INSTRUCTIONS FOR CERTIFICATION

1. By signing and submitting this proposal (contract), the prospective primary participant is providing the certification set out below.

2. The inability of a person to provide the certification required below will not necessarily result in denial of participation in this covered transaction. If necessary, the prospective participant shall submit an explanation of why it cannot provide the certification. The certification or explanation will be considered in connection with the NH Department of Health and Human Services' (DHHS) determination whether to enter into this transaction. However, failure of the prospective primary participant to furnish a certification or an explanation shall disqualify such person from participation in this transaction.

3. The certification in this clause is a material representation of fact upon which reliance was placed when DHHS determined to enter into this transaction. If it is later determined that the prospective primary participant knowingly rendered an erroneous certification, in addition to other remedies available to the Federal Government, DHHS may terminate this transaction for cause or default.

4. The prospective primary participant shall provide immediate written notice to the DHHS agency to whom this proposal (contract) is submitted if at any time the prospective primary participant learns that its certification was erroneous when submitted or has become erroneous by reason of changed circumstances.

8. A participant in a covered transaction may rely upon a certification of a prospective participant in a lower tier covered transaction that it is not debarred, suspended, ineligible, or involuntarily excluded from the covered transaction, unless it knows that the certification is erroneous. A participant may decide the method and frequency by which it determines the eligibility of its principals. Each participant may, but is not required to, check the Nonprocurement List (of excluded parties).

9. Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render in good faith the certification required by this clause. The knowledge and

information of a participant is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.

10. Except for transactions authorized under paragraph 6 of these instructions, if a participant in a covered transaction knowingly enters into a lower tier covered transaction with a person who is suspended, debarred, ineligible, or voluntarily excluded from participation in this transaction, in addition to other remedies available to the Federal government, DHHS may terminate this transaction for cause or default.

REPORT OF INDEPENDENT CERTIFIED PUBLIC ACCOUNTANTS

To the Board of Directors of
Phoenix Houses of New England, Inc.:

We have audited the accompanying financial statements of Phoenix Houses of New England, Inc. ("PH New England"), which comprise the statements of financial position as of June 30, 2018 and 2017, and the related statements of operations and changes in net assets, and cash flows for the years then ended, and the related notes to the financial statements.

Management's responsibility for the financial statements
Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's responsibility
Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform our audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to PH New England's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of PH New England's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

Grant Thornton

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of PH New England as of June 30, 2018 and 2017, and the results of its operations and changes in net assets and its cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Emphasis of Matter

As further detailed in Note 1 to the accompanying financial statements, PH New England has recurring operating losses. Management's evaluation of the events and conditions and management's plans to mitigate these matters are also described in Note 1. Our opinion is not modified with respect to this matter.

Supplementary Information

Our audits were conducted for the purposes of forming an opinion on the financial statements of PH New England as of and for the years ended June 30, 2018 and 2017, taken as a whole. The supplementary information included on pages 18 and 19 is presented for purposes of additional analysis and is not a required part of the financial statements. Such supplementary information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audits of the financial statements and certain additional procedures. These additional procedures included comparing and reconciling the information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the supplementary information is fairly stated, in all material respects, in relation to the financial statements as a whole.

1. ORGANIZATION

Phoenix Houses of New England, Inc. ("PH New England") is a Section 501(c)(3) not-for-profit organization, exempt from federal income taxes under Section 501(a) of the Internal Revenue Code (the "Code"). PH New England is also exempt from state and local taxes under similar provisions. PH New England was established in order to operate therapeutic treatment centers for the rehabilitation of drug and substance abusers throughout New England.

Through June 30, 2016, Phoenix House Foundation, Inc. was the sole member of PH New England and the following affiliated organizations: Phoenix Houses of New York, Inc. and Affiliates (which consists of Phoenix Houses of New York, Inc. and Phoenix Houses of Long Island, Inc.); Phoenix Houses of California, Inc. and Affiliates (which consists of Phoenix Houses of California, Inc.; Phoenix Houses of Los Angeles, Inc.; Phoenix House Orange County, Inc.; and Phoenix House San Diego, Inc.); Phoenix Houses of the Mid-Atlantic, Inc. and Affiliate (which consists of Phoenix Houses of the Mid-Atlantic, Inc. and Phoenix Houses of Mid-Atlantic Property Management, Inc.); Phoenix Programs of Florida, Inc.; Phoenix Houses of Texas, Inc.; American Council for Drug Education, Inc.; Center on Addiction and the Family, Inc.; and Phoenix Houses of New Jersey, Inc.

On April 11, 2016, a new corporation, named "Phoenix House," was incorporated in the State of Minnesota. Phoenix House is a nonprofit corporation which, effective September 29, 2017, was granted recognition of its federal tax exempt status as an organization described in Internal Revenue Code § 501(c)(3).

As of July 1, 2016, Phoenix House (the "Parent") became the sole corporate member of the following affiliated organizations: Phoenix House Foundation, Inc., Phoenix Houses of California, Inc., Phoenix Houses of New York, Inc., Phoenix Houses of New England, Inc., Phoenix Houses of Texas, Inc., Phoenix Programs of Florida, Inc., and Phoenix Houses of the Mid-Atlantic, Inc. Phoenix House Foundation, Inc. remains the sole corporate member of the American Council for Drug Education, Inc., Center on Addiction and the Family, Inc., and Phoenix Houses of New Jersey, Inc.

The accompanying 2018 and 2017 financial statements reflect losses from operations totaling $3,694,972 and $116,745, respectively. In order to address the operating deficits and ensure the long-term viability of PH New England's program services, management and the Board are evaluating the discontinuation of unprofitable programs and will restructure the remaining programs in order to improve operating margins. Further, subsequent to year-end, the Parent began to undertake a restructuring plan for the Phoenix House organization as a whole. The thrust of the restructuring plan is to right-size the infrastructure and adjust the revenue mix with the principal goal of improving cash flows and ensuring the sustainability of the regional affiliates. During March 2019, the Board of the Parent voted to dissolve the sole corporate member (the Phoenix House parent entity, incorporated in Minnesota). The effect of this dissolution will cause PH New England to become a stand-alone entity, with a self-governing operating board. All amounts owed to Phoenix House Foundation, Inc. ("PH Foundation") by PH New England, as of the dissolution date, have been forgiven. Additionally, during fiscal 2019, PH Foundation made a non-reciprocal transfer of $2 million in cash to PH New England to provide additional liquidity for operations, and PH Foundation will license the "Phoenix House" name and intellectual property to PH New England, at no cost.

Following the effectuation of the dissolution of the sole corporate member, PH Foundation will have no further obligation to support the operations of PH New England.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

The accompanying financial statements have been prepared using the accrual basis of accounting in accordance with accounting principles generally accepted in the United States of America ("US GAAP"). Accordingly, the net assets of PH New England and changes therein are classified and reported based upon the existence or absence of donor-imposed restrictions as follows:

- Unrestricted net assets represent expendable resources that are used to carry out PH New England's operations and are not subject to donor-imposed stipulations.
- Temporarily restricted net assets represent resources that contain donor-imposed restrictions that permit PH New England to use or expend such resources only as or when specified. Restrictions are satisfied either by the passage of time or by actions of PH New England.
- Permanently restricted net assets contain donor-imposed restrictions that stipulate that such resources be maintained permanently. PH New England had no permanently restricted net assets at June 30, 2018 and 2017.

Cash and Cash Equivalents

PH New England considers all highly liquid financial instruments, which principally consist of money market funds, with original maturities of three months or less from the date of purchase to be cash equivalents.

Use of Estimates

The preparation of financial statements in conformity with US GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. The allowance for doubtful accounts on receivables, the useful lives assigned to fixed assets and the fair value of donated goods and services represent significant accounting estimates reflected in the accompanying financial statements. Actual results could differ from those estimates.

Donated Goods and Services

Donated goods are recorded as revenues and assets (at fair value when received) and expenses (when used) on the statement of operations and changes in net assets. Food stamps are recorded at face amount, which is the same as fair value, as revenues and assets and are charged to resident sustenance when expended. Donated goods received during the years ended June 30, 2018 and 2017 totaled approximately $145,000 and $189,000, respectively.

PH New England receives contributed legal services that meet the criteria established by US GAAP for recognition as contributions. Such services are recorded as part of donated goods and services on the statement of operations and changes in net assets at fair value. Donated services received during the years ended June 30, 2018 and 2017 approximated $59,000 and $17,000, respectively.

Property and Equipment

Property and equipment are stated at cost, if purchased, or if donated, at fair value at the date of gift, less accumulated depreciation and amortization. PH New England capitalizes assets acquired for greater than $1,000 and with useful lives greater than three years. Depreciation is computed on the straight-line basis over the estimated useful lives of the assets as follows:

Buildings and improvements	4 - 40 years
Furniture, fixtures and equipment	3 - 7 years
Computer equipment and vehicles	3 - 5 years

Furniture, fixtures and equipment acquired under capital lease arrangements are amortized using the straight-line method over the shorter of the lease term or the estimated useful life of the asset.

Statement of Operations and Changes in Net Assets

PH New England's operating income includes all unrestricted revenues and expenses. Other items include depreciation on capital assets funded with government grants and losses on disposals of property and equipment. The statement of operations and changes in net assets also includes the caption "(deficiency in) excess of revenues and support over expenses and other items," which is the performance indicator. Other changes in net assets, which are excluded from the performance indicator, consistent with industry practice, include capital contributions (including assets acquired using contributions which by donor restriction are to be used for the purposes of acquiring such assets).

Revenue and Support

Contributions (including unconditional promises to give) are recorded at fair value when received. Revenues relative to special events are recognized upon occurrence of the respective event. Contributions received with donor stipulations that limit the use of the donated assets are reported as either temporarily or permanently restricted support. Unconditional promises to give, with payments due in future years, are reported as either temporarily restricted or permanently restricted support and discounted to present value. When a donor restriction expires, that is, when a time restriction ends or purpose restriction is fulfilled, temporarily restricted net assets are reclassified to unrestricted net assets and reported on the statement of operations and changes in net assets as net assets released from restrictions. Contributions restricted by donors for the acquisition of property and equipment are released from their restrictions when the respective assets are acquired or constructed and placed into service. Such contributions and related releases are reported below the performance indicator. There were contributions of approximately $10,000 and $77,000 restricted by donors for the acquisition of property and equipment received during the years ended June 30, 2018 and 2017, respectively.

Special Events Revenue

Special events revenue consists of proceeds from fundraising events, reported net of direct donor benefits, if any. Revenue and related expenses are recognized upon occurrence of the respective event to which they pertain. For the years ended June 30, 2018 and 2017, direct benefits to donors totaled approximately $1,300 and $23,000, respectively.

Government Contract Revenue

PH New England's contracts and other program funding arrangements with government agencies are classified as part of operating activities within the unrestricted net asset category and revenue is recognized when earned. PH New England operates under various contracts with government agencies which generally cover a one-year period, subject to annual renewal. The terms of these contracts allow the grantors the right to audit the costs incurred thereunder and adjust contract funding based upon, among other things, the amount of program income received. Any costs disallowed by the grantor would be absorbed by PH New England and any adjustments by grantors would be recorded when amounts are known; however, it is the opinion of management that disallowances, if any, would not be material to the accompanying financial statements.

Client and Third-Party Revenue

Inpatient and outpatient services rendered to Medicaid program beneficiaries are reimbursed based on pre-determined rates. Medicaid and managed Medicaid approximated 81% and 73% of total client and third-party revenue for the years ended June 30, 2018 and 2017, respectively. Contracts have been entered into with commercial insurance carriers and reimbursement is based on contracted rates.

Laws and regulations governing healthcare programs are complex and subject to interpretation. As a result, there is at least a reasonable possibility that recorded estimates will change by a material amount in the near-term. Noncompliance with such laws and regulations could result in fines, penalties, and exclusion from such programs. The federal government and many states have aggressively increased enforcement under Medicaid antifraud and abuse legislation. PH New England believes that it is in compliance, in all material respects, with all applicable laws and regulations and, is not aware of any pending or threatened investigations involving allegations of potential wrongdoing. While no such regulatory inquires have been made, compliance with such laws and regulations can be subject to future government review and interpretation.

Noncompliance with such laws and regulations could result in repayments of amounts improperly reimbursed, substantial monetary fines, civil and criminal penalties and exclusion from the Medicaid program.

Concentration of Credit Risk

Financial instruments that potentially subject PH New England to concentrations of credit risk consist principally of cash and cash equivalents. PH New England maintains its cash and cash equivalents in various bank deposit accounts that, at times, may exceed federally insured limits. PH New England's cash and cash equivalents have been placed with high credit quality financial institutions at June 30, 2018 and 2017, and PH New England believes the risk of nonperformance by these financial institutions to be remote.

PH New England provides drug and alcohol rehabilitation services through its inpatient and outpatient care facilities. PH New England grants credit without collateral to clients, however, it routinely obtains assignment of (or is otherwise entitled to receive) clients' benefits payable under their respective health insurance programs, plans, or policies (e.g., Medicaid and commercial insurance providers).

Amounts due from government agencies and other receivables by financial class as a percentage of total accounts receivable at June 30, 2018 and 2017, are as follows:

	2018	2017
Medicaid/Managed Medicaid	35 %	27 %
Commercial insurance	16	43
Other third-party payors	49	30
	100 %	100 %

Income Taxes

PH New England follows guidance that clarifies the accounting for uncertainty in tax positions taken or expected to be taken in a tax return, including issues relating to financial statement recognition and measurement. This guidance provides that the tax effects from an uncertain tax position can only be recognized in the financial statements if the position is "more-likely-than-not" to be sustained if the position were to be challenged by a taxing authority. The assessment of the tax position is based solely on the technical merits of the position, without regard to the likelihood that the tax position may be challenged.

PH New England is exempt from federal income tax under IRC Section 501(c)(3), though it is subject to tax on income unrelated to its exempt purpose, unless that income is otherwise excluded by the Code. PH New England has processes presently in place to ensure the maintenance of its tax-exempt status; to identify and report unrelated income; to determine its filing and tax obligations in jurisdictions for which it has nexus; and to identify and evaluate other matters that may be considered tax positions. PH New England has determined that there are no material uncertain tax positions that require recognition or disclosure in the accompanying financial statements.

Subsequent Events

PH New England evaluated its subsequent events through May 3, 2019, the date these financial statements were available to be issued, and determined that there are no matters to report, other than the matters described in Notes 1 and 3.

3. RELATED PARTY TRANSACTIONS

PH New England is charged for administrative services provided by its Parent based upon a cost allocation plan. The administrative expenses charged by the Parent approximate the federally approved indirect cost rate for the Parent and its affiliates on a consolidated basis, adjusted to reflect PH New England's own administrative expenses. For the years ended June 30, 2018 and 2017, such allocated charges totaled approximately $1,711,000 and $1,117,000, respectively, and are included as part of administrative charges from Parent on the accompanying statements of operations and changes in net assets.

The Parent has adopted a cash management strategy with the principal goal of pooling its cash balances with those of its affiliates to maximize returns and reduce short-term borrowings and to pay for certain costs on behalf of the respective affiliates on a reimbursable basis. As a result of this strategy, certain affiliates participating in the cash management program will have corresponding amounts due to (from) the Parent as

of the reporting date. Amounts reflected as due to Parent on the accompanying statements of financial position of approximately $5,353,000 and $3,228,000 as of June 30, 2018 and 2017, respectively, relate to costs incurred by PH New England, but paid for by the Parent. Subsequent to June 30, 2018, the Parent forgave all amounts due from PH New England, as more fully described in Note 1.

4. CONTRIBUTIONS RECEIVABLE

At June 30, 2018 and 2017, contributions receivable consist of unconditional promises to give of approximately $9,000 and $47,000, respectively, which are expected to be collected within one year.

Multi-year pledges received are recorded at the present value of their expected future cash flows using a credit adjusted discount rate which articulates with the collection period of the respective pledge. Discount rates assigned to multi-year pledges in the year of origination are not subsequently revised.

5. NOTES RECEIVABLE

During May 2012, PH New England entered into a lease, with no stated rental payments due, and a promissory agreement with Central Vermont Community Land Trust ("CVCLT"), a non-profit corporation existing under the laws of the State of Vermont. In conjunction with a new program, PH New England agreed to lease a facility from CVCLT for twenty years. As part of the lease agreement, PH New England entered into a non-interest bearing note of $100,000 payable by CVCLT and secured by a mortgage of and security interest in the property in Barre, Vermont. The principal of this note does not bear interest nor will any principal be due at any time during which the lease between PH New England and CVCLT is in effect and for a period beginning on the date of termination of the lease and ending on the last day of the twelfth calendar month after such date. The principal due shall be reduced by $5,000 each year for the initial twenty year term of the lease, beginning with the commencement of the new program, beginning July 1, 2013. In the event the lease is in effect throughout the entire initial 20 year term, the note shall be deemed paid in full upon the conclusion of such term. In the event the lease terminates prior to the conclusion of the initial lease term, then the remaining principal shall be due and payable on the last day of the twelfth full calendar month following termination of the lease. Interest shall begin to accrue on such remaining principal balance beginning on the first day of the first month following the due date at a rate equal to the U.S. Department of the Treasury One Year Treasury Bill Rate in effect on the due date. At June 30, 2018 and 2017, the balance of this note receivable was $75,000 and $80,000, respectively. Use of this facility is received free of charge, however, is cancellable by any party to the lease agreement. Given the immaterial amount of the free rent received, the fair value for the right to use this space has not been quantified and recognized in the accompanying financial statements.

During July 2010, PH New England entered into a lease and promissory agreement with Burlington Housing Authority ("BHA"), a housing authority existing under the laws of the State of Vermont and the City of Burlington. In conjunction with a new program, PH New England agreed to lease a facility from BHA for twenty-five years. As part of the lease agreement, PH New England entered into a non-interest bearing note of $75,000 due and payable by BHA on the last day of the twelfth full calendar month immediately following the termination of the lease. Interest accrues on the principal balance of this note, beginning on the first day of the first month following the due date, at a rate equal to the One Year Treasury Bill rate in effect on that date. At June 30, 2018 and 2017, the balance of this note receivable was $75,000. Total rent expense associated with the lease for this space totaled approximately $50,000 for each of the years ended June 30, 2018 and 2017.

During fiscal 2018, PH New England sold its Ottmar property for $676,000 and terminated its lease of the Quincy property, which entailed the landlord paying PH New England $390,000 for the abandoned furniture, equipment and improvements made to the space. In connection with these sales and disposals, a net loss of approximately $699,000 was recognized and is reflected as loss on disposal of property and equipment on the accompanying 2018 statement of operations and changes in net assets.

7. LONG-TERM DEBT

At June 30, 2018 and 2017, long-term debt consists of the following:

- On May 1, 2007, PH New England entered into a loan agreement with Citizens Bank of Rhode Island in the amount of $146,000 due in 120 monthly installments with a final balloon payment at the end of the term. The interest rate resets in the fifth year of the loan at a rate equal to the then 5-Year Treasury Constant Maturity rate plus an additional one hundred and seventy-five basis points (175) which resulted in a rate of 2.59% effective June 2012 through the term of the loan agreement in April 2017. The proceeds of the loan were used to purchase and renovate a building in Springfield, MA. Amounts due under the mortgage were secured by the property purchased. During the year ended June 30, 2017, the balance of this loan was repaid, in accordance with the terms of the loan agreement.

- On July 18, 2008, PH New England entered into a loan agreement with Citizens Bank of Rhode Island in the amount of $200,000 due in 120 monthly installments with a final balloon payment, including interest amortized over fifteen years at a rate of 6.46%, due in July 2018. On November 25, 2014, a modification was made to the loan agreement changing the interest rate to 3.99% effective November 19, 2014 and remaining fixed at that rate though the maturity date. All other terms and conditions of the Note remain the same. The proceeds of the loan were used to purchase and renovate a building in Holyoke, MA. Amounts due under the mortgage are secured by property in Springfield,

MA. At June 30, 2018 and 2017, the balance of this mortgage payable was approximately $81,000 and $98,000, respectively.

- On October 1, 2014, PH New England entered into a loan agreement with Old Colony Realty, LLC in the amount of $400,000 due in 48 monthly installments. The interest rate is fixed at 9.242%. The proceeds of the loan were used to renovate a building in Quincy, MA. In December 2017, the Quincy location was closed and the remaining loan balance of approximately $105,000 was repaid in January 2018. At June 30, 2017, the balance of this mortgage payable was approximately $150,000.

- On November 25, 2014, PH New England entered into a loan agreement with Citizens Bank of Rhode Island in the amount of $468,000 due in 120 monthly installments with a final balloon payment at the end of the term. The interest rate for years 1-5 is fixed at 3.99%. The interest rate resets in the sixth year of the loan at the Bank's Five Year Cost of Funds plus an additional two hundred and ten basis points (210) effective November 2019 through the term of the loan agreement in April 2024. The proceeds of the loan were used to renovate a building in Quincy, MA. Amounts due under the mortgage are secured by property in Providence, RI. In December 2017, the Quincy location was closed and the remaining loan balance of approximately $418,000 was repaid in January 2018. At June 30, 2017, the balance of this mortgage payable was approximately $426,000.

Litigation

PH New England is contingently liable under various claims which have arisen in the ordinary course of its operations. Charitable Choice statutory provisions of the Public Health Service Act enacted by Congress in 2000 are applicable to the SAPT Block Grant program. If an organization conducts such activities, it must offer them separately, in time or location, from the programs or services for which it receives funds directly from SAMHSA or the relevant State or local government under any applicable program, and participation must be voluntary for the program beneficiaries.

EXPLANATION

Action #1)

Requested Action #1 is **retroactive** because the Department and FIT/NHNH, Inc. were continuing to work on the scope of work and therefore, the contract was not completed in time to place the item on the agenda for the June 20, 2018 Governor and Executive Council meeting. The contract with Greater Nashua Council on Alcoholism and Hope on Haven Hill are being submitted after the release of audit reports to allow for Council review prior to entering into an Agreement, and to add contract monitoring language to address the audit findings. If these actions were not taken retroactively, the result would have been a gap in critical substance use disorder treatment and recovery support services in the State's two largest cities.

The Department requests approval of three (3) agreements. Ten (10) agreements were previously approved by Governor and Executive Council on June 20, 2018 Late Item G. These agreements will allow the Vendors listed to provide an array of Substance Use Disorder Treatment and Recovery Support Services statewide to children and adults with substance use disorders, who have income below 400% of the Federal Poverty level and are residents of New Hampshire or are homeless in New Hampshire. Substance use disorders occur when the use of alcohol and/or drugs causes clinically and functionally significant impairment, such as health problems, disability, and failure to meet major responsibilities at work, school, or home. The existence of a substance use disorder is determined using a clinical evaluation based on Diagnostic and Statistical Manual of Mental Disorders, Fifth Edition criteria.

These Agreements are part of the Department's overall strategy to respond to the opioid epidemic that continues to negatively impact New Hampshire's individuals, families, and communities as well as to respond to other types of substance use disorders. Under the current iteration of these contracts, fifteen (15) vendors are delivering an array of treatment services, including individual and group outpatient, intensive outpatient, partial hospitalization, transitional living, high and low intensity residential, and ambulatory and residential withdrawal management services as well as ancillary recovery support services. While the array of services offered by each vendor varies slightly, together they enrolled 2994 individuals in service groups covered by the contract between May 1, 2017 and April 30, 2018. In 2016 there were 485 drug overdose deaths in New Hampshire with the death toll for 2017 at 428 as of April 20, 2018; however, the 2017 statistics are expected to increase slightly as cases are still pending analysis. This reduction in deaths indicates that the overall strategy including prevention, intervention, treatment, and recovery support services may be having a positive impact.

The Department published a Request for Applications for Substance Use Disorder Treatment and Recovery Support Services (RFA-2019-BDAS-01-SUBST) on the Department of Health and Humans Services website April 20, 2018 through May 10, 2018. The Department received sixteen (16) applications. These proposals were reviewed and scored by a team of individuals with program specific knowledge. The Department selected fourteen applications (two (2) submitted by Grafton County were combined into one contract) to provide these services (See attached Summary Score Sheet).

Some of the Vendors' applications scored lower than anticipated; however, this was largely due to the Vendors providing a limited array of services and not to their experience and/or capacity to provide those services. In addition the Bureau of Drug and Alcohol Services is working with the Bureau of Improvement and Integrity to improve the contract monitoring and quality improvement process as well as taking steps to reposition staff to assist with this.

The Contract includes language to assist pregnant and parenting women by providing interim services if they are on a waitlist; to ensure clients contribute to the cost of services by assessing client income at intake and on a monthly basis; and to ensure care coordination for the clients by assisting them with accessing services or working with a client's existing provider for physical health, behavioral health, medication assisted treatment and peer recovery support services.

The Department will monitor the performance of the Vendors through monthly and quarterly reports, conducting site visits, reviewing client records, and engaging in activities identified in the contract monitoring and quality improvement work referenced above. In addition, the Department is collecting baseline data on access, engagement, clinical appropriateness, retention, completion, and outcomes that will be used to create performance improvement goals in future contracts. Finally, contractor financial health is also being monitored monthly.

All thirteen (13) contracts include language that reserves the right to renew each contract for up to two (2) additional years, subject to the continued availability of funds, satisfactory performance of contracted services and Governor and Executive Council approval.

Should the Governor and Executive Council determine to not authorize this Requested Action #1, the vendors would not have sufficient resources to promote and provide the array of services necessary to provide individuals with substance use disorders the necessary tools to achieve, enhance and sustain recovery.

Action #2)

Requested Action #2 seeks approval to amend ten (10) of the thirteen (13) agreements for the provision of substance use disorder treatment and recovery support services by modifying the scope to reduce the burden on the vendors in meeting contract requirements.

The changes to the contracts include removal of the requirement to continue providing services after the contract price limitation is reached, allowing for assistance to clients enrolling in insurance through the use of referrals to trained community providers, and an easing of supervision requirements that is not expected to negatively impact client care. Corrective action for compliance audits was also included. The changes were also made to the three (3) contracts being put forth in Action #1. These changes are being made as a part of the Department's response to provider's concerns over reimbursement rates with the goal of reducing the gap between the cost of providing services and the rate paid by the Department by reducing the administrative burden associated with service delivery without compromising client care.

These contracts were originally competitively bid.

Should the Governor and Executive Council determine to not authorize this Request Action #2, the gap between the cost of care and reimbursement rates will remain the same, which vendors have indicated may result in having to limit services provided under this contract. In addition, there would not be a requirement of a corrective actions plan should there be an audit which does not allow for a system to assist with improvement in services provided.

Area served: Statewide.

Source of Funds: 55.87% Federal Funds from the United States Department of Health and Human Services, Substance Abuse and Mental Health Services Administration, Substance Abuse Prevention and Treatment Block Grant, CFDA #93.959, Federal Award Identification Number TI010035-14, and 13.97% General Funds and 30.16% Other Funds from the Governor's Commission on Alcohol and Other Drug Abuse Prevention, Intervention and Treatment.

In the event that the Federal Funds become no longer available, General Funds will not be requested to support this program.

Please see attached financial details.

EXPLANATION

The Department requests approval of ten (10) agreements with a combined price limitation of $3,157,927 that will allow the Vendors listed to provide an array of Substance Use Disorder Treatment and Recovery Support Services statewide to children and adults with substance use disorders, who have income below 400% of the Federal Poverty level and are residents of New Hampshire or are homeless in New Hampshire. Substance use disorders occur when the use of alcohol and/or drugs causes clinically and functionally significant impairment, such as health problems, disability, and failure to meet major responsibilities at work, school, or home. The existence of a substance use disorder is

determined using a clinical evaluation based on Diagnostic and Statistical Manual of Mental Disorders, Fifth Edition criteria. Three (3) more agreements will be submitted by the Department at a future Governor and Executive Council meeting.

These Agreements are part of the Department's overall strategy to respond to the opioid epidemic that continues to negatively impact New Hampshire's individuals, families, and communities as well as to respond to other types of substance use disorders. Under the current iteration of these contracts, fifteen (15) vendors are delivering an array of treatment services, including individual and group outpatient, intensive outpatient, partial hospitalization, transitional living, high and low intensity residential, and ambulatory and residential withdrawal management services as well as ancillary recovery support services. While the array of services offered by each vendor varies slightly, together they enrolled 2994 individuals in service groups covered by the contract between May 1, 2017 and April 30, 2018. In 2016 there were 485 drug overdose deaths in New Hampshire with the death toll for 2017 at 428 as of April 20, 2016; however, the 2017 statistics are expected to increase slightly as cases are still pending analysis. This reduction in deaths indicates that the overall strategy including prevention, intervention, treatment, and recovery support services is having a positive impact.

The Department published a Request for Applications for Substance Use Disorder Treatment and Recovery Support Services. (RFA-2018-BDAS-01-SUBST) on the Department of Health and Humans Services website April 20, 2018 through May 10, 2018. The Department received sixteen (16) applications. These proposals were reviewed and scored by a team of individuals with program specific knowledge. The Department selected fourteen applications (two (2) submitted by Grafton County were combined into one contract) to provide these services (See attached Summary Score Sheet).

Some of the Vendors' applications scored lower than anticipated; however, this was largely due to the vendors providing a limited array of services and not to their experience and/or capacity to provide those services. In addition the Bureau of Drug and Alcohol Services is working with the Bureau of Improvement and Integrity to improve the contract monitoring and quality improvement process as well as taking steps to reposition staff to assist with this.

The Contract includes language to assist pregnant and parenting women by providing interim services if they are on a waitlist; to ensure clients contribute to the cost of services by assessing client income at intake and on a monthly basis; and to ensure care coordination for the clients by assisting them with accessing services or working with a client's existing provider for physical health, behavioral health, medication assisted treatment and peer recovery support services.

The Department will monitor the performance of the Vendors through monthly and quarterly reports, conducting site visits, reviewing client records, and engaging in activities identified in the contract monitoring and quality improvement work referenced above. In addition, the Department is collecting baseline data on access, engagement, clinical appropriateness, retention, completion, and outcomes that will be used to create performance improvement goals in future contracts. Finally, contractor financial health is also being monitored monthly.

This contract includes language that reserves the right to renew each contract for up to two (2) additional years, subject to the continued availability of funds, satisfactory performance of contracted services and Governor and Executive Council approval.

Should the Governor and Executive Council determine to not authorize this Request, the vendors would not have sufficient resources to promote and provide the array of services necessary to provide individuals with substance use disorders the necessary tools to achieve, enhance and sustain recovery.

Area served: Statewide.

Source of Funds: 55.87% Federal Funds from the United States Department of Health and Human Services, Substance Abuse and Mental Health Services Administration, Substance Abuse Prevention and Treatment Block Grant, CFDA #93.959, Federal Award Identification Number TI010035-14, and 13.97% General Funds and 30.16% Other Funds from the Governor's Commission on Alcohol and Other Drug Abuse Prevention, Intervention and Treatment.

In the event that the Federal Funds become no longer available, General Funds will not be requested to support this program.

2.8.5.3.3. Transfer/Discharge Criteria C: The patient has demonstrated a lack of capacity due to diagnostic or co-occurring conditions that limit his or her ability to resolve his or her problem(s). Treatment at a qualitatively different level of care or type of service, or discharge from treatment, is therefore indicated; or

INSTRUCTIONS FOR CERTIFICATION

1. By signing and submitting this proposal (contract), the prospective primary participant is providing the certification set out below.

2. The inability of a person to provide the certification required below will not necessarily result in denial of participation in this covered transaction. If necessary, the prospective participant shall submit an explanation of why it cannot provide the certification. The certification or explanation will be considered in connection with the NH Department of Health and Human Services' (DHHS) determination whether to enter into this transaction. However, failure of the prospective primary participant to furnish a certification or an explanation shall disqualify such person from participation in this transaction.

3. The certification in this clause is a material representation of fact upon which reliance was placed when DHHS determined to enter into this transaction. If it is later determined that the prospective primary participant knowingly rendered an erroneous certification, in addition to other remedies available to the Federal Government, DHHS may terminate this transaction for cause or default.

4. The prospective primary participant shall provide immediate written notice to the DHHS agency to whom this proposal (contract) is submitted if at any time the prospective primary participant learns that its certification was erroneous when submitted or has become erroneous by reason of changed circumstances.

5. The terms "covered transaction," "debarred," "suspended," "ineligible," "lower tier covered transaction," "participant," "person," "primary covered transaction," "principal," "proposal," and "voluntarily excluded," as used in this clause, have the meanings set out in the Definitions and Coverage sections of the rules implementing Executive Order 12549: 45 CFR Part 76. See the attached definitions.

6. The prospective primary participant agrees by submitting this proposal (contract) that, should the proposed covered transaction be entered into, it shall not knowingly enter into any lower tier covered transaction with a person who is debarred, suspended, declared ineligible, or voluntarily excluded from participation in this covered transaction, unless authorized by DHHS.

7. The prospective primary participant further agrees by submitting this proposal that it will include the clause titled "Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion - Lower Tier Covered Transactions," provided by DHHS, without modification, in all lower tier covered transactions and in all solicitations for lower tier covered transactions.

8. A participant in a covered transaction may rely upon a certification of a prospective participant in a lower tier covered transaction that it is not debarred, suspended, ineligible, or involuntarily excluded from the covered transaction, unless it knows that the certification is erroneous. A participant may decide the method and frequency by which it determines the eligibility of its principals. Each participant may, but is not required to, check the Nonprocurement List (of excluded parties).

9. Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render in good faith the certification required by this clause. The knowledge and

information of a participant is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.

10. Except for transactions authorized under paragraph 6 of these instructions, if a participant in a covered transaction knowingly enters into a lower tier covered transaction with a person who is suspended, debarred, ineligible, or voluntarily excluded from participation in this transaction, in addition to other remedies available to the Federal government, DHHS may terminate this transaction for cause or default.

and 42 CFR Part 54 and Part 54a, 45 CFR Part 96, Charitable Choice Provisions and Regulations). Charitable Choice statutory provisions of the Public Health Service Act enacted by Congress in 2000 are applicable to the SAPT Block Grant program. No funds provided directly from SAMHSA or the relevant State or local government to organizations participating in applicable programs may be expended for inherently religious activities, such as worship, religious instruction, or proselytization. If an organization conducts such activities, it must offer them separately, in time or location, from the programs or services for which it receives funds directly from SAMHSA or the relevant State or local government under any applicable program, and participation must be voluntary for the program beneficiaries.

INDEPENDENT AUDITOR'S REPORT

To the Board of Directors of
Southeastern New Hampshire
Alcohol & Drug Abuse Services and Affiliate
Dover, New Hampshire

We have audited the accompanying consolidated financial statements of Southeastern New Hampshire Alcohol & Drug Abuse Services and Affiliate (New Hampshire nonprofit organizations), which comprise the consolidated statements of financial position as of June 30, 2018 and 2017, and the related consolidated statements of activities and changes in net assets, functional expenses, and cash flows for the years then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of Southeastern New Hampshire Alcohol & Drug Abuse Services and Affiliate as of June 30, 2018 and 2017, and the changes in its consolidated net assets and its cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Nature of Organization & Activities:

Southeastern New Hampshire Alcohol & Drug Abuse Services (the "Organization"), is a non-profit organization formed under the laws of the State of New Hampshire in 1979, dedicated to helping people recover from addictive disorders thru programs that focus on substance use disorders as chronic, progressive, biological, psychological and social in nature.

Southeastern New Hampshire Alcohol & Drug Abuse Services Foundation (the "Affiliate"), is a non-profit organization formed under the laws of the State of New Hampshire in 2004 for the purpose to raise funds for the Organization.

Note 1 - Summary of Significant Accounting Principles:

A. Method of Accounting

The accompanying consolidated financial statements have been prepared using the accrual basis of accounting, in accordance with accounting principles generally accepted in the United States of America.

B. Consolidation Policy

The consolidated financial statements include the accounts of Southeastern New Hampshire Alcohol & Drug Abuse Services and Southeastern New Hampshire Alcohol & Drug Abuse Services Foundation. All significant intercompany transactions are eliminated in the consolidated financial statements.

The Foundation, due to substantial control by the Organization, is consolidated in these financial statements.

C. Basis of Presentation

The Organization presents the consolidated financial statements following the Not-For-Profit Entities topic of the FASB Accounting Standards Codification with respect to financial statement presentation. Under this topic, the Organization is required to report information regarding its financial position and activities according to the three classes of net assets: unrestricted net assets, temporarily restricted net assets and permanently restricted net assets. In addition, the Organization is required to present a statement of cash flows. The financial statements are presented using the three classes of net assets and are as follows:

Unrestricted Net Assets:
The portion of net assets of a not-for-profit Organization that is neither permanently restricted nor temporarily restricted by donor imposed stipulations.

-Continued on Next Page-

Note 1 - Summary of Significant Accounting Principles - Continued:

C. Basis of Presentation - Continued

Temporarily Restricted Net Assets:
The portion of net assets of a not-for-profit Organization resulting (a) from contributions and other inflows of assets whose use by the Organization is limited by donor-imposed stipulations that either expire by passage of time or can be fulfilled and removed by actions of the Organization pursuant to those stipulations, (b) from other asset enhancements and diminishments subject to the same kinds of stipulations, and (c) for reclassifications to or from other classes of net assets as a consequence of donor-imposed stipulations, their expiration by passage of time, or their fulfillments and removal by actions of the Organization pursuant to those stipulations. The Temporarily Restricted Net Assets at June 30, 2018 and 2017 are $22,539 and $29,000, respectively.

Permanently Restricted Net Assets:
The portion of net assets of a not-for-profit Organization resulting (a) from contributions and other inflows of assets whose use by the Organization is limited by donor-imposed stipulations that neither expire by the passage of time nor can be fulfilled or otherwise removed by actions of the Organizations, (b) from other asset enhancements and diminishments subject to the same kinds of stipulations, and (c) from reclassifications from or to other classes of net assets as a consequence of donor-imposed stipulations. There are no Permanently Restricted Net Assets at June 30, 2018 and 2017.

D. Cash and Cash Equivalents

For purposes of the consolidated statement of cash flows, the Organization considers all highly liquid deposits with maturity of three months or less to be cash and/or cash equivalents.

E. Use of Estimates in the Preparation of Financial Statements

Management uses estimates and assumptions in preparing these consolidated financial statements in accordance with generally accepted accounting principles. Those estimates and assumptions affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities, and the reported revenues and expenses. Actual results could vary from the estimates that were used.

F. Income Taxes

The Organization and the Affiliate is exempt from Federal Income Tax under Section 501(c)(3) of the Internal Revenue Code. There are no state income taxes due to the fact that the State of New Hampshire recognizes Section 501(c)(3) for exemption of organizations that are organized and operated exclusively for religious, charitable, scientific, literary, or educational purposes. The Organization's evaluation on June 30, 2018 revealed no uncertain tax positions that would have a material impact of the financial statements.

-Continued on Next Page-

Note 1 - Summary of Significant Accounting Principles - Continued:

F. Income Taxes

The Organization's information returns are subject to possible examination by the taxing authorities. For federal purposes the returns essentially remain open for possible examination for a period of three years after the respective filing deadlines of those returns.

G. Fixed Assets

Property and equipment are carried at cost and donations of property and equipment are recorded as support at fair value at the time of the gift. Acquisitions of property and equipment in excess of $1,500 that meet the capitalization requirements are capitalized. Depreciation is computed using the straight-line method based on the assets' estimated useful lives. When assets are retired or otherwise disposed of, the cost and related accumulated depreciation are removed from the accounts, and any resulting gain or loss is recognized. The cost of maintenance and repairs is charged to operations as incurred; significant renewals and betterments are capitalized. The breakdown of assets relevant to useful life is as follows:

Description	Method	Life
Furniture and Fixtures	Straight-Line	5-7 years
Equipment	Straight-Line	3-5 years
Buildings and Improvements	Straight-Line	5-39 years

H. Accounts Receivable

Accounts receivable are reported at net realizable value. Net realizable value is equal to the gross amount of receivables less an estimated allowance for uncollectible accounts. The Organization determines an allowance for doubtful accounts based on historical experience and assessment and review of subsequent collections. The balance for allowance for doubtful accounts at June 30, 2018 and 2017 is $25,654 and $29,000, respectively.

I. Donor-Restricted Contributions

The Organization's policy is to report donor-restricted contributions whose restrictions are met in the same reporting period, as unrestricted support, as there is no effect to reported restricted net assets.

J. Advertising

The Organization follows the policy of charging the costs of advertising to expense as they are incurred. Advertising expenses were $ 8,568 and $4,172 for the year ended June 30, 2018 and 2017.

-Continued on Next Page-

Note 1 - Summary of Significant Accounting Principles - Continued:

K. Functional Allocation of Expenses

The costs of the Organization's programs and supporting services have been reported on a functional basis in the Statement of Functional Expenses. Expenses are charged to each program based on direct expenses incurred. Any program expenses not directly chargeable to a program are allocated based on prescribed indirect cost allocation.

Note 2 – Capital Lease:

The Organization leased two copiers with a total value of $21,250 under a five year noncancelable lease. The minimum lease payments are schedule to be $620 per month at 24.70%. The future minimum lease payments at June 30, 2018 are as follows:

The minimum lease payments were $4,659 and $4,483 per month, for the years ended June 30, 2018 and 2017, respectively. The rent payments are adjusted per the percentage increase of the consumer price index (CPI) in the Boston Area as of January 1 of those years, and on such other terms and conditions as the parties may agree. Rent expense for the year ended June 30, 2018 and 2017 was $61,153 and $64,582. The future minimum lease payments at June 30, 2018 are as follows:

Note 4 – Concentration of Credit Risk – Cash in Bank:

The Organization maintains its bank accounts with commercial banks, which could at times exceed federally insured limits. Management considers this risk minimal.

Note 5 – Concentration of Revenues and Support Sources:

The Organization's primary sources of revenues are grants for prevention and treatment of substance abuse. Revenue is recognized as earned under the terms of the grant contract. Other support originates from charges for private services performed for citizens of New Hampshire and miscellaneous income and grants.

Note 6 – Contributions:

Donated materials, equipment and essential services are reflected as contributions in the accompanying financial statements at fair market value, at the date of the donation. The Organization also adopted a policy to record an in-kind donation for food procured at a below market rate from another non-profit organization. These transactions have been recorded as follows.

	2018	2017
Donated rent, materials, equipment and food	$ 13,577	$ 11,333

Note 7 – Deferred Revenue:

Revenues received in advance are recorded as deferred revenue and recognized as revenue in the period in which the related services are provided or costs are incurred. The balance at June 30, 2018 and 2017 is $3,640 and $55,250, respectively.

Note 8 – Line of Credit:

The Organization has a revolving line of credit with a bank in the amount of $50,000. The line requires monthly interest payments on the unpaid principal balance at the rate of 1.5% over the bank's stated rate. The line of credit is secures by a security interest in all business assets. At June 30, 2018 and 2017, the outstanding balances were $25,000 and $-0- on the line.

Note 9 – Compensated Absences:

Compensated absences are granted based on a vesting schedule of time of employment and employment status. The amount at June 30, 2018 and 2017 totaled $41,035 and $48,491.

-Continued on Next Page-

Note 10 – Employee Retirement Plan:

All employees of the Organization who have completed minimum service requirements are eligible to participate in the tax sheltered annuity plan qualified under section 403(b) of the Internal Revenue Code. Participants in the Plan are eligible to contribute amounts up to the maximum allowed by law on an annual basis. In addition, the Organization may make non-elective contributions as defined by the plan. Plan expenses for the year ending June 30, 2018 and 2017 were $18,828 and $24,010, respectively.

Note 11 – Going Concern:

Substantial Doubt Alleviated

As shown in the accompanying consolidated financial statements, the Organization incurred a net loss $200,488 and $180,176 for the years ending June 30, 2018 and 2017, and as of those dates, has seen a large decrease in cash funds and increase in receivables that have had to be written off as third party payers are not obligated to pay the entire amount of services rendered. Those factors, as well as the uncertain conditions of future funding from third party payers and the subsequent closure of the ARC program, create uncertainty about the Company's ability to continue as a going concern. Management of the Organization has evaluated these conditions and determined that a reduction in staff and closure of the ARC Program to focus maximizing capacity with the Turning Point Program, combined with new management since the beginning of the fiscal year, would alleviate this uncertainty.

Note 12 – Reclassifications:

Certain reclassifications have been made to the 2018 consolidated financial statement presentations to correspond to the current year's format. Total net assets and changes in net assets are unchanged due to these reclassifications.

Note 13 – Subsequent Events:

The Organization has evaluated subsequent events thru October 22, 2018, which is the date the financial statements were available to be issued, for possible recognition or disclosure in the financial statements. As of August 16, 2018, the Organization closed the ARC Program.

Please see attached financial details.

EXPLANATION

This request is **sole source** because the increase to the price limitation for eight (8) vendor exceeds ten (10) percent of the total contract value.

Substance use disorders develop when the use of alcohol and/or drugs causes clinically and functionally significant impairment, such as health problems, disability, and failure to meet

major responsibilities at work, school, or home. The existence of a substance use disorder is determined using a clinical evaluation based on Diagnostic and Statistical Manual of Mental Disorders, Fifth Edition criteria.

This amendment will allow the above eight (8) vendors listed above in bold to continue and potentially expand access to residential treatment services provided to Medicaid-covered individuals with opioid use disorder (OUD). Funds in this amendment will be used to cover $100 of room and board payments for Medicaid beneficiaries with OUD in low and high intensity residential treatment services. These funds will support existing residential programs to continue serving the Medicaid population, which has been cited as a challenge by treatment providers as a result of differing rates of reimbursement between Medicaid and Commercial payers. The vendors above will also continue to offer their existing array of treatment services, including individual and group outpatient, intensive outpatient, partial hospitalization, transitional living, high and low intensity residential services.

This amendment is part of the State's recently approved plan under the State Opioid Response (SOR) grant, which identified access to residential treatment as a funding priority. The Substance Abuse and Mental Health Services Administration (SAMHSA) approved NH's proposal in September, with the expectation that funds are in services for communities within the third month of grant award. The eight (8) vendors above will use these funds to ensure that individuals with OUD receiving high or low intensity residential treatment have continued and/or expanded access to the necessary level of care, which increases their ability to achieve and maintain recovery.

Additionally, the Department will continue to monitor the performance of the Vendors through monthly and quarterly reports, conducting site visits, reviewing client records, and engaging in activities identified in the contract monitoring and quality improvement work referenced above. Contractor financial health is also being monitored monthly.

Should the Governor and Executive Council not authorize this request residential treatment programs may have to limit the availability of beds for individuals with OUD on Medicaid, which would delay access to care for those individuals.

Area served: Statewide.

EXPLANATION

Action #1)

Requested Action #1 is **retroactive** because the Department and FIT/NHNH, Inc. were continuing to work on the scope of work and therefore, the contract was not completed in time to place the item on the agenda for the June 20, 2018 Governor and Executive Council meeting. The contract with Greater Nashua Council on Alcoholism and Hope on Haven Hill are being submitted after the release of audit reports to allow for Council review prior to entering into an Agreement, and to add contract monitoring language to address the audit findings. If these actions were not taken retroactively, the result would have been a gap in critical substance use disorder treatment and recovery support services in the State's two largest cities.

The Department requests approval of three (3) agreements. Ten (10) agreements were previously approved by Governor and Executive Council on June 20, 2018 Late Item G. These agreements will allow the Vendors listed to provide an array of Substance Use Disorder Treatment and Recovery Support Services statewide to children and adults with substance use disorders, who have income below 400% of the Federal Poverty level and are residents of New Hampshire or are homeless in New Hampshire. Substance use disorders occur when the use of alcohol and/or drugs causes clinically and functionally significant impairment, such as health problems, disability, and failure to meet major responsibilities at work, school, or home. The existence of a substance use disorder is determined using a clinical evaluation based on Diagnostic and Statistical Manual of Mental Disorders, Fifth Edition criteria.

These Agreements are part of the Department's overall strategy to respond to the opioid epidemic that continues to negatively impact New Hampshire's individuals, families, and communities as well as to respond to other types of substance use disorders. Under the current iteration of these contracts, fifteen (15) vendors are delivering an array of treatment services, including individual and group outpatient, intensive outpatient, partial hospitalization, transitional living, high and low intensity residential, and ambulatory and residential withdrawal management services as well as ancillary recovery support services. While the array of services offered by each vendor varies slightly, together they enrolled 2994 individuals in service groups covered by the contract between May 1, 2017 and April 30, 2018. In 2016 there were 485 drug overdose deaths in New Hampshire with the death toll for 2017 at 428 as of April 20, 2018; however, the 2017 statistics are expected to increase slightly as cases are still pending analysis. This reduction in deaths indicates that the overall strategy including prevention, intervention, treatment, and recovery support services may be having a positive impact.

The Department published a Request for Applications for Substance Use Disorder Treatment and Recovery Support Services (RFA-2019-BDAS-01-SUBST) on the Department of Health and Humans Services website April 20, 2018 through May 10, 2018. The Department received sixteen (16) applications. These proposals were reviewed and scored by a team of individuals with program specific knowledge. The Department selected fourteen applications (two (2) submitted by Grafton County were combined into one contract) to provide these services (See attached Summary Score Sheet).

Some of the Vendors' applications scored lower than anticipated; however, this was largely due to the Vendors providing a limited array of services and not to their experience and/or capacity to provide those services. In addition the Bureau of Drug and Alcohol Services is working with the Bureau of Improvement and Integrity to improve the contract monitoring and quality improvement process as well as taking steps to reposition staff to assist with this.

The Contract includes language to assist pregnant and parenting women by providing interim services if they are on a waitlist; to ensure clients contribute to the cost of services by assessing client income at intake and on a monthly basis; and to ensure care coordination for the clients by assisting them with accessing services or working with a client's existing provider for physical health, behavioral health, medication assisted treatment and peer recovery support services.

The Department will monitor the performance of the Vendors through monthly and quarterly reports, conducting site visits, reviewing client records, and engaging in activities identified in the contract monitoring and quality improvement work referenced above. In addition, the Department is collecting baseline data on access, engagement, clinical appropriateness, retention, completion, and outcomes that will be used to create performance improvement goals in future contracts. Finally, contractor financial health is also being monitored monthly.

All thirteen (13) contracts include language that reserves the right to renew each contract for up to two (2) additional years, subject to the continued availability of funds, satisfactory performance of contracted services and Governor and Executive Council approval.

Should the Governor and Executive Council determine to not authorize this Requested Action #1, the vendors would not have sufficient resources to promote and provide the array of services necessary to provide individuals with substance use disorders the necessary tools to achieve, enhance and sustain recovery.

Action #2)

Requested Action #2 seeks approval to amend ten (10) of the thirteen (13) agreements for the provision of substance use disorder treatment and recovery support services by modifying the scope to reduce the burden on the vendors in meeting contract requirements.

The changes to the contracts include removal of the requirement to continue providing services after the contract price limitation is reached, allowing for assistance to clients enrolling in insurance through the use of referrals to trained community providers, and an easing of supervision requirements that is not expected to negatively impact client care. Corrective action for compliance audits was also included. The changes were also made to the three (3) contracts being put forth in Action #1. These changes are being made as a part of the Department's response to provider's concerns over reimbursement rates with the goal of reducing the gap between the cost of providing services and the rate paid by the Department by reducing the administrative burden associated with service delivery without compromising client care.

These contracts were originally competitively bid.

Should the Governor and Executive Council determine to not authorize this Request Action #2, the gap between the cost of care and reimbursement rates will remain the same, which vendors have indicated may result in having to limit services provided under this contract. In addition, there would not be a requirement of a corrective actions plan should there be an audit which does not allow for a system to assist with improvement in services provided.

Area served: Statewide.

Source of Funds: 55.87% Federal Funds from the United States Department of Health and Human Services, Substance Abuse and Mental Health Services Administration, Substance Abuse Prevention and Treatment Block Grant, CFDA #93.959, Federal Award Identification Number TI010035-14, and 13.97% General Funds and 30.16% Other Funds from the Governor's Commission on Alcohol and Other Drug Abuse Prevention, Intervention and Treatment.

In the event that the Federal Funds become no longer available, General Funds will not be requested to support this program.

Please see attached financial details.

EXPLANATION

The Department requests approval of ten (10) agreements with a combined price limitation of $3,157,927 that will allow the Vendors listed to provide an array of Substance Use Disorder Treatment and Recovery Support Services statewide to children and adults with substance use disorders, who have income below 400% of the Federal Poverty level and are residents of New Hampshire or are homeless in New Hampshire. Substance use disorders occur when the use of alcohol and/or drugs causes clinically and functionally significant impairment, such as health problems, disability, and failure to meet major responsibilities at work, school, or home. The existence of a substance use disorder is

determined using a clinical evaluation based on Diagnostic and Statistical Manual of Mental Disorders, Fifth Edition criteria. Three (3) more agreements will be submitted by the Department at a future Governor and Executive Council meeting.

These Agreements are part of the Department's overall strategy to respond to the opioid epidemic that continues to negatively impact New Hampshire's individuals, families, and communities as well as to respond to other types of substance use disorders. Under the current iteration of these contracts, fifteen (15) vendors are delivering an array of treatment services, including individual and group outpatient, intensive outpatient, partial hospitalization, transitional living, high and low intensity residential, and ambulatory and residential withdrawal management services as well as ancillary recovery support services. While the array of services offered by each vendor varies slightly, together they enrolled 2994 individuals in service groups covered by the contract between May 1, 2017 and April 30, 2018. In 2016 there were 485 drug overdose deaths in New Hampshire with the death toll for 2017 at 428 as of April 20, 2016; however, the 2017 statistics are expected to increase slightly as cases are still pending analysis. This reduction in deaths indicates that the overall strategy including prevention, intervention, treatment, and recovery support services is having a positive impact.

The Department published a Request for Applications for Substance Use Disorder Treatment and Recovery Support Services (RFA-2018-BDAS-01-SUBST) on the Department of Health and Humans Services website April 20, 2018 through May 10, 2018. The Department received sixteen (16) applications. These proposals were reviewed and scored by a team of individuals with program specific knowledge. The Department selected fourteen applications (two (2) submitted by Grafton County were combined into one contract) to provide these services (See attached Summary Score Sheet).

Some of the Vendors' applications scored lower than anticipated; however, this was largely due to the vendors providing a limited array of services and not to their experience and/or capacity to provide those services. In addition the Bureau of Drug and Alcohol Services is working with the Bureau of Improvement and Integrity to improve the contract monitoring and quality improvement process as well as taking steps to reposition staff to assist with this.

The Contract includes language to assist pregnant and parenting women by providing interim services if they are on a waitlist; to ensure clients contribute to the cost of services by assessing client income at intake and on a monthly basis; and to ensure care coordination for the clients by assisting them with accessing services or working with a client's existing provider for physical health, behavioral health, medication assisted treatment and peer recovery support services.

The Department will monitor the performance of the Vendors through monthly and quarterly reports, conducting site visits, reviewing client records, and engaging in activities identified in the contract monitoring and quality improvement work referenced above. In addition, the Department is collecting baseline data on access, engagement, clinical appropriateness, retention, completion, and outcomes that will be used to create performance improvement goals in future contracts. Finally, contractor financial health is also being monitored monthly.

This contract includes language that reserves the right to renew each contract for up to two (2) additional years, subject to the continued availability of funds, satisfactory performance of contracted services and Governor and Executive Council approval.

Should the Governor and Executive Council determine to not authorize this Request, the vendors would not have sufficient resources to promote and provide the array of services necessary to provide individuals with substance use disorders the necessary tools to achieve, enhance and sustain recovery.

Area served: Statewide.

Source of Funds: 55.87% Federal Funds from the United States Department of Health and Human Services, Substance Abuse and Mental Health Services Administration, Substance Abuse Prevention and Treatment Block Grant, CFDA #93.959, Federal Award Identification Number TI010035-14, and 13.97% General Funds and 30.16% Other Funds from the Governor's Commission on Alcohol and Other Drug Abuse Prevention, Intervention and Treatment.

In the event that the Federal Funds become no longer available, General Funds will not be requested to support this program.

9.3 Confidentiality of data shall be governed by N.H. RSA chapter 91-A or other existing law. Disclosure of data requires prior written approval of the State.

10. TERMINATION. In the event of an early termination of this Agreement for any reason other than the completion of the Services, the Contractor shall deliver to the Contracting Officer, not later than fifteen (15) days after the date of termination, a report ("Termination Report") describing in detail all Services performed, and the contract price earned, to and including the date of termination. The form, subject matter, content, and number of copies of the Termination Report shall be identical to those of any Final Report described in the attached EXHIBIT A.

11. CONTRACTOR'S RELATION TO THE STATE. In the performance of this Agreement the Contractor is in all respects an independent contractor, and is neither an agent nor an employee of the State. Neither the Contractor nor any of its officers, employees, agents or members shall have authority to bind the State or receive any benefits, workers' compensation or other emoluments provided by the State to its employees.

12. ASSIGNMENT/DELEGATION/SUBCONTRACTS.
The Contractor shall not assign, or otherwise transfer any interest in this Agreement without the prior written notice and consent of the State. None of the Services shall be subcontracted by the Contractor without the prior written notice and consent of the State.

13. INDEMNIFICATION. The Contractor shall defend, indemnify and hold harmless the State, its officers and employees, from and against any and all losses suffered by the State, its officers and employees, and any and all claims, liabilities or penalties asserted against the State, its officers and employees, by or on behalf of any person, on account of, based or resulting from, arising out of (or which may be claimed to arise out of) the acts or omissions of the Contractor. Notwithstanding the foregoing, nothing herein contained shall be deemed to constitute a waiver of the sovereign immunity of the State, which immunity is hereby reserved to the State. different level of care or type of service, or discharge from treatment, is therefore indicated; or

INSTRUCTIONS FOR CERTIFICATION

1. By signing and submitting this proposal (contract), the prospective primary participant is providing the certification set out below.

2. The inability of a person to provide the certification required below will not necessarily result in denial of participation in this covered transaction. If necessary, the prospective participant shall submit an explanation of why it cannot provide the certification. The certification or explanation will be considered in connection with the NH Department of Health and Human Services' (DHHS) determination whether to enter into this transaction. However, failure of the prospective primary participant to furnish a certification or an explanation shall disqualify such person from participation in this transaction.

3. The certification in this clause is a material representation of fact upon which reliance was placed when DHHS determined to enter into this transaction. If it is later determined that the prospective primary participant knowingly rendered an erroneous certification, in addition to other remedies available to the Federal Government, DHHS may terminate this transaction for cause or default.

4. The prospective primary participant shall provide immediate written notice to the DHHS agency to whom this proposal (contract) is submitted if at any time the prospective primary participant learns that its certification was erroneous when submitted or has become erroneous by reason of changed circumstances.

The prospective primary participant further agrees by submitting this proposal that it will include the clause titled "Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion - Lower Tier Covered Transactions," provided by DHHS, without modification, in all lower tier covered transactions and in all solicitations for lower tier covered transactions.

8. A participant in a covered transaction may rely upon a certification of a prospective participant in a lower tier covered transaction that it is not debarred, suspended, ineligible, or involuntarily excluded from the covered transaction, unless it knows that the certification is erroneous. A participant may decide the method and frequency by which it determines the eligibility of its principals. Each participant may, but is not required to, check the Nonprocurement List (of excluded parties).

9. Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render in good faith the certification required by this clause. The knowledge and

information of a participant is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.

10. Except for transactions authorized under paragraph 6 of these instructions, if a participant in a covered transaction knowingly enters into a lower tier covered transaction with a person who is suspended, debarred, ineligible, or voluntarily excluded from participation in this transaction, in addition to other remedies available to the Federal government, DHHS may terminate this transaction for cause or default.

      3.1.1. Services covered by any New Hampshire Medicaid programs for clients who are eligible for New Hampshire Medicaid

      3.1.2. Services covered by Medicare for clients who are eligible for Medicare

   3.3. Payments may be withheld until the Contractor submits accurate required monthly and quarterly reporting.

   3.4. Notwithstanding Section 3.1 above, when payment of the deductible or copay would constitute a financial hardship for the client, the Contractor must seek reimbursement from the State for that deductible based on the sliding fee scale and not to exceed $4,000 per client per treatment episode.

3.4.1. For the purposes of this section, financial hardship is defined as the client's monthly household income being less than the deductible plus the Federally defined monthly cost of living (COL).

4. The Contractor shall bill and seek reimbursement for actual services delivered by fee for services in Exhibit B-1, Service Fee Table, unless otherwise stated.

4.1. The Contractor agrees the fees for services are all-inclusive contract rates to deliver the services (except for Clinical Evaluation which is an activity that is billed for separately) and are the maximum allowable charge in calculating the amount to charge the Department for services delivered as part of this Agreement (See Section 5 below).

5. Calculating the Amount to Charge the Department Applicable to All Services in Exhibit B-1, Service Fee Table.

5.1. The Contractor shall:

5.1.1. Directly bill and receive payment for services and/or transportation provided under this contract from public and private insurance plans, the clients, and the Department

5.2. The Contractor shall determine and charge accordingly for services provided to an eligible client under this contract, as follows:

Second: Charge the client according to Exhibit B, Amendment #2, Section 6, Sliding Fee Scale, when the Contractor determines or anticipates that the private insurer will not remit payment for the full amount of the Contract Rate in Exhibit B-1, Service Fee Table Third: If, any portion of the Contract Rate in Exhibit B-1, Service Fee Table remains unpaid, after the Contractor charges the client's insurer (if applicable) and the client, the Contractor shall charge the Department the balance (the Contract Rate in Exhibit B-1, Service Fee Table less the amount paid by private insurer and the amount paid by the client).

5.2.3. Third: If, any portion of the Contract Rate in Exhibit B-1 remains unpaid, after the Contractor charges the client's insurer (if applicable) and the client, the Contractor shall charge the Department the balance (the Contract Rate in Exhibit B-1, Service Fee Table less the amount paid by private insurer and the amount paid by the client), unless the client's copay or deductible is charged to the Department in accordance with 3.3 above.

5.3. The Contractor agrees the amount charged to the client shall not exceed the Contract Rate in Exhibit B-1, Service Fee Table multiplied by the corresponding percentage stated in Exhibit B, Amendment #2 Section 6 Sliding Fee Scale for the client's applicable income level.

5.4. The Contractor shall assist clients who are unable to secure financial resources necessary for initial entry into the program by developing payment plans.

5.5. The Contractor shall not deny, delay or discontinue services for enrolled clients who do not pay their fees in Section 5.2.2 above, until after working with the client as in Section 5.4 above, and only when the client fails to pay their fees within thirty (30) days after being informed in writing and counseled regarding financial responsibility and possible sanctions including discharge from treatment.

5.6. The Contractor shall provide to clients, upon request, copies of their financial accounts.

5.7. The Contractor shall not charge the combination of the public or private insurer, the client and the Department an amount greater than the Contract Rate in Exhibit B-1, Service Fee Table.

5.8. In the event of an overpayment wherein the combination of all payments received by the Contractor for a given service exceeds the Contract Rate stated in Exhibit B-1, Service Fee Table, the Contractor shall refund the parties in the reverse order, unless the overpayment was due to insurer, client or Departmental error.

5.9. In instances of payer error, the Contractor shall refund the party who erred, and adjust the charges to the other parties, according to a correct application of the Sliding Fee Schedule.

5.10. In the event of overpayment as a result of billing the Department under this contract when a third party payer would have covered the service, the Contractor must repay the state in an amount and within a timeframe agreed upon between the Contractor and the Department upon identifying the error.

6. Sliding Fee Scale

6.1. The Contractor shall apply the sliding fee scale in accordance with Exhibit B, Amendment #2, Section 5 above.

6.2. The Contractor shall adhere to the sliding fee scale as follows:

Percentage of Client's income of the Federal Poverty Level (FPL)	Percentage of Contract Rate in Exhibit B-1, Service Fee Table to Charge the Client
0%-138%	0%
139% - 149%	8%
150% - 199%	12%
200% - 249%	25%
250% - 299%	40%
300% - 349%	57%
350% - 399%	77%

6.3. The Contractor shall not deny a minor child (under the age of 18) services because of the parent's unwillingness to pay the fee or the minor child's decision to receive confidential services pursuant to RSA 318-B:12-a.

7. Submitting Charges for Payment

7.1. The Contractor shall submit billing through the Website Information Technology System (WITS) for services listed in Exhibit B-1, Service Fee Table. The Contractor shall:

7.1.3. Correct errors, if any, in the encounter notes as identified by the Department no later than seven (7) days after being notified of the errors and notify the Department the notes have been corrected and are ready for review.

7.1.4. Batch and transmit the encounter notes upon Department approval for the billing month.

7.1.5. Submit separate batches for each billing month.

7.2. The Contractor agrees that billing submitted for review after sixty (60) days of the last day of the billing month may be subject to non-payment.

7.3. To the extent possible, the Contractor shall bill for services provided under this contract through WITS. For any services that are unable to be billed through WITS, the contractor shall work with the Department to develop an alternative process for submitting invoices.

8. Funds in this contract may not be used to replace funding for a program already funded from another source.

9. The Contractor will keep detailed records of their activities related to Department funded programs and services.

10. Notwithstanding anything to the contrary herein, the Contractor agrees that funding under this agreement may be withheld, in whole or in part, in the event of non-compliance with any Federal or State law, rule or regulation applicable to the services provided, or if the said services or products have not been satisfactorily completed in accordance with the terms and conditions of this agreement.

11. Contractor will have forty-five (45) days from the end of the contract period to submit to the Department final invoices for payment. Any adjustments made to a prior invoice will need to be accompanied by supporting documentation.

12. Limitations and restrictions of federal Substance Abuse Prevention and Treatment (SAPT) Block Grant funds:

12.1. The Contractor agrees to use the SAPT funds as the payment of last resort.

12.2. The Contractor agrees to the following funding restrictions on SAPT Block Grant expenditures to:

12.2.1. Make cash payments to intended recipients of substance abuse services.

12.2.2. Expend more than the amount of Block Grant funds expended in Federal Fiscal Year 1991 for treatment services provided in penal or correctional institutions of the State.

12.2.3. Use any federal funds provided under this contract for the purpose of conducting testing for the etiologic agent for Human Immunodeficiency Virus (HIV) unless such testing is accompanied by appropriate pre and post-test counseling.

12.2.4. Use any federal funds provided under this contract for the purpose of conducting any form of needle exchange, free needle programs or the distribution of bleach for the cleaning of needles for intravenous drug abusers.

12.3. The Contractor agrees to the Charitable Choice federal statutory provisions as follows:

> Federal Charitable Choice statutory provisions ensure that religious organizations are able to equally compete for Federal substance abuse funding administered by SAMHSA, without impairing the religious character of such organizations and without diminishing the religious freedom of SAMHSA beneficiaries (see 42 USC 300x-65 and 42 CFR Part 54 and Part 54a, 45 CFR Part 96, Charitable Choice Provisions and Regulations). Charitable Choice statutory provisions of the Public Health Service Act enacted by Congress in 2000 are applicable to the SAPT Block Grant program. No funds provided directly from SAMHSA or the relevant State or local government to organizations participating in applicable programs may be expended for inherently religious activities, such as worship, religious instruction, or proselytization. If an organization conducts such activities, it must offer them separately, in time or location, from the programs or services for which it receives funds directly from SAMHSA or the relevant State or local government

under any applicable program, and participation must be voluntary for the program beneficiaries.

INDEPENDENT AUDITOR'S REPORT

Board of Directors
The Community Council of Nashua, NH d/b/a Greater Nashua Mental Health Center

We have audited the accompanying financial statements of The Community Council of Nashua, NH d/b/a Greater Nashua Mental Health Center (the Organization), which comprise the statement of financial position as of June 30, 2018, and the related statements of activities and changes in net assets, functional revenues and expenses and cash flows for the year then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with U.S. generally accepted accounting principles; this includes the design, implementation and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with U.S. generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the Organization as of June 30, 2018, and the changes in its net assets and its cash flows for the year then ended in accordance with U.S. generally accepted accounting principles.

Report on Summarized Comparative Information

We have previously audited the Organization's 2017 financial statements and we expressed an unmodified audit opinion on those audited financial statements in our report dated October 25, 2017. In our opinion, the summarized comparative information presented herein as of and for the year ended June 30, 2017 is consistent, in all material respects, with the audited financial statements from which it has been derived.

1. Summary of Significant Accounting Policies

Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles (U.S. GAAP) requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements. Estimates also affect the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Basis of Presentation

Net assets and revenues, expenses, gains and losses are classified as follows:

Unrestricted net assets - Net assets that are not subject to donor-imposed stipulations, which include board designated funds of $540,065 and $1,503,958 at June 30, 2018 and $42,893 and $1,483,120 at June 30, 2017, included in cash and investments, respectively.

Temporarily restricted net assets - Net assets subject to donor-imposed stipulations that may be or will be met by actions of the Organization and/or the passage of time. When a donor restriction expires, that is, when a stipulated time restriction ends or purpose restriction is accomplished, temporarily restricted net assets are reclassified to unrestricted net assets and reported in the consolidated statement of activities and changes in net assets as net assets released from restrictions.

Permanently restricted net assets - Net assets subject to donor-imposed stipulations that they be maintained permanently by the Organization.

All contributions are considered to be available for unrestricted use unless specifically restricted by the donor. Amounts received that are designated for future periods or restricted by the donor for specific purposes are reported as temporarily restricted or permanently restricted support that increases those net asset classes. When a donor restriction expires, that is, when a stipulated time restriction ends or purpose restriction is accomplished, temporarily restricted net assets are reclassified to unrestricted net assets and reported in the statement of activities and changes in net assets as net assets released from restrictions. The Organization records donor-restricted contributions whose restrictions are met in the same reporting period as unrestricted support in the year of the gift.

The Organization reports contributions of land, buildings or equipment as unrestricted support, unless a donor places explicit restriction on their use. Contributions of cash or other assets that must be used to acquire long-lived assets are reported as temporarily restricted support and reclassified to unrestricted net assets when the assets are acquired and placed in service.

The financial statements include certain prior year summarized comparative information in total, but not by net asset class. Such information does not include sufficient detail to constitute a presentation in conformity with U.S. GAAP. Accordingly, such information should be read in conjunction with the Organization's June 30, 2017 financial statements, from which the summarized information was derived.

Cash and Cash Equivalents

Cash and cash equivalents include highly liquid investments with an original maturity of three months or less, excluding investments.

The Organization has cash deposits in major financial institutions which may exceed federal depository insurance limits. The Organization has not experienced any losses in such accounts. Management believes it is not exposed to any significant risk with respect to these accounts.

Accounts Receivable

Accounts receivable are reduced by an allowance for uncollectible accounts. In evaluating the collectibility of accounts receivable, the Organization monitors the amount of actual cash collected during each month against the Organization's outstanding patient accounts receivable balances, as well as the aging of balances. The Organization analyzes its past history and identifies trends for each of its major payer sources of revenue to estimate the appropriate allowance for uncollectible accounts and provision for bad debts. Management, as well as the Finance Committee of the Organization, regularly reviews the aging and collection rate of major payer sources.

Investments

Investments in marketable securities and debt instruments with readily determined market values are carried at fair value. Fair values are based on quoted market prices, if available, or estimated using quoted market prices for similar securities.

Dividends, interest, net realized and unrealized gains (losses) arising from investments are reported as follows:

- Increases (decreases) in permanently restricted net assets if the terms of the gift require that they be maintained with the corpus of a permanent endowment fund;

- Increases (decreases) in temporarily restricted net assets if the terms of the gift or state law imposes restrictions on the use of the allocated investment income (loss); and

- Increases (decreases) in unrestricted net assets in all other cases.

Property and Equipment

Property and equipment are carried at cost, if purchased, or at estimated fair value at date of donation in the case of gifts, less accumulated depreciation. The Organization's policy is to capitalize assets greater than $5,000, while minor maintenance and repairs are charged to expense as incurred. Depreciation is recorded using the straight-line method over the following estimated lives as follows:

Furniture and equipment	3-10 years
Buildings and improvements	15-50 years
Computer equipment and software	3-10 years
Vehicles	5 years

Functional Allocation of Expenses

The costs of providing various programs and other activities have been summarized on a functional basis in the statements of functional revenues and expenses. Accordingly, certain costs have been allocated among the programs and supporting services benefited. In 2018 the method of allocating expenses by function was revised based on patient service revenue related to medical services by department. In 2017, expenses were allocated based on payroll expense by department.

Estimated Third-Party Liability

The Organization's third-party liability consists of estimated amounts due to Medicaid under capitation contract agreements.

Income Taxes

The Organization is exempt from federal income taxes under Section 501(c)(3) of the Internal Revenue Code. There was no unrelated business income tax incurred by the Organization for the years ended June 30, 2018 and 2017. Management has evaluated the Organization's tax positions and concluded the Organization has maintained its tax-exempt status, does not have any significant unrelated business income and has taken no uncertain tax positions that require adjustment to, or disclosure within, the accompanying financial statements.

Subsequent Events

For purposes of the preparation of these consolidated financial statements in conformity with U.S. GAAP, management has considered transactions or events occurring through October 24, 2018, which is the date that the financial statements were available to be issued.

2. Program Service Fees and Concentrations of Credit Risk

Program service fees are charged at established rates and recognized as services are rendered. Discounts, allowances and other arrangements for services provided at other than established rates are recorded as an offset to program service fees. The State of New Hampshire has implemented payment reform in which certain patients covered under Medicaid were transitioned to coverage under a managed care system. Net revenues from managed care represented approximately 76% and 74% of the Organization's net program service fees for 2018 and 2017, respectively. Net revenues from the Medicaid program accounted for approximately 11% and 17% of the Organization's net program service fees for 2018 and 2017, respectively.

An estimated breakdown of program service fees, net of the provision for bad debt, capitation adjustments and contractual allowances, recognized in 2018 and 2017 from those major sources is as follows:

	2018	2017
Private pay	$ 1,401,634	$ 1,070,603
Commercial insurance	326,938	322,958
Medicaid	1,880,676	2,546,817
Medicare	1,147,556	1,301,991
Other payers	589,739	438,909
Managed care	16,899,789	12,886,961
	22,246,332	18,568,239
Less: Contractual allowances	(4,426,265)	(3,092,460)
Capitation adjustments	(5,990,567)	(3,452,269)
Provision for bad debt	(1,286,950)	(1,106,441)
	(11,703,782)	(7,651,170)
Program service fees, net	$ 10,542,550	$ 10,917,069

The increase in bad debt expense in 2018 as compared to 2017 is primarily due to collection issues relating to self pay patients.

The Organization grants credit without collateral to its patients, most of whom are insured under third-party payer agreements. Following is a summary of gross accounts receivable by funding source as of June 30:

	2018	2017
Private pay	34 %	61 %
Blue Cross/Blue Shield	4	1
Medicaid	31	23
Medicare	15	5
Other	6	3
Managed care	10	7
	100 %	100 %

3. Investments

Investments, which are reported at fair value, consist of the following at June 30:

	2018	2017
Common stocks	$ 554,946	$ 558,516
Equity mutual funds	403,223	718,546
U.S. Treasury bonds	436,769	343,841
Corporate bonds	270,297	24,062
Mortgage backed securities	-	87,951
Corporate bond mutual funds	97,993	-
	$ 1,763,228	$ 1,732,916

The Organization's investments are subject to various risks, such as interest rate, credit and overall market volatility, which may substantially impact the values of investments at any given time.

4. Fair Value of Financial Instruments

Financial Accounting Standards Board Accounting Standards Codification (ASC) Topic 820, *Fair Value Measurement*, defines fair value as the exchange price that would be received to sell an asset or paid to transfer a liability (an exit price) in an orderly transaction between market participants and also establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value.

The fair value hierarchy within ASC Topic 820 distinguishes three levels of inputs that may be utilized when measuring fair value:

Level 1: Quoted prices (unadjusted) for identical assets or liabilities in active markets that the entity has the ability to access as of the measurement date.

Level 2: Significant observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities, quoted prices in markets that are not active, and other inputs that are observable or can be corroborated by observable market data.

Level 3: Significant unobservable inputs that reflect an entity's own assumptions about the assumptions that market participants would use in pricing an asset or liability.

The following table sets forth by level, within the fair value hierarchy, the Organization's assets measured at fair value on a recurring basis as of June 30:

	2018		
	Level 1	**Level 2**	**Total**
Investments			
Common stocks	**$ 554,946**	**$ -**	**$ 554,946**

Mortgage-backed securities	87,951	-	87,951
	$ 1,708,854	$ 24,062	$ 1,732,916

The fair value for Level 2 assets is primarily based on market prices of comparable or underlying securities, interest rates, and credit risk, using the market approach for the Organization's investments.

5. Property and Equipment

Property and equipment consists of the following:

	2018	2017
Land, buildings and improvements	$ 5,028,346	$ 4,983,891

6. Endowment

The Organization's endowment primarily consists of funds established for certain programs provided by the Organization. Its endowment includes both donor-restricted endowment funds and funds designated by the Board of Directors to function as endowments. As required by U.S. GAAP, net assets associated with endowment funds, including funds designated by the Board of Directors to function as endowments, are classified and reported based on the existence or absence of donor-imposed restrictions.

Interpretation of Relevant Law

The Organization has interpreted the State of New Hampshire Uniform Prudent Management of Institutional Funds Act (the Act), which became effective July 1, 2008, as requiring the preservation of the contributed value of the donor-restricted endowment funds absent explicit donor stipulations to the contrary. As a result of this interpretation, the Organization classifies as permanently restricted net assets (1) the original value of gifts donated to the permanent endowment, (2) the original value of subsequent gifts to the permanent endowment, and (3) accumulations to the permanent endowment made in accordance with the direction of the applicable donor gift instrument at the time the accumulation is added to the fund. If the donor-restricted endowment assets earn investment returns beyond the amount necessary to maintain the endowment assets' real value, that excess is available for appropriation and, therefore, classified as temporarily restricted net assets until appropriated by the Board of Trustees for expenditure. Funds designated by the Board of Directors to function as endowments are classified as unrestricted net assets.

In accordance with the Act, the Organization considers the following factors in making a determination to appropriate or accumulate donor-restricted endowment funds:

(1) The duration and preservation of the fund;
(2) The purposes of the Organization and the donor-restricted endowment fund;
(3) General economic conditions;
(4) The possible effect of inflation and deflation;
(5) The expected total return from income and the appreciation of investments;
(6) Other resources of the Organization; and
(7) The investment policies of the Organization.

Return Objectives and Risk Parameters

The Organization has adopted investment policies, approved by the Board of Directors, for endowment assets that attempt to maintain the purchasing power of those endowment assets over the long term. Accordingly, the investment process seeks to achieve an after-cost total real rate of return, including investment income as well as capital appreciation, which exceeds the annual distribution with acceptable levels of risk. Endowment assets are invested in a well-diversified asset mix, which includes equity and debt securities, that is intended to result in a consistent inflation-protected rate of return that has sufficient liquidity to make an annual distribution of accumulated interest and dividend income to be reinvested or used as needed, while growing the funds if possible. Actual returns in any given year may vary from this amount. Investment risk is measured in terms of the total endowment fund; investment assets and allocation between asset classes and strategies are managed to reduce the exposure of the fund to unacceptable levels of risk.

Spending Policy

Currently, the Organization does not have a written spending policy approved by its Board of Directors. Historically, the Organization has appropriated for distribution the accumulated interest and dividend income on the investment funds. The Organization considers the long-term expected return on its investment assets, the nature and duration of the individual endowment funds, many of which must be maintained in perpetuity because of donor restrictions, and the possible effects of inflation.

EMPLOYMENT HISTORY:

President & CEO
Behavioral Health Services North
Plattsburgh, NY — Dates of employment: Mar. '13 - Present

Duties: Responsible for the overall operations of one of the oldest and largest nonprofit organizations in upstate New York, providing a comprehensive array of behavioral health and social support services for clients across the entire age / developmental spectrum. The agency has a staff of approximately180, with an annual budget of over 10 million; serving approximately 8,000 individuals each year through 24 programs across three rural counties.

Results: Led the Board and Staff through a comprehensive strategic planning process in response to a rapidly changing healthcare environment--including the transition to Medicaid managed care and integrated health. New initiatives include: same day client access, maximizing technology to enhance efficiency and effectiveness, a performance management program and other human capital enhancements, significant expansion of new low income housing, bringing primary care into the behavioral health clinic, a new community-based crisis stabilization program, enhancing client access to best practices; along with an expansion of development, marketing and community relations activities. Named to the Steering Committee for the northern New York healthcare delivery system reform initiative: a program initiated by the Governor to promote integrated care, reduce unnecessary hospitalizations, increase best practices, and make recommendations for a successful transition to Medicaid managed care.

Consultant & Interim Director of Development and Community Relations
Visiting Nurse & Hospice of VT and NH
West Lebanon, NH — Dates of employment: Jan.-Sept. 2012

Duties: Brought in to assist the organization with Fund Raising / Development, Marketing and Community Relations initiatives. The agency provides home health care and hospice services to a large, rural population in western New Hampshire and eastern Vermont; with over 200 staff and an annual operating budget of 20 million. The agency had been experiencing declines in referrals as a result of new competition, as well as declines in revenue from development activities (annual appeals, grants, etc.).

Results: Serving as both consultant and interim Director of Development and Community Relations, I worked with the senior leadership and the Board Development Committee to define the problems and formulate solutions. Delivered new marketing and development strategies and plans that were designed to address the issues identified and effectively utilize available resources to accomplish the goals. Achieved the best Spring appeal campaign in five years, more than doubling the income from the previous year's effort. This was a limited term engagement.

CEO **Range Mental Health Center**
Virginia, MN Dates of employment: June '10-Nov. '11

Duties: Responsible for the overall operations of this comprehensive community behavioral health organization that employs 250 staff, with an annual budget of 13 million. The organization offers comprehensive programming for youth through seniors, has both in-patient and outpatient chemical dependency services (including detox), supported housing, community crisis facilities, adult foster homes, partial hospitalization programs, community-based support services for the seriously mentally ill, and family / youth support services in every school district in the area.

Results: Led board and senior management through a strategic planning effort to prepare the agency to thrive in a rapidly changing, healthcare reformed marketplace. Developed new partnerships with primary care and launched an integrated care pilot program that holds the promise of both enhanced client outcomes and improved profit margins. Initiated several business process restructuring efforts to dramatically reduce client wait times, reduce days in A/R, reduce documentation time, and increase service capacity without adding additional staff. Launched several new service lines and opened a community-based crisis facility to meet the acute behavioral health needs of area residents—at roughly a third of the cost of hospital-based services. Left the agency to return to New Hampshire and reunite with family after efforts to sell NH home proved to be unsuccessful in a difficult market.

Executive Director: **Familystrength**
Concord, NH Dates of employment: Jan.'06-May '10

Duties: Responsible for the overall operations of this state-wide private, nonprofit agency that provides intensive home / community-based services for at-risk youth and their families; the agency had a staff of 45 and a budget of 2.5 million. Strong focus on strategic planning, board and middle management development, and restructuring of organizational processes and personnel for optimal agency performance.

Results: The agency went from a deficit of $197,000 in 2005 (prior to my arrival), to a surplus of $228,000 (and additional clients served) at the close of my first year. The agency saw similar increases in 2007 and was on track for another record year in 2008--until the state / national economy took a downturn and referrals were adversely affected. Re-engineered the organization to be more cost effective, competitive in '09; State funding continued to be cut so sought out strategic partnerships and merged the organization with another nonprofit agency that was closely aligned and less dependent upon State funding for future growth and sustainability.

Owner: **The Wellness Center**
Powell, Wyoming Dates of employment: 2004 - 2005

Duties: Private practice providing consulting services to area businesses, schools, hospitals, and other human services related organizations; in addition to conducting individual, couples and family therapy on an outpatient basis.

Executive Director: **Park County Mental Health Center**
Cody, Wyoming — Dates of employment: 1996 – 2004

Duties: Responsible for the overall operations of this private, nonprofit community mental health agency with a staff of 30 and a budget of 2 million. When I arrived, the agency was heavily in debt, attempting to recover from lawsuits, had multiple staffing and recruitment concerns and was facing the very real prospect of having to close its doors. The agency's reputation in the community was poor at best and its ability to accomplish its mission was severely compromised.

Led the organization through a comprehensive strategic planning process and within a relatively short period, the organization more than quadrupled in size, expanded its operating budget / income by almost 500%, established a healthy reserve and best of all—significantly enhanced the mental health of the communities it serves by providing healthcare in a rural environment that is second to none. The agency maintained multiple sites for ease of access, operated a drop-in center for SPMI clients and provided on-site community-based services in area hospitals, schools, nursing homes / senior centers, correctional facilities, etc. Created a community-based acute care option to prevent unnecessary hospitalizations and implemented a mobile crisis program to respond to acute/emergency needs on a county-wide basis.

Results: Development of a comprehensive system of mental health care that encompassed youth through the elderly—utilizing evidenced based models where appropriate.

- Quadrupled the size of organization and the associated revenue
- Oversaw the design and building of multiple facilities
- Oversaw the design and implementation of an integrated computerized client database, clinical records, and accounting/billing system
- Facilitated the integration of mental health care with primary health care systems, educational systems, law enforcement / correctional systems and other community-based social / human service systems.
- Achieved national accreditation (CARF), youth/adult behavioral health care
- Significantly enhanced the agency's community reputation and fiscal viability
- Effectively managed significant growth and change

EXPLANATION

Action #1)

Requested Action #1 is **retroactive** because the Department and FIT/NHNH, Inc. were continuing to work on the scope of work and therefore, the contract was not completed in time to place the item on the agenda for the June 20, 2018 Governor and Executive Council meeting. The contract with Greater Nashua Council on Alcoholism and Hope on Haven Hill are being submitted after the release of audit reports to allow for Council review prior to entering into an Agreement, and to add contract monitoring language to address the audit findings. If these actions were not taken retroactively, the result would have been a gap in critical substance use disorder treatment and recovery support services in the State's two largest cities.

The Department requests approval of three (3) agreements. Ten (10) agreements were previously approved by Governor and Executive Council on June 20, 2018 Late Item G. These agreements will allow the Vendors listed to provide an array of Substance Use Disorder Treatment and Recovery Support Services statewide to children and adults with substance use disorders, who have income below 400% of the Federal Poverty level and are residents of New Hampshire or are homeless in New Hampshire. Substance use disorders occur when the use of alcohol and/or drugs causes clinically and functionally significant impairment, such as health problems, disability, and failure to meet major responsibilities at work, school, or home. The existence of a substance use disorder is determined using a clinical evaluation based on Diagnostic and Statistical Manual of Mental Disorders, Fifth Edition criteria.

These Agreements are part of the Department's overall strategy to respond to the opioid epidemic that continues to negatively impact New Hampshire's individuals, families, and communities as well as to respond to other types of substance use disorders. Under the current iteration of these contracts, fifteen (15) vendors are delivering an array of treatment services, including individual and group outpatient, intensive outpatient, partial hospitalization, transitional living, high and low intensity residential, and ambulatory and residential withdrawal management services as well as ancillary recovery support services. While the array of services offered by each vendor varies slightly, together they enrolled 2994 individuals in service groups covered by the contract between May 1, 2017 and April 30, 2018. In 2016 there were 485 drug overdose deaths in New Hampshire with the death toll for 2017 at 428 as of April 20, 2018; however, the 2017 statistics are expected to increase slightly as cases are still pending analysis. This reduction in deaths indicates that the overall strategy including prevention, intervention, treatment, and recovery support services may be having a positive impact.

The Department published a Request for Applications for Substance Use Disorder Treatment and Recovery Support Services (RFA-2019-BDAS-01-SUBST) on the Department of Health and Humans Services website April 20, 2018 through May 10, 2018. The Department received sixteen (16) applications. These proposals were reviewed and scored by a team of individuals with program specific knowledge. The Department selected fourteen applications (two (2) submitted by Grafton County were combined into one contract) to provide these services (See attached Summary Score Sheet).

Some of the Vendors' applications scored lower than anticipated; however, this was largely due to the Vendors providing a limited array of services and not to their experience and/or capacity to provide those services. In addition the Bureau of Drug and Alcohol Services is working with the Bureau of Improvement and Integrity to improve the contract monitoring and quality improvement process as well as taking steps to reposition staff to assist with this.

The Contract includes language to assist pregnant and parenting women by providing interim services if they are on a waitlist; to ensure clients contribute to the cost of services by assessing client income at intake and on a monthly basis; and to ensure care coordination for the clients by assisting them with accessing services or working with a client's existing provider for physical health, behavioral health, medication assisted treatment and peer recovery support services.

The Department will monitor the performance of the Vendors through monthly and quarterly reports, conducting site visits, reviewing client records, and engaging in activities identified in the contract monitoring and quality improvement work referenced above. In addition, the Department is collecting baseline data on access, engagement, clinical appropriateness, retention, completion, and outcomes that will be used to create performance improvement goals in future contracts. Finally, contractor financial health is also being monitored monthly.

All thirteen (13) contracts include language that reserves the right to renew each contract for up to two (2) additional years, subject to the continued availability of funds, satisfactory performance of contracted services and Governor and Executive Council approval.

Should the Governor and Executive Council determine to not authorize this Requested Action #1, the vendors would not have sufficient resources to promote and provide the array of services necessary to provide individuals with substance use disorders the necessary tools to achieve, enhance and sustain recovery.

Action #2)

Requested Action #2 seeks approval to amend ten (10) of the thirteen (13) agreements for the provision of substance use disorder treatment and recovery support services by modifying the scope to reduce the burden on the vendors in meeting contract requirements.

The changes to the contracts include removal of the requirement to continue providing services after the contract price limitation is reached, allowing for assistance to clients enrolling in insurance through the use of referrals to trained community providers, and an easing of supervision requirements that is not expected to negatively impact client care. Corrective action for compliance audits was also included. The changes were also made to the three (3) contracts being put forth in Action #1. These changes are being made as a part of the Department's response to provider's concerns over reimbursement rates with the goal of reducing the gap between the cost of providing services and the rate paid by the Department by reducing the administrative burden associated with service delivery without compromising client care.

These contracts were originally competitively bid.

Should the Governor and Executive Council determine to not authorize this Request Action #2, the gap between the cost of care and reimbursement rates will remain the same, which vendors have indicated may result in having to limit services provided under this contract. In addition, there would not be a requirement of a corrective actions plan should there be an audit which does not allow for a system to assist with improvement in services provided.

Area served: Statewide.

Please see attached financial details.

EXPLANATION

The Department requests approval of ten (10) agreements with a combined price limitation of $3,157,927 that will allow the Vendors listed to provide an array of Substance Use Disorder Treatment and Recovery Support Services statewide to children and adults with substance use disorders, who have income below 400% of the Federal Poverty level and are residents of New Hampshire or are homeless in New Hampshire. Substance use disorders occur when the use of alcohol and/or drugs causes clinically and functionally significant impairment, such as health problems, disability, and failure to meet major responsibilities at work, school, or home. The existence of a substance use disorder is

determined using a clinical evaluation based on Diagnostic and Statistical Manual of Mental Disorders, Fifth Edition criteria. Three (3) more agreements will be submitted by the Department at a future Governor and Executive Council meeting.

These Agreements are part of the Department's overall strategy to respond to the opioid epidemic that continues to negatively impact New Hampshire's individuals, families, and communities as well as to respond to other types of substance use disorders. Under the current iteration of these contracts, fifteen (15) vendors are delivering an array of treatment services, including individual and group outpatient, intensive outpatient, partial hospitalization, transitional living, high and low intensity residential, and ambulatory and residential withdrawal management services as well as ancillary recovery support services. While the array of services offered by each vendor varies slightly, together they enrolled 2994 individuals in service groups covered by the contract between May 1, 2017 and April 30, 2018. In 2016 there were 485 drug overdose deaths in New Hampshire with the death toll for 2017 at 428 as of April 20, 2016; however, the 2017 statistics are expected to increase slightly as cases are still pending analysis. This reduction in deaths indicates that the overall strategy including prevention, intervention, treatment, and recovery support services is having a positive impact.

The Department published a Request for Applications for Substance Use Disorder Treatment and Recovery Support Services (RFA-2019-BDAS-01-SUBST) on the Department of Health and Humans Services website April 20, 2018 through May 10, 2018. The Department received sixteen (16) applications. These proposals were reviewed and scored by a team of individuals with program specific knowledge. The Department selected fourteen applications (two (2) submitted by Grafton County were combined into one contract) to provide these services (See attached Summary Score Sheet).

Some of the Vendors' applications scored lower than anticipated; however, this was largely due to the vendors providing a limited array of services and not to their experience and/or capacity to provide those services. In addition the Bureau of Drug and Alcohol Services is working with the Bureau of Improvement and Integrity to improve the contract monitoring and quality improvement process as well as taking steps to reposition staff to assist with this.

The Contract includes language to assist pregnant and parenting women by providing interim services if they are on a waitlist; to ensure clients contribute to the cost of services by assessing client income at intake and on a monthly basis; and to ensure care coordination for the clients by assisting them with accessing services or working with a client's existing provider for physical health, behavioral health, medication assisted treatment and peer recovery support services.

The Department will monitor the performance of the Vendors through monthly and quarterly reports, conducting site visits, reviewing client records, and engaging in activities identified in the contract monitoring and quality improvement work referenced above. In addition, the Department is collecting baseline data on access, engagement, clinical appropriateness, retention, completion, and outcomes that will be used to create performance improvement goals in future contracts. Finally, contractor financial health is also being monitored monthly.

This contract includes language that reserves the right to renew each contract for up to two (2) additional years, subject to the continued availability of funds, satisfactory performance of contracted services and Governor and Executive Council approval.

Should the Governor and Executive Council determine to not authorize this Request, the vendors would not have sufficient resources to promote and provide the array of services necessary to provide individuals with substance use disorders the necessary tools to achieve, enhance and sustain recovery.

Area served: Statewide.

Source of Funds: 55.87% Federal Funds from the United States Department of Health and Human Services, Substance Abuse and Mental Health Services Administration, Substance Abuse Prevention and Treatment Block Grant, CFDA #93.959, Federal Award Identification Number TI010035-14, and 13.97% General Funds and 30.16% Other Funds from the Governor's Commission on Alcohol and Other Drug Abuse Prevention, Intervention and Treatment.

In the event that the Federal Funds become no longer available, General Funds will not be requested to support this program.

The certification or explanation will be considered in connection with the NH Department of Health and Human Services' (DHHS) determination whether to enter into this transaction. However, failure of the prospective primary participant to furnish a certification or an explanation shall disqualify such person from participation in this transaction.

If it is later determined that the prospective primary participant knowingly rendered an erroneous certification, in addition to other remedies available to the Federal Government, DHHS may terminate this transaction for cause or default.

A participant may decide the method and frequency by which it determines the eligibility of its principals. Each participant may, but is not required to, check the Nonprocurement List (of excluded parties).

10. Except for transactions authorized under paragraph 6 of these instructions, if a participant in a covered transaction knowingly enters into a lower tier covered transaction with a person who is suspended, debarred, ineligible, or voluntarily excluded from participation in this transaction, in addition to other remedies available to the Federal government, DHHS may terminate this transaction for cause or default.

   II. As required by law, pursuant to the terms set forth in paragraph d. below; or
   III. For data aggregation purposes for the health care operations of Covered Entity.

If Covered Entity objects to such disclosure, the Business

Associate shall refrain from disclosing the PHI until Covered Entity has exhausted all remedies.

e. If the Covered Entity notifies the Business Associate that Covered Entity has agreed to be bound by additional restrictions over and above those uses or disclosures or security safeguards of PHI pursuant to the Privacy and Security Rule, the Business Associate shall be bound by such additional restrictions and shall not disclose PHI in violation of such additional restrictions and shall abide by any additional security safeguards.

f. Within five (5) business days of receipt of a written request from Covered Entity, Business Associate shall make available during normal business hours at its offices all records, books, agreements, policies and procedures relating to the use and disclosure of PHI to the Covered Entity, for purposes of enabling Covered Entity to determine Business Associate's compliance with the terms of the Agreement.

j. Within ten (10) business days of receiving a written request from Covered Entity for a request for an accounting of disclosures of PHI, Business Associate shall make available to Covered Entity such information as Covered Entity may require to fulfill its obligations to provide an accounting of disclosures with respect to PHI in accordance with 45 CFR Section 164.528.

k. In the event any individual requests access to, amendment of, or accounting of PHI directly from the Business Associate, the Business Associate shall within two (2) business days forward such request to Covered Entity. Covered Entity shall have the responsibility of responding to forwarded requests. However, if forwarding the individual's request to Covered Entity would cause Covered Entity or the Business Associate to violate HIPAA and the Privacy and Security Rule, the Business Associate shall instead respond to the individual's request as required by such law and notify Covered Entity of such response as soon as practicable.

l. Within ten (10) business days of termination of the Agreement, for any reason, the Business Associate shall return or destroy, as specified by Covered Entity, all PHI received from, or created or received by the Business Associate in connection with the Agreement, and shall not retain any copies or back-up tapes of such PHI. If return or destruction is not feasible, or the disposition of the PHI has been otherwise agreed to in the Agreement, Business Associate shall continue to extend the protections of the Agreement, to such PHI and limit further uses and disclosures of such PHI to those purposes that make the return or destruction infeasible, for so long as Business

Associate maintains such PHI. If Covered Entity, in its sole discretion, requires that the Business Associate destroy any or all PHI, the Business Associate shall certify to Covered Entity that the PHI has been destroyed.

(4) Obligations of Covered Entity

a. Covered Entity shall notify Business Associate of any changes or limitation(s) in its Notice of Privacy Practices provided to individuals in accordance with 45 CFR Section 164.520, to the extent that such change or limitation may affect Business Associate's use or disclosure of PHI.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of West Central Services, Inc. d/b/a West Central Behavioral Health as of June 30, 2018 and 2017, and the changes in its net assets and its cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Report on Supplementary Information

Our audit was conducted for the purpose of forming an opinion on the financial statements as a whole. The supplementary information on pages 14-17 is presented for purposes of additional analysis and is not a required part of the financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated in all material respects in relation to the financial statements as a whole.

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Organization

West Central Services, Inc. d/b/a West Central Behavioral Health (the Center) is a not-for-profit corporation, organized under New Hampshire law to provide services in the areas of mental health and related non-mental health programs; it is exempt from income taxes under Section 501(c)(3) of the Internal Revenue Code (Code). In addition, the Center qualifies for the charitable contribution deduction under Section 170(b)(1)(a) and has been classified as an organization that is not a private foundation under Section 509(a)(2).

Income Taxes

The Center is exempt from federal income tax under Internal Revenue Code Section 501(c)(3) and is not a private foundation. Therefore no provision for income tax expense has been reflected in these financial statements.

Consideration has been given to uncertain tax positions. The federal income tax returns for the years ended after June 30, 2015 remain open for potential examination by major tax jurisdictions generally for three years after they were filed.

Basis of Accounting

The accompanying financial statements have been prepared on the accrual basis of accounting in accordance with generally accepted accounting principles.

Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results could differ from those estimates.

Cash and Cash Equivalents

The Center considers cash on hand, cash in banks and all highly liquid debt instruments purchased with a maturity of three months or less to be cash and cash equivalents.

Accounts Receivable

Accounts receivable are recorded based on the amount billed for services provided, net of respective allowances.

Policy for Evaluating Collectability of Accounts Receivable

In evaluating the collectability of accounts receivable, the Center analyzes past results and identifies trends for each major payer source of revenue for the purpose of estimating the appropriate amounts of the allowance for doubtful accounts. Data in each major payer source is regularly reviewed to evaluate the adequacy of the allowance for doubtful accounts. Specifically, for receivables relating to services provided to clients having third-party coverage, an allowance for doubtful accounts and a corresponding provision for bad debts are established for amounts outstanding for an extended period of time and for third-party payers experiencing financial difficulties; for receivables relating to self-pay clients, a provision for bad debts is made in the period services are rendered based on experience indicating the inability or unwillingness of clients to pay amounts for which they are financially responsible.

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Based on management's assessment, the Center provides for estimated uncollectible amounts through a charge to earnings and a credit to a valuation allowance. Balances that remain outstanding after the Center has used reasonable collection efforts are written off through a change to the valuation allowance and a credit to accounts receivable.

Policy for Evaluating Collectability of Accounts Receivable (continued)
During 2018, the Center decreased its estimated percentage in the allowance for doubtful accounts from 36% to 33% of the total patient receivables. The allowance for doubtful accounts decreased to $177,142 as of June 30, 2018 from $265,219 as of June 30, 2017.

Property and Equipment
All property and equipment is recorded at cost, or estimated fair value at date of acquisition. The Center follows the policy of charging to costs and expenses annual amounts of depreciation, which allocates the cost of property and equipment over estimated useful lives. The Center has a policy of capitalizing assets with a cost in excess of $1,000 and a life greater than one year. The Center uses the straight-line method for determining the annual charge for depreciation. Asset lives range from 2-40 years.

Expenditures for repairs and maintenance are expensed when incurred and betterments are capitalized.

The Center reviews the carrying value of property and equipment for impairment whenever events and circumstances indicate that the carrying value of an asset may not be recoverable from the estimated future cash flows expected to result from its use and eventual disposition. In cases where undiscounted expected future cash flows are less than the carrying value, an impairment loss is recognized equal to an amount by which the carrying value exceeds the fair value of assets. The factors considered by management in performing this assessment include current operating results, trends and prospects, as well as the effects of obsolescence, demand, competition and other economic factors.

Client Service Revenue
The Center recognizes client service revenue relating to services rendered to clients that have third-party payer coverage and are self-pay. The Center receives payment from Medicare, Medicaid and Insurance Companies at defined rates for services to clients covered by such third-party payer programs. The difference between the established billing rates and the actual rate of reimbursement is recorded as allowances when received. For services rendered to uninsured clients (i.e., self-pay clients), revenue is recognized on the basis of standard or negotiated discounted rates. At the time services are rendered to self-pay clients, a provision for bad debts is recorded based on experience and the effects of newly identified circumstances and trends in pay rates. Client service revenue (net of contractual allowances and discounts but before taking account of the provision for bad debts) recognized during the year ended June 30, 2018 totaled $7,771,399, of which $7,537,062 was revenue from third-party payers and $234,337 was revenue from self-pay clients.

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Third-Party Contractual Arrangements
A significant portion of patient revenue is derived from services to patients insured by third-party payers. The Center receives payment from Medicare, Medicaid, Blue Cross and other third-party payers at defined rates for services rendered to patients covered by these programs. The difference between the established billing rates and the actual rate of payment is recorded as allowances when received and/or billed. A provision for estimated contractual allowances is provided on outstanding patient receivables at the balance sheet date.

State Grants
The Center receives a number of grants from and has entered into various contracts with the State of New Hampshire related to the delivery of mental health services.

Functional Allocation of Expenses
The costs of providing the various programs and other activities has been summarized on a functional basis in the statement of activities. Accordingly, certain costs have been allocated among the programs and supporting services benefited.

Vacation Pay and Fringe Benefits
Annual vacation allotments are granted in full to employees at the beginning of the fiscal year and are to be utilized by June 30th; unused time is forfeited. Fringe benefits are allocated to the appropriate program expense based on the percentage of actual time spent on the program.

Advertising
Advertising costs are expensed to operating expenses as incurred. Advertising expense for the years ended June 30, 2018 and 2017 was $17,728 and $11,556, respectively.

Concentration of Credit Risk
The Center maintains cash balances at several financial institutions. Accounts at financial institutions are insured by the Federal Deposit Insurance Corporation up to $250,000. At times throughout the year, cash balances with these institutions exceed that amount. The Center has not incurred any losses related to uninsured cash.

NOTE 2 CLIENT SERVICE REVENUES FROM THIRD PARTY PAYORS

The Center has agreements with third-party payors that provide payments to the Center at established rates. These payments include:

New Hampshire and Managed Medicaid
The Center is reimbursed for services from the State of New Hampshire and Managed Care Organizations for services rendered to Medicaid clients on the basis of fixed fee for service rates.

NOTE 2 CLIENT SERVICE REVENUES FROM THIRD PARTY PAYORS (continued)

Approximately 86% of program service fees is from participation in the State and Managed Care Organization sponsored Medicaid programs for the year ended June 30, 2018. Laws and regulations governing the Medicaid programs are complex and subject to interpretation and change. As a result, it is reasonably possible that recorded estimates could change materially in the near term.

NOTE 6 FAIR VALUE MEASUREMENTS

Professional accounting standards established a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurement) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy are described below:

Basis of Fair Value Measurement

Level 1 Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities;

Level 2 Quoted prices in markets that are not considered to be active or financial instruments for which all significant inputs are observable, either directly or indirectly.

Level 3 Prices or valuations that require inputs that are both significant to the fair value measurement and unobservable.

All investments are categorized as Level 1 and recorded at fair value, as of June 30, 2018. As required by professional accounting standards, investment assets are classified in their entirety based upon the lowest level of input that is significant to the fair value measurement.

EXPLANATION

Action #1)

Requested Action #1 is **retroactive** because the Department and FIT/NHNH, Inc. were continuing to work on the scope of work and therefore, the contract was not completed in time to place the item on the agenda for the June 20, 2018 Governor and Executive Council meeting. The contract with Greater Nashua Council on Alcoholism and Hope on Haven Hill are being submitted after the release of audit reports to allow for Council review prior to entering into an Agreement, and to add contract monitoring language to address the audit findings. If these actions were not taken retroactively, the result would have been a gap in critical substance use disorder treatment and recovery support services in the State's two largest cities.

The Department requests approval of three (3) agreements. Ten (10) agreements were previously approved by Governor and Executive Council on June 20, 2018 Late Item G. These agreements will allow the Vendors listed to provide an array of Substance Use Disorder Treatment and Recovery Support Services statewide to children and adults with substance use disorders, who have income below 400% of the Federal Poverty level and are residents of New Hampshire or are homeless in New Hampshire. Substance use disorders occur when the use of alcohol and/or drugs causes clinically and functionally significant impairment, such as health problems, disability, and failure to meet major responsibilities at work, school, or home. The existence of a substance use disorder is determined using a clinical evaluation based on Diagnostic and Statistical Manual of Mental Disorders, Fifth Edition criteria.

These Agreements are part of the Department's overall strategy to respond to the opioid epidemic that continues to negatively impact New Hampshire's individuals, families, and communities as well as to respond to other types of substance use disorders. Under the current iteration of these contracts, fifteen (15) vendors are delivering an array of treatment services, including individual and group outpatient, intensive outpatient, partial hospitalization, transitional living, high and low intensity residential, and ambulatory and residential withdrawal management services as well as ancillary recovery support services. While the array of services offered by each vendor varies slightly, together they enrolled 2994 individuals in service groups covered by the contract between May 1, 2017 and April 30, 2018. In 2016 there were 485 drug overdose deaths in New Hampshire with the death toll for 2017 at 428 as of April 20, 2018; however, the 2017 statistics are expected to increase slightly as cases are still pending analysis. This reduction in deaths indicates that the overall strategy including prevention, intervention, treatment, and recovery support services may be having a positive impact.

The Department published a Request for Applications for Substance Use Disorder Treatment and Recovery Support Services (RFA-2019-BDAS-01-SUBST) on the Department of Health and Humans Services website April 20, 2018 through May 10, 2018. The Department received sixteen (16) applications. These proposals were reviewed and scored by a team of individuals with program specific knowledge. The Department selected fourteen applications (two (2) submitted by Grafton County were combined into one contract) to provide these services (See attached Summary Score Sheet).

Some of the Vendors' applications scored lower than anticipated; however, this was largely due to the Vendors providing a limited array of services and not to their experience and/or capacity to provide those services. In addition the Bureau of Drug and Alcohol Services is working with the Bureau of Improvement and Integrity to improve the contract monitoring and quality improvement process as well as taking steps to reposition staff to assist with this.

The Contract includes language to assist pregnant and parenting women by providing interim services if they are on a waitlist; to ensure clients contribute to the cost of services by assessing client income at intake and on a monthly basis; and to ensure care coordination for the clients by assisting them with accessing services or working with a client's existing provider for physical health, behavioral health, medication assisted treatment and peer recovery support services.

The Department will monitor the performance of the Vendors through monthly and quarterly reports, conducting site visits, reviewing client records, and engaging in activities identified in the contract monitoring and quality improvement work referenced above. In addition, the Department is collecting baseline data on access, engagement, clinical appropriateness, retention, completion, and outcomes that will be used to create performance improvement goals in future contracts. Finally, contractor financial health is also being monitored monthly.

All thirteen (13) contracts include language that reserves the right to renew each contract for up to two (2) additional years, subject to the continued availability of funds, satisfactory performance of contracted services and Governor and Executive Council approval.

Should the Governor and Executive Council determine to not authorize this Requested Action #1, the vendors would not have sufficient resources to promote and provide the array of services necessary to provide individuals with substance use disorders the necessary tools to achieve, enhance and sustain recovery.

Action #2)

Requested Action #2 seeks approval to amend ten (10) of the thirteen (13) agreements for the provision of substance use disorder treatment and recovery support services by modifying the scope to reduce the burden on the vendors in meeting contract requirements.

The changes to the contracts include removal of the requirement to continue providing services after the contract price limitation is reached, allowing for assistance to clients enrolling in insurance through the use of referrals to trained community providers, and an easing of supervision requirements that is not expected to negatively impact client care. Corrective action for compliance audits was also included. The changes were also made to the three (3) contracts being put forth in Action #1. These changes are being made as a part of the Department's response to provider's concerns over reimbursement rates with the goal of reducing the gap between the cost of providing services and the rate paid by the Department by reducing the administrative burden associated with service delivery without compromising client care.

These contracts were originally competitively bid.

Should the Governor and Executive Council determine to not authorize this Request Action #2, the gap between the cost of care and reimbursement rates will remain the same, which vendors have indicated may result in having to limit services provided under this contract. In addition, there would not be a requirement of a corrective actions plan should there be an audit which does not allow for a system to assist with improvement in services provided.

Area served: Statewide.

Source of Funds: 55.87% Federal Funds from the United States Department of Health and Human Services, Substance Abuse and Mental Health Services Administration, Substance Abuse Prevention and Treatment Block Grant, CFDA #93.959, Federal Award Identification Number TI010035-14, and 13.97% General Funds and 30.16% Other Funds from the Governor's Commission on Alcohol and Other Drug Abuse Prevention, Intervention and Treatment.

In the event that the Federal Funds become no longer available, General Funds will not be requested to support this program.

Funds to support this request are available in State Fiscal Year 2019 in the following accounts, with the authority to adjust encumbrances between State Fiscal Years through the Budget Office without approval of the Governor and Executive Council, if needed and justified.

Please see attached financial details.

EXPLANATION

The Department requests approval of ten (10) agreements with a combined price limitation of $3,157,927 that will allow the Vendors listed to provide an array of Substance Use Disorder Treatment and Recovery Support Services statewide to children and adults with substance use disorders, who have income below 400% of the Federal Poverty level and are residents of New Hampshire or are homeless in New Hampshire. Substance use disorders occur when the use of alcohol and/or drugs causes clinically and functionally significant impairment, such as health problems, disability, and failure to meet major responsibilities at work, school, or home. The existence of a substance use disorder is

determined using a clinical evaluation based on Diagnostic and Statistical Manual of Mental Disorders, Fifth Edition criteria. Three (3) more agreements will be submitted by the Department at a future Governor and Executive Council meeting.

These Agreements are part of the Department's overall strategy to respond to the opioid epidemic that continues to negatively impact New Hampshire's individuals, families, and communities as well as to respond to other types of substance use disorders. Under the current iteration of these contracts, fifteen (15) vendors are delivering an array of treatment services, including individual and group outpatient, intensive outpatient, partial hospitalization, transitional living, high and low intensity residential, and ambulatory and residential withdrawal management services as well as ancillary recovery support services. While the array of services offered by each vendor varies slightly, together they enrolled 2994 individuals in service groups covered by the contract between May 1, 2017 and April 30, 2018. In 2016 there were 485 drug overdose deaths in New Hampshire with the death toll for 2017 at 428 as of April 20, 2016; however, the 2017 statistics are expected to increase slightly as cases are still pending analysis. This reduction in deaths indicates that the overall strategy including prevention, intervention, treatment, and recovery support services is having a positive impact.

The Department published a Request for Applications for Substance Use Disorder Treatment and Recovery Support Services (RFA-2019-BDAS-01-SUBST) on the Department of Health and Humans Services website April 20, 2018 through May 10, 2018. The Department received sixteen (16) applications. These proposals were reviewed and scored by a team of individuals with program specific knowledge. The Department selected fourteen applications (two (2) submitted by Grafton County were combined into one contract) to provide these services (See attached Summary Score Sheet).

Some of the Vendors' applications scored lower than anticipated; however, this was largely due to the vendors providing a limited array of services and not to their experience and/or capacity to provide those services. In addition the Bureau of Drug and Alcohol Services is working with the Bureau of Improvement and Integrity to improve the contract monitoring and quality improvement process as well as taking steps to reposition staff to assist with this.

The Contract includes language to assist pregnant and parenting women by providing interim services if they are on a waitlist; to ensure clients contribute to the cost of services by assessing client income at intake and on a monthly basis; and to ensure care coordination for the clients by assisting them with accessing services or working with a client's existing provider for physical health, behavioral health, medication assisted treatment and peer recovery support services.

The Department will monitor the performance of the Vendors through monthly and quarterly reports, conducting site visits, reviewing client records, and engaging in activities identified in the contract monitoring and quality improvement work referenced above. In addition, the Department is collecting baseline data on access, engagement, clinical appropriateness, retention, completion, and outcomes that will be used to create performance improvement goals in future contracts. Finally, contractor financial health is also being monitored monthly.

This contract includes language that reserves the right to renew each contract for up to two (2) additional years, subject to the continued availability of funds, satisfactory performance of contracted services and Governor and Executive Council approval.

Should the Governor and Executive Council determine to not authorize this Request, the vendors would not have sufficient resources to promote and provide the array of services necessary to provide individuals with substance use disorders the necessary tools to achieve, enhance and sustain recovery.

Area served: Statewide.

Source of Funds: 55.87% Federal Funds from the United States Department of Health and Human Services, Substance Abuse and Mental Health Services Administration, Substance Abuse Prevention and Treatment Block Grant, CFDA #93.959, Federal Award Identification Number TI010035-14, and 13.97% General Funds and 30.16% Other Funds from the Governor's Commission on Alcohol and Other Drug Abuse Prevention, Intervention and Treatment.

In the event that the Federal Funds become no longer available, General Funds will not be requested to support this program.

3. EFFECTIVE DATE/COMPLETION OF SERVICES.
3.1 Notwithstanding any provision of this Agreement to the contrary, and subject to the approval of the Governor and Executive Council of the State of New Hampshire, if applicable, this Agreement, and all obligations of the parties hereunder, shall become effective on the date the Governor and Executive Council approve this Agreement as indicated in block 1.18, unless no such approval is required, in which case the Agreement shall become effective on the date the Agreement is signed by the State Agency as shown in block 1.14 ("Effective Date").
3.2 If the Contractor commences the Services prior to the Effective Date, all Services performed by the Contractor prior to the Effective Date shall be performed at the sole risk of the Contractor, and in the event that this Agreement does not become effective, the State shall have no liability to the Contractor, including without limitation, any obligation to pay the Contractor for any costs incurred or Services performed. The State shall have no liability to the Contractor other than the contract price.
5.3 The State reserves the right to offset from any amounts otherwise payable to the Contractor under this Agreement those liquidated amounts required or permitted by N.H. RSA 80:7 through RSA 80:7-c or any other provision of law.

8.1 Any one or more of the following acts or omissions of the Contractor shall constitute an event of default hereunder ("Event of Default"):

9. DATA/ACCESS/CONFIDENTIALITY/ PRESERVATION.
9.1 As used in this Agreement, the word "data" shall mean all information and things developed or obtained during the performance of, or acquired or developed by reason of, this Agreement, including, but not limited to, all studies, reports, files, formulae, surveys, maps, charts, sound recordings, video recordings, pictorial reproductions, drawings, analyses, graphic representations, computer programs, computer printouts, notes, letters, memoranda, papers, and documents, all whether finished or unfinished.
9.2 All data and any property which has been received from the State or purchased with funds provided for that purpose under this Agreement, shall be the property of the State, and shall be returned to the State upon demand or upon termination of this Agreement for any reason.
9.3 Confidentiality of data shall be governed by N.H. RSA chapter 91-A or other existing law. Disclosure of data requires prior written approval of the State.

10. TERMINATION. In the event of an early termination of this Agreement for any reason other than the completion of the Services, the Contractor shall deliver to the Contracting Officer, not later than fifteen (15) days after the date of termination, a report ("Termination Report") describing in detail all Services performed, and the contract price earned, to and including the date of termination. The form, subject matter, content, and number of copies of the Termination Report shall be identical to those of any Final Report described in the attached EXHIBIT A.

11. CONTRACTOR'S RELATION TO THE STATE. In the performance of this Agreement the Contractor is in all respects an independent contractor, and is neither an agent nor an employee of the State. Neither the Contractor nor any of its officers, employees, agents or members shall have authority to bind the State or receive any benefits, workers' compensation or other emoluments provided by the State to its employees.

12. ASSIGNMENT/DELEGATION/SUBCONTRACTS. The Contractor shall not assign, or otherwise transfer any interest in this Agreement without the prior written notice and consent of the State. None of the Services shall be subcontracted by the Contractor without the prior written notice and consent of the State.

13. INDEMNIFICATION. The Contractor shall defend, indemnify and hold harmless the State, its officers and employees, from and against any and all losses suffered by the State, its officers and employees, and any and all claims, liabilities or penalties asserted against the State, its officers and employees, by or on behalf of any person, on account of, based or resulting from, arising out of (or which may be claimed to arise out of) the acts or omissions of the Contractor. Notwithstanding the foregoing, nothing herein contained shall be deemed to constitute a waiver of the sovereign immunity of the State, which immunity is hereby reserved to the State. This covenant in paragraph 13 shall survive the termination of this Agreement.

14. INSURANCE.

13.2.4. Use any federal funds provided under this contract for the purpose of conducting any form of needle exchange, free needle programs or the distribution of bleach for the cleaning of needles for intravenous drug abusers.

13.3. The Contractor agrees to the Charitable Choice federal statutory provisions as follows:

Federal Charitable Choice statutory provisions ensure that religious organizations are able to equally compete for Federal substance abuse funding administered by SAMHSA, without impairing the religious character of such organizations and without diminishing the religious freedom of SAMHSA beneficiaries (see 42 USC 300x-65 and 42 CFR Part 54 and Part 54a, 45 CFR Part 96, Charitable Choice Provisions and Regulations). Charitable Choice statutory provisions of the Public Health Service Act enacted by Congress in 2000 are applicable to the SAPT Block Grant program. No funds provided directly from SAMHSA or the relevant State or local government to organizations participating in applicable programs may be expended for inherently religious activities, such as worship, religious instruction, or proselytization. If an organization conducts such activities, it must offer them separately, in time or location, from the programs or services for which it receives funds directly from SAMHSA or the relevant State or local government under any applicable program, and participation must be voluntary for the program beneficiaries.

6. **Retroactive Payments:** Notwithstanding anything to the contrary contained in the Contract or in any other document, contract or understanding, it is expressly understood and agreed by the parties hereto, that no payments will be made hereunder to reimburse the Contractor for costs incurred for any purpose or for any services provided to any individual prior to the Effective Date of the Contract and no payments shall be made for expenses incurred by the Contractor for any services provided prior to the date on which the individual applies for services or (except as otherwise provided by the federal regulations) prior to a determination that the individual is eligible for such services.

If at any time during the term of this Contract or after receipt of the Final Expenditure Report hereunder, the Department shall determine that the Contractor has used payments hereunder to reimburse items of expense other than such costs, or has received payment in excess of such costs or in excess of such rates charged by the Contractor to ineligible individuals or other third party funders, the Department may elect to:
   7.1. Renegotiate the rates for payment hereunder, in which event new rates shall be established;
   7.2. Deduct from any future payment to the Contractor the amount of any prior reimbursement in excess of costs;

7.3. Demand repayment of the excess payment by the Contractor in which event failure to make such repayment shall constitute an Event of Default hereunder. When the Contractor is permitted to determine the eligibility of individuals for services, the Contractor agrees to reimburse the Department for all funds paid by the Department to the Contractor for services provided to any individual who is found by the Department to be ineligible for such services at any time during the period of retention of records established herein.

Contractor shall not reproduce any materials produced under the contract without prior written approval from DHHS.

15. **Operation of Facilities: Compliance with Laws and Regulations:** In the operation of any facilities for providing services, the Contractor shall comply with all laws, orders and regulations of federal, state, county and municipal authorities and with any direction of any Public Officer or officers pursuant to laws which shall impose an order or duty upon the contractor with respect to the operation of the facility or the provision of the services at such facility. If any governmental license or permit shall be required for the operation of the said facility or the performance of the said services, the Contractor will procure said license or permit, and will at all times comply with the terms and conditions of each such license or permit. In connection with the foregoing requirements, the Contractor hereby covenants and agrees that, during the term of this Contract the facilities shall comply with all rules, orders, regulations, and requirements of the State Office of the Fire Marshal and the local fire protection agency, and shall be in conformance with local building and zoning codes, by-laws and regulations.

INSTRUCTIONS FOR CERTIFICATION

1. By signing and submitting this proposal (contract), the prospective primary participant is providing the certification set out below.

2. The inability of a person to provide the certification required below will not necessarily result in denial of participation in this covered transaction. If necessary, the prospective participant shall submit an explanation of why it cannot provide the certification. The certification or explanation will be considered in connection with the NH Department of Health and Human Services' (DHHS) determination whether to enter into this transaction. However, failure of the prospective primary participant to furnish a certification or an explanation shall disqualify such person from participation in this transaction.

3. The certification in this clause is a material representation of fact upon which reliance was placed when DHHS determined to enter into this transaction. If it is later determined that the prospective primary participant knowingly rendered an erroneous certification, in addition to other remedies available to the Federal Government, DHHS may terminate this transaction for cause or default.

4. The prospective primary participant shall provide immediate written notice to the DHHS agency to whom this proposal (contract) is submitted if at any time the prospective primary participant learns that its certification was erroneous when submitted or has become erroneous by reason of changed circumstances.

5. The terms "covered transaction," "debarred," "suspended," "ineligible," "lower tier covered transaction," "participant," "person," "primary covered transaction," "principal," "proposal," and "voluntarily excluded," as used in this clause, have the meanings set out in the Definitions and Coverage sections of the rules implementing Executive Order 12549: 45 CFR Part 76. See the attached definitions.

6. The prospective primary participant agrees by submitting this proposal (contract) that, should the proposed covered transaction be entered into, it shall not knowingly enter into any lower tier covered transaction with a person who is debarred, suspended, declared ineligible, or voluntarily excluded from participation in this covered transaction, unless authorized by DHHS.

7. The prospective primary participant further agrees by submitting this proposal that it will include the clause titled "Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion - Lower Tier Covered Transactions," provided by DHHS, without modification, in all lower tier covered transactions and in all solicitations for lower tier covered transactions.

8. A participant in a covered transaction may rely upon a certification of a prospective participant in a lower tier covered transaction that it is not debarred, suspended, ineligible, or involuntarily excluded from the covered transaction, unless it knows that the certification is erroneous. A participant may decide the method and frequency by which it determines the eligibility of its principals. Each participant may, but is not required to, check the Nonprocurement List (of excluded parties).

9. Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render in good faith the certification required by this clause. The knowledge and

information of a participant is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.

10. Except for transactions authorized under paragraph 6 of these instructions, if a participant in a covered transaction knowingly enters into a lower tier covered transaction with a person who is suspended, debarred, ineligible, or voluntarily excluded from participation in this transaction, in addition to other remedies available to the Federal government, DHHS may terminate this transaction for cause or default.

12. Where the prospective primary participant is unable to certify to any of the statements in this certification, such prospective participant shall attach an explanation to this proposal (contract).

LOWER TIER COVERED TRANSACTIONS

13. By signing and submitting this lower tier proposal (contract), the prospective lower tier participant, as defined in 45 CFR Part 76, certifies to the best of its knowledge and belief that it and its principals:
