EXPLANATION

This purpose of this request is to extend the agreements with the Contractors listed above to provide substance use disorder treatment and recovery support services, statewide.
These funds will be used to provide $100 room and board payments for Medicaid-covered individuals with opioid use disorder in residential treatment. Funds in this amendment will assist with serving the Medicaid population challenge of different reimbursement rates between Medicaid and Commercial payers. The vendors above will also continue to offer their existing array of treatment services, including individual and group outpatient, intensive outpatient, partial hospitalization, transitional living, high and low intensity residential services.

This amendment is part of the State's recently approved plan under the State Opioid Response (SOR) grant, which identified access to residential treatment as a funding priority. The Substance Abuse and Mental Health Services Administration (SAMHSA) approved NH's proposal in September 2018. The vendors above will use these funds to ensure that individuals with OUD receiving the appropriate level of residential treatment have continued and/or expanded access to the necessary level of care, which increases their ability to achieve and maintain recovery.

Approximately 6,000 individuals will receive substance use disorder treatment services from July 2019 through September 2020. In addition, approximately 40,184 days of room and board will be funded.

The original agreement, included language in Exhibit C-1, that allows the Department to renew the contract for up to two (2) years, subject to the continued availability of funding, satisfactory performance of service, parties' written authorization and approval from the Governor and Executive Council. The Department is in agreement with renewing services for one (1) and three (3) months of the two (2) years at this time.

Substance use disorders develop when the use of alcohol and/or drugs causes clinically and functionally significant impairment, such as health problems, disability, and failure to meet major responsibilities at work, school, or home. The existence of a substance use disorder is determined using a clinical evaluation based on Diagnostic and Statistical Manual of Mental Disorders, Fifth Edition criteria.

These Agreements are part of the Department's overall strategy to respond to the opioid epidemic that continues to negatively impact New Hampshire's individuals, families, and communities as well as to respond to other types of substance use disorders. Under the current iteration of these contracts, 13 vendors are delivering an array of treatment services, including individual and group outpatient, intensive outpatient, partial hospitalization, transitional living, high and low intensity residential, and ambulatory and residential withdrawal management services as well as ancillary recovery support services. In 2018, there were 467 confirmed drug overdose deaths in NH with 6 cases still pending. These contracts will support the State's efforts to continue to respond to the opioid epidemic and substance misuse as a whole.

Should the Governor and Executive Council determine to not authorize this Request, the vendors would not have sufficient resources to promote and provide the array of services necessary to provide individuals with substance use disorders the necessary tools to achieve, enhance and sustain recovery.

Area served: Statewide.

Source of Funds: 70.76% Federal Funds from the United States Department of Health and Human Services, Substance Abuse and Mental Health Services Administration, Substance Abuse Prevention and Treatment Block Grant, CFDA #93.959, Federal Award Identification Number TI010035-14, Substance Abuse and Mental Health Services Administration State Opioid Response Grant, CFDA #93.788, and 10.56% General Funds and 18.69% Other Funds from the Governor's Commission on Alcohol and Other Drug Abuse Prevention, Intervention and Treatment.

In the event that the Federal Funds become no longer available, General Funds will not be requested to support this program.

Respectfully submitted,

Jeffrey A. Meyers

Karin Powers

[redacted]

I have a degree in Crop and Soil Science, a Montessori upper elementary teaching diploma, and a profound interest in the world around me. I am passionate about learning, and I love to share what I have learned with others. In the past I have worked as a Home Health Aide, as a security officer, and as a residential counselor in a homeless shelter. Having grown up in challenging circumstances, I find that I am most fulfilled when I have meaningful work teaching people of any age or supporting those who are in crisis. I have just moved to downtown Manchester to complete my studies at a holistic massage therapy school in the area. I would love to find part-time, preferably long term, work that matters.
Authorized to work in the US for any employer.

Please see attached financial details.

EXPLANATION

This request is **sole source** because the increase to the price limitation for eight (8) vendor exceeds ten (10) percent of the total contract value.

Substance use disorders develop when the use of alcohol and/or drugs causes clinically and functionally significant impairment, such as health problems, disability, and failure to meet

major responsibilities at work, school, or home. The existence of a substance use disorder is determined using a clinical evaluation based on Diagnostic and Statistical Manual of Mental Disorders, Fifth Edition criteria.

This amendment will allow the above eight (8) vendors listed above in bold to continue and potentially expand access to residential treatment services provided to Medicaid-covered individuals with opioid use disorder (OUD). Funds in this amendment will be used to cover $100 of room and board payments for Medicaid beneficiaries with OUD in low and high intensity residential treatment services. These funds will support existing residential programs to continue serving the Medicaid population, which has been cited as a challenge by treatment providers as a result of differing rates of reimbursement between Medicaid and Commercial payers. The vendors above will also continue to offer their existing array of treatment services, including individual and group outpatient, intensive outpatient, partial hospitalization, transitional living, high and low intensity residential services.

This amendment is part of the State's recently approved plan under the State Opioid Response (SOR) grant, which identified access to residential treatment as a funding priority. The Substance Abuse and Mental Health Services Administration (SAMHSA) approved NH's proposal in September, with the expectation that funds are in services for communities within the third month of grant award. The eight (8) vendors above will use these funds to ensure that individuals with OUD receiving high or low intensity residential treatment have continued and/or expanded access to the necessary level of care, which increases their ability to achieve and maintain recovery.

Additionally, the Department will continue to monitor the performance of the Vendors through monthly and quarterly reports, conducting site visits, reviewing client records, and engaging in activities identified in the contract monitoring and quality improvement work referenced above. Contractor financial health is also being monitored monthly.

Should the Governor and Executive Council not authorize this request residential treatment programs may have to limit the availability of beds for individuals with OUD on Medicaid, which would delay access to care for those individuals.

Area served: Statewide.

Source of Funds: 69.35% Federal Funds from the United States Department of Health and Human Services, Substance Abuse and Mental Health Services Administration, Substance Abuse Prevention and Treatment Block Grant, CFDA #93.959, Federal Award Identification Number TI010035-14, Substance Abuse and Mental Health Services Administration State Opioid Response Grant, CFDA #93.788, and 13.50% General Funds and 17.15% Other Funds from the Governor's Commission on Alcohol and Other Drug Abuse Prevention, Intervention and Treatment.

In the event that the Federal Funds become no longer available, General Funds will not be requested to support this program.

EXPLANATION

Action #1)

Requested Action #1 is **retroactive** because the Department and FIT/NHNH, Inc. were continuing to work on the scope of work and therefore, the contract was not completed in time to place the item on the agenda for the June 20, 2018 Governor and Executive Council meeting. The contract with Greater Nashua Council on Alcoholism and Hope on Haven Hill are being submitted after the release of audit reports to allow for Council review prior to entering into an Agreement, and to add contract monitoring language to address the audit findings. If these actions were not taken retroactively, the result would have been a gap in critical substance use disorder treatment and recovery support services in the State's two largest cities.

The Department requests approval of three (3) agreements. Ten (10) agreements were previously approved by Governor and Executive Council on June 20, 2018 Late Item G. These agreements will allow the Vendors listed to provide an array of Substance Use Disorder Treatment and Recovery Support Services statewide to children and adults with substance use disorders, who have income below 400% of the Federal Poverty level and are residents of New Hampshire or are homeless in New Hampshire. Substance use disorders occur when the use of alcohol and/or drugs causes clinically and functionally significant impairment, such as health problems, disability, and failure to meet major responsibilities at work, school, or home. The existence of a substance use disorder is determined using a clinical evaluation based on Diagnostic and Statistical Manual of Mental Disorders, Fifth Edition criteria.

These Agreements are part of the Department's overall strategy to respond to the opioid epidemic that continues to negatively impact New Hampshire's individuals, families, and communities as well as to respond to other types of substance use disorders. Under the current iteration of these contracts, fifteen (15) vendors are delivering an array of treatment services, including individual and group outpatient, intensive outpatient, partial hospitalization, transitional living, high and low intensity residential, and ambulatory and residential withdrawal management services as well as ancillary recovery support services. While the array of services offered by each vendor varies slightly, together they enrolled 2994 individuals in service groups covered by the contract between May 1, 2017 and April 30, 2018. In 2016 there were 485 drug overdose deaths in New Hampshire with the death toll for 2017 at 428 as of April 20, 2018; however, the 2017 statistics are expected to increase slightly as cases are still pending analysis. This reduction in deaths indicates that the overall strategy including prevention, intervention, treatment, and recovery support services may be having a positive impact.

The Department published a Request for Applications for Substance Use Disorder Treatment and Recovery Support Services (RFA-2019-BDAS-01-SUBST) on the Department of Health and Humans Services website April 20, 2018 through May 10, 2018. The Department received sixteen (16) applications. These proposals were reviewed and scored by a team of individuals with program specific knowledge. The Department selected fourteen applications (two (2) submitted by Grafton County were combined into one contract) to provide these services (See attached Summary Score Sheet).

Some of the Vendors' applications scored lower than anticipated; however, this was largely due to the Vendors providing a limited array of services and not to their experience and/or capacity to provide those services. In addition the Bureau of Drug and Alcohol Services is working with the Bureau of Improvement and Integrity to improve the contract monitoring and quality improvement process as well as taking steps to reposition staff to assist with this.

The Contract includes language to assist pregnant and parenting women by providing interim services if they are on a waitlist; to ensure clients contribute to the cost of services by assessing client income at intake and on a monthly basis; and to ensure care coordination for the clients by assisting them with accessing services or working with a client's existing provider for physical health, behavioral health, medication assisted treatment and peer recovery support services.

The Department will monitor the performance of the Vendors through monthly and quarterly reports, conducting site visits, reviewing client records, and engaging in activities identified in the contract monitoring and quality improvement work referenced above. In addition, the Department is collecting baseline data on access, engagement, clinical appropriateness, retention, completion, and outcomes that will be used to create performance improvement goals in future contracts. Finally, contractor financial health is also being monitored monthly.

All thirteen (13) contracts include language that reserves the right to renew each contract for up to two (2) additional years, subject to the continued availability of funds, satisfactory performance of contracted services and Governor and Executive Council approval.

Should the Governor and Executive Council determine to not authorize this Requested Action #1, the vendors would not have sufficient resources to promote and provide the array of services necessary to provide individuals with substance use disorders the necessary tools to achieve, enhance and sustain recovery.

Action #2)

Requested Action #2 seeks approval to amend ten (10) of the thirteen (13) agreements for the provision of substance use disorder treatment and recovery support services by modifying the scope to reduce the burden on the vendors in meeting contract requirements.

The changes to the contracts include removal of the requirement to continue providing services after the contract price limitation is reached, allowing for assistance to clients enrolling in insurance through the use of referrals to trained community providers, and an easing of supervision requirements that is not expected to negatively impact client care. Corrective action for compliance audits was also included. The changes were also made to the three (3) contracts being put forth in Action #1. These changes are being made as a part of the Department's response to provider's concerns over reimbursement rates with the goal of reducing the gap between the cost of providing services and the rate paid by the Department by reducing the administrative burden associated with service delivery without compromising client care.

These contracts were originally competitively bid.

Should the Governor and Executive Council determine to not authorize this Request Action #2, the gap between the cost of care and reimbursement rates will remain the same, which vendors have indicated may result in having to limit services provided under this contract. In addition, there would not be a requirement of a corrective actions plan should there be an audit which does not allow for a system to assist with improvement in services provided.

Area served: Statewide.

Please see attached financial details.

EXPLANATION

The Department requests approval of ten (10) agreements with a combined price limitation of $3,157,927 that will allow the Vendors listed to provide an array of Substance Use Disorder Treatment and Recovery Support Services statewide to children and adults with substance use disorders, who have income below 400% of the Federal Poverty level and are residents of New Hampshire or are homeless in New Hampshire. Substance use disorders occur when the use of alcohol and/or drugs causes clinically and functionally significant impairment, such as health problems, disability, and failure to meet major responsibilities at work, school, or home. The existence of a substance use disorder is

determined using a clinical evaluation based on Diagnostic and Statistical Manual of Mental Disorders, Fifth Edition criteria. Three (3) more agreements will be submitted by the Department at a future Governor and Executive Council meeting.

These Agreements are part of the Department's overall strategy to respond to the opioid epidemic that continues to negatively impact New Hampshire's individuals, families, and communities as well as to respond to other types of substance use disorders. Under the current iteration of these contracts, fifteen (15) vendors are delivering an array of treatment services, including individual and group outpatient, intensive outpatient, partial hospitalization, transitional living, high and low intensity residential, and ambulatory and residential withdrawal management services as well as ancillary recovery support services. While the array of services offered by each vendor varies slightly, together they enrolled 2994 individuals in service groups covered by the contract between May 1, 2017 and April 30, 2018. In 2016 there were 485 drug overdose deaths in New Hampshire with the death toll for 2017 at 428 as of April 20, 2016; however, the 2017 statistics are expected to increase slightly as cases are still pending analysis. This reduction in deaths indicates that the overall strategy including prevention, intervention, treatment, and recovery support services is having a positive impact.

The Department published a Request for Applications for Substance Use Disorder Treatment and Recovery Support Services (RFA-2019-BDAS-01-SUBST) on the Department of Health and Humans Services website April 20, 2018 through May 10, 2018. The Department received sixteen (16) applications. These proposals were reviewed and scored by a team of individuals with program specific knowledge. The Department selected fourteen applications (two (2) submitted by Grafton County were combined into one contract) to provide these services (See attached Summary Score Sheet).

Some of the Vendors' applications scored lower than anticipated; however, this was largely due to the vendors providing a limited array of services and not to their experience and/or capacity to provide those services. In addition the Bureau of Drug and Alcohol Services is working with the Bureau of Improvement and Integrity to improve the contract monitoring and quality improvement process as well as taking steps to reposition staff to assist with this.

The Contract includes language to assist pregnant and parenting women by providing interim services if they are on a waitlist; to ensure clients contribute to the cost of services by assessing client income at intake and on a monthly basis; and to ensure care coordination for the clients by assisting them with accessing services or working with a client's existing provider for physical health, behavioral health, medication assisted treatment and peer recovery support services.

The Department will monitor the performance of the Vendors through monthly and quarterly reports, conducting site visits, reviewing client records, and engaging in activities identified in the contract monitoring and quality improvement work referenced above. In addition, the Department is collecting baseline data on access, engagement, clinical appropriateness, retention, completion, and outcomes that will be used to create performance improvement goals in future contracts. Finally, contractor financial health is also being monitored monthly.

This contract includes language that reserves the right to renew each contract for up to two (2) additional years, subject to the continued availability of funds, satisfactory performance of contracted services and Governor and Executive Council approval.

Should the Governor and Executive Council determine to not authorize this Request, the vendors would not have sufficient resources to promote and provide the array of services necessary to provide individuals with substance use disorders the necessary tools to achieve, enhance and sustain recovery.

Area served: Statewide.

Source of Funds: 55.87% Federal Funds from the United States Department of Health and Human Services, Substance Abuse and Mental Health Services Administration, Substance Abuse Prevention and Treatment Block Grant, CFDA #93.959, Federal Award Identification Number TI010035-14, and 13.97% General Funds and 30.16% Other Funds from the Governor's Commission on Alcohol and Other Drug Abuse Prevention, Intervention and Treatment.

In the event that the Federal Funds become no longer available, General Funds will not be requested to support this program.

Covered Entity shall have the responsibility of responding to forwarded requests. However, if forwarding the individual's request to Covered Entity would cause Covered Entity or the Business Associate to violate HIPAA and the Privacy and Security Rule, the Business Associate shall instead respond to the individual's request as required by such law and notify Covered Entity of such response as soon as practicable.

l. Within ten (10) business days of termination of the Agreement, for any reason, the Business Associate shall return or destroy, as specified by Covered Entity, all PHI received from, or created or received by the Business Associate in connection with the Agreement, and shall not retain any copies or back-up tapes of such PHI. INDEPENDENT AUDITOR'S REPORT

Board of Directors
FIT/NHNH, Inc. and Subsidiaries

We have audited the accompanying consolidated financial statements of FIT/NHNH, Inc. and Subsidiaries (the Organization), which comprise the consolidated statement of financial position as of December 31, 2018 and the related consolidated statements of activities, functional expenses and cash flows for the year then ended, and the related notes to the consolidated financial statements.

Management's Responsibility for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with U.S. generally accepted accounting principles; this includes the design, implementation and maintenance of internal control relevant to the preparation and fair presentation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. We conducted our audit in accordance with U.S. generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of the Organization as of December 31, 2018, and the consolidated changes in their net assets and their consolidated cash flows for the year then ended in accordance with U.S. generally accepted accounting principles.

Report on Summarized Comparative Information

We have previously audited the Organization's 2017 consolidated financial statements and, in our report dated March 30, 2018, expressed an unmodified opinion on those audited consolidated financial statements. In our opinion, the summarized comparative information presented herein as of and for the year ended December 31, 2017 is consistent, in all material respects, with the audited consolidated financial statements from which it has been derived.

Other Matter

Supplementary Information

Our audit was conducted for the purpose of forming an opinion on the consolidated financial statements as a whole. The accompanying supplementary information, which consists of the consolidating statement of financial position as of December 31, 2018, and the related consolidating statements of activities and functional expenses for the year then ended, is presented for purposes of additional analysis, rather than to present the financial position and changes in net assets of the individual entities, and is not a required part of the consolidated financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the consolidated financial statements. The information has been subjected to the auditing procedures applied in the audit of the consolidated financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the consolidated financial statements or to the consolidated financial statements themselves, and other additional procedures in accordance with U.S. generally accepted auditing standards. In our opinion, the information is fairly stated in all material respects in relation to the consolidated financial statements as a whole.

Change in Accounting Principle

As discussed in Note 1 to the consolidated financial statements, in 2018 the Organization adopted Financial Accounting Standards Board Accounting Standards Update No. 2016-14, *Presentation of Financial Statements for Not-for-Profit Entities* (Topic 958). Our opinion is not modified with respect to this matter.

Organization

Families in Transition, Inc. (FIT or the Organization) is a New Hampshire nonprofit, incorporated on May 13, 1994, to provide housing and comprehensive social services to individuals and families who are homeless or at risk of becoming homeless in certain areas of southern New Hampshire, including Manchester, Concord and Dover.

The Organization directly owns and operates housing programs in facilities located on Amherst Street, Spruce Street, Lake Avenue and Douglas Street in Manchester, New Hampshire. Additional housing facilities are owned and operated by several limited partnerships of which the Organization is the sole general partner. These limited partnerships include Bicentennial Families Concord Limited Partnership (Bicentennial), located at Bicentennial Square in Concord, New Hampshire; Family Bridge Limited Partnership (Family Bridge), located on Second Street in Manchester, New Hampshire; and Family Willows Limited Partnership (Family Willows), located on South Beech Street in Manchester, New Hampshire (collectively referred to as the Limited Partnerships).

In 2008, the Organization created a Community Development Housing Organization, Housing Benefits, Inc. (Housing Benefits). Housing Benefits identifies and develops new housing units and refurbishes existing units to meet the persistent need of combating homelessness. Completed housing units are located on School & Third Street, Lowell Street, Belmont Street, Market Street (Millyard I and Millyard II), Spruce Street and Hayward Street, in Manchester, New Hampshire as well as an additional housing facilities located on Central Avenue in Dover, New Hampshire (Dover), and Lehner Street in Wolfeboro, New Hampshire (Hope House).

In 2012, the Organization became the sole member of Manchester Emergency Housing, Inc. (MEH), a New Hampshire nonprofit corporation providing immediate shelter to homeless families in the Manchester, New Hampshire area. MEH is the only family shelter in Manchester, New Hampshire.

The Organization also owns 100% of Family Outfitters, LLC (Outfitters), a limited liability corporation. At December 31, 2018, Outfitters operated an independent thrift store in Manchester, New Hampshire with the sole purpose of generating an alternate funding stream for the Organization. During 2018, management made the decision to close the Concord, New Hampshire thrift store location.

The Organization has several wholly-owned corporations which include Bicentennial Families Concord, Inc. (Bicentennial Families), Second Street Family Mill, Inc. (Family Mill), and Big Shady Tree, Inc. (Big Shady Tree) (collectively referred to as the General Partners), all of which are New Hampshire corporations. These wholly-owned corporations represent the .01% sole general partners in the Limited Partnerships, whereby Bicentennial Families is a general partner of Bicentennial, Family Mill is a general partner of Family Bridge and Big Shady Tree is a general partner of Family Willows.

In 2012, the Organization became the sole member of The New Hampshire Coalition to End Homelessness (NHCEH), a statewide entity, whose mission is to "eliminate the causes for homelessness through research, education and advocacy".

Effective January 1, 2018, FIT and New Horizons for New Hampshire, Inc. (NHNH) merged to create an integrated system of care that will provide an increased supply of affordable housing for those most in need, sustain positive outcomes through the incorporation of evidence based practices proven to meet identified needs and goals, identify areas for systemic and programmatic improvements through the use of consistent and accurate data to regularly measure success, and provide an integrated system of care that will prevent homelessness when possible and rapidly rehouse those who become homeless, including both the chronically homeless and families with children. The merger resulted in a contribution of net assets of $3,430,951 as follows:

Cash and cash equivalents	$ 326,551
Other current assets	63,438
Cash surrender value of life insurance	33,676
Investments	1,780,456
Property and equipment, net	1,396,197
Accounts payable and accrued payroll	(95,950)
Notes payable	(73,417)
Fair value of net assets acquired	$ 3,430,951

The merger resulted in a contribution because the fair value of the identifiable assets exceeds the fair value of the liabilities assumed and no consideration was transferred from NHNH.

On May 25, 2018, the Organization organized Wilson Street Condominium Association (the Association) and is the majority owner in the Association. The Association was established for the purpose of maintaining and preserving a five unit premise located on Wilson Street in Manchester, New Hampshire.

1. Summary of Significant Accounting Policies

Principles of Consolidation

Since the General Partners have control of the Limited Partnerships, in accordance with Financial Accounting Standards Board *Accounting Standards Codification* Topic 810-20-25, *Consolidation*, the financial statements of each of the Limited Partnerships are required to be consolidated with the Organization's consolidated financial statements. The limited partners' ownership interest is reported in the consolidated statements of financial position as noncontrolling interest.

The consolidated financial statements include the net assets of the Organization, the Limited Partnerships, the General Partners, Housing Benefits, MEH, Outfitters, the Association, and NHCEH. All significant inter-entity balances and transactions are eliminated in the accompanying consolidated financial statements.

Comparative Information

The consolidated financial statements include certain prior year summarized comparative information in total, but not by net asset classification. Such information does not include sufficient detail to constitute a presentation in conformity with U.S. generally accepted accounting principles (U.S. GAAP). Accordingly, such information should be read in conjunction with the Organization's December 31, 2017 consolidated financial statements, from which the summarized information was derived.

Use of Estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements. Estimates also affect the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Basis of Presentation

The consolidated financial statements of the Organization have been prepared in accordance with U.S. GAAP, which require the Organization to report information regarding to its consolidated financial position and activities according to the following net asset classification:

Net assets without donor restrictions: Net assets that are not subject to donor-imposed restrictions and may be expended for any purpose in performing the primary objectives of the Organization. These net assets may be used at the discretion of the Organization's management and the board of directors.

Net assets with donor restrictions: Net assets subject to stipulations imposed by donors and grantors. Some donor restrictions are temporary in nature; those restrictions will be met by actions of the Organization or by the passage of time. Other donor restrictions are perpetual in nature, whereby the donor has stipulated the funds be maintained in perpetuity. Donor restricted contributions are reported as increases in net assets with donor restrictions. When a restriction expires, net assets are reclassified from net assets with donor restrictions to net assets without donor restrictions in the consolidated statement of activities.

All contributions are considered to be available for unrestricted use unless specifically restricted by the donor. Amounts received that are designated for future periods or restricted by the donor for specific purposes are reported as support with donor restrictions that increases those net asset classes. When a donor restriction expires, that is, when a stipulated time restriction ends or purpose restriction is accomplished, net assets with donor restrictions are reclassified to net assets without donor restrictions and reported in the consolidated statement of activities as net assets released from restrictions. The Organization records donor-restricted contributions whose restrictions are met in the same reporting period as support without donor restrictions in the year of the gift.

The Organization reports contributions of land, buildings or equipment as support without donor restrictions, unless a donor places explicit restriction on its use. Contributions of cash or other assets that must be used to acquire long-lived assets are reported as support with donor restrictions and reclassified to net assets without donor restrictions when the assets are acquired and placed in service.

Cash and Cash Equivalents

The Organization considers all highly liquid investments with an initial maturity of three months or less to be cash equivalents. The Organization maintains its cash in bank deposit accounts which, at times, may exceed the federally insured limits. Management regularly monitors the financial institutions, together with their respective cash balances, and attempts to maintain the potential risk at a minimum. The Organization has not experienced any losses in such accounts and management believes it is not exposed to any significant risk on these accounts.

Restricted deposits are those deposits of cash and cash equivalents not generally available for operating costs, but restricted to particular uses including operating and replacement reserves for rental properties as well as certain other social services and programs.

Property and Equipment

Property and equipment are recorded at cost or, if donated, at estimated fair market value at the date of donation less accumulated depreciation. The Organization's capitalization policy requires the capitalization of capital expenditures greater than $1,000, while ordinary maintenance and repairs are charged to expense. Depreciation is provided using the straight-line method over the estimated useful lives of the related assets, ranging from 5 to 30 years. Assets not in service are not depreciated.

Volunteer Services

A number of volunteers have donated their time to the Organization's various programs and administrative services. The value of these services has not been included in the accompanying consolidated financial statements since the volunteers' time does not meet criteria for recognition. The estimated value of donated time for the years ended December 31, 2018 and 2017 is approximately $780,000 and $1,060,000, respectively.

Functional Expense Allocation

The consolidated financial statements report certain categories of expenses that are attributable to more than one program or supporting function. Therefore, these expenses require allocation on a reasonable basis that is consistently applied. The expenses that allocated include salaries and benefits, depreciation, amortization, office and other expenses, which are allocated based on estimated utilization of support services by functional cost centers.

Income Taxes

The Organization is a tax-exempt Section 170(b)(1)(A)(vi) public charity as described in Section 501(c)(3) of the Internal Revenue Code (the Code) and is exempt from federal income taxes on related income pursuant to Section 501(a) of the Code. Accordingly, no provision for income taxes has been reflected in these financial statements.

The standards for accounting for uncertainty in income taxes require the Organization to report any uncertain tax positions and to adjust its financial statements for the impact thereof. As of December 31, 2018 and 2017, the Organization determined that it had no tax positions that did not meet the more-likely-than-not threshold of being sustained by the applicable tax authority. The Organization files an informational return in the United States. This return is generally subject to examination by the federal government for up to three years.

No provision for taxes on income is made in the Limited Partnerships' financial statements since, as partnerships, all taxable income and losses are allocated to the partners for inclusion in their respective tax returns.

The Association is not exempt from income taxes, however, the Internal Revenue Service is prepared to regard any profits realized by the Association from its member activities as reductions of members' contributions towards the operation of the condominium property and not as taxable income of the Association or its members. Accordingly, no provision for income taxes has been made in these consolidated financial statements.

Recently Issued Accounting Pronouncement

In August 2016, Financial Accounting Standards Board issued Accounting Standards Update (ASU) No. 2016-14, *Presentation of Financial Statements of Not-for-Profit Entities (*Topic 958*)*, which makes targeted changes to the not-for-profit financial reporting model. The new ASU marks the completion of the first phase of a larger project aimed at improving not-for profit financial reporting. Under the new ASU, net asset reporting is streamlined and clarified. The previous three category classification of net assets is replaced with a simplified model that combines temporarily restricted and permanently restricted into a single category called "net assets with donor restrictions." The guidance for classifying deficiencies in endowment funds and on accounting for the lapsing of restrictions on gifts to acquire property, plant, and equipment has also been simplified and clarified. New disclosures highlight restrictions on the use of resources that make otherwise liquid assets unavailable for meeting near-term financial requirements. The ASU also imposes several new requirements related to reporting expenses. The ASU is effective for the Organization for the year ended December 31, 2018.

2. Availability and Liquidity of Financial Assets

As of December 31, 2018, the Organization has working capital of $1,108,040 and average days (based on normal expenditures) cash on hand of 54.

Financial assets and liquidity resources available within one year for general expenditure, such as operating expenses, scheduled principal payments on mortgage notes payable, and capital acquisitions not funded through replacement reserves or financed with debt, were as follows:

	2018	2017
Financial assets:		
Cash and cash equivalents	$ 1,598,033	$ 1,062,497
Accounts receivable	52,211	38,380

Financial assets available at year end for current use	$ 2,585,535	$ 655,119

The Organization also has a line of credit available to meet short-term needs.

The Organization has replacement reserves and cash designated reserves for properties as part of its debt financing with New Hampshire Housing Finance Authority (NHHFA) and only available when approved by NHHFA. As a result, these replacement reserves and cash designated reserves for properties are not considered available for general expenditure within the next year and are not reflected in the amount above. The goal for the Organization is to maintain a balanced budget while meeting the requirements of the various financing authorities.

4. Development in Process

Development in process consists of costs related to the following facilities:

Family Willows Recovery Housing Program

In response to the rising rates of opioid and other substance use issues throughout Manchester, New Hampshire and the State of New Hampshire, FIT and Housing Benefits are assisting in the establishment of The Manchester Recovery and Treatment Center, a large-scale facility to curb the tide of substance misuse.

The plan for establishment of this facility includes the following provisions: Each of the four floors of the Manchester Recovery and Treatment Center will provide different substance use disorder treatments or services to those at varying stages of recovery. Agencies using the facility will coordinate services to ensure that clients who seek services are provided with integrated and comprehensive care. One of the key programs in the facility will be Housing Benefit's Family Willows Recovery Housing Program (the Project) on the 2nd and 3rd floors. This program will provide 19 units of sober, recovery housing, and can accommodated an estimated 40-50 women and their children on an annual basis. Residents in the Project will have access to case management, continued outpatient treatment, self-help groups, employment workshops, and social events. Construction began in December 2017 and is anticipated to be completed in the first quarter of 2019. Funding for the Project has been secured from the City of Manchester, NHHFA, Franklin Savings Bank, the Community Development Finance Authority (CDFA) and private foundations.

Hope House

In December 2017, FIT and Housing Benefits began renovations on Hope House. Hope House, modeled after FIT's Family Place Resource Center and Shelter in Manchester, New Hampshire, is a comprehensive resource for families experiencing homelessness. In addition to emergency housing, Hope House provides services including comprehensive intake, assessment and referrals designed to direct families to the appropriate homeless and housing resources in the community, referrals to medical care for parents and children, and other essential resources. Hope House houses 7 families and their children each night, with an estimated 30 adults and 90 children annually. During 2018, the renovations at Hope House were completed and facility was placed into service. Funding for Hope House was obtained with lending from NHHFA, as well as private contributions.

5. Line of Credit

During the term of the agreement, the interest rate on any outstanding principal balance shall be equal to the base rate, as defined by the financial institution, with a floor of 4% (5.5% at December 31, 2018). There was no outstanding balance as of December 31, 2017. As of December 31, 2018, the outstanding balance was $145,000.

EXPLANATION

This request is **sole source** because the increase to the price limitation for one (1) vendor exceeds ten (10) percent of the total contract value.

The purpose of this request is to amend an existing agreement with Families in Transition (FIT) continue providing an array of Substance Use Disorder Treatment and Recovery Support Services, statewide, to children and adults with substance use disorders, who have income below 400% of the Federal Poverty level and are residents of New Hampshire or are homeless in New Hampshire.

Substance use disorders develop when the use of alcohol and/or drugs causes clinically and functionally significant impairment, such as health problems, disability, and failure to meet major responsibilities at work, school, or home. The existence of a substance use disorder is determined using a clinical evaluation based on Diagnostic and Statistical Manual of Mental Disorders, Fifth Edition criteria.

This amendment will allow FIT to continue to offer established services while offering transitional living as well as an array of treatment services, including individual and group outpatient, intensive outpatient, partial hospitalization, transitional living, high and low intensity residential services.

This amendment is part of the State's recently approved plan under the State Opioid Response (SOR) grant, which identified access to transitional living and recovery housing as a funding priority. The Substance Abuse and Mental Health Services Administration (SAMHSA) approved NH's proposal in September, with the expectation that funds are in services for communities within the third month of grant award. Families in Transition will use these funds to ensure that individuals with Opioid Use Disorder (OUD) transitioning from treatment into the community will have access to safe, sober living environments that support their recovery and aid in the transition.

This contract includes language to assist pregnant and parenting women by providing interim services if they are on a waitlist; to ensure clients contribute to the cost of services by assessing client income at intake and on a monthly basis; and to ensure care coordination for the clients by assisting them with accessing services or working with a client's existing provider for physical health, behavioral health, medication assisted treatment and peer recovery support services.

The Department will monitor the performance of the Vendors through monthly and quarterly reports, conducting site visits, reviewing client records, and engaging in activities identified in the contract monitoring and quality improvement work referenced above. In addition, the Department is collecting baseline data on access, engagement, clinical appropriateness, retention, completion, and outcomes that will be used to create performance improvement goals in future contracts. Finally, contractor financial health is also being monitored monthly.

Should the Governor and Executive Council not authorize this request persons transitioning into the community may have limited access to safe sober living during this time period.

Area served: Statewide.

Source of Funds: 55.87% Federal Funds from the United States Department of Health and Human Services, Substance Abuse and Mental Health Services Administration, Substance Abuse Prevention and Treatment Block Grant, CFDA #93.959, Federal Award Identification Number TI010035-14, and 13.97% General Funds and 30.16% Other Funds from the Governor's Commission on Alcohol and Other Drug Abuse Prevention, Intervention and Treatment.

In the event that the Federal Funds become no longer available, General Funds will not be requested to support this program.

Charitable Choice statutory provisions of the Public Health Service Act enacted by Congress in 2000 are applicable to the SAPT Block Grant program. No funds provided directly from SAMHSA or the relevant State or local government to organizations participating in applicable programs may be expended for inherently religious activities, such as worship, religious instruction, or proselytization. If an organization conducts such activities, it must offer them separately, in time or location, from the programs or services for which it receives funds directly from SAMHSA or the relevant State or local government under any applicable program, and participation must be voluntary for the program beneficiaries.

Please see attached financial details.

EXPLANATION

The Department requests approval of ten (10) agreements with a combined price limitation of $3,157,927 that will allow the Vendors listed to provide an array of Substance Use Disorder Treatment and Recovery Support Services statewide to children and adults with substance use disorders, who have income below 400% of the Federal Poverty level and are residents of New Hampshire or are homeless in New Hampshire. Substance use disorders occur when the use of alcohol and/or drugs causes clinically and functionally significant impairment, such as health problems, disability, and failure to meet major responsibilities at work, school, or home. The existence of a substance use disorder is

determined using a clinical evaluation based on Diagnostic and Statistical Manual of Mental Disorders, Fifth Edition criteria. Three (3) more agreements will be submitted by the Department at a future Governor and Executive Council meeting.

These Agreements are part of the Department's overall strategy to respond to the opioid epidemic that continues to negatively impact New Hampshire's individuals, families, and communities as well as to respond to other types of substance use disorders. Under the current iteration of these contracts, fifteen (15) vendors are delivering an array of treatment services, including individual and group outpatient, intensive outpatient, partial hospitalization, transitional living, high and low intensity residential, and ambulatory and residential withdrawal management services as well as ancillary recovery support services. While the array of services offered by each vendor varies slightly, together they enrolled 2994 individuals in service groups covered by the contract between May 1, 2017 and April 30, 2018. In 2016 there were 485 drug overdose deaths in New Hampshire with the death toll for 2017 at 428 as of April 20, 2016; however, the 2017 statistics are expected to increase slightly as cases are still pending analysis. This reduction in deaths indicates that the overall strategy including prevention, intervention, treatment, and recovery support services is having a positive impact.

The Department published a Request for Applications for Substance Use Disorder Treatment and Recovery Support Services (RFA-2019-BDAS-01-SUBST) on the Department of Health and Humans Services website April 20, 2018 through May 10, 2018. The Department received sixteen (16) applications. These proposals were reviewed and scored by a team of individuals with program specific knowledge. The Department selected fourteen applications (two (2) submitted by Grafton County were combined into one contract) to provide these services (See attached Summary Score Sheet).

Some of the Vendors' applications scored lower than anticipated; however, this was largely due to the vendors providing a limited array of services and not to their experience and/or capacity to provide those services. In addition the Bureau of Drug and Alcohol Services is working with the Bureau of Improvement and Integrity to improve the contract monitoring and quality improvement process as well as taking steps to reposition staff to assist with this.

The Contract includes language to assist pregnant and parenting women by providing interim services if they are on a waitlist; to ensure clients contribute to the cost of services by assessing client income at intake and on a monthly basis; and to ensure care coordination for the clients by assisting them with accessing services or working with a client's existing provider for physical health, behavioral health, medication assisted treatment and peer recovery support services.

The Department will monitor the performance of the Vendors through monthly and quarterly reports, conducting site visits, reviewing client records, and engaging in activities identified in the contract monitoring and quality improvement work referenced above. In addition, the Department is collecting baseline data on access, engagement, clinical appropriateness, retention, completion, and outcomes that will be used to create performance improvement goals in future contracts. Finally, contractor financial health is also being monitored monthly.

This contract includes language that reserves the right to renew each contract for up to two (2) additional years, subject to the continued availability of funds, satisfactory performance of contracted services and Governor and Executive Council approval.

Should the Governor and Executive Council determine to not authorize this Request, the vendors would not have sufficient resources to promote and provide the array of services necessary to provide individuals with substance use disorders the necessary tools to achieve, enhance and sustain recovery.

Area served: Statewide.

Source of Funds: 55.87% Federal Funds from the United States Department of Health and Human Services, Substance Abuse and Mental Health Services Administration, Substance Abuse Prevention and Treatment Block Grant, CFDA #93.959, Federal Award Identification Number TI010035-14, and 13.97% General Funds and 30.16% Other Funds from the Governor's Commission on Alcohol and Other Drug Abuse Prevention, Intervention and Treatment.

In the event that the Federal Funds become no longer available, General Funds will not be requested to support this program.

If it is later determined that the prospective primary participant knowingly rendered an erroneous certification, in addition to other remedies available to the Federal Government, DHHS may terminate this transaction for cause or default.

A participant may decide the method and frequency by which it determines the eligibility of its principals. Each participant may, but is not required to, check the Nonprocurement List (of excluded parties).

Except for transactions authorized under paragraph 6 of these instructions, if a participant in a covered transaction knowingly enters into a lower tier covered transaction with a person who is suspended, debarred, ineligible, or voluntarily excluded from participation in this transaction, in addition to other remedies available to the Federal government, DHHS may terminate this transaction for cause or default.

j. Within ten (10) business days of receiving a written request from Covered Entity for a request for an accounting of disclosures of PHI, Business Associate shall make available to Covered Entity such information as Covered Entity may require to fulfill its obligations to provide an accounting of disclosures with respect to PHI in accordance with 45 CFR Section 164.528.

k. In the event any individual requests access to, amendment of, or accounting of PHI directly from the Business Associate, the Business Associate shall within two (2) business days forward such request to Covered Entity. Treatment at a qualitatively different level of care or type of service, or discharge from treatment, is therefore indicated; or

11. Notwithstanding anything to the contrary herein, the Contractor agrees that funding under this agreement may be withheld, in whole or in part, in the event of non-compliance with any Federal or State law, rule or regulation applicable to the services provided, or if the said services or products have not been satisfactorily completed in accordance with the terms and conditions of this agreement.

12. Contractor will have forty-five (45) days from the end of the contract period to submit to the Department final invoices for payment. Any adjustments made to a prior invoice will need to be accompanied by supporting documentation.

13. Limitations and restrictions of federal Substance Abuse Prevention and Treatment (SAPT) Block Grant funds:

13.1. The Contractor agrees to use the SAPT funds as the payment of last resort.

13.2. The Contractor agrees to the following funding restrictions on SAPT Block Grant expenditures to:

13.2.1. Make cash payments to intended recipients of substance abuse services.

13.2.2. Expend more than the amount of Block Grant funds expended in Federal Fiscal Year 1991 for treatment services provided in penal or correctional institutions of the State.

13.2.3. Use any federal funds provided under this contract for the purpose of conducting testing for the etiologic agent for Human Immunodeficiency Virus (HIV) unless such testing is accompanied by appropriate pre and post-test counseling.

13.2.4. Use any federal funds provided under this contract for the purpose of conducting any form of needle exchange, free needle programs or the distribution of bleach for the cleaning of needles for intravenous drug abusers.

13.3. The Contractor agrees to the Charitable Choice federal statutory provisions as follows:

Federal Charitable Choice statutory provisions ensure that religious organizations are able to equally compete for Federal substance abuse funding administered by SAMHSA, without

impairing the religious character of such organizations and without diminishing the religious freedom of SAMHSA beneficiaries (see 42 USC 300x-65 and 42 CFR Part 54 and Part 54a, 45 CFR Part 96, Charitable Choice Provisions and Regulations). Charitable Choice statutory provisions of the Public Health Service Act enacted by Congress in 2000 are applicable to the SAPT Block Grant program. No funds provided directly from SAMHSA or the relevant State or local government to organizations participating in applicable programs may be expended for inherently religious activities, such as worship, religious instruction, or proselytization. If an organization conducts such activities, it must offer them separately, in time or location, from the programs or services for which it receives funds directly from SAMHSA or the relevant State or local government under any applicable program, and participation must be voluntary for the program beneficiaries.

INDEPENDENT AUDITORS' REPORT

To the Board of Commissioners
County of Grafton, New Hampshire

Report on the Financial Statements

We have audited the accompanying financial statements of the governmental activities, the major fund, and the aggregate remaining fund information of the County of Grafton, New Hampshire (the "County"), as of and for the year ended June 30, 2018, and the related notes to the financial statements, which collectively comprise the County of Grafton, New Hampshire's basic financial statements as listed in the Table of Contents.

Management's Responsibility for the Financial Statements

The County's management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Opinions

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the major fund, and the aggregate remaining fund information of the County of Grafton, New Hampshire, as of June 30, 2018, and the respective changes in financial position, and the respective budgetary comparison for the General Fund for the year then ended in conformity with accounting principles generally accepted in the United States of America.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that Management's Discussion and Analysis and certain pension and OPEB schedules be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with evidence sufficient to express an opinion or provide any assurance.

Other Reporting Required by *Government Auditing Standards*

In accordance with *Government Auditing Standards*, we have also issued our report dated October 26, 2018 on our consideration of the County's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the County's internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the County's internal control over financial reporting and compliance.

MANAGEMENT'S DISCUSSION AND ANALYSIS

As management of the County of Grafton, New Hampshire, we offer readers this narrative overview and analysis of the financial activities of the County for the fiscal year ended June 30, 2018.

A. OVERVIEW OF THE FINANCIAL STATEMENTS

This discussion and analysis is intended to serve as an introduction to the basic financial statements. The basic financial statements are comprised of three components: (1) government-wide financial statements, (2) fund financial statements, and (3) notes to financial statements. This report also contains other required supplementary information in addition to the basic financial statements themselves.

Government-wide financial statements. The government-wide financial statements are designed to provide readers with a broad overview of our finances in a manner similar to a private-sector business.

The Statement of Net Position presents information on all assets, liabilities, and deferred outflows/inflows of resources, with the difference reported as net position. Over time, increases or decreases in net position may serve as a useful indicator of whether the financial position is improving or deteriorating.

The Statement of Activities presents information showing how the County's net position changed during the most recent fiscal year. All changes in net position are reported as soon as the underlying event giving rise to the change occurs, regardless of the timing of related cash flows. Thus, revenues and expenses are reported in this statement for some items that will only result in cash flows in future fiscal periods.

Fund financial statements. A fund is a grouping of related accounts that is used to maintain control over resources that have been segregated for specific activities or objectives. Fund accounting is used to ensure and demonstrate compliance with finance-related legal requirements. The County's funds are reported in two categories: governmental funds and fiduciary funds.

Governmental funds. Governmental funds are used to account for essentially the same functions reported as governmental activities in the government-wide financial statements. However, unlike the government-wide financial statements, governmental fund financial statements focus on near-term inflows and outflows of spendable resources, as well as on balances of spendable resources available at the end of the fiscal year. Such information may be useful in evaluating the County's near-term financing requirements.

Because the focus of governmental funds is narrower than that of the government-wide financial statements, it is useful to compare the information presented for

governmental funds with similar information presented for governmental activities in the government-wide financial statements. By doing so, readers may better understand the long-term impact of the County's near-term financing decisions. Reconciliations are provided to facilitate the comparison between governmental funds and governmental activities.

An annual appropriated budget is adopted for the General Fund. A budgetary comparison statement has been provided in order to demonstrate compliance with this budget.

Fiduciary funds. Fiduciary funds are used to account for resources held for the benefit of parties outside the County. Fiduciary funds are not reflected in the government-wide financial statements because the resources of those funds are not available to support County programs.

Notes to financial statements. The notes provide additional information that is essential to a full understanding of the data provided in the government-wide and fund financial statements.

Other information. In addition to the basic financial statements and accompanying notes, this report also presents certain required supplementary information which is required to be disclosed by accounting principles generally accepted in the United States of America.

B. FINANCIAL HIGHLIGHTS

- As of the close of the current fiscal year, the total of liabilities and deferred inflows exceeded assets and deferred outflows by $(20,785,120) (i.e., net position), a change of $(2,807,848) in comparison to the prior year.

- As of the close of the current fiscal year, governmental funds reported combined ending fund balances of $4,240,113, a change of $600,278 in comparison to the prior year.

Net position - end of year	$ (20,785,120)	$ (8,976,798)

* Net position reported above for fiscal year 2017 was not restated to reflect the implementation of GASB 75, as the County applied GASB 75 prospectively.

As noted earlier, net position may serve over time as a useful indicator of the County's financial position. At the close of the most recent fiscal year, total net position was $(20,785,120), a change of $(2,807,848) from the prior year.

The largest portion of net position, $21,544,485, reflects our investment in capital assets (e.g., land, land improvements, buildings and improvements, and equipment and vehicles), less any related debt used to acquire those assets that is still outstanding. These capital assets are used to provide services to citizens; consequently, these assets are not available for future spending. Although the investment in capital assets is reported net of related debt, it should be noted that the resources needed to repay this debt must be provided from other sources, since the capital assets themselves cannot be used to liquidate these liabilities.

An additional portion of net position, $46,377, represents resources that are subject to external restrictions on how they may be used. The remaining balance of net position is in a deficit, primarily a result of the implementation of GASB 68 and GASB 75 related to the net pension liability and the net OPEB liability.

Governmental activities. Governmental activities for the year resulted in a change in net position of $(2,807,848). Key elements of this change are as follows:

Governmental funds operating results	$ 600,278
Purchase of capital assets	398,901
Loss on disposals of capital assets	(8,974)
Principal debt service in excess of depreciation expense	887,608
Change in accrued interest liability	24,305
Change in compensated absence liability	(121,287)
Change in net pension liability and related deferrals	(891,659)
Change in net OPEB liability and related deferrals	(3,697,020)
Total	$ (2,807,848)

D. FINANCIAL ANALYSIS OF THE COUNTY'S FUNDS

As noted earlier, fund accounting is used to ensure and demonstrate compliance with finance-related legal requirements.

Governmental funds. The focus of governmental funds is to provide information on near-term inflows, outflows, and balances of spendable resources. Such information is useful in assessing financing requirements. In particular, unassigned fund balance may serve as a useful measure of the County's net resources available for spending at the end of the fiscal year.

As of the end of the current fiscal year, governmental funds reported combined ending fund balances of $4,240,113, a change of $600,678 in comparison to the prior year. Key elements of this change are as follows:

General Fund operating results	$ 600,007
Nonmajor Governmental Funds operating results	271
Total	$ 600,278

The General Fund is the chief operating fund. At the end of the current fiscal year, unassigned fund balance of the General Fund was $2,272,580, while total fund balance was $4,193,736. As a measure of the General Fund's liquidity, it may be useful to compare both unassigned fund balance and total fund balance to total budgeted expenditures. Refer to the table below.

General Fund	6/30/18	6/30/17	Change	Percentage of Total Budgeted Expenditures
Unassigned fund balance	$ 2,272,580	$ 1,619,257	$ 653,323	5.3%
Total fund balance	$ 4,193,736	$ 3,593,729	$ 600,007	9.9%

Included in the General Fund are the County's Delegation-voted reserve funds with the following balances:

	6/30/18	6/30/17	Change
Nursing Home Reserve	$ 59,306	$ 110,581	$ (51,275)
Dispatch Capital Reserve	158,110	153,401	4,709
Total	$ 217,416	$ 263,982	$ (46,566)

E. BUDGETARY HIGHLIGHTS

Differences between the original budget and the final budget resulted in an overall increase in appropriations of $87,648. This change relates to a use of prior year reserves (fund balance) for various purposes.

The total fund balance of all funds changed by $600,278 during the current fiscal year. Key factors in this change are as follows:

Revenues in excess of budget	$ 901,398
Expenditures less than appropriations	892,226
Budgetary results	1,793,624
Nonmajor governmental funds operating results	271
Use of fund balance - reduce taxes	(1,030,000)
Transfer to reserve funds	84,000
Use of reserves and restricted funds	(247,617)
GAAP basis results	$ 600,278

F. CAPITAL ASSETS AND DEBT

Capital assets. Total investment in capital assets for governmental activities at year-end amounted to $47,670,360 (net of accumulated depreciation). This investment in capital assets includes land, land improvements, buildings and improvements, and equipment and vehicles.

Additional information on capital assets can be found in the notes to financial statements.

Long-term debt. At the end of the current fiscal year, total bonded debt outstanding was $28,209,138, all of which was backed by the full faith and credit of the County.

Additional information on long-term debt can be found in the Notes to Financial Statements.

1. Summary of Significant Accounting Policies

The accounting policies of the County of Grafton, New Hampshire (the "County") conform to Generally Accepted Accounting principles (GAAP) as applicable to governmental units. The following is a summary of the more significant policies:

A. *Reporting Entity*

The County is a municipal corporation governed by an elected Board of Commissioners. As required by Generally Accepted Accounting Principles, these financial statements present the County and applicable component units for which the County is considered to be financially accountable. In fiscal year 2018, it was determined that no entities met the required GASB 14 (as amended) criteria of component units.

B. *Government-wide and Fund Financial Statements*

Government-wide Financial Statements

The government-wide financial statements (i.e., the Statement of Net Position and the Statement of Activities) report information on all of the nonfiduciary activities of the County. The effect of interfund activity has been removed from these statements.

The Statement of Activities demonstrates the degree to which the direct expenses of a given function or segment are offset by program revenues. *Direct expenses* are those that are clearly identifiable with a specific function or segment. Program revenues include (1) charges to customers or applicants who purchase, use, or directly benefit from goods, services, or privileges provided by a given function or segment and (2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular function or segment. Taxes and other items not properly included among program revenues are reported instead as *general revenues*.

Fund Financial Statements

Separate financial statements are provided for governmental funds and fiduciary funds, even though the latter is excluded from the government-wide financial statements. Major individual governmental funds are reported as separate columns in the fund financial statements.

C. *Measurement Focus, Basis of Accounting, and Financial Statement Presentation*

Government-wide Financial Statements

The government-wide financial statements are reported using the *economic resources measurement focus* and the *accrual basis of accounting*. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met. The effect of interfund activity has been eliminated from the government-wide financial statements.

Fund Financial Statements

Governmental fund financial statements are reported using the *current financial resources measurement focus* and the *modified accrual basis of accounting*. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be available when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. Generally, all other revenue items are considered to be measurable and available only when cash is received by the County. Expenditures generally are recorded when a liability is incurred, as under accrual accounting. However, certain expenditures, such as debt service, compensated absences, claims and judgments, and pension and OPEB are recorded as expenditures only when they are due.

Major Governmental Funds

- The *General Fund* is the County's primary operating fund. It accounts for all financial resources of the County, except those required to be accounted for in another fund.

Nonmajor Governmental Funds

Nonmajor governmental funds include special revenue funds that account for grants.

Fiduciary Funds

Fiduciary funds are reported using the *economic resources measurement focus* and the accrual *basis of accounting.* Under this method, revenues are recognized when earned and expenses are recorded when liabilities are incurred. Agency funds are categorized as fiduciary funds and used to account for funds held by the County on behalf of others (e.g., inmate funds and patient funds).

D. *Cash and Short-Term Investments*

Cash balances from all funds, except those required to be segregated by law, are combined to form a consolidation of cash. Cash balances are invested to the extent available, and interest earnings are recognized in the General Fund. Certain special revenue and fiduciary funds segregate cash, and investment earnings become a part of those funds.

Deposits with financial institutions consist primarily of demand deposits. A cash and investment pool is maintained that is available for use by all funds. Each fund's portion of this pool is reflected on the combined financial statements under the caption "cash and short-term investments". The interest earnings attributable to each fund type are included under investment income.

E. *Inventory*

Inventory is valued at cost using the first-in/first-out (FIFO) method. Inventory includes dietary, housekeeping, and supplies for use at the nursing home, maintenance supplies, and corrections supplies.

F. *Capital Assets*

Capital assets, which include land, land improvements, buildings and improvements, and equipment and vehicles, are reported in the government-wide financial statements. Capital assets are defined by the County as assets with a grouped cost of more than $500 for assets acquired for use in the Nursing Home, and $5,000 for all other assets, and an estimated useful life in excess of three years. Such assets are recorded at historical cost or estimated historical cost if purchased or constructed. Donated capital assets are recorded at acquisition value at the date of donation.

The costs of normal maintenance and repairs that do not add to the value of the asset or materially extend assets' lives are not capitalized.

Major outlays for capital assets and improvements are capitalized as projects are constructed. Interest incurred during the construction phase of capital assets is included as part of the capitalized value of the assets constructed.

Capital assets are depreciated using the straight-line method over the following estimated useful lives:

Assets	Years
Land improvements	20
Buildings and improvements	20 - 40
Equipment and vehicles	3 - 20

G. *Compensated Absences*

It is the County's policy to permit employees to accumulate earned but unused vacation and sick pay benefits. All vested sick and vacation pay is accrued when incurred in the government-wide and fiduciary fund financial statements. A liability for these amounts is reported in governmental funds only if they have matured, for example, as a result of employee resignations and retirements.

H. *Long-Term Liabilities*

In the government-wide financial statements, long-term debt and other long-term obligations are reported as liabilities in the governmental activities Statement of Net Position.

I. *Fund Equity*

Fund equity at the governmental fund financial reporting level is classified as "fund balance". Fund equity for all other reporting is classified as "net position".

Fund Balance - Generally, fund balance represents the difference between current assets/deferred outflows and current liabilities/deferred inflows. The County reserves portions of fund balance that are legally segregated for a specific future use or which do not represent available, spendable resources and, therefore, are not available for appropriation or expenditure. Unassigned fund balance indicates that portion of fund balance that is available for appropriation in future periods.

When an expenditure is incurred that would qualify for payment from multiple fund balance types, the County uses the following order to liquidate liabilities: restricted, committed, assigned, and unassigned.

Net Position - Net position represents the difference between assets/ deferred outflows and liabilities/deferred inflows. Net investment in capital assets consists of capital assets, net of accumulated depreciation, reduced by the outstanding balances of any borrowing used for the acquisition, construction, or improvement of those assets. Net position is reported as restricted when there are limitations imposed on use either through enabling legislation adopted by the County or through external restrictions imposed by creditors, grantors, or laws or regulations of other governments. The remaining net position is reported as unrestricted.

J. Fund Balance Policy

There is no rule or law in New Hampshire that governs the level of fund balance for counties. However, by looking at other guidelines that exist and by comparing the County to other counties in the state and in other states, the County arrived at a policy that fits the County's needs and standards:

1) The NH Department of Revenue Administration recommends that municipalities maintain a fund balance that represents between 5% and 10% of its total annual appropriations, including municipal, school, and county obligations.

2) The Government Finance Officer Association recommends as a best practice that "general-purpose governments, regardless of size, maintain unrestricted fund balance in their General Fund of no less than two months of regular General Fund operating revenues or regular General Fund operating expenditures. Furthermore, a government's particular situation often may require a level of unrestricted fund balance in the General Fund significantly in excess of this recommended minimum level. In any case, such measures should be applied within the context of long-term forecasting, thereby avoiding the risk of placing too much emphasis upon the level of unrestricted fund balance in the General Fund at any one time". Two months of operating revenues for operations funded by the General Fund for the County is approximately $7 million, which is about 17% of budgeted appropriations.

Through this fund balance policy, the County will endeavor to achieve and maintain an undesignated fund balance that is between 8% and 17% of its annual budgeted appropriations, which represents one to two months of operations.

K. Use of Estimates

The preparation of basic financial statements in conformity with Generally Accepted Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures for contingent assets and liabilities at the date of the basic financial statements and the reported amounts of revenues and expenditures/expenses during the fiscal year. Actual results could vary from estimates used.

2. Stewardship, Compliance, and Accountability

A. Budgetary Information

The County follows the following procedures for establishing the budgetary data reflected in the basic financial statements:

- Prior to May 1st, County departments submit to the County Commissioners a proposed budget for the fiscal year commencing the following July 1. The budget includes proposed expenditures and the means of financing them.
- Hearings are conducted by the County Commissioners prior to the County's budget meeting to discuss the proposed budget.
- The budget is legally enacted by the County Delegation prior to September 1st.
- Appropriations for certain projects and specific items not fully expended at the fiscal year-end are carried forward as continued appropriations to the new fiscal year in which they supplement the appropriations of that year.
- The budgets for all departments and operations of the County are prepared under the direction of the County Commissioners. Original appropriations are acted upon by the County Delegation vote.
- A copy of the budget is published in the Annual Report of the County of Grafton, New Hampshire.

B. *Budgetary Basis*

The final appropriation appearing on the "Budget and Actual" page of the fund financial statements represents the final amended budget after all reserve fund and line item transfers.

C. *Budget/GAAP Reconciliation*

The budgetary data for the General Fund is based upon accounting principles that differ from Generally Accepted Accounting Principles (GAAP). Therefore, in addition to the GAAP basis financial statements, the results of operations are presented in accordance with budgetary accounting principles to provide a meaningful comparison to budgetary data.

The following is a summary of adjustments made to actual revenues and other sources, and expenditures and other uses, to conform to the budgetary basis of accounting.

General Fund	Revenues and Other Financing Sources	Expenditures and Other Financing Uses
Revenues/Expenditures - (GAAP Basis)	$ 42,967,650	$ 42,367,643

3. Cash and Short-Term Investments

Custodial Credit Risk - Deposits. Custodial credit risk is the risk that in the event of a bank failure, the County's deposits may not be returned to it. RSA 29:1 limits deposits as follows "deposit in any one bank shall not at any time exceed the sum of its paid-up capital and surplus." The County does not have a deposit policy for custodial credit risk.

As of June 30, 2018, none of the County's bank balance was exposed to custodial credit risk as uninsured or uncollateralized.

4. Restricted Cash

Restricted cash represents cash and cash equivalents where use is limited by legal requirements. Within the General Fund, the restricted cash amount of $403,027 is composed of amounts from the Nursing Home Capital Reserve, the Registry of Deeds Surcharge Fund, the Dispatch Capital Reserve, and the Pandemic Fund.

5. Allowance for Doubtful Accounts and Contractual Allowances

The allowance for doubtful accounts for Nursing Home receivables has been estimated at approximately $83,000 at June 30, 2018. Nursing Home receivables are also reported net of contractual allowances.

7. Deferred Outflows of Resources

Deferred outflows of resources represent the consumption of net position by the County that is applicable to future reporting periods. Deferred outflows of resources have a positive effect on net position, similar to assets. Deferred outflows of resources related to pension and OPEB, in accordance with GASB Statements No. 68 and No. 75, are more fully discussed in the corresponding pension and OPEB notes. Other deferred outflows of resources consist of loss on bond refunding.

8. Anticipation Notes Payable

At June 30, 2018, the County had no anticipation lines of credit available. The following summarizes notes payable activity during fiscal year 2018:

Purpose	Issue Amount	Issue Date	Interest Rate	Balance Beginning of Year	Advances	Repayments	Balance End of Year

On October 14, 2016, the County issued general obligation bonds in the amount of $16,180,000 with a variable interest rate ranging from 2.50% to 5.00% to advance refund $16,500,000 of term bonds with an interest rate of 3.00% to 4.75%. The term bonds mature on December 1, 2030 and January 1, 2032 and are callable on December 1, 2020 and January 1, 2022, respectively. The general obligation bonds were issued at 3.00% and, after paying issuance costs of $200,706, the net proceeds were $18,948,719. The net proceeds from the issuance of the general obligation bonds were used to purchase U.S. government securities and those securities were deposited in an irrevocable trust with an escrow agent to provide debt service payments until the term bonds are called on December 1, 2020 and January 1, 2022, respectively. The advance refunding met the requirements of an in-substance debt defeasance and the term bonds were removed from the County's financial statements.

As a result of the advance refunding, the County decreased its total debt service cash flow requirements by $875,596, which resulted in an economic gain (difference between the present value of the debt service payments on the old and new debt) of $638,904.

Defeased debt still outstanding at June 30, 2018 is $16,500,000.

11. Deferred Inflows of Resources

Deferred inflows of resources are the acquisition of net position by the County that is applicable to future reporting periods. Deferred inflows of resources have a negative effect on net position, similar to liabilities. Deferred inflows of resources related to pension and OPEB will be recognized as expense in future years and are more fully described in the corresponding pension and OPEB notes.

12. Governmental Funds - Balances

Fund balances are segregated to account for resources that are either not available for expenditure in the future or are legally set aside for a specific future use.

The County has implemented GASB Statement No. 54 (GASB 54), *Fund Balance Reporting and Governmental Fund Type Definitions*, which enhances the usefulness of fund balance information by providing clearer fund balance classifications that can be more consistently applied and by clarifying existing governmental fund type definitions.

The following types of fund balances are reported at June 30, 2018:

Nonspendable - Represents amounts that cannot be spent because they are either (a) not in spendable form or (b) legally or contractually required to be maintained intact. This fund balance classification includes General Fund reserves for prepaid expenditures and nonmajor governmental fund reserves for the principal portion of permanent trust funds.

Restricted - Represents amounts that are restricted to specific purposes by constraints imposed by creditors, grantors, contributors, or laws or regulations of other governments, or constraints imposed by law through constitutional provisions or enabling legislation. This fund balance classification includes General Fund encumbrances funded by bond issuances, various special revenue funds, and the income portion of permanent trust funds.

Committed - Represents amounts that can only be used for specific purposes pursuant to constraints imposed by formal action of the County's highest level of decision-making authority. This fund balance classification includes General Fund encumbrances for non-lapsing special article appropriations approved by the Delegation and reserve funds.

Assigned - Represents amounts that are constrained by the County's intent to use these resources for a specific purpose. This fund balance classification includes General Fund encumbrances that have been established by County departments for the expenditure of current year budgetary financial resources upon vendor performance in the subsequent budgetary period, and surplus set aside to be used in the subsequent year's budget.

Unassigned - Represents amounts that are available to be spent in future periods and deficit funds.

The following is a summary of fund balances at June 30, 2018:

13. New Hampshire Retirement System (GASB 68)

The County follows the provisions of GASB Statement No. 68, *Accounting and Financial Reporting for Pensions – an amendment of GASB Statement No. 27,* with respect to the State of New Hampshire Retirement System (NHRS).

Plan Description

Full-time employees participate in the State of New Hampshire Retirement System, a cost-sharing, multiple-employer defined benefit contributory pension plan and trust established in 1967 by RSA 100-A:2 and qualified as a tax-exempt organization under Section 401(a) and 501(a) of the Internal Revenue Code. The plan is a contributory, defined benefit plan providing service, disability, death, and vested retirement benefits to members and their beneficiaries. Substantially all full-time state employees, public school teachers and administrators, permanent firefighters, and permanent police officers within the State of New Hampshire are eligible and required to participate in the system. Full-time employees of political subdivisions, including

counties, municipalities, and school districts are also eligible to participate as a group if the governing body of the political subdivision has elected participation.

The New Hampshire Retirement System, a Public Employees Retirement System (PERS), is divided into two membership groups. State or local employees and teachers belong to Group I. Police officers and firefighters belong to Group II. All assets are held in a single trust and are available to each group. Additional information is disclosed in the NHRS' annual report publicly available from the New Hampshire Retirement System located at 54 Regional Drive, Concord, New Hampshire 03301-8507.

Benefits Provided

Group 1 benefits are provided based on creditable service and average final salary for the highest of either three or five years, depending on when service commenced.

Group II benefits are provided based on age, years of creditable service, and a benefit multiplier depending on vesting status as of January 1, 2012. The maximum retirement allowance for Group II members vested by January 1, 2012 (45 years of age with 20 years of service or age 60 regardless of years of creditable service) is the average final compensation multiplied by 2.5% multiplied by creditable service. For Group II members not vested by January 1, 2012, the benefit is calculated the same way but the multiplier used in the calculation will change depending on age and years of creditable service, as follows:

Years of creditable service as of January 1, 2012	Minimum Age	Minimum Service	Benefit Multiplier
At least 3 but less than 10 years	46	21	2.4%
At least 6 but less than 8 years	47	22	2.3%
At least 4 but less than 6 years	48	12	2.2%
Less than 4 years	49	24	2.1%

Contributions

Plan members are required to contribute a percentage of their gross earnings to the pension plan, for which the contribution rates are 7% for employees and 11.55% for sheriff's deputies and correctional officers. The County makes annual contributions to the pension plan equal to the amount required by Revised Statutes Annotated 100-A:16, and range from 11.08% to 27.79% of covered compensation. The County's contribution to NHRS for the year ended June 30, 2018 was $2,111,746, which was equal to its annual required contribution.

Summary of Significant Accounting Policies

For purposes of measuring the net pension liability, deferred outflows of resources and deferred inflows of resources related to pensions, and pension expense, information about the fiduciary net position of the NHRS and additions to/deductions from NHRS's fiduciary net position have been determined on the same basis as they are reported by NHRS. For this purpose, benefit payments (including refunds of

employee contributions) are recognized when due and payable in accordance with benefit terms. Investments are reported at fair value.

Pension Liabilities, Pension Expense, and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions

At June 30, 2018, the County reported a liability of $25,666,764 for its proportionate share of the net pension liability. The net pension liability was measured as of June 30, 2017, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of June 30, 2016. The County's proportion of the net pension liability was based on a projection of the County's long-term share of contributions to the pension plan relative to the projected contributions of all participating employers, actuarially determined.

At the most recent measurement date of June 30, 2017, the County's proportion was .52189510%, which was a decrease of .01229055% from its previous year proportion.

For the year ended June 30, 2018, the County recognized pension expense of $2,891,904. In addition, the County reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

	Deferred Outflows of Resources	Deferred Inflows of Resources
Differences between expected and actual experience	$ 58,197	$ 326,664
Changes of assumptions	2,577,282	-
Net difference between projected and actual earnings on pension plan investments	-	326,879
Changes in proportion and differences between contributions and proportionate share of contributions	308,520	-
Contributions subsequent to the measurement date (fiscal year 2018)	2,111,746	-
Total	$ 5,055,745	$ 653,543

Deferred outflows of resources related to pensions resulting from contributions subsequent to the measurement date will be recognized as a reduction of the net pension liability in 2019. Other amounts reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized in expense as follows:

Year ended June 30:	
2019	$ (641,726)
2020	(1,239,580)
2021	(921,298)
2022	512,148
Total	$ (2,290,456)

Actuarial Assumptions

The total pension liability in the June 30, 2016 actuarial valuation was determined using the following actuarial assumptions, applied to all periods included in the measurement:

Inflation	2.5 percent per year
Salary increases	5.6 percent average, including inflation
Investment rate of return	7.25 percent, net of pension plan investment expense, including inflation

Mortality rates were based on the RP-2014 Employee generational mortality table for males and females, adjusted for mortality improvements using Scale MP-2015, based on the last experience study.

The actuarial assumptions used in the June 30, 2016 valuation were based on the results of the most recent actuarial experience study.

The long-term expected rate of return on pension plan investments was selected from a best estimate range determined using the building block approach. Under this method, an expected future real return range is calculated separately for each asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return net of investment expenses by the target asset allocation percentage and by adding expected inflation. The target allocation and best estimates of arithmetic real rates of return for each major class are summarized in the following table:

Asset Class	Target Allocation Percentage	Weighted Average Average Long-Term Expected Real Rate of Return
Large Cap Equities	22.50 %	4.25%
Small/Mid Cap Equities	7.50	4.50%

Discount Rate

The discount rate used to measure the total pension liability was 7.25%. This is a decrease of .50% from the previous valuation and has contributed to the significant deferred outflow of resources balance for changes of assumptions. The projection of cash flows used to determine the discount rate assumed that the plan member contributions will be made at the current contribution rate and that employer contributions will be made at rates equal to the difference between actuarially determined contribution rates and the member rate. For purposes of the projection, member contributions and employer service cost contributions are projected based on the expected payroll of current members only. Employer contributions are determined based on the pension plan's actuarial funding policy and as required by RSA 100-A:16. Based on those assumptions, the pension plan's fiduciary net position was projected to be available to make all projected future benefit payments to current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

Sensitivity of the Proportionate Share of the Net Pension Liability to Changes in the Discount Rate

The following presents the County's proportionate share of the net pension liability calculated using the discount rate of 7.25%, as well as what the County's proportionate share of the net pension liability would be if it were calculated using a discount rate that is one percentage-point lower (6.25%) or one percentage-point higher (8.25%) than the current rate:

14. Other Post-Employment Benefits – OPEB (GASB 75)

GASB Statement No. 75, *Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions, replaces the requirements of Statement No. 45, Accounting and Financial Reporting by Employers for Postemployment Benefits Other Than Pensions*. GASB Statement No. 75 establishes standards for recognizing and measuring assets, liabilities, deferred outflows/inflows of resources, and expenditures related to other post-employment benefits (OPEB) liabilities and identifies the methods and assumptions that are required to be used to project benefit payments, discount projected benefit payments to their actuarial present value, and attribute that present value to periods of employee service.

County of Grafton OPEB Plan

The following disclosures are based on a measurement date of July 1, 2017, determined on an actuarial valuation as of that date.

Plan Description

New Hampshire Retirement System Medical Subsidy Plan

Plan Description

In addition to the County's OPEB plan discussed above, the County participates in the New Hampshire Retirement System's (NHRS) Medical Subsidy Plan (MSP). The NHRS MSP is a cost-sharing, multiple-employer other post-employment benefit plan for retiree health insurance subsidies. Benefit amounts and eligibility requirements are set by state law, and members are designated by type. The four membership types are Group II Police Officer and Firefighters, Group I Teachers, Group I Political Subdivision Employees and Group I State Employees.

Benefits Provided

NHRS MSP provides a medical insurance subsidy to qualified retired members. The medical subsidy is a payment made by NHRS to the former employer or their insurance administrator toward the cost of health insurance for a qualified retiree, his/her qualified spouse, and his/her certifiably dependent children with a disability who are living in the household and being cared for by the retiree. Under specific conditions, the qualified beneficiaries of members who die while in service may also be eligible for the medical subsidy. The eligibility requirements for receiving MSP benefits differ for Group I and Group II members. The monthly MSP rates are:

1 Person - $375.56
2 Person - $751.12
1 Person Medicare Supplement - $236.84
2 Person Medicare Supplement - $473.68

Actuarial Assumptions and Other Inputs

The County's proportionate share of the NHRS MSP OPEB liability as of June 30, 2018 is based upon an actuarial valuation performed as of June 30, 2016 (rolled forward to June 30, 2017) using a measurement date of June 30, 2017. The actuarial valuation used the following actuarial assumptions:

Price inflation	2.50%
Wage inflation	3.25%
Salary increases	5.60%
Investment rate of return	7.25%
Discount rate	7.25%

Mortality rates were based on the RP-2014 healthy annuitant and employee generational mortality tables for males and females with credibility adjustments, adjusted for fully generational mortality improvements using scale MP-2015, based on the last experience study.

The actuarial assumptions used in the June 30, 2016 valuation were based on the results of the most recent experience study, which was for the period July 1, 2010 – June 30, 2015.

Grants - Amounts received or receivable from grantor agencies are subject to audit and adjustment by grantor agencies, principally the federal government. Any disallowed claims, including amounts already collected, may constitute a liability of the applicable funds. The amount of expenditures which may be disallowed by the grantor cannot be determined at this time, although the County expects such amounts, if any, to be immaterial.

EXPLANATION

Action #1)

Requested Action #1 is **retroactive** because the Department and FIT/NHNH, Inc. were continuing to work on the scope of work and therefore, the contract was not completed in time to place the item on the agenda for the June 20, 2018 Governor and Executive Council meeting. The contract with Greater Nashua Council on Alcoholism and Hope on Haven Hill are being submitted after the release of audit reports to allow for Council review prior to entering into an Agreement, and to add contract monitoring language to address the audit findings. If these actions were not taken retroactively, the result would have been a gap in critical substance use disorder treatment and recovery support services in the State's two largest cities.

The Department requests approval of three (3) agreements. Ten (10) agreements were previously approved by Governor and Executive Council on June 20, 2018 Late Item G. These agreements will allow the Vendors listed to provide an array of Substance Use Disorder Treatment and Recovery Support Services statewide to children and adults with substance use disorders, who have income below 400% of the Federal Poverty level and are residents of New Hampshire or are homeless in New Hampshire. Substance use disorders occur when the use of alcohol and/or drugs causes clinically and functionally significant impairment, such as health problems, disability, and failure to meet major responsibilities at work, school, or home. The existence of a substance use disorder is determined using a clinical evaluation based on Diagnostic and Statistical Manual of Mental Disorders, Fifth Edition criteria.

These Agreements are part of the Department's overall strategy to respond to the opioid epidemic that continues to negatively impact New Hampshire's individuals, families, and communities as well as to respond to other types of substance use disorders. Under the current iteration of these contracts, fifteen (15) vendors are delivering an array of treatment services, including individual and group outpatient, intensive outpatient, partial hospitalization, transitional living, high and low intensity residential, and ambulatory and residential withdrawal management services as well as ancillary recovery support services. While the array of services offered by each vendor varies slightly, together they enrolled 2994 individuals in service groups covered by the contract between May 1, 2017 and April 30, 2018. In 2016 there were 485 drug overdose deaths in New Hampshire with the death toll for 2017 at 428 as of April 20, 2018; however, the 2017 statistics are expected to increase slightly as cases are still pending analysis. This reduction in deaths indicates that the overall strategy including prevention, intervention, treatment, and recovery support services may be having a positive impact.

The Department published a Request for Applications for Substance Use Disorder Treatment and Recovery Support Services (RFA-2019-BDAS-01-SUBST) on the Department of Health and Humans Services website April 20, 2018 through May 10, 2018. The Department received sixteen (16) applications. These proposals were reviewed and scored by a team of individuals with program specific knowledge. The Department selected fourteen applications (two (2) submitted by Grafton County were combined into one contract) to provide these services (See attached Summary Score Sheet).

Some of the Vendors' applications scored lower than anticipated; however, this was largely due to the Vendors providing a limited array of services and not to their experience and/or capacity to provide those services. In addition the Bureau of Drug and Alcohol Services is working with the Bureau of Improvement and Integrity to improve the contract monitoring and quality improvement process as well as taking steps to reposition staff to assist with this.

The Contract includes language to assist pregnant and parenting women by providing interim services if they are on a waitlist; to ensure clients contribute to the cost of services by assessing client income at intake and on a monthly basis; and to ensure care coordination for the clients by assisting them with accessing services or working with a client's existing provider for physical health, behavioral health, medication assisted treatment and peer recovery support services.

The Department will monitor the performance of the Vendors through monthly and quarterly reports, conducting site visits, reviewing client records, and engaging in activities identified in the contract monitoring and quality improvement work referenced above. In addition, the Department is collecting baseline data on access, engagement, clinical appropriateness, retention, completion, and outcomes that will be used to create performance improvement goals in future contracts. Finally, contractor financial health is also being monitored monthly.

All thirteen (13) contracts include language that reserves the right to renew each contract for up to two (2) additional years, subject to the continued availability of funds, satisfactory performance of contracted services and Governor and Executive Council approval.

Should the Governor and Executive Council determine to not authorize this Requested Action #1, the vendors would not have sufficient resources to promote and provide the array of services necessary to provide individuals with substance use disorders the necessary tools to achieve, enhance and sustain recovery.

Action #2)

Requested Action #2 seeks approval to amend ten (10) of the thirteen (13) agreements for the provision of substance use disorder treatment and recovery support services by modifying the scope to reduce the burden on the vendors in meeting contract requirements.

The changes to the contracts include removal of the requirement to continue providing services after the contract price limitation is reached, allowing for assistance to clients enrolling in insurance through the use of referrals to trained community providers, and an easing of supervision requirements that is not expected to negatively impact client care. Corrective action for compliance audits was also included. The changes were also made to the three (3) contracts being put forth in Action #1. These changes are being made as a part of the Department's response to provider's concerns over reimbursement rates with the goal of reducing the gap between the cost of providing services and the rate paid by the Department by reducing the administrative burden associated with service delivery without compromising client care.

These contracts were originally competitively bid.

Should the Governor and Executive Council determine to not authorize this Request Action #2, the gap between the cost of care and reimbursement rates will remain the same, which vendors have indicated may result in having to limit services provided under this contract. In addition, there would not be a requirement of a corrective actions plan should there be an audit which does not allow for a system to assist with improvement in services provided.

Area served: Statewide.

Source of Funds: 55.87% Federal Funds from the United States Department of Health and Human Services, Substance Abuse and Mental Health Services Administration, Substance Abuse Prevention and Treatment Block Grant, CFDA #93.959, Federal Award Identification Number TI010035-14, and 13.97% General Funds and 30.16% Other Funds from the Governor's Commission on Alcohol and Other Drug Abuse Prevention, Intervention and Treatment.

In the event that the Federal Funds become no longer available, General Funds will not be requested to support this program.

Funds to support this request are available in State Fiscal Year 2019 in the following accounts, with the authority to adjust encumbrances between State Fiscal Years through the Budget Office without approval of the Governor and Executive Council, if needed and justified.

Please see attached financial details.

EXPLANATION

The Department requests approval of ten (10) agreements with a combined price limitation of $3,157,927 that will allow the Vendors listed to provide an array of Substance Use Disorder Treatment and Recovery Support Services statewide to children and adults with substance use disorders, who have income below 400% of the Federal Poverty level and are residents of New Hampshire or are homeless in New Hampshire. Substance use disorders occur when the use of alcohol and/or drugs causes clinically and functionally significant impairment, such as health problems, disability, and failure to meet major responsibilities at work, school, or home. The existence of a substance use disorder is

determined using a clinical evaluation based on Diagnostic and Statistical Manual of Mental Disorders, Fifth Edition criteria. Three (3) more agreements will be submitted by the Department at a future Governor and Executive Council meeting.

These Agreements are part of the Department's overall strategy to respond to the opioid epidemic that continues to negatively impact New Hampshire's individuals, families, and communities as well as to respond to other types of substance use disorders. Under the current iteration of these contracts, fifteen (15) vendors are delivering an array of treatment services, including individual and group outpatient, intensive outpatient, partial hospitalization, transitional living, high and low intensity residential, and ambulatory and residential withdrawal management services as well as ancillary recovery support services. While the array of services offered by each vendor varies slightly, together they enrolled 2994 individuals in service groups covered by the contract between May 1, 2017 and April 30, 2018. In 2016 there were 485 drug overdose deaths in New Hampshire with the death toll for 2017 at 428 as of April 20, 2016; however, the 2017 statistics are expected to increase slightly as cases are still pending analysis. This reduction in deaths indicates that the overall strategy including prevention, intervention, treatment, and recovery support services is having a positive impact.

The Department published a Request for Applications for Substance Use Disorder Treatment and Recovery Support Services (RFA-2019-BDAS-01-SUBST) on the Department of Health and Humans Services website April 20, 2018 through May 10, 2018. The Department received sixteen (16) applications. These proposals were reviewed and scored by a team of individuals with program specific knowledge. The Department selected fourteen applications (two (2) submitted by Grafton County were combined into one contract) to provide these services (See attached Summary Score Sheet).

Some of the Vendors' applications scored lower than anticipated; however, this was largely due to the vendors providing a limited array of services and not to their experience and/or capacity to provide those services. In addition the Bureau of Drug and Alcohol Services is working with the Bureau of Improvement and Integrity to improve the contract monitoring and quality improvement process as well as taking steps to reposition staff to assist with this.

The Contract includes language to assist pregnant and parenting women by providing interim services if they are on a waitlist; to ensure clients contribute to the cost of services by assessing client income at intake and on a monthly basis; and to ensure care coordination for the clients by assisting them with accessing services or working with a client's existing provider for physical health, behavioral health, medication assisted treatment and peer recovery support services.

The Department will monitor the performance of the Vendors through monthly and quarterly reports, conducting site visits, reviewing client records, and engaging in activities identified in the contract monitoring and quality improvement work referenced above. In addition, the Department is collecting baseline data on access, engagement, clinical appropriateness, retention, completion, and outcomes that will be used to create performance improvement goals in future contracts. Finally, contractor financial health is also being monitored monthly.

This contract includes language that reserves the right to renew each contract for up to two (2) additional years, subject to the continued availability of funds, satisfactory performance of contracted services and Governor and Executive Council approval.

Should the Governor and Executive Council determine to not authorize this Request, the vendors would not have sufficient resources to promote and provide the array of services necessary to provide individuals with substance use disorders the necessary tools to achieve, enhance and sustain recovery.

Area served: Statewide.

Source of Funds: 55.87% Federal Funds from the United States Department of Health and Human Services, Substance Abuse and Mental Health Services Administration, Substance Abuse Prevention and Treatment Block Grant, CFDA #93.959, Federal Award Identification Number TI010035-14, and 13.97% General Funds and 30.16% Other Funds from the Governor's Commission on Alcohol and Other Drug Abuse Prevention, Intervention and Treatment.

In the event that the Federal Funds become no longer available, General Funds will not be requested to support this program.

diagnostic or co-occurring conditions that limit his or her ability to resolve his or her problem(s). Treatment at a qualitatively different level of care or type of service, or discharge from treatment, is therefore indicated; or

b. Business Associate may use or disclose PHI:
   I. For the proper management and administration of the Business Associate;
   II. As required by law, pursuant to the terms set forth in paragraph d. below; or
   III. For data aggregation purposes for the health care operations of Covered Entity.

e. If the Covered Entity notifies the Business Associate that Covered Entity has agreed to be bound by additional restrictions over and above those uses or disclosures or security safeguards of PHI pursuant to the Privacy and Security Rule, the Business Associate shall be bound by such additional restrictions and shall not disclose PHI in violation of such additional restrictions and shall abide by any additional security safeguards.

(3) Obligations and Activities of Business Associate.

a. The Business Associate shall notify the Covered Entity's Privacy Officer immediately after the Business Associate becomes aware of any use or disclosure of protected health information not provided for by the Agreement including breaches of unsecured protected health information and/or any security incident that may have an impact on the protected health information of the Covered Entity.

b. The Business Associate shall immediately perform a risk assessment when it becomes aware of any of the above situations. The risk assessment shall include, but not be limited to:

The Business Associate shall complete the risk assessment within 48 hours of the breach and immediately report the findings of the risk assessment in writing to the Covered Entity.

c. The Business Associate shall comply with all sections of the Privacy, Security, and Breach Notification Rule.

d. Business Associate shall make available all of its internal policies and procedures, books and records relating to the use and disclosure of PHI received from, or created or received by the Business Associate on behalf of Covered Entity to the Secretary for purposes of determining Covered Entity's compliance with HIPAA and the Privacy and Security Rule.

f. j. Within ten (10) business days of receiving a written request from Covered Entity for a request for an accounting of disclosures of PHI, Business Associate shall make available to Covered Entity such information as Covered Entity may require to fulfill its obligations to provide an accounting of disclosures with respect to PHI in accordance with 45 CFR Section 164.528.

k. In the event any individual requests access to, amendment of, or accounting of PHI directly from the Business Associate, the Business Associate shall within two (2) business days forward such request to Covered Entity. Covered Entity shall have the responsibility of responding to forwarded requests. However, if forwarding the individual's request to Covered Entity would cause Covered Entity or the Business Associate to violate HIPAA and the Privacy and Security Rule, the Business Associate shall instead respond to the individual's request as required by such law and notify Covered Entity of such response as soon as practicable.

l. Within ten (10) business days of termination of the Agreement, for any reason, the Business Associate shall return or destroy, as specified by Covered Entity, all PHI received from, or created or received by the Business Associate in connection with the Agreement, and shall not retain any copies or back-up tapes of such PHI. If return or destruction is not feasible, or the disposition of the PHI has been otherwise agreed to in the Agreement, Business Associate shall continue to extend the protections of the Agreement, to such PHI and limit further uses and disclosures of such PHI to those purposes that make the return or destruction infeasible, for so long as Business

Associate maintains such PHI. If Covered Entity, in its sole discretion, requires that the Business Associate destroy any or all PHI, the Business Associate shall certify to Covered Entity that the PHI has been destroyed.

(4) Obligations of Covered Entity

a. Covered Entity shall notify Business Associate of any changes or limitation(s) in its Notice of Privacy Practices provided to Individuals in accordance with 45 CFR Section 164.520, to the extent that such change or limitation may affect Business Associate's use or disclosure of PHI.

c. Covered entity shall promptly notify Business Associate of any restrictions on the use or disclosure of PHI that Covered Entity has agreed to in accordance with 45 CFR 164.522, to the extent that such restriction may affect Business Associate's use or disclosure of PHI.

(5) Termination for Cause

In addition to Paragraph 10 of the standard terms and conditions (P-37) of this Agreement the Covered Entity may immediately terminate the Agreement upon Covered Entity's knowledge of a breach by Business Associate of the Business Associate Agreement set forth herein as Exhibit I. The Covered Entity may either immediately terminate the Agreement or provide an opportunity for Business Associate to cure the alleged breach within a timeframe specified by Covered Entity. If Covered Entity determines that neither termination nor cure is feasible, Covered Entity shall report the violation to the Secretary.

(6) Miscellaneous

a. Definitions and Regulatory References. All terms used, but not otherwise defined herein, shall have the same meaning as those terms in the Privacy and Security Rule, amended from time to time. A reference in the Agreement, as amended to include this Exhibit I, to a Section in the Privacy and Security Rule means the Section as in effect or as amended.

b. Amendment. Covered Entity and Business Associate agree to take such action as is necessary to amend the Agreement, from time to time as is necessary for Covered Entity to comply with the changes in the requirements of HIPAA, the Privacy and Security Rule, and applicable federal and state law.

c. Data Ownership. The Business Associate acknowledges that it has no ownership rights with respect to the PHI provided by or created on behalf of Covered Entity.

d. Interpretation. The parties agree that any ambiguity in the Agreement shall be resolved to permit Covered Entity to comply with HIPAA, the Privacy and Security Rule.

e. Segregation. If any term or condition of this Exhibit I or the application thereof to any person(s) or circumstance is held invalid, such invalidity shall not affect other terms or conditions which can be given effect without the invalid term or condition; to this end the terms and conditions of this Exhibit I are declared severable.

f. Survival. Provisions in this Exhibit I regarding the use and disclosure of PHI, return or destruction of PHI, extensions of the protections of the Agreement in section (3) I, the defense and indemnification provisions of section (3) e and Paragraph 13 of the standard terms and conditions (P-37), shall survive the termination of the Agreement.

INDEPENDENT AUDITORS' REPORT

To the Board of Directors of
Greater Nashua Council on Alcoholism

Report on the Financial Statements

We have audited the accompanying financial statements of Greater Nashua Council on Alcoholism, which comprise the statement of financial position as of June 30, 2018, and the related statements of activities, functional expenses, and cash flows for the year then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and

fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Greater Nashua Council on Alcoholism as of June 30, 2018, and the changes in net assets and its cash flows for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Report on Summarized Comparative Information

We have previously audited Greater Nashua Council on Alcoholism's fiscal year 2017 financial statements, and we expressed an unmodified audit opinion on those audited financial statements in our report dated January 10, 2018. In our opinion, the summarized comparative information presented herein as of and for the year ended June 30, 2017 is consistent, in all material respects, with the audited financial statements from which it has been derived.

Other Matters

Other Information

Our audit was conducted for the purpose of forming an opinion on the financial statements as a whole. The supplementary information is presented for purposes of additional analysis and is not a required part of the financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated in all material respects in relation to the financial statements as a whole.

Other Reporting Required by *Government Auditing Standards*

In accordance with *Government Auditing Standards*, we have also issued our report dated December 20, 2018 on our consideration of Greater Nashua Council on Alcoholism's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of Greater Nashua Council on Alcoholism's internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering Greater Nashua Council on Alcoholism's internal control over financial reporting and compliance.

1. Organization:

Greater Nashua Council on Alcoholism (the Organization) is a nonprofit organization providing recovery support services which are evidence-based, gender-specific, and culturally competent. Programs include residential, transitional housing, outpatient, intensive outpatient, family-based substance abuse services, pregnant and parenting women and children, and offender re-entry services initiative.

2. Summary of Significant Accounting Policies:

Comparative Financial Information

The accompanying financial statements include certain prior-year summarized comparative information in total, but not by net asset class. Such information does not include sufficient detail to constitute a presentation in conformity with accounting principles generally accepted in the United States of America (GAAP). Accordingly, such information should be read in conjunction with the audited financial statements for the year ended June 30, 2017, from which the summarized information was derived.

Cash and Cash Equivalents

All cash and highly liquid financial instruments with original maturities of three months or less, and which are neither held for nor restricted by donors for long-term purposes, are considered to be cash and cash equivalents.

Receivables, Net

Receivables, net consist primarily of noninterest-bearing amounts due for services and programs. The allowance for uncollectable receivables is based on historical experience, an assessment of economic conditions, and a review of subsequent collections. Receivables are written off when deemed uncollectable.

Property and Equipment

Property and equipment is reported in the Statement of Financial Position at cost, if purchased, and at fair value at the date of donation, if donated. Property and equipment is capitalized if it has a cost of $2,500 or more and a useful life when acquired of more than one year. Repairs and maintenance that do not significantly increase the useful life of the asset are expensed as

incurred. Depreciation is computed using the straight-line method over the estimated useful lives of the assets, as follows:

Land improvements	15 years
Building and improvements	30 years
Equipment	5 years
Furniture and fixtures	5 - 7 years
Software	3 years
Vehicles	5 years

Property and equipment is reviewed for impairment when a significant change in the asset's use or another indicator of possible impairment is present. No impairment losses were recognized in the financial statements in the current period.

Net Assets

Net assets, revenues, gains, and losses are classified based on the existence or absence of donor-imposed restrictions. Accordingly, net assets and changes therein are classified and reported as follows:

Unrestricted Net Assets – Net assets available for use in general operations.

Temporarily Restricted Net Assets – Net assets subject to donor restrictions that may or will be met by expenditures or actions and/or the passage of time. Contributions are reported as temporarily restricted support if they are received with donor stipulations that limit the use of the donated assets. When a donor restriction expires, that is, when a stipulated time restriction ends or purpose restriction is accomplished, temporarily restricted net assets are reclassified to unrestricted net assets and reported in the Statement of Activities as net assets released from restrictions.

Permanently Restricted Net Assets – Net assets whose use is limited by donor-imposed restrictions that neither expire by the passage of time nor can be fulfilled or otherwise removed.

The Organization has only unrestricted net assets.

Revenue and Revenue Recognition

Revenue is recognized when earned. Program service fees and payments under cost-reimbursable contracts received in advance are deferred to the applicable period in which the related services are performed or expenditures are incurred, respectively.

Accounting for Contributions

Contributions are recognized when received. All contributions are reported as increases in unrestricted net assets unless use of the contributed assets is specifically restricted by the donor. Amounts received that are restricted by the donor to use in future periods or for specific purposes are reported as increases in either temporarily restricted or permanently restricted net assets, consistent with the nature of the restriction. Unconditional promises with payments due in future years have an implied restriction to be used in the year the payment is due and, therefore, are reported as temporarily restricted until the payment is due unless the contribution is clearly intended to support activities of the current fiscal year or is received with permanent restrictions. Conditional promises, such as matching grants, are not recognized until they become unconditional, that is, until all conditions on which they depend are substantially met.

Gifts-in-Kind Contributions

The Organization periodically receives contributions in a form other than cash or investments. Contributed property and equipment is recognized as an asset at its estimated fair value at the date of gift, provided that the value of the asset and its estimated useful life meets the Organization's capitalization policy. Donated use of facilities is reported as contributions and as expenses at the estimated fair value of similar space for rent under similar conditions. If the use of the space is promised unconditionally for a period greater than one year, the contribution is reported as a contribution and an unconditional promise to give at the date of gift, and the expense is reported over the term of use. Donated supplies are recorded as contributions at the date of gift and as expenses when the donated items are placed into service or distributed.

The Organization benefits from personal services provided by a substantial number of volunteers. Those volunteers have donated significant amounts of time and services in the Organization's program operations and in its fundraising campaigns. However, the majority of the contributed services do not meet the criteria for recognition in financial statements. Generally Accepted Accounting Principles allow recognition of contributed services only if (*a*) the services create or enhance nonfinancial assets or (*b*) the services would have been purchased if not provided by contribution, require specialized skills, and are provided by individuals possessing those skills.

Grant Revenue

Grant revenue is recognized when the qualifying costs are incurred for cost-reimbursement grants or contracts or when a unit of service is provided for performance grants. Grant revenue from federal agencies is subject to independent audit under the Office of Management and Budget's, *Uniform Grant Guidance*, and review by grantor agencies. The review could result in the dis-

allowance of expenditures under the terms of the grant or reductions of future grant funds. Based on prior experience, the Organization's management believes that costs ultimately disallowed, if any, would not materially affect the financial position of the Organization.

Functional Allocation of Expenses

The costs of program and supporting services activities have been summarized on a functional basis in the Statement of Activities. The Statement of Functional Expenses presents the natural classification detail of expenses by function. Accordingly, certain costs have been allocated among the programs and supporting services benefited.

Income Taxes

Greater Nashua Council on Alcoholism has been recognized by the Internal Revenue Service (IRS) as exempt from federal income taxes under Internal Revenue Code (IRC) Section 501(a) as an organization described in IRC Section 501(c)(3), qualifies for charitable contribution deductions, and has been determined not to be a private foundation. The Organization is annually required to file a Return of Organization Exempt from Income Tax (Form 990) with the IRS. In addition, the Organization is subject to income tax on net income that is derived from business activities that are unrelated to its exempt purpose. In fiscal year 2018, the Organization was not subject to unrelated business income tax and did not file an Exempt Organization Business Income Tax Return (Form 990-T) with the IRS.

Estimates

The preparation of financial statements in conformity with Generally Accepted Accounting Principles requires estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Accordingly, actual results may differ from those estimates.

Financial Instruments and Credit Risk

Deposit concentration risk is managed by placing cash with financial institutions believed to be creditworthy. At times, amounts on deposit may exceed insured limits. To date, no losses have been experienced in any of these accounts. Credit risk associated with receivables is considered to be limited due to high historical collection rates.

Fair Value Measurements and Disclosures

Certain liabilities are reported at fair value in the financial statements. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction in the principal, or most advantageous, market at the measurement date under current market conditions regardless of whether that price is directly observable or estimated using another valuation technique. Inputs used to determine fair value refer broadly to the assumptions that market participants would use in pricing the asset or liability, including assumptions about risk. Inputs may be observable or unobservable. Observable inputs are inputs that reflect the assumptions market participants would use in pricing the asset or liability based on market data obtained from sources independent of the reporting entity. Unobservable inputs are inputs that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability based on the best information available. A three-tier hierarchy categorizes the inputs as follows:

Level 1 – Quoted prices (unadjusted) in active markets for identical assets or liabilities that are accessible at the measurement date.

Level 2 – Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. These include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability, and market-corroborated inputs.

Level 3 – Unobservable inputs for the asset or liability. In these situations, inputs are developed using the best information available in the circumstances.

When available, the Organization measures fair value using Level 1 inputs because they generally provide the most reliable evidence of fair value. However, Level 1 inputs are not available for many of the assets and liabilities that the Organization is required to measure at fair value (for example, unconditional contributions receivable and in-kind contributions).

The primary uses of fair value measures in the Organization's financial statements are:

- Initial measurement of noncash gifts, including gifts of investment assets and unconditional contributions receivable.
- Recurring measurement of due (to) from related organizations – Level 3.

2.8.5.3.3. Transfer/Discharge Criteria C: The patient has demonstrated a lack of capacity due to diagnostic or co-occurring conditions that limit his or her ability to resolve his or her problem(s). Treatment at a qualitatively different level of care or type of service, or discharge from treatment, is therefore indicated; or

EXPLANATION

Action #1)

Requested Action #1 is **retroactive** because the Department and FIT/NHNH, Inc. were continuing to work on the scope of work and therefore, the contract was not completed in time to place the item on the agenda for the June 20, 2018 Governor and Executive Council meeting. The contract with Greater Nashua Council on Alcoholism and Hope on Haven Hill are being submitted after the release of audit reports to allow for Council review prior to entering into an Agreement, and to add contract monitoring language to address the audit findings. If these actions were not taken retroactively, the result would have been a gap in critical substance use disorder treatment and recovery support services in the State's two largest cities.

The Department requests approval of three (3) agreements. Ten (10) agreements were previously approved by Governor and Executive Council on June 20, 2018 Late Item G. These agreements will allow the Vendors listed to provide an array of Substance Use Disorder Treatment and Recovery Support Services statewide to children and adults with substance use disorders, who have income below 400% of the Federal Poverty level and are residents of New Hampshire or are homeless in New Hampshire. Substance use disorders occur when the use of alcohol and/or drugs causes clinically and functionally significant impairment, such as health problems, disability, and failure to meet major responsibilities at work, school, or home. The existence of a substance use disorder is determined using a clinical evaluation based on Diagnostic and Statistical Manual of Mental Disorders, Fifth Edition criteria.

These Agreements are part of the Department's overall strategy to respond to the opioid epidemic that continues to negatively impact New Hampshire's individuals, families, and communities as well as to respond to other types of substance use disorders. Under the current iteration of these contracts, fifteen (15) vendors are delivering an array of treatment services, including individual and group outpatient, intensive outpatient, partial hospitalization, transitional living, high and low intensity residential, and ambulatory and residential withdrawal management services as well as ancillary recovery support services. While the array of services offered by each vendor varies slightly, together they enrolled 2994 individuals in service groups covered by the contract between May 1, 2017 and April 30, 2018. In 2016 there were 485 drug overdose deaths in New Hampshire with the death toll for 2017 at 428 as of April 20, 2018; however, the 2017 statistics are expected to increase slightly as cases are still pending analysis. This reduction in deaths indicates that the overall strategy including prevention, intervention, treatment, and recovery support services may be having a positive impact.

The Department published a Request for Applications for Substance Use Disorder Treatment and Recovery Support Services (RFA-2019-BDAS-01-SUBST) on the Department of Health and Humans Services website April 20, 2018 through May 10, 2018. The Department received sixteen (16) applications. These proposals were reviewed and scored by a team of individuals with program specific knowledge. The Department selected fourteen applications (two (2) submitted by Grafton County were combined into one contract) to provide these services (See attached Summary Score Sheet).

Some of the Vendors' applications scored lower than anticipated; however, this was largely due to the Vendors providing a limited array of services and not to their experience and/or capacity to provide those services. In addition the Bureau of Drug and Alcohol Services is working with the Bureau of Improvement and Integrity to improve the contract monitoring and quality improvement process as well as taking steps to reposition staff to assist with this.

The Contract includes language to assist pregnant and parenting women by providing interim services if they are on a waitlist; to ensure clients contribute to the cost of services by assessing client income at intake and on a monthly basis; and to ensure care coordination for the clients by assisting them with accessing services or working with a client's existing provider for physical health, behavioral health, medication assisted treatment and peer recovery support services.

The Department will monitor the performance of the Vendors through monthly and quarterly reports, conducting site visits, reviewing client records, and engaging in activities identified in the contract monitoring and quality improvement work referenced above. In addition, the Department is collecting baseline data on access, engagement, clinical appropriateness, retention, completion, and outcomes that will be used to create performance improvement goals in future contracts. Finally, contractor financial health is also being monitored monthly.

All thirteen (13) contracts include language that reserves the right to renew each contract for up to two (2) additional years, subject to the continued availability of funds, satisfactory performance of contracted services and Governor and Executive Council approval.

Should the Governor and Executive Council determine to not authorize this Requested Action #1, the vendors would not have sufficient resources to promote and provide the array of services necessary to provide individuals with substance use disorders the necessary tools to achieve, enhance and sustain recovery.

Action #2)

Requested Action #2 seeks approval to amend ten (10) of the thirteen (13) agreements for the provision of substance use disorder treatment and recovery support services by modifying the scope to reduce the burden on the vendors in meeting contract requirements.

The changes to the contracts include removal of the requirement to continue providing services after the contract price limitation is reached, allowing for assistance to clients enrolling in insurance through the use of referrals to trained community providers, and an easing of supervision requirements that is not expected to negatively impact client care. Corrective action for compliance audits was also included. The changes were also made to the three (3) contracts being put forth in Action #1. These changes are being made as a part of the Department's response to provider's concerns over reimbursement rates with the goal of reducing the gap between the cost of providing services and the rate paid by the Department by reducing the administrative burden associated with service delivery without compromising client care.

These contracts were originally competitively bid.

Should the Governor and Executive Council determine to not authorize this Request Action #2, the gap between the cost of care and reimbursement rates will remain the same, which vendors have indicated may result in having to limit services provided under this contract. In addition, there would not be a requirement of a corrective actions plan should there be an audit which does not allow for a system to assist with improvement in services provided.

Area served: Statewide.

Source of Funds: 55.87% Federal Funds from the United States Department of Health and Human Services, Substance Abuse and Mental Health Services Administration, Substance Abuse Prevention and Treatment Block Grant, CFDA #93.959, Federal Award Identification Number TI010035-14, and 13.97% General Funds and 30.16% Other Funds from the Governor's Commission on Alcohol and Other Drug Abuse Prevention, Intervention and Treatment.

In the event that the Federal Funds become no longer available, General Funds will not be requested to support this program.

INSTRUCTIONS FOR CERTIFICATION

1. By signing and submitting this proposal (contract), the prospective primary participant is providing the certification set out below.

2. The inability of a person to provide the certification required below will not necessarily result in denial of participation in this covered transaction. If necessary, the prospective participant shall submit an explanation of why it cannot provide the certification. The certification or explanation will be considered in connection with the NH Department of Health and Human Services' (DHHS) determination whether to enter into this transaction. However, failure of the prospective primary participant to furnish a certification or an explanation shall disqualify such person from participation in this transaction.

3. The certification in this clause is a material representation of fact upon which reliance was placed when DHHS determined to enter into this transaction. If it is later determined that the prospective primary participant knowingly rendered an erroneous certification, in addition to other remedies available to the Federal Government, DHHS may terminate this transaction for cause or default.

4. The prospective primary participant shall provide immediate written notice to the DHHS agency to whom this proposal (contract) is submitted if at any time the prospective primary participant learns that its certification was erroneous when submitted or has become erroneous by reason of changed circumstances.

5. 7. The prospective primary participant further agrees by submitting this proposal that it will include the clause titled "Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion - Lower Tier Covered Transactions," provided by DHHS, without modification, in all lower tier covered transactions and in all solicitations for lower tier covered transactions.

8. A participant in a covered transaction may rely upon a certification of a prospective participant in a lower tier covered transaction that it is not debarred, suspended, ineligible, or involuntarily excluded from the covered transaction, unless it knows that the certification is erroneous. A participant may decide the method and frequency by which it determines the eligibility of its principals. Each participant may, but is not required to, check the Nonprocurement List (of excluded parties).

9. Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render in good faith the certification required by this clause. The knowledge and

information of a participant is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.

10. Except for transactions authorized under paragraph 6 of these instructions, if a participant in a covered transaction knowingly enters into a lower tier covered transaction with a person who is suspended, debarred, ineligible, or voluntarily excluded from participation in this transaction, in addition to other remedies available to the Federal government, DHHS may terminate this transaction for cause or default.
