Dept Environmental Services, DWSRF Loan Management, Training of Providers

EXPLANATION

The State of New Hampshire requires the 1,205 public water systems to have certified drinking water operators. These operators must have a requisite amount of experience and education and must pass an exam to become certified. Certification of Water Works Operators administrative rules, Env-Dw 502, further requires certified drinking water operators to attain a minimum amount of continuing education to be eligible to maintain and renew their certifications. DES conducted surveys of drinking water operators, public water system owners and managers, and held numerous meetings with the various training organizations, to determine how to best meet current and future training needs of the NH drinking water industry. With this input, DES developed a training approach that identified training goals, needs, and types. This approach supports the need to certify and maintain certification for these public health professionals.

His Excellency, Governor Christopher T. Sununu

And the Honorable Council

Page 2

DES solicited proposals through posting on the NH Department of Administrative Services website and direct correspondence with training providers to train water system operators of very small water systems, those serving fewer than 500 people. DES selected the NHWWA, the sole bidder, for the very small water system training program. NHWWA is a non-profit association and has many years of experience in training New Hampshire drinking water operators. NHWWA also has knowledge of State and Federal drinking water regulations, demonstrated training experience, and knowledge of water system operations.

This agreement has been approved as to form, substance, and execution by the Office of Attorney General.

We respectfully request your approval.

Robert R. Scott, Commissioner

Notice: This agreement and all of its attachments shall become public upon submission to Governor and Executive Council for approval. Any information that is private, confidential or proprietary must be clearly identified to the agency and agreed to in writing prior to signing the contract.
