Community & School Partners (C&SP) will provide the following services to the New Hampshire Department of Education effective upon Governor & Council approval through December 31, 2021:

Analyze the existing ESS application's architecture, functionality, and administrative capabilities to understand current strengths and weaknesses

Create a new ESS application that is web based and has the following abilities:

- Design the application so there can be multiple administrators.
 - The Lead Admin would have overall responsibility for the application.
 - Each bureau within the DOE will have a Bureau Admin that is responsible for managing their surveys. The Bureau Admins will be able to add to/modify the pool of questions and other configuration settings (e.g. user access) for their surveys.
 - Bureau Admins would manage one or more surveys with the Lead Admin having full rights to all surveys.
- Provide a bank of questions that the Lead and Bureau Admins can leverage to create/modify the survey
- Provide a band of validations so as to not duplicate one validation in several places
- Provide survey functionality to include:
 - The ability for the Lead and Bureau Admins to:
 - Upload/import questions
 - Modify questions once they have been added to a survey
 - Ability to save, submit and certify (if needed)
 - Skip logic for questions
 - Prepopulate summary data in surveys
 - Ability for users to run reports to pull the data from prior years by links within the survey
- Link the survey mailing lists to the mailing lists (e.g. superintendent list) in the DOE's common database (this is where the DOE's master data is located.)

- Provide the Lead and Bureau Admins with the ability to create validations on the survey fields
 - Dynamic validations (e.g. decision trees, control totals based on inputs, etc.)
 - Ability to have fields on survey that summarize data inputs (e.g. user enters number of staff per grade and a total row in the survey is then displayed automatically)
 - Data type
 - Comparisons to prior surveys (could be link)
- Provide the Lead and Bureau Admins with scheduling functionality:
 - Admins can schedule the surveys
 - Admins can create and schedule the reminder messages
- Security
 - Leverage the existing application security
 - Provide the Lead and Bureau Admins with the ability to maintain the security:
 - Role based
 - Single Sign on (SSO)
- Provide logging capabilities (i.e. who, what, when, where). We want to know what was changed along with who made the change and when, and to which survey.

Deploy the new ESS application.

- Assist with transition to the new ESS application
- Work with DOE staff to re-create existing the surveys in the new application
- Document all system changes to support end-user knowledge.

Training - Prepare administrators/users adequately to use the new system from the day of deployment, including maximum knowledge transfer to allow the administrators to conduct training in the future

Specific tasks may be altered upon request of the NH DOE Division Director.

Other requirements:

- Source control repository used throughout the project to store and version code
- Utilize the State of New Hampshire virtual private network/secure network internet access for communicating with the DOE's hardware
- Participate in Bureau and DOE meetings to share information as required
- Work collaboratively with state information technology developers and database administrators, and other project team members
- Every two weeks, provide the DOE project manager reports that document the work accomplished and a log of the time spent
- Work with DoIT resources to insure best practices in terms of development methodology, appropriate lifecycle management and production change management notification.
