EXPLANATION

The purpose of this request is to provide unlimited telephone support and on-site services and repairs for the Panasonic Thermoluminescent Dosimeter Reader UD-716AGL, used by the Public Health Laboratories Radiochemistry Laboratory to analyze environmental samples collected in the vicinity of the Seabrook Station Nuclear Plant, as well as other locations, statewide.

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 2 of 2

In the event of a radiological emergency at the nuclear power plant, the Radiochemistry Laboratory within the Public Health Laboratory would assume the lead role for the coordination and analysis of environmental samples in the State of New Hampshire. The routine data collected prior to a radiological emergency constitutes the baseline data. The baseline data is used for comparison against samples collected during an emergency. Maintaining the Thermoluminescent Dosimeter Reader in a ready and operating condition is a key to supporting the analysis of post emergency samples. This is an essential component of the New Hampshire Nuclear Emergency Response Plan (NHNERP) mandated by NH RSA 107-B.

The Department will monitor the effectiveness of contract services required under this agreement using the following performance measures:

- The Contractor will respond to on-site service requests within two (2) business days.
- The Contractor will perform two (2) scheduled on-site Preventative Maintenance (PM) visits per twelve (12) month period, scheduled by the Department, at a time mutually convenient to the Contractor and the Department.

The Department selected the Contractor through a competitive bid process using a Request for Bids (RFB) that was posted on the Department's website from 12/30/2020 through 2/3/2021.

As referenced in Exhibit A of the attached contract, the parties have the option to extend the agreement for up to one (1) additional year, contingent upon satisfactory delivery of services, available funding, agreement of the parties, and Governor and Council approval.

Should the Governor and Council not authorize this request, the Thermoluminescent Dosimeter Reader would be without a service contract for maintenance and repair. If the Thermoluminescent Dosimeter Reader were to become inoperable, laboratory staff is not capable of initiating repairs. The laboratory would not be able to analyze environmental samples for routine monitoring or emergency response, putting the health of New Hampshire citizens at risk.

Area served: Statewide

In the event that the Other Funds become no longer available, General Funds will not be requested to support this program.

Respectfully submitted,

If necessary, the prospective participant shall submit an explanation of why it cannot provide the certification. The certification or explanation will be considered in connection with the NH Department of Health and Human Services' (DHHS) determination whether to enter into this transaction. However, failure of the prospective primary participant to furnish a certification or an explanation shall disqualify such person from participation in this transaction.
3. The certification in this clause is a material representation of fact upon which reliance was placed when DHHS determined to enter into this transaction. If it is later determined that the prospective primary participant knowingly rendered an erroneous certification, in addition to other remedies available to the Federal Government, DHHS may terminate this transaction for cause or default.

The prospective primary participant shall provide immediate written notice to the DHHS agency to whom this proposal (contract) is submitted if at any time the prospective primary participant learns that its certification was erroneous when submitted or has become erroneous by reason of changed circumstances.

A participant may decide the method and frequency by which it determines the eligibility of its principals. Each participant may, but is not required to, check the Nonprocurement List (of excluded parties).
9. Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render in good faith the certification required by this clause. The knowledge and

- l. Within ten (10) business days of termination of the Agreement, for any reason, the Business Associate shall return or destroy, as specified by Covered Entity, all PHI received from, or created or received by the Business Associate in connection with the Agreement, and shall not retain any copies or back-up tapes of such PHI.
