Contracts for Program Services			

EXPLANATION

This contract is **sole source** because the PMC is the exclusive national organization that is the source of the Pyramid Model Framework, the evidence-based framework that supports social-emotional competence in infants and young children, in which the work of State Systemic Improvement Plan (SSIP) is grounded. The PMC members include the original authors of the Framework and they are the only provider of validating the assessors of the fidelity tool that monitors implementation practices.

Since early 2015, the PMC has provided the NH Department of Education technical assistance to support the development of a cross-sector, statewide Pyramid Model leadership team that informs and supports our State Systemic Improvement Plan which is focused on improving the social-emotional outcomes for preschool children with disabilities. Their expertise and national perspective in implementing the Pyramid Model Framework is unique to their organization as they partner with 28 other states doing similar work. The purpose of this contract is for the PMC

His Excellency, Governor Christopher T. Sununu
and the Honorable Council

to provide state-level support to expand opportunities and access for increased school district participation in Pyramid Model implementation. The PMC will collaborate with state leadership to expand the current capacity of the Master Cadre of trainers and practice-based coaches to include the specific expertise needed to support school districts serving preschoolers with special needs. This will include training and support for the development of NH-based Pyramid Model Practice-based Coaches, coaching implementation and practice-level fidelity assessment within additionally identified school districts engaged in the work of the State Systemic Improvement Plan (SSIP).

In the event that the Federal Funds become no longer available, General Funds will not be requested to support this program.

Respectfully submitted,

Frank Edelblut
Commissioner of Education
