrosion. Stone headwalls need minor repair.

The proposed contingency amount is 10% of the contract amount. This is to account for the risks associated with the unknown extent of headwall repairs, unanticipated traffic control needs, and weather dependent items such as water diversions and erosion control.

The Contractor has been prequalified by this Department. The Contract has been approved by the Attorney General as to form and execution, and the Department has certified that the necessary funds are available and the bid reasonably conforms to the engineer's estimate in accordance with State procedure. Copies of the fully executed contract are on file at the Secretary of State's Office and the Department of Administrative Service's Office, and subsequent to Governor and Council approval will be on file at the Department of Transportation.

This project funding is 80% Federal Funds with 20% state match. Turnpike toll credit is being utilized for match requirements, effectively using 100% Federal Funds.

A copy of the Tabulation of Bids received for this project is attached along with the Contract Supplemental Sheet and a map indicating the location of the project.

Sincerely,

Victoria F. Sheehan
Commissioner

VFS/md

Department Estimate: \$207,870.00

Contract Amount: \$177,713.80

Under Estimate: \$ 30,156.20

SUPPLEMENTAL PROJECT INFORMATION SHEET

DESCRIPTION: The project will rehabilitate two existing corrugated aluminum culverts carrying un-named streams under NH Route 104 in Alexandria. Location 1 is a 60" diameter x 128' long culvert located 850' east of Bog Road. Location 2 is a 66" diameter x 86' long culvert located 275' west of Karl Gordon/Berry Road. The two locations are about 1,850' apart. The proposed treatment for both culverts is slip lining with a corrugated metal liner. Incidental work includes repair of headwalls and placement of stone aprons at inlets and outlets.

FEDERAL FUNDING: 80% (Culvert Replacement/Rehabilitation and Drainage Repair (CRDR)) with anticipated utilization of Turnpike Toll Credits for the State's 20% match.

CONTINGENCY: The proposed contingency amount is 10% of the contract amount. This is to account for the risks associated with the unknown extent of headwall repairs, unanticipated traffic control needs, and weather dependent items such as water diversions and erosion control.

PROJECT INITIATED: State's 10 Year Plan, under the Culvert Replacement/Rehabilitation and Drainage Repair (CRDR) Program

PROJECT EXPLANATION: The purpose of this project is culvert rehabilitation. The subject culverts are corrugated aluminum, constructed in 1963. The tops of the pipes are experiencing severe corrosion. Stone headwalls need minor repair.

TRAFFIC IMPLICATIONS: Daily shoulder closures will be required for access to the culvert inlets and outlets. Lane shifts or lane closures with one-lane, alternating two-way traffic will be allowed for delivery of materials and equipment and during grouting operations. Traffic will be returned to normal operation during non-work hours. Access to the culvert inlets may require removal of short segments of guardrail, during work hours only. Work that impacts traffic will not be allowed on Sundays, Holidays, the day before and after a Holiday, and during special events scheduled by the Town.
