EXPLANATION

The purpose of this request is to clarify requirements related to staffing and coordination of care; to attach Exhibit L, ASAM End User Agreement; to clarify payment terms for all Contractors; to update terms specific to 42 CFR Part 2, substance use treatment confidentiality regulations within the Exhibit I, Health Insurance Portability and Accountability Act Business Associate Agreement; to revise the funding allocations for Bridge Street Recovery and for the Manchester Alcoholism Rehabilitation Center; and to increase funding to Contractors with transitional living programs.

The clarified staffing requirements will allow Contractors to hire and utilize Licensed Supervisors, in accordance with the original requirements of the related Request for Proposals (RFP) for these services. The original contracts referred to the position as a Licensed Clinical Supervisor based on a specific type of license issued by the New Hampshire Office of Professional Licensure and Certification, Board of Licensing for Alcohol and Other Drug Use Professionals, which is not required under these contracts. The Licensed Supervisor is equally qualified to the Licensed Clinical Supervisor to provide supervision services.

Additional language around coordination of care will require Contractors to use a Department-approved referral system to connect individuals to health and social services providers as needed.

Exhibit L, ASAM End User Agreement, which details policy regarding Contractors' promotion or marketing of the American Society of Addiction Medicine (ASAM) criteria or utilization of language related to ASAM levels of care, will ensure Contractor compliance with ASAM requirements relative to utilization of such language. Should the Governor and Council not authorize this request, Contractors that market or promote their utilization of ASAM criteria or levels of care will be out of compliance with the End User Agreement Policy required by ASAM.

The clarified detailed payment process for all Contractors will ensure compliance with federal funding requirements. Should Governor and Council not authorize this request, Contractors that receive State Opioid Response funding through these agreements may not be able to accurately invoice for program-related expenses, which may put the Department in violation of federal funding agreements.

Revising the funding allocation for Bridge Street Recovery is necessary because the initial funding award amount for the organization was based their provision of multiple services under this agreement. The Contractor has chosen to only provide Transitional Living (TLP) Services under this agreement, resulting in the funding decrease.

Revising the funding allocation for the Manchester Alcoholism Rehabilitation Center is necessary because the initial funding award amount for Manchester Alcoholism Rehabilitation Center was based on the number of licensed beds available at its facilities for services within this scope of work. The Contractor has chosen to reduce the number of licensed beds available for these services, resulting in a decrease in funding. The types of services available through Manchester Alcoholism Rehabilitation Center remain unchanged.

The funding made available by the decrease will be utilized for a future procurement, for substance use disorder residential and outpatient treatment and recovery services for the general public, as well as for pregnant and parenting women. The new procurement will serve approximately 450 individuals. Should the Governor and Council not authorize this request, the Department will not be able to utilize this funding for the new procurement to address known service gaps, including in the Greater Nashua Area.

Adding funding to Contractors with transitional living programs is necessary, due to the increasing lack of affordable housing and increasing acuity of substance use disorders in the state, exacerbated by the COVID-19 pandemic. Individuals with substance use disorders have a greater need for stable, affordable housing, where they can continue to receive treatment services. Transitional living programs are not covered by Medicaid, and these funds will be used to provide this service to the most vulnerable individuals; individuals who have an income below 400% of the poverty level; are residents of NH or experiencing homelessness in NH; and who are in need of ongoing substance use disorder treatment in a safe and sober environment.

Contractors will continue to provide an array of treatment and recovery support services with statewide access, ensuring individuals with a substance use disorder receive the appropriate type of treatment and have access to continued and expanded levels of care, which increase individuals' abilities to achieve and maintain recovery. Approximately 7000 individuals will continue to be served over the next two (2) years through all 11 contracts.

The Department will continue to monitor services through monthly, quarterly, and annual reporting, as well as through audits by the Department of individual providers. An annual overarching evaluation of all Bureau of Drug and Alcohol Services (BDAS) funded providers will look at all collected data, including the demographic and outcome data collected from the Web Information Technology System (WITS). This will help to ensure:

- Services provided reduce the negative impacts of substance misuse.
- Contractors make continuing care, transfer, and discharge decisions based on American Society of Addiction Medicine (ASAM) Criteria.
- Contractors treat individuals using evidence-based practices and follow best practices with fidelity.
- Contractors achieve initiation, engagement, and retention goals as detailed in the agreements.

As referenced in Exhibit A, Revisions to Standard Agreement Provisions, of the original agreements, the parties have the option to extend the agreements for up to four (4) additional years, contingent upon satisfactory delivery of services, available funding, agreement of the parties, and Governor and Council approval. The Department is not exercising its option to renew at this time.

Area served: Statewide

Source of Funds: Substance Abuse Prevention and Treatment Block Grant, CFDA 93.959 FAIN TI083464 and State Opioid Response Grant, CFDA # 93.788, FAIN TI083326.

In the event that the Federal or Other Funds become no longer available, General Funds will not be requested to support this program.

Respectfully submitted,

Lori A. Shibinette
Commissioner

INDEPENDENT AUDITOR'S REPORT

To the Board of Directors of
Southeastern New Hampshire
Alcohol & Drug Abuse Services and Affiliate
Dover, New Hampshire

We have audited the accompanying consolidated financial statements of Southeastern New Hampshire Alcohol & Drug Abuse Services (a nonprofit organization) and affiliate, which comprise the consolidated statements of financial position as of June 30, 2021 and 2020, and the related consolidated statements of activities and changes in net assets, functional expenses, and cash flows for the years then ended, and the related notes to the consolidated financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Nature of Organization & Activities:

Southeastern New Hampshire Alcohol & Drug Abuse Services (the "Organization"), is a non-profit organization formed under the laws of the State of New Hampshire in 1979, dedicated to helping people recover from addictive disorders thru programs that focus on substance use disorders as chronic, progressive, biological, psychological and social in nature.

Southeastern New Hampshire Alcohol & Drug Abuse Services Foundation (the "Affiliate"), is a non-profit organization formed under the laws of the State of New Hampshire in 2004 for the purpose to raise funds for the Organization.

Note 1 - Summary of Significant Accounting Principles:

Method of Accounting

The accompanying consolidated financial statements have been prepared using the accrual basis of accounting, in accordance with accounting principles generally accepted in the United States of America. Revenues are recorded when earned and expenses are recorded when the obligation is incurred.

Consolidation Policy

The consolidated financial statements include the accounts of Southeastern New Hampshire Alcohol & Drug Abuse Services and Southeastern New Hampshire Alcohol & Drug Abuse Services Foundation. All significant intercompany transactions are eliminated in the consolidated financial statements.

The Foundation, due to substantial control by the Organization, is consolidated in these financial statements.

Basis of Presentation

The Organization presents information regarding its financial position and activities according to Accounting Standards Update (ASU) 2016-14, *Not-for-Profit Entities (Topic 958): Presentation of Financial Statements of Not-for-Profit Entities.* The amendments in this ASU make improvements to the information provided in the financial statements and notes for not-for-profit entities. In accordance with the update, the Organization reports information regarding its financial position and activities according to two classes of net assets: net assets without donor restrictions and net assets with donor restrictions.

Note 1 – Summary of Significant Accounting Principles - Continued:

Basis of Presentation – continued

Net Assets without Donor Restrictions – These net assets generally result from revenues generated by receiving contributions that have no donor restrictions, providing services, and receiving interest from operating investments, less expenses incurred in providing program related services, raising contributions, and performing administrative functions.

Net Assets with Donor Restrictions – These net assets result from gifts of cash and other assets that are received with donor stipulations that limit the use of the donated assets, either temporarily or permanently, until the donor restriction expires, that is until the stipulated time restriction ends or the purpose of the restriction is accomplished, the net assets are restricted.

Use of Estimates in the Preparation of Financial Statements

Management uses estimates and assumptions in preparing these consolidated financial statements in accordance with generally accepted accounting principles. Those estimates and assumptions affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities, and the reported revenues and expenses. Actual results could vary from the estimates that were used.

Cash and Cash Equivalents

For purposes of the consolidated statement of cash flows, the Organization considers all highly liquid deposits with maturity of three months or less to be cash and/or cash equivalents.

Income Taxes

The Organization and the Affiliate is exempt from Federal Income Tax under Section 501(c)(3) of the Internal Revenue Code. There are no state income taxes due to the fact that the State of New Hampshire recognizes Section 501(c)(3) for exemption of organizations that are organized and operated exclusively for religious, charitable, scientific, literary, or educational purposes. The Organization's evaluation on June 30, 2021 revealed no uncertain tax positions that would have a material impact of the financial statements.

The Organization's information returns are subject to possible examination by the taxing authorities. For federal purposes the returns essentially remain open for possible examination for a period of three years after the respective filing deadlines of those returns.

Note 1 – Summary of Significant Accounting Principles - Continued:

Fixed Assets

Property and equipment are carried at cost and donations of property and equipment are recorded as support at fair value at the time of the gift. Acquisitions of property and equipment in excess of $1,500 that meet the capitalization requirements are capitalized. Depreciation is computed using the straight-line method based on the assets' estimated useful lives. When assets are retired or otherwise disposed of, the cost and related accumulated depreciation are removed from the accounts, and any resulting gain or loss is recognized. The cost of maintenance and repairs is charged to operations as incurred; significant renewals and betterments are capitalized. The breakdown of assets relevant to useful life is as follows:

Description	Method	Life
Furniture and Fixtures	Straight-Line	5-7 years
Equipment	Straight-Line	3-5 years
Buildings and Improvements	Straight-Line	5-39 years

Accounts Receivable

Accounts receivable are reported at net realizable value. Net realizable value is equal to the gross amount of receivables less an estimated allowance for uncollectible accounts. The Organization determines an allowance for doubtful accounts based on historical experience and assessment and review of subsequent collections. The balance for allowance for doubtful accounts at June 30, 2021 and 2020 is $8,677 and $8,958, respectively.

Contributions with Donor Restrictions

The Organization's policy is to report contributions with donor restrictions that are met in the same reporting period, as contributions without donor restrictions, since under said circumstances, there is no effect to reported net assets with donor restrictions.

Advertising

The Organization follows the policy of charging the costs of advertising to expense as they are incurred. Advertising expenses were $0 and $694 for the year ended June 30, 2021 and 2020.

Functional Allocation of Expenses

The costs of the Organization's programs and supporting services have been reported on a functional basis in the Statement of Functional Expenses. Expenses are charged to each program based on direct expenses incurred. Any program expenses not directly chargeable to a program are allocated based on prescribed indirect cost allocation.

New Accounting Pronouncements

Topic 606

The Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2014-09, *Revenue from Contracts with Customers (Topic 606).* The core principle of ASU 2014-09 is to recognize revenue when the promised goods or services due are transferred to customers in an amount that reflects the consideration that is expected to be received for those goods or services. FASB issued a limited deferral of the effective date to implement the ASU for one year, for years beginning after December 15, 2020. Management will be evaluating the potential impact the pronouncement will have on the financial statements, if any.

Topic 842

This standard is effective for the company for the year beginning December 15, 2022. Management will be evaluating the potential impact the pronouncement will have on the financial statements, if any.

Funds are available in the following accounts for State Fiscal Years 2022 and 2023, and are anticipated to be available in State Fiscal Year 2024, upon the availability and continued appropriation of funds in the future operating budget, with the authority to adjust budget line items within the price limitation and encumbrances between state fiscal years through the Budget Office, if needed and justified.

See attached fiscal details.

EXPLANATION

The purpose of this request is to provide Substance Use Disorder Treatment and Recovery Supports Services statewide to New Hampshire residents who have income below 400% of the Federal Poverty Level, and are uninsured or underinsured.

The Contractors will provide statewide access to an array of treatment services, including individual and group outpatient services; intensive outpatient services; partial hospitalization; ambulatory withdrawal management services; transitional living services; high and low intensity residential treatment services; specialty residential services; and integrated medication assisted treatment. The Contractors will ensure individuals with a substance use disorder receive the appropriate type of treatment and have access to continued and expanded levels of care, which will increase the ability of individuals to achieve and maintain recovery. The Contractors will also assist eligible individuals with enrolling in Medicaid while receiving treatment, and the Department will serve as the payer of last resort.

Approximately 7,000 individuals will receive services over the next two years.

The Department will monitor services through monthly, quarterly, and annual reporting to ensure the Contractors:

- Provide services that reduce the negative impacts of substance misuse.
- Make continuing care, transfer and discharge decisions based on American Society of Addiction Medicine (ASAM) criteria.
- Treat individuals using Evidence Based Practices and follow best practices.
- Achieve initiation, engagement, and retention goals as required by the Department.

The Department selected the Contractors through a competitive bid process using a Request for Proposals (RFP) that was posted on the Department's website from July 20, 2021 through August 19, 2021. The Department received twelve (12) responses that were reviewed and scored by a team of qualified individuals. The Scoring Sheet is attached. This request represents ten (10) of twelve (12) contracts for Substance Use Disorder Treatment and Recovery Supports Services. The Department anticipates presenting two (2) additional contracts at a future Governor and Executive Council meeting for approval.

As referenced in Exhibit A, Revisions to Standard Agreement Provisions of the attached agreements, the parties have the option to extend the agreements for up to four (4) additional years, contingent upon satisfactory delivery of services, available funding, agreement of the parties, and Governor and Council approval.

Should the Governor and Council not authorize this request, individuals in need of Substance Use Disorder Treatment and Recovery Supports Services may not receive the treatment, tools, and education required to enhance and sustain recovery that, in some cases, prevents untimely deaths.

CERTIFICATION REGARDING DEBARMENT, SUSPENSION AND OTHER RESPONSIBILITY MATTERS

The Contractor identified in Section 1.3 of the General Provisions agrees to comply with the provisions of Executive Office of the President, Executive Order 12549 and 45 CFR Part 76 regarding Debarment, Suspension, and Other Responsibility Matters, and further agrees to have the Contractor's representative, as identified in Sections 1.11 and 1.12 of the General Provisions execute the following Certification:

INSTRUCTIONS FOR CERTIFICATION

1. By signing and submitting this proposal (contract), the prospective primary participant is providing the certification set out below.

2. The inability of a person to provide the certification required below will not necessarily result in denial of participation in this covered transaction. If necessary, the prospective participant shall submit an explanation of why it cannot provide the certification. The certification or explanation will be considered in connection with the NH Department of Health and Human Services' (DHHS) determination whether to enter into this transaction. However, failure of the prospective primary participant to furnish a certification or an explanation shall disqualify such person from participation in this transaction.

3. The certification in this clause is a material representation of fact upon which reliance was placed when DHHS determined to enter into this transaction. If it is later determined that the prospective primary participant knowingly rendered an erroneous certification, in addition to other remedies available to the Federal Government, DHHS may terminate this transaction for cause or default.

4. The prospective primary participant shall provide immediate written notice to the DHHS agency to whom this proposal (contract) is submitted if at any time the prospective primary participant learns that its certification was erroneous when submitted or has become erroneous by reason of changed circumstances.

5. The terms "covered transaction," "debarred," "suspended," "ineligible," "lower tier covered transaction," "participant," "person," "primary covered transaction," "principal," "proposal," and "voluntarily excluded," as used in this clause, have the meanings set out in the Definitions and Coverage sections of the rules implementing Executive Order 12549: 45 CFR Part 76. See the attached definitions.

6. The prospective primary participant agrees by submitting this proposal (contract) that, should the proposed covered transaction be entered into, it shall not knowingly enter into any lower tier covered transaction with a person who is debarred, suspended, declared ineligible, or voluntarily excluded from participation in this covered transaction, unless authorized by DHHS.

7. The prospective primary participant further agrees by submitting this proposal that it will include the clause titled "Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion - Lower Tier Covered Transactions," provided by DHHS, without modification, in all lower tier covered transactions and in all solicitations for lower tier covered transactions.

8. A participant in a covered transaction may rely upon a certification of a prospective participant in a lower tier covered transaction that it is not debarred, suspended, ineligible, or involuntarily excluded from the covered transaction, unless it knows that the certification is erroneous. A participant may decide the method and frequency by which it determines the eligibility of its principals. Each participant may, but is not required to, check the Nonprocurement List (of excluded parties).

9. Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render in good faith the certification required by this clause. The knowledge and

information of a participant is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.

10. Except for transactions authorized under paragraph 6 of these instructions, if a participant in a covered transaction knowingly enters into a lower tier covered transaction with a person who is suspended, debarred, ineligible, or voluntarily excluded from participation in this transaction, in addition to other remedies available to the Federal government, DHHS may terminate this transaction for cause or default.

PRIMARY COVERED TRANSACTIONS

11. The prospective primary participant certifies to the best of its knowledge and belief, that it and its principals:
    - 11.1. are not presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from covered transactions by any Federal department or agency;
    - 11.2. have not within a three-year period preceding this proposal (contract) been convicted of or had a civil judgment rendered against them for commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a public (Federal, State or local) transaction or a contract under a public transaction; violation of Federal or State antitrust statutes or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, or receiving stolen property;
    - 11.3. are not presently indicted for otherwise criminally or civilly charged by a governmental entity (Federal, State or local) with commission of any of the offenses enumerated in paragraph (l)(b) of this certification; and
    - 11.4. have not within a three-year period preceding this application/proposal had one or more public transactions (Federal, State or local) terminated for cause or default.

12. Where the prospective primary participant is unable to certify to any of the statements in this certification, such prospective participant shall attach an explanation to this proposal (contract).

LOWER TIER COVERED TRANSACTIONS

13. By signing and submitting this lower tier proposal (contract), the prospective lower tier participant, as defined in 45 CFR Part 76, certifies to the best of its knowledge and belief that it and its principals:
    - 13.1. are not presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participation in this transaction by any federal department or agency.
    - 13.2. where the prospective lower tier participant is unable to certify to any of the above, such prospective participant shall attach an explanation to this proposal (contract).

f. Within five (5) business days of receipt of a written request from Covered Entity, Business Associate shall make available during normal business hours at its offices all records, books, agreements, policies and procedures relating to the use and disclosure of PHI to the Covered Entity, for purposes of enabling Covered Entity to determine Business Associate's compliance with the terms of the Agreement.

j. Within ten (10) business days of receiving a written request from Covered Entity for a request for an accounting of disclosures of PHI, Business Associate shall make available to Covered Entity such information as Covered Entity may require to fulfill its obligations to provide an accounting of disclosures with respect to PHI in accordance with 45 CFR Section 164.528.

k. In the event any individual requests access to, amendment of, or accounting of PHI directly from the Business Associate, the Business Associate shall within two (2) business days forward such request to Covered Entity. Covered Entity shall have the responsibility of responding to forwarded requests. l. Within ten (10) business days of termination of the Agreement, for any reason, the Business Associate shall return or destroy, as specified by Covered Entity, all PHI received from, or created or received by the Business Associate in connection with the Agreement, and shall not retain any copies or back-up tapes of such PHI. If return or destruction is not feasible, or the disposition of the PHI has been otherwise agreed to in the Agreement, Business Associate shall continue to extend the protections of the Agreement, to such PHI and limit further uses and disclosures of such PHI to those purposes that make the return or destruction infeasible, for so long as Business

Associate maintains such PHI. If Covered Entity, in its sole discretion, requires that the Business Associate destroy any or all PHI, the Business Associate shall certify to Covered Entity that the PHI has been destroyed.

(4) Obligations of Covered Entity

a. Covered Entity shall notify Business Associate of any changes or limitation(s) in its Notice of Privacy Practices provided to individuals in accordance with 45 CFR Section 164.520, to the extent that such change or limitation may affect Business Associate's use or disclosure of PHI.

b. Covered Entity shall promptly notify Business Associate of any changes in, or revocation of permission provided to Covered Entity by individuals whose PHI may be used or disclosed by Business Associate under this Agreement, pursuant to 45 CFR Section 164.506 or 45 CFR Section 164.508.

c. Covered entity shall promptly notify Business Associate of any restrictions on the use or disclosure of PHI that Covered Entity has agreed to in accordance with 45 CFR 164.522, to the extent that such restriction may affect Business Associate's use or disclosure of PHI.

(5) Termination for Cause

In addition to Paragraph 10 of the standard terms and conditions (P-37) of this Agreement the Covered Entity may immediately terminate the Agreement upon Covered Entity's knowledge of a breach by Business Associate of the Business Associate Agreement set forth herein as Exhibit I. The Covered Entity may either immediately terminate the Agreement or provide an opportunity for Business Associate to cure the alleged breach within a timeframe specified by Covered Entity. If Covered Entity determines that neither termination nor cure is feasible, Covered Entity shall report the violation to the Secretary.

A reference in the Agreement, as amended to include this Exhibit I, to a Section in the Privacy and Security Rule means the Section as in effect or as amended.

b. Amendment. Covered Entity and Business Associate agree to take such action as is necessary to amend the Agreement, from time to time as is necessary for Covered Entity to comply with the changes in the requirements of HIPAA, the Privacy and Security Rule, and applicable federal and state law.

c. Data Ownership. The Business Associate acknowledges that it has no ownership rights with respect to the PHI provided by or created on behalf of Covered Entity.

d. Interpretation. The parties agree that any ambiguity in the Agreement shall be resolved to permit Covered Entity to comply with HIPAA, the Privacy and Security Rule.

e. Segregation. If any term or condition of this Exhibit I or the application thereof to any person(s) or circumstance is held invalid, such invalidity shall not affect other terms or conditions which can be given effect without the invalid term or condition; to this end the terms and conditions of this Exhibit I are declared severable.

f. Survival. Provisions in this Exhibit I regarding the use and disclosure of PHI, return or destruction of PHI, extensions of the protections of the Agreement in section (3) I, the defense and indemnification provisions of section (3) e and Paragraph 13 of the standard terms and conditions (P-37), shall survive the termination of the Agreement.

Funds are available in the following accounts for State Fiscal Years 2022 and 2023, and are anticipated to be available in State Fiscal Year 2024, upon the availability and continued appropriation of funds in the future operating budget, with the authority to adjust budget line items within the price limitation and encumbrances between state fiscal years through the Budget Office, if needed and justified.

See attached fiscal details.

EXPLANATION

The purpose of this request is to provide Substance Use Disorder Treatment and Recovery Supports Services statewide to New Hampshire residents who have income below 400% of the Federal Poverty Level, and are uninsured or underinsured.

The Contractors will provide statewide access to an array of treatment services, including individual and group outpatient services; intensive outpatient services; partial hospitalization; ambulatory withdrawal management services; transitional living services; high and low intensity residential treatment services; specialty residential services; and integrated medication assisted treatment. The Contractors will ensure individuals with a substance use disorder receive the appropriate type of treatment and have access to continued and expanded levels of care, which will increase the ability of individuals to achieve and maintain recovery. The Contractors will also assist eligible individuals with enrolling in Medicaid while receiving treatment, and the Department will serve as the payer of last resort.

Approximately 7,000 individuals will receive services over the next two years.

The Department will monitor services through monthly, quarterly, and annual reporting to ensure the Contractors:

- Provide services that reduce the negative impacts of substance misuse.
- Make continuing care, transfer and discharge decisions based on American Society of Addiction Medicine (ASAM) criteria.
- Treat individuals using Evidence Based Practices and follow best practices.
- Achieve initiation, engagement, and retention goals as required by the Department.

The Department selected the Contractors through a competitive bid process using a Request for Proposals (RFP) that was posted on the Department's website from July 20, 2021 through August 19, 2021. The Department received twelve (12) responses that were reviewed and scored by a team of qualified individuals. The Scoring Sheet is attached. This request represents ten (10) of twelve (12) contracts for Substance Use Disorder Treatment and Recovery Supports Services. The Department anticipates presenting two (2) additional contracts at a future Governor and Executive Council meeting for approval.

As referenced in Exhibit A, Revisions to Standard Agreement Provisions of the attached agreements, the parties have the option to extend the agreements for up to four (4) additional years, contingent upon satisfactory delivery of services, available funding, agreement of the parties, and Governor and Council approval.

Should the Governor and Council not authorize this request, individuals in need of Substance Use Disorder Treatment and Recovery Supports Services may not receive the treatment, tools, and education required to enhance and sustain recovery that, in some cases, prevents untimely deaths.

2. SERVICES TO BE PERFORMED. The State of New Hampshire, acting through the agency identified in block 1.1 ("State"), engages contractor identified in block 1.3 ("Contractor") to perform, and the Contractor shall perform, the work or sale of goods, or both, identified and more particularly described in the attached EXHIBIT B which is incorporated herein by reference ("Services").

3. EFFECTIVE DATE/COMPLETION OF SERVICES.

3.1 Notwithstanding any provision of this Agreement to the contrary, and subject to the approval of the Governor and Executive Council of the State of New Hampshire, if applicable, this Agreement, and all obligations of the parties hereunder, shall become effective on the date the Governor and Executive Council approve this Agreement as indicated in block 1.17, unless no such approval is required, in which case the Agreement shall become effective on the date the Agreement is signed by the State Agency as shown in block 1.13 ("Effective Date").

3.2 If the Contractor commences the Services prior to the Effective Date, all Services performed by the Contractor prior to the Effective Date shall be performed at the sole risk of the Contractor, and in the event that this Agreement does not become effective, the State shall have no liability to the Contractor, including without limitation, any obligation to pay the Contractor for any costs incurred or Services performed. In no event shall the State be liable for any payments hereunder in excess of such available appropriated funds. In the event of a reduction or termination of appropriated funds, the State shall have the right to withhold payment until such funds become available, if ever, and shall have the right to reduce or terminate the Services under this Agreement immediately upon giving the Contractor notice of such reduction or termination. 5.2 The payment by the State of the contract price shall be the only and the complete reimbursement to the Contractor for all expenses, of whatever nature incurred by the Contractor in the performance hereof, and shall be the only and the complete compensation to the Contractor for the Services. The State shall have no liability to the Contractor other than the contract price.

5.3 The State reserves the right to offset from any amounts otherwise payable to the Contractor under this Agreement those liquidated amounts required or permitted by N.H. RSA 80:7 through RSA 80:7-c or any other provision of law.

5.4 Notwithstanding any provision in this Agreement to the contrary, and notwithstanding unexpected circumstances, in no event shall the total of all payments authorized, or actually made hereunder, exceed the Price Limitation set forth in block 1.8.

6. COMPLIANCE BY CONTRACTOR WITH LAWS AND REGULATIONS/ EQUAL EMPLOYMENT OPPORTUNITY.

6.1 In connection with the performance of the Services, the Contractor shall comply with all applicable statutes, laws, regulations, and orders of federal, state, county or municipal authorities which impose any obligation or duty upon the Contractor, including, but not limited to, civil rights and equal employment opportunity laws. CERTIFICATION REGARDING DEBARMENT, SUSPENSION AND OTHER RESPONSIBILITY MATTERS

The Contractor identified in Section 1.3 of the General Provisions agrees to comply with the provisions of Executive Office of the President, Executive Order 12549 and 45 CFR Part 76 regarding Debarment, Suspension, and Other Responsibility Matters, and further agrees to have the Contractor's representative, as identified in Sections 1.11 and 1.12 of the General Provisions execute the following Certification:

INSTRUCTIONS FOR CERTIFICATION

1. By signing and submitting this proposal (contract), the prospective primary participant is providing the certification set out below.

2. The inability of a person to provide the certification required below will not necessarily result in denial of participation in this covered transaction. If necessary, the prospective participant shall submit an explanation of why it cannot provide the certification. The certification or explanation will be considered in connection with the NH Department of Health and Human Services' (DHHS) determination whether to enter into this transaction. However, failure of the prospective primary participant to furnish a certification or an explanation shall disqualify such person from participation in this transaction.

3. The certification in this clause is a material representation of fact upon which reliance was placed when DHHS determined to enter into this transaction. If it is later determined that the prospective primary participant knowingly rendered an erroneous certification, in addition to other remedies available to the Federal Government, DHHS may terminate this transaction for cause or default.

4. The prospective primary participant shall provide immediate written notice to the DHHS agency to whom this proposal (contract) is submitted if at any time the prospective primary participant learns that its certification was erroneous when submitted or has become erroneous by reason of changed circumstances.

5. The terms "covered transaction," "debarred," "suspended," "ineligible," "lower tier covered transaction," "participant," "person," "primary covered transaction," "principal," "proposal," and "voluntarily excluded," as used in this clause, have the meanings set out in the Definitions and Coverage sections of the rules implementing Executive Order 12549: 45 CFR Part 76. See the attached definitions.

6. The prospective primary participant agrees by submitting this proposal (contract) that, should the proposed covered transaction be entered into, it shall not knowingly enter into any lower tier covered transaction with a person who is debarred, suspended, declared ineligible, or voluntarily excluded from participation in this covered transaction, unless authorized by DHHS.

7. The prospective primary participant further agrees by submitting this proposal that it will include the clause titled "Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion - Lower Tier Covered Transactions," provided by DHHS, without modification, in all lower tier covered transactions and in all solicitations for lower tier covered transactions.

8. A participant in a covered transaction may rely upon a certification of a prospective participant in a lower tier covered transaction that it is not debarred, suspended, ineligible, or involuntarily excluded from the covered transaction, unless it knows that the certification is erroneous. A participant may decide the method and frequency by which it determines the eligibility of its principals. Each participant may, but is not required to, check the Nonprocurement List (of excluded parties).

9. Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render in good faith the certification required by this clause. The knowledge and

information of a participant is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.

10. Except for transactions authorized under paragraph 6 of these instructions, if a participant in a covered transaction knowingly enters into a lower tier covered transaction with a person who is suspended, debarred, ineligible, or voluntarily excluded from participation in this transaction, in addition to other remedies available to the Federal government, DHHS may terminate this transaction for cause or default.

PRIMARY COVERED TRANSACTIONS

11. The prospective primary participant certifies to the best of its knowledge and belief, that it and its principals:
    11.1. are not presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from covered transactions by any Federal department or agency;
    11.2. have not within a three-year period preceding this proposal (contract) been convicted of or had a civil judgment rendered against them for commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a public (Federal, State or local) transaction or a contract under a public transaction; violation of Federal or State antitrust statutes or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, or receiving stolen property;
    11.3. are not presently indicted for otherwise criminally or civilly charged by a governmental entity (Federal, State or local) with commission of any of the offenses enumerated in paragraph (l)(b) of this certification; and
    11.4. have not within a three-year period preceding this application/proposal had one or more public transactions (Federal, State or local) terminated for cause or default.

12. Where the prospective primary participant is unable to certify to any of the statements in this certification, such prospective participant shall attach an explanation to this proposal (contract).

LOWER TIER COVERED TRANSACTIONS

13. By signing and submitting this lower tier proposal (contract), the prospective lower tier participant, as defined in 45 CFR Part 76, certifies to the best of its knowledge and belief that it and its principals:

b. Business Associate may use or disclose PHI:
   I. For the proper management and administration of the Business Associate;
   II. As required by law, pursuant to the terms set forth in paragraph d. below; or
   III. For data aggregation purposes for the health care operations of Covered Entity.

e. If the Covered Entity notifies the Business Associate that Covered Entity has agreed to be bound by additional restrictions over and above those uses or disclosures or security safeguards of PHI pursuant to the Privacy and Security Rule, the Business Associate shall be bound by such additional restrictions and shall not disclose PHI in violation of such additional restrictions and shall abide by any additional security safeguards.

d. Business Associate shall make available all of its internal policies and procedures, books and records relating to the use and disclosure of PHI received from, or created or received by the Business Associate on behalf of Covered Entity to the Secretary for purposes of determining Covered Entity's compliance with HIPAA and the Privacy and Security Rule.

pursuant to this Agreement, with rights of enforcement and indemnification from such business associates who shall be governed by standard Paragraph #13 of the standard contract provisions (P-37) of this Agreement for the purpose of use and disclosure of protected health information.

f. Within five (5) business days of receipt of a written request from Covered Entity, Business Associate shall make available during normal business hours at its offices all records, books, agreements, policies and procedures relating to the use and disclosure of PHI to the Covered Entity, for purposes of enabling Covered Entity to determine Business Associate's compliance with the terms of the Agreement.

j. Within ten (10) business days of receiving a written request from Covered Entity for a request for an accounting of disclosures of PHI, Business Associate shall make available to Covered Entity such information as Covered Entity may require to fulfill its obligations to provide an accounting of disclosures with respect to PHI in accordance with 45 CFR Section 164.528.

k. In the event any individual requests access to, amendment of, or accounting of PHI directly from the Business Associate, the Business Associate shall within two (2) business days forward such request to Covered Entity. Covered Entity shall have the responsibility of responding to forwarded requests. However, if forwarding the individual's request to Covered Entity would cause Covered Entity or the Business Associate to violate HIPAA and the Privacy and Security Rule, the Business Associate shall instead respond to the individual's request as required by such law and notify Covered Entity of such response as soon as practicable.

l. Within ten (10) business days of termination of the Agreement, for any reason, the Business Associate shall return or destroy, as specified by Covered Entity, all PHI received from, or created or received by the Business Associate in connection with the Agreement, and shall not retain any copies or back-up tapes of such PHI. If return or destruction is not feasible, or the disposition of the PHI has been otherwise agreed to in the Agreement, Business Associate shall continue to extend the protections of the Agreement, to such PHI and limit further uses and disclosures of such PHI to those purposes that make the return or destruction infeasible, for so long as Business

Associate maintains such PHI. If Covered Entity, in its sole discretion, requires that the Business Associate destroy any or all PHI, the Business Associate shall certify to Covered Entity that the PHI has been destroyed.

(4) Obligations of Covered Entity

a. Covered Entity shall notify Business Associate of any changes or limitation(s) in its Notice of Privacy Practices provided to individuals in accordance with 45 CFR Section 164.520, to the extent that such change or limitation may affect Business Associate's use or disclosure of PHI.

c. Covered entity shall promptly notify Business Associate of any restrictions on the use or disclosure of PHI that Covered Entity has agreed to in accordance with 45 CFR 164.522, to the extent that such restriction may affect Business Associate's use or disclosure of PHI.

(5) Termination for Cause

In addition to Paragraph 10 of the standard terms and conditions (P-37) of this Agreement the Covered Entity may immediately terminate the Agreement upon Covered Entity's knowledge of a breach by Business Associate of the Business Associate Agreement set forth herein as Exhibit I. The Covered Entity may either immediately terminate the Agreement or provide an opportunity for Business Associate to cure the alleged breach within a timeframe specified by Covered Entity. If Covered Entity determines that neither termination nor cure is feasible, Covered Entity shall report the violation to the Secretary.

(6) Miscellaneous

a. Definitions and Regulatory References. All terms used, but not otherwise defined herein, shall have the same meaning as those terms in the Privacy and Security Rule, amended from time to time. A reference in the Agreement, as amended to include this Exhibit I, to a Section in the Privacy and Security Rule means the Section as in effect or as amended.

b. Amendment. Covered Entity and Business Associate agree to take such action as is necessary to amend the Agreement, from time to time as is necessary for Covered Entity to comply with the changes in the requirements of HIPAA, the Privacy and Security Rule, and applicable federal and state law.

c. Data Ownership. The Business Associate acknowledges that it has no ownership rights with respect to the PHI provided by or created on behalf of Covered Entity.

d. Interpretation. The parties agree that any ambiguity in the Agreement shall be resolved to permit Covered Entity to comply with HIPAA, the Privacy and Security Rule.

Funds are available in the following accounts for State Fiscal Years 2022 and 2023, and are anticipated to be available in State Fiscal Year 2024, upon the availability and continued appropriation of funds in the future operating budget, with the authority to adjust budget line items within the price limitation and encumbrances between state fiscal years through the Budget Office, if needed and justified.

See attached fiscal details.

EXPLANATION

The purpose of this request is to provide Substance Use Disorder Treatment and Recovery Supports Services statewide to New Hampshire residents who have income below 400% of the Federal Poverty Level, and are uninsured or underinsured.

The Contractors will provide statewide access to an array of treatment services, including individual and group outpatient services; intensive outpatient services; partial hospitalization; ambulatory withdrawal management services; transitional living services; high and low intensity residential treatment services; specialty residential services; and integrated medication assisted treatment. The Contractors will ensure individuals with a substance use disorder receive the appropriate type of treatment and have access to continued and expanded levels of care, which will increase the ability of individuals to achieve and maintain recovery. The Contractors will also assist eligible individuals with enrolling in Medicaid while receiving treatment, and the Department will serve as the payer of last resort.

Approximately 7,000 individuals will receive services over the next two years.

The Department will monitor services through monthly, quarterly, and annual reporting to ensure the Contractors:

- Provide services that reduce the negative impacts of substance misuse.
- Make continuing care, transfer and discharge decisions based on American Society of Addiction Medicine (ASAM) criteria.
- Treat individuals using Evidence Based Practices and follow best practices.
- Achieve initiation, engagement, and retention goals as required by the Department.

The Department selected the Contractors through a competitive bid process using a Request for Proposals (RFP) that was posted on the Department's website from July 20, 2021 through August 19, 2021. The Department received twelve (12) responses that were reviewed and scored by a team of qualified individuals. The Scoring Sheet is attached. This request represents ten (10) of twelve (12) contracts for Substance Use Disorder Treatment and Recovery Supports Services. The Department anticipates presenting two (2) additional contracts at a future Governor and Executive Council meeting for approval.

As referenced in Exhibit A, Revisions to Standard Agreement Provisions of the attached agreements, the parties have the option to extend the agreements for up to four (4) additional years, contingent upon satisfactory delivery of services, available funding, agreement of the parties, and Governor and Council approval.

Should the Governor and Council not authorize this request, individuals in need of Substance Use Disorder Treatment and Recovery Supports Services may not receive the treatment, tools, and education required to enhance and sustain recovery that, in some cases, prevents untimely deaths.

CERTIFICATION REGARDING DEBARMENT, SUSPENSION AND OTHER RESPONSIBILITY MATTERS

The Contractor identified in Section 1.3 of the General Provisions agrees to comply with the provisions of Executive Office of the President, Executive Order 12549 and 45 CFR Part 76 regarding Debarment, Suspension, and Other Responsibility Matters, and further agrees to have the Contractor's representative, as identified in Sections 1.11 and 1.12 of the General Provisions execute the following Certification:

INSTRUCTIONS FOR CERTIFICATION

1. By signing and submitting this proposal (contract), the prospective primary participant is providing the certification set out below.

2. The inability of a person to provide the certification required below will not necessarily result in denial of participation in this covered transaction. If necessary, the prospective participant shall submit an explanation of why it cannot provide the certification. The certification or explanation will be considered in connection with the NH Department of Health and Human Services' (DHHS) determination whether to enter into this transaction. However, failure of the prospective primary participant to furnish a certification or an explanation shall disqualify such person from participation in this transaction.

3. The certification in this clause is a material representation of fact upon which reliance was placed when DHHS determined to enter into this transaction. If it is later determined that the prospective primary participant knowingly rendered an erroneous certification, in addition to other remedies available to the Federal Government, DHHS may terminate this transaction for cause or default.

4. The prospective primary participant shall provide immediate written notice to the DHHS agency to whom this proposal (contract) is submitted if at any time the prospective primary participant learns that its certification was erroneous when submitted or has become erroneous by reason of changed circumstances.

5. The terms "covered transaction," "debarred," "suspended," "ineligible," "lower tier covered transaction," "participant," "person," "primary covered transaction," "principal," "proposal," and "voluntarily excluded," as used in this clause, have the meanings set out in the Definitions and Coverage sections of the rules implementing Executive Order 12549: 45 CFR Part 76. See the attached definitions.

6. The prospective primary participant agrees by submitting this proposal (contract) that, should the proposed covered transaction be entered into, it shall not knowingly enter into any lower tier covered transaction with a person who is debarred, suspended, declared ineligible, or voluntarily excluded from participation in this covered transaction, unless authorized by DHHS.

7. The prospective primary participant further agrees by submitting this proposal that it will include the clause titled "Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion - Lower Tier Covered Transactions," provided by DHHS, without modification, in all lower tier covered transactions and in all solicitations for lower tier covered transactions.

8. A participant in a covered transaction may rely upon a certification of a prospective participant in a lower tier covered transaction that it is not debarred, suspended, ineligible, or involuntarily excluded from the covered transaction, unless it knows that the certification is erroneous. A participant may decide the method and frequency by which it determines the eligibility of its principals. Each participant may, but is not required to, check the Nonprocurement List (of excluded parties).

9. Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render in good faith the certification required by this clause. The knowledge and

information of a participant is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.

10. Except for transactions authorized under paragraph 6 of these instructions, if a participant in a covered transaction knowingly enters into a lower tier covered transaction with a person who is suspended, debarred, ineligible, or voluntarily excluded from participation in this transaction, in addition to other remedies available to the Federal government, DHHS may terminate this transaction for cause or default.

PRIMARY COVERED TRANSACTIONS

11. The prospective primary participant certifies to the best of its knowledge and belief, that it and its principals:
    11.1. are not presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from covered transactions by any Federal department or agency;
    11.2. have not within a three-year period preceding this proposal (contract) been convicted of or had a civil judgment rendered against them for commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a public (Federal, State or local) transaction or a contract under a public transaction; violation of Federal or State antitrust statutes or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, or receiving stolen property;
    11.3. are not presently indicted for otherwise criminally or civilly charged by a governmental entity (Federal, State or local) with commission of any of the offenses enumerated in paragraph (I)(b) of this certification; and
    11.4. have not within a three-year period preceding this application/proposal had one or more public transactions (Federal, State or local) terminated for cause or default.

12. Where the prospective primary participant is unable to certify to any of the statements in this certification, such prospective participant shall attach an explanation to this proposal (contract).

LOWER TIER COVERED TRANSACTIONS

13. By signing and submitting this lower tier proposal (contract), the prospective lower tier participant, as defined in 45 CFR Part 76, certifies to the best of its knowledge and belief that it and its principals:
    13.1. are not presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participation in this transaction by any federal department or agency.
    13.2. where the prospective lower tier participant is unable to certify to any of the above, such prospective participant shall attach an explanation to this proposal (contract).

c. Data Ownership. The Business Associate acknowledges that it has no ownership rights with respect to the PHI provided by or created on behalf of Covered Entity.

n. Within thirty (30) business days of termination of the Agreement, for any reason, the Business Associate shall return or destroy, as specified by Covered Entity, all PHI received from or created or received by the Business Associate in connection with the Agreement, and shall not retain any copies or back-ups of such PHI in any form or platform.

Report of Independent Auditors

To the Board of Trustees of
Dartmouth-Hitchcock Health and subsidiaries

We have audited the accompanying consolidated financial statements of Dartmouth-Hitchcock Health and its subsidiaries (the "Health System"), which comprise the consolidated balance sheets as of June 30, 2020 and 2019, and the related consolidated statements of operations and changes in net assets and of cash flows for the years then ended.

Management's Responsibility for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on the consolidated financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on our judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, we consider internal control relevant to the Health System's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Health System's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Dartmouth-Hitchcock Health and its subsidiaries as of June 30, 2020 and 2019, and the results of their operations, changes in net assets and their cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Emphasis of Matter

As discussed in Note 2 to the consolidated financial statements, the Health System changed the manner in which it accounts for leases and the presentation of net periodic pension costs in 2020. Our opinion is not modified with respect to these matters.

Other Matter

Our audit was conducted for the purpose of forming an opinion on the consolidated financial statements taken as a whole. The consolidating information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the consolidated financial statements. The consolidating information has been subjected to the auditing procedures applied in the audit of the consolidated financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the consolidated financial statements or to the consolidated financial statements themselves and other additional procedures, in accordance with auditing standards generally accepted in the United States of America. In our opinion, the consolidating information is fairly stated, in all material respects, in relation to the consolidated financial statements taken as a whole. The consolidating information is presented for purposes of additional analysis of the consolidated financial statements rather than to present the financial position, results of operations, changes in net assets and cash flows of the individual companies and is not a required part of the consolidated financial statements. Accordingly, we do not express an opinion on the financial position, results of operations, changes in net assets and cash flows of the individual companies.

1. Organization and Community Benefit Commitments

Dartmouth-Hitchcock Health (D-HH) serves as the sole corporate member of the following entities: Dartmouth-Hitchcock Clinic and Subsidiaries (DHC), Mary Hitchcock Memorial Hospital and Subsidiaries (MHMH), (DHC and MHMH together are referred to as D-H), The New London Hospital Association and Subsidiaries (NLH), Windsor Hospital Corporation (d/b/a Mt. Ascutney Hospital and Health Center) and Subsidiaries (MAHHC), Cheshire Medical Center and Subsidiaries (Cheshire), Alice Peck Day Memorial Hospital and Subsidiary (APD), and the Visiting Nurse and Hospice for Vermont and New Hampshire and Subsidiaries (VNH). The "Health System" consists of D-HH, its members and their subsidiaries.

The Health System currently operates one tertiary, one community and three acute care (critical access) hospitals in New Hampshire (NH) and Vermont (VT). One facility provides inpatient and outpatient rehabilitation medicine and long-term care. The Health System also operates multiple physician practices, a nursing home, a continuing care retirement community, and a home health and hospice service. The Health System operates a graduate level program for health professions and is the principal teaching affiliate of the Geisel School of Medicine (Geisel), a component of Dartmouth College.

D-HH, Dartmouth-Hitchcock Clinic, Mary Hitchcock Memorial Hospital, The New London Hospital Association, Cheshire Medical Center, and Alice Peck Day Memorial Hospital are NH not-for-profit corporations exempt from federal income taxes under Section 501(c)(3) of the Internal Revenue Code (IRC). Windsor Hospital Corporation and the Visiting Nurse and Hospice for VT and NH are VT not-for-profit corporations exempt from federal income taxes under Section 501(c)(3) of the IRC.

On September 30, 2019, D-HH and GraniteOne Health ("GOH") entered into an agreement ("The Combination Agreement") to combine their respective healthcare systems. The GOH system is comprised of Catholic Medical Center ("CMC"), an acute care community hospital in Manchester, New Hampshire, Huggins Hospital ("HH") located in Wolfeboro, NH and Monadnock Community Hospital, ("MCH") located in Petersborough, NH. Both HH and MCH are designated as Critical Access Hospitals. The three member hospitals of GOH have a combined licensed bed count of 380 beds. GOH is a non-profit, community based health care system. The overarching rationale for the proposed combination is to improve access to high quality primary and specialty care in the most convenient, cost-effective sites of service for patients and the communities served by D-HH and GOH. Other stated benefits of the combination include reinforcing the rural health network, investing in needed capacity to accommodate unmet and anticipated demand, and drawing on our combined strengths to attract the necessary health care workforce. The parties have submitted regulatory filings with the Federal Trade Commission and the New Hampshire Attorney General's office seeking approval of the proposed transaction.

Community Benefits

The mission of the Health System is to advance health through clinical practice and community partnerships, research and education, providing each person the best care, in the right place, at the right time, every time.

Consistent with this mission, the Health System provides high quality, cost effective, comprehensive, and integrated healthcare to individuals, families, and the communities it serves regardless of a patient's ability to pay. The Health System actively supports community-based healthcare and promotes the coordination of services among healthcare providers and social services organizations. In addition, the Health System also seeks to work collaboratively with other

DocuSign Envelope ID: 35E64ED9-E359-47FF-A4E9-2BF10561F892

area healthcare providers to improve the health status of the region. As a component of an integrated academic medical center, the Health System provides significant support for academic and research programs.

Certain member hospitals of the Health System file annual Community Benefits Reports with the State of NH which outline the community and charitable benefits each provides. VT hospitals are not required by law to file a state community benefit report. The categories used in the Community Benefit Reports to summarize these benefits are as follows:

- *Community Health Services* include activities carried out to improve community health and could include community health education (such as classes, programs, support groups, and materials that promote wellness and prevent illness), community-based clinical services (such as free clinics and health screenings), and healthcare support services (enrollment assistance in public programs, assistance in obtaining free or reduced costs medications, telephone information services, or transportation programs to enhance access to care, etc.).

- *Health Professions Education* includes uncompensated costs of training medical students, Residents, nurses, and other health care professionals

- *Subsidized health services* are services provided by the Health System, resulting in financial losses that meet the needs of the community and would not otherwise be available unless the responsibility was assumed by the government.

- *Research support and other grants* represent costs in excess of awards for numerous health research and service initiatives awarded to the organizations within the Health System.

- *Financial Contributions* include financial contributions of cash, as well as in-kind contributions such as time, supplies, and expertise to local organizations to address community health needs.

- *Community-Building Activities* include expenses incurred to support the development of programs and partnerships intended to address public health challenges as well as social and economic determinants of health. Examples include physical improvements and housing, economic development, support system enhancements, environmental improvements, leadership development and training for community members, community health improvement advocacy, and workforce enhancement.

- *Community Benefit Operations* includes costs associated with staff dedicated to administering benefit programs, community health needs assessment costs, and other costs associated with community benefit planning and operations.

- *Charity Care and Costs of Government Sponsored Health Care* includes losses, at-cost, incurred by providing health care services to persons qualifying for hospital financial assistance programs, and uncompensated costs of providing health care services to patients who are Medicaid Beneficiaries.

- *The uncompensated cost of care for Medicaid* patients reported in the unaudited Community Benefits Reports for 2019 was approximately $143,013,000. The 2020 Community Benefits Reports are expected to be filed in February 2021.

The following table summarizes the value of the community benefit initiatives outlined in the Health System's most recently filed Community Benefit Reports for the year ended June 30, 2019:

2. Summary of Significant Accounting Policies

Basis of Presentation

The consolidated financial statements are prepared on the accrual basis of accounting in accordance with accounting principles generally accepted in the United States of America, and have been prepared consistent with the Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 954, *Healthcare Entities*, which addresses the accounting for healthcare entities. The net assets, revenue, expenses, and gains and losses of healthcare entities are classified based on the existence or absence of donor-imposed restrictions. Accordingly, net assets without donor restrictions are amounts not subject to donor-imposed stipulations and are available for operations. Net assets with donor restrictions are those whose use has been limited by donors to a specific time period or purpose, or whose use has been restricted by donors to be maintained in perpetuity. All significant intercompany transactions have been eliminated upon consolidation.

Use of Estimates

The preparation of the consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the dates of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting periods. The most significant areas that are affected by the use of estimates include implicit and explicit pricing concessions, valuation of certain investments, estimated third-party settlements, insurance reserves, and pension obligations. Actual results may differ from those estimates.

(Deficiency) Excess of Revenue over Expenses

The consolidated statements of operations and changes in net assets include the (deficiency) excess of revenue over expenses. Operating revenues consist of those items attributable to the care of patients, including contributions and investment income on investments of net assets without donor restrictions, which are utilized to provide charity and other operational support. Peripheral activities, including contribution of net assets without donor restrictions from acquisitions, loss on early extinguishment of debt, realized gains/losses on sales of investment securities and changes in unrealized gains/losses on investments are reported as non-operating gains (losses).

Changes in net assets without donor restrictions which are excluded from the (deficiency) excess of revenue over expenses, consistent with industry practice, include contributions of long-lived assets (including assets acquired using contributions which by donor restriction were to be used for the purpose of acquiring such assets, and change in funded status of pension and other postretirement benefit plans.

Charity Care

The Health System provides care to patients who meet certain criteria under their financial assistance policies without charge or at amounts less than their established rates. Because the Health System does not anticipate collection of amounts determined to qualify as charity care, they are not reported as revenue.

DocuSign Envelope ID: 35E64ED9-E359-47FF-A4E9-2BF10561F892

The Health System grants credit without collateral to patients. Most are local residents and are insured under third-party arrangements. The amount of charges for implicit price concessions is based upon management's assessment of historical and expected net collections, business and economic conditions, trends in federal and state governmental healthcare coverage, and other collection indicators (Notes 1 and 4).

Patient Service Revenue
The Health System applies the accounting provisions of ASC 606, *Revenue from Contracts with Customers* (ASC 606). Patient service revenue is reported at the amount of consideration to which the Health System expects to be entitled from patients, third party payors, and others for services rendered, including estimated retroactive adjustments under reimbursement agreements with third-party payors and implicit pricing concessions. Retroactive adjustments are accrued on an estimated basis in the period the related services are rendered and adjusted in future periods as estimates change or final settlements are determined (Note 4).

Contracted Revenue
The Health System has various Professional Service Agreements (PSAs), pursuant to which certain organizations purchase services of personnel employed by the Health System and also lease space and equipment. Revenue pursuant to these PSAs and certain facility and equipment leases and other professional service contracts have been classified as contracted revenue in the accompanying consolidated statements of operations and changes in net assets.

Other Revenue
The Health System recognizes other revenue which is not related to patient medical care but is central to the day-to-day operations of the Health System. Other revenue primarily consists of revenue from retail pharmacy, which the Health System records as customer revenues in the amounts that reflect the consideration to which it expects to be entitled in exchange for the prescription. Other revenue also includes the Department of Health and Human Services ("HHS") Coronavirus Aid, Relief, and Economic Securities Act ("CARES Act" Provider Relief Funds ("Provider Relief Funds") operating agreements, grant revenue, cafeteria sales and other support service revenue.

Cash Equivalents
Cash and cash equivalents include amounts on deposit with financial institutions; short-term investments with maturities of three months or less at the time of purchase and other highly liquid investments, primarily cash management funds. Short-term highly liquid investments held within the endowment and similar investment pools are classified as investments rather than cash equivalents and restricted cash is defined as that which is legally restricted to withdrawal and usage.

Investments and Investment Income
Investments in equity securities with readily determinable fair values, mutual funds, governmental securities, debt securities, and pooled/commingled funds are reported at fair value with changes in fair value included in the (deficiency) excess of revenues over expenses. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (Note 7).

Investments in pooled/commingled investment funds, private equity funds and hedge funds that represent investments where the Health System owns shares or units of funds rather than the underlying securities in that fund are valued using the equity method of accounting with changes in value recorded in the (deficiency) excess of revenues over expenses. All investments, whether

DocuSign Envelope ID: 35E64ED9-E359-47FF-A4E9-2BF10561F892

held at fair value or under the equity method of accounting, are reported at what the Health System believes to be the amount they would expect to receive if it liquidated its investments at the balance sheet dates on a non-distressed basis.

Certain members of the Health System are partners in a NH general partnership established for the purpose of operating a master investment program of pooled investment accounts. Substantially all of the Health System's board-designated and assets with donor restrictions, such as endowment funds, were invested in these pooled funds by purchasing units based on the market value of the pooled funds at the end of the month prior to receipt of any new additions to the funds. Interest, dividends, and realized and unrealized gains and losses earned on pooled funds are allocated monthly based on the weighted average units outstanding at the prior month-end.

Investment income or losses (including change in unrealized and realized gains and losses on investments, change in value of equity method investments, interest, and dividends) are included in the (deficiency) excess of revenue over expenses and classified as non-operating gains and losses, unless the income or loss is restricted by donor or law (Note 9).

Fair Value Measurement of Financial Instruments
The Health System estimates fair value based on a valuation framework that uses a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of fair value hierarchy, as defined by ASC 820, *Fair Value Measurements and Disclosures*, are described below:

Level 1 — Unadjusted quoted prices in active markets that are accessible at the measurement date for assets or liabilities.

Level 2 — Prices other than quoted prices in active markets that are either directly or indirectly observable as of the date of measurement.

Level 3 — Prices or valuation techniques that are both significant to the fair value measurement and unobservable.

The Health System applies the accounting provisions of Accounting Standards Update (ASU) 2009-12, *Investments in Certain Entities That Calculate Net Asset Value per Share (or its Equivalent)* (ASU 2009-12). ASU 2009-12 allows for the estimation of fair value of investments for which the investment does not have a readily determinable fair value, to use net asset value (NAV) per share or its equivalent as a practical expedient, subject to the Health System's ability to redeem its investment.

The carrying amounts of patient accounts receivable, prepaid and other current assets, accounts payable and accrued expenses approximate fair value due to the short maturity of these instruments.

Property, Plant, and Equipment
Property, plant, and equipment, and other real estate are stated at cost at the time of purchase or fair value at the time of donation, less accumulated depreciation. The Health System's policy is to capitalize expenditures for major improvements and to charge expense for maintenance and repair expenditures which do not extend the lives of the related assets. The provision for depreciation has been determined using the straight-line method at rates which are intended to amortize the cost of assets over their estimated useful lives which range from 10 to 40 years for buildings and improvements, 2 to 20 years for equipment, and the shorter of the lease term, or 5 to 12 years, for

DocuSign Envelope ID: 35E64ED9-E359-47FF-A4E9-2BF10561F892

leasehold improvements. Certain software development costs are amortized using the straight-line method over a period of up to 10 years. Net interest cost incurred on borrowed funds during the period of construction of capital assets is capitalized as a component of the cost of acquiring those assets.

The fair value of a liability for legal obligations associated with asset retirements is recognized in the period in which it is incurred, if a reasonable estimate of the fair value of the obligation can be made. When a liability is initially recorded, the cost of the asset retirement obligation is capitalized by increasing the carrying amount of the related long-lived asset. Over time, the liability is accreted to its present value each period and the capitalized cost associated with the retirement is depreciated over the useful life of the related asset. Upon settlement of the obligation, any difference between the actual cost to settle the asset retirement obligation and the liability recorded is recognized as a gain or loss in the consolidated statements of operations and changes in net assets.

Gifts of capital assets such as land, buildings, or equipment are reported as support, and excluded from the (deficiency) excess of revenue over expenses, unless explicit donor stipulations specify how the donated assets must be used. Gifts of capital assets with explicit restrictions that specify how the assets are to be used and gifts of cash or other assets that must be used to acquire capital assets are reported as restricted support. Absent explicit donor stipulations about how long those capital assets must be maintained, expirations of donor restrictions are reported when the donated or acquired capital assets are placed in service.

Bond Issuance Costs
Bond issuance costs, classified on the consolidated balance sheets within long-term debt, are amortized over the term of the related bonds. Amortization is recorded within interest expense in the consolidated statements of operations and changes in net assets using the straight-line method which approximates the effective interest method.

Intangible Assets and Goodwill
The Health System records within other assets on the consolidated balance sheets goodwill and intangible assets such as trade names and leases-in-place. The Health System considers trade names and goodwill to be indefinite-lived assets, assesses them at least annually for impairment or more frequently if certain events or circumstances warrant and recognizes impairment charges for amounts by which the carrying values exceed their fair values. The Health System has recorded $10,007,000 and $10,524,000 as intangible assets associated with its affiliations as of June 30, 2020 and 2019, respectively.

Gifts
Gifts without donor restrictions are recorded net of related expenses as non-operating gains. Conditional promises to give and indications of intentions to give to the Health System are reported at fair value at the date the gift is received. Gifts are reported with donor restrictions if they are received with donor stipulations that limit the use of the donated assets. When a donor restriction expires, that is, when a stipulated time restriction ends or purpose restriction is accomplished, net assets with donor restrictions are reclassified as net assets without donor restrictions and reported in the consolidated statements of operations and changes in net assets as net assets released from restrictions.

Recently Issued Accounting Pronouncements

In January 2016, the FASB issued ASU 2016-01- *Recognition and Measurement of Financial Assets and Financial Liabilities*, which addresses certain aspects of recognition, measurement, presentation and disclosure of financial instruments. This guidance allows an entity to choose, investment-by-investment, to report an equity investment that neither has a readily determinable fair value, nor qualifies for the practical expedient for fair value estimation using NAV, at its cost minus impairment (if any), plus or minus changes resulting from observable price changes in orderly transactions for the identical or similar investment of the same issue. Impairment of such investments must be assessed qualitatively at each reporting period. Entities must disclose their financial assets and liabilities by measurement category and form of asset either on the face of the balance sheet or in the accompanying notes. The ASU is effective for annual reporting periods beginning after December 15, 2018 or fiscal year 2020 for the Health System. The provision to eliminate the requirement to disclose the fair value of financial instruments measured at cost (such as the fair value of debt) was early adopted during the year ended June 30, 2017. The standard has been adopted during the current fiscal year and no material impact was noted.

In February 2016, the FASB issued *ASU 2016-02 – Leases (Topic 842)*. Under the new guidance, lessees are required to recognize the following for all leases (with the exception of leases with a term of twelve months or less) at the commencement date: (a) a lease liability, which is a lessee's obligation to make lease payments arising from a lease, measured on a discounted basis; and (b) a right-of-use asset, which is an asset that represents the lessee's right to use, or control the use of, a specified asset for the lease term. Leases are classified as either operating or finance. Operating leases result in straight-line expense in the statement of operations (similar to previous operating leases), while finance leases result in more expense being recognized in the earlier years of the lease term (similar to previous capital leases). The Health System adopted the new standard on July 1, 2019 using the modified retrospective approach. The Health System elected the transition method that allows for the application of the standard at the adoption date rather than at the beginning of the earliest comparative period presented in the consolidated financial statements. The Health System also elected available practical expedients (Note 16).

In March 2017, the FASB issued ASU 2017-07, *Compensation – Retirement Benefits* (Topic 715): *Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost*. Under the new standard, the service cost component of the net benefit cost will be included within income from operations as a component of benefits expenses and the other components of net benefit cost as defined by ASC 715 will be reported in non-operating activities within the consolidated statements of operations and changes in net assets. The standard also prohibits reporting of the other components of net benefit cost in the same line as other pension related changes on the statements of operations and changes in net assets. ASU 2017-07 is effective for the fiscal year ended June 30, 2020 and is applied on a retrospective basis.

Reclassifications

As a result of adopting the provisions of ASU 2017-07, the Health System reclassified $11,221,000 from benefits expense to non-operating activities within the consolidated statements of operations and changes in net assets for the fiscal year ended June 30, 2019. The amount included in non-operating activities for the fiscal year ending June 30, 2020 was $10,810,000.

3. Acquisition

Effective July 1, 2018, Alice Peck Day Memorial Hospital became the sole corporate member of APD LifeCare Center Inc. (LifeCare). LifeCare owns and operates Harvest Hill, an assisted living facility, the Woodlands, a residential living community and the Elizabeth S. Hughes Care Unit, which provides hospice care.

In accordance with applicable accounting guidance on not-for-profit mergers and acquisitions, Alice Peck Day Memorial Hospital recorded goodwill related to the acquisition of LifeCare of approximately $5,131,000. Restricted contribution income of $383,000 was recorded within net assets with donor restrictions in the accompanying consolidated statement of changes in net assets. Included in the transaction was LifeCare's cash balance of $4,863,000. No consideration was exchanged for the net assets assumed and acquisition costs were expensed as incurred.

4. Patient Service Revenue and Accounts Receivable

The Health System reports patient service revenue at amounts that reflect the consideration to which it expects to be entitled in exchange for providing patient care. These amounts are due from patients, third-party payers (including managed care payers and government programs), and others; and they include variable consideration for retroactive revenue adjustments due to settlement of audits, reviews, and investigations. Generally, the Health System bills patients and third-party payers several days after the services were performed or shortly after discharge. Revenue is recognized as performance obligations are satisfied under contracts by providing healthcare services to patients.

The Health System determines performance obligations based on the nature of the services provided. Revenues for performance obligations satisfied over time are recognized based on actual charges incurred in relation to total expected charges as this method provides a reasonable estimate of the transfer of services over the term of performance obligations based on inputs needed to satisfy the obligations. Generally, performance obligations satisfied over time relate to patients receiving inpatient acute care services. For inpatient services, performance obligations are measured from admission to the point when there are no further services required for the patient, which is generally the time of discharge. For outpatient services and physician services, performance obligations are recognized at a point in time when the services are provided and no further patient services are deemed necessary.

Generally, the Health System's patient service performance obligations relate to contracts with a duration of less than one year, therefore the Health System has elected to apply the optional exemption provided in ASC 606-10-50-14a and, therefore, we are not required to disclose the aggregate amount of the transaction price allocated to performance obligations that are unsatisfied or partially unsatisfied at the end of the reporting period. This generally refers to inpatient services at the end of the reporting period. The performance obligations for these contracts are generally completed when the patients are discharged, which generally occurs within days or weeks of the end of the reporting period.

Established charges represent gross charges. They are not the same as actual pricing, and they generally do not reflect what a hospital is ultimately entitled to for services it provides. Therefore, they are not displayed in the Health System's consolidated statements of operations and changes in net assets.

Hospitals are paid amounts negotiated with insurance companies or set by government entities, which are typically less than established or standard charges. Gross charges are used to calculate Medicare outlier payments and to determine certain elements of payment under managed care contracts. Gross charges are what hospitals charge all patients prior to the application of contractual adjustments and implicit price concessions.

Explicit Pricing Concessions
Revenues for the Health System under the traditional fee-for service Medicare and Medicaid programs are based on prospectively determined rates per discharge or visit, reasonable (allowable) cost, or prospective rates per episodic period, depending on the type of provider.

- Inpatient acute care services provided to Medicare program beneficiaries are paid using the prospective payment system ("PPS") to determine rates-per-discharge. These rates vary according to a patient classification system ("DRG"), based on diagnostic, clinical and other factors. In addition, inpatient capital costs (depreciation and interest) are reimbursed by Medicare on the basis of a prospectively determined rate per discharge. Medicare outpatient services are paid on a prospective payment system, based on a pre-determined amount for each outpatient procedure (APC), subject to various mandated modifications. Retrospectively determined cost-based revenues under these programs, such as indirect medical education, direct graduate medical education, disproportionate share hospital, transplant services, and bad debt reimbursement are based on the hospital's cost reports and are estimated using historical trends and current factors. The Health System's payments for inpatient services rendered to New Hampshire ("NH") and Vermont ("VT") Medicaid beneficiaries are based on PPS, while outpatient services are reimbursed on a retrospective cost basis or fee schedules for NH beneficiaries. VT outpatient beneficiaries are paid on a prospective basis per outpatient procedure.

- Inpatient acute, swing, and outpatient services furnished by critical access hospitals ("CAH") are reimbursed by Medicare at 101% of reasonable costs, subject to 2% sequestration, excluding ambulance services and inpatient hospice care.

- Providers of home health services to patients eligible for Medicare home health benefits are paid on a prospective basis, with no retrospective settlement. The prospective payment is based on the scoring attributed to the acuity level of the patient at a rate determined by federal guidelines.

- Hospice services to patients eligible for Medicare hospice benefits are paid on a per diem basis, with no retrospective settlement, provided the aggregate annual Medicare reimbursement is below a predetermined aggregate capitated rate.

- The Health System's cost based services to Medicare and Medicaid are reimbursed during the year based on varying interim payment methodologies. Final settlement is determined after the submission of an annual cost report and subject to audit of this report by Medicare and Medicaid auditors, as well as administrative and judicial review. Because the laws, regulations, and rule interpretations, governing Medicare and Medicaid reimbursement are complex and change frequently, the estimates recorded could change over time by material amounts.

- Revenues under Managed Care Plans (Plans) consist primarily of payment terms involving mutually agreed upon rates per diagnosis, discounted fee-for service rates, or similar contractual arrangements. These revenues are also subject to review and possible audit.

The Plans are billed for patient services on an individual patient basis. An individual patient's bill is subject to adjustments in accordance with contractual terms in place with the Plans following their review and adjudication of each bill.

The Health System is not aware of any claims, disputes, or unsettled matters with any payer that would materially affect its revenues for which it has not adequately provided in the accompanying Health System's consolidated financial statements.

The Health System provides charity care to patients who are unable to pay for healthcare services they receive as determined by financial conditions. Patients who qualify receive partial or full adjustments to charges for services rendered. The Health System's policy is to treat amounts qualified as charity care as explicit price concessions and as such are not reported in net patient service revenue.

Vermont imposes a provider tax on home health agencies in the amount of 4.25% of annual net patient revenue. In fiscal years 2020 and 2019, home health provider taxes paid were $624,000 and $628,000, respectively.

Medicaid Enhancement Tax & Disproportionate Share Hospital

On May 22, 2018, the State of New Hampshire and all New Hampshire hospitals (Hospitals) agreed to resolve disputed issues and enter into a seven-year agreement to stabilize Disproportionate Share Hospital (DSH) payments, with provisions for alternative payments in the event of legislative changes to the DSH program. Under the agreement, the State committed to make DSH payments to the Hospitals in an amount no less than 86% of the Medicaid Enhancement Tax (MET) proceeds collected in each fiscal year, in addition to providing for directed payments or increased rates for Hospitals in an amount equal to 5% of MET proceeds collected from state fiscal year (SFY) 2020 through SFY 2024. The agreement prioritizes DSH payments to critical access hospitals in an amount equal to 75% of allowable uncompensated care (UCC), with the remainder distributed to Hospitals without critical access designation in proportion to their allowable UCC amounts.

During the years ended June 30, 2020 and 2019, the Health System received DSH payments of approximately, $71,133,000 and $69,179,000 respectively. DSH payments are subject to audit and therefore, for the years ended June 30, 2020 and 2019, the Health System recognized as revenue DSH receipts of approximately $67,500,000 and approximately $64,864,000, respectively.

During the years ended June 30, 2020 and 2019, the Health System recorded State of NH MET and State of VT Provider taxes of $76,010,000 and $70,061,000, respectively. The taxes are calculated at 5.4% for NH and 6% for VT of certain patient service revenues. The Provider taxes are included in operating expenses in the consolidated statements of operations and changes in net assets.

Implicit Price Concessions
Generally, patients who are covered by third-party payer contracts are responsible for related co-pays, co-insurance and deductibles, which vary depending on the contractual obligations of patients. The Health System also provides services to uninsured patients and offers those patients a discount from standard charges. The Health System estimates the transaction price for patients with co-pays, co-insurance, and deductibles and for those who are uninsured based on historical collection experience and current market conditions. The discount offered to uninsured patients reduces the transaction price at the time of billing. The uninsured and patient responsible

DocuSign Envelope ID: 35E64ED9-E359-47FF-A4E9-2BF10561F892

accounts, net of discounts recorded, are further reduced through implicit price concessions based on historical collection trends for similar accounts and other known factors that impact the estimation process. Subsequent changes to the estimate of transaction price are generally recorded as adjustments to net patient services revenue in the period of change.

The implicit price concessions included in estimating the transaction price represent the difference between amounts billed to patients and the amounts the Health System expects to collect based on collection history with similar patients. Although outcomes vary, the Health System's policy is to attempt to collect amounts due from patients, including co-pays, co-insurance and deductibles due from insurance at the time of service while complying with all federal and state statutes and regulations, including but not limited to, the Emergency Medical Treatment and Active Labor Act (EMTALA). Through various systems and processes the Health System estimates Medicare and Medicaid net patient service revenue and cost report settlements and accrues final expected settlements. For filed cost reports, the accrual is recorded based on those filings, subsequent activity, and on historical trends and other relevant evidence. For periods in which a cost report is yet to be filed, accruals are based on estimates of what is expected to be reported, and any trends and relevant evidence. Cost reports generally must be filed within five months of the closing period.

Settlements with third-party payers for retroactive revenue adjustments due to audits, reviews or investigations are considered variable consideration and are included in the determination of the estimated transaction price for providing patient care using the most likely amount. These settlements are estimated based on the terms of the payment agreement with the payer, correspondence from the payer and historical settlement activity, including assessments to ensure that it is probable that a significant reversal in the amount of cumulative revenue recognized will not occur when the uncertainty associated with the retroactive adjustment is subsequently resolved. Estimated settlements are adjusted in future periods as adjustments become known, or as years are settled or are no longer subject to such audits, reviews or investigations. As of June 30, 2020 and 2019, the Health System had reserves of $302,525,000 and $41,570,000, respectively, recorded in Estimated third-party settlements. Included in the 2020 Estimated third party settlements is $239,500,000 of Medicare accelerated and advanced payments, received as working capital support during the novel coronavirus ("COVID-19") outbreak at June 30, 2020. In addition, $10,900,000 has been recorded in Other liabilities as of June 30, 2020 and 2019, respectively.

For the years ended June 30, 2020 and 2019, additional increases in revenue of $2,314,000 and $1,800,000, respectively, were recognized due to changes in estimates of implicit price concessions for performance obligations satisfied in prior years.

Net operating revenues for the hospital operations of the PPS and CAH, and other business segments consist primarily of patient service revenues, principally for patients covered by Medicare, Medicaid, managed care and other health plans as well as patients covered under the Health System's uninsured discount and charity care programs.

The table below shows the Health System's sources of net operating revenues presented at the net transaction price for the years ended June 30, 2020 and 2019.

Investments are accounted for using either the fair value method or equity method of accounting, as appropriate on a case by case basis. The fair value method is used for all debt securities and equity securities that are traded on active markets and are valued at prices that are readily available in those markets. The equity method is used when investments are made in pooled/commingled investment funds that represent investments where shares or units are owned of pooled funds rather than the underlying securities in that fund. These pooled/commingled funds make underlying investments in securities from the asset classes listed above. All investments, whether the fair value or equity method of accounting is used, are reported at what the Health System believes to be the amount that the Health System would expect to receive if it liquidated its investments at the balance sheets date on a non-distressed basis.

The following tables summarize the investments by the accounting method utilized, as of June 30, 2020 and 2019. Accounting standards require disclosure of additional information for those securities accounted for using the fair value method, as shown in Note 7.

For the years ended June 30, 2020 and 2019 investment income is reflected in the accompanying consolidated statements of operations and changes in net assets as other operating revenue of approximately $936,000 and $983,000 and as non-operating gains of approximately $27,047,000 and $40,052,000, respectively.

Private equity limited partnership shares are not eligible for redemption from the fund or general partner, but can be sold to third party buyers in private transactions that typically can be completed in approximately 90 days. It is the intent of the Health System to hold these investments until the fund has fully distributed all proceeds to the limited partners and the term of the partnership agreement expires. Under the terms of these agreements, the Health System has committed to contribute a specified level of capital over a defined period of time. Through June 30, 2020 and 2019, the Health System has committed to contribute approximately $172,819,000 and $164,319,000 to such funds, of which the Health System has contributed approximately $119,142,000 and $109,584,000 and has outstanding commitments of $53,677,000 and $54,735,000, respectively.

6. Property, Plant, and Equipment

Property, plant, and equipment are summarized as follows at June 30, 2020 and 2019:

(in thousands of dollars)	2020	2019
Land	$ 40,749	$ 38,232
Land improvements	39,820	42,607
Buildings and improvements	893,081	898,050

Construction in progress	99,224	15,166
	$ 643,586	$ 621,256

As of June 30, 2020, construction in progress primarily consists of two projects. The first project, started in fiscal 2019, consists of the addition of the ambulatory surgical center (ASC) located in Manchester, NH. The estimated cost to complete the project is $42 million. The anticipated completion date is the second quarter of fiscal 2021. The second project, involves the addition of the in-patient tower located in Lebanon, NH. The estimated cost to complete the tower project is $140 million over the next three fiscal years.

The construction in progress as of June 30, 2019, included both the ASC, as well as renovations taking place at the various pharmacy locations to bring their facilities compliant with Regulation USP800. The pharmacy upgrade was completed during the first quarter of fiscal year 2021. 7. Fair Value Measurements

The following is a description of the valuation methodologies for assets and liabilities measured at fair value on a recurring basis:

Cash and Short-Term Investments
Consists of money market funds and are valued at net asset value (NAV) reported by the financial institution.

Domestic, Emerging Markets and International Equities
Consists of actively traded equity securities and mutual funds which are valued at the closing price reported on an active market on which the individual securities are traded (Level 1 measurements).

U.S. Government Securities, Domestic Corporate and Global Debt Securities
Consists of U.S. government securities, domestic corporate and global debt securities, mutual funds and pooled/commingled funds that invest in U.S. government securities, domestic corporate and global debt securities. Securities are valued based on quoted market prices or dealer quotes where available (Level 1 measurement). If quoted market prices are not available, fair values are based on quoted market prices of comparable instruments or, if necessary, matrix pricing from a third party pricing vendor to determine fair value (Level 2 measurements). Matrix prices are based on quoted prices for securities with similar coupons, ratings and maturities, rather than on specific bids and offers for a designated security. Investments in mutual funds are measured based on the quoted NAV as of the close of business in the respective active market (Level 1 measurements).

The preceding methods may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Health System believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

Investments are classified in their entirety based on the lowest level of input that is significant to the fair value measurement. The following tables set forth the consolidated financial assets and liabilities that were accounted for at fair value on a recurring basis as of June 30, 2020 and 2019:

9. Board Designated and Endowment Funds

Net assets include numerous funds established for a variety of purposes including both donor-restricted endowment funds and funds designated by the Board of Trustees to function as endowments. Net assets associated with endowment funds, including funds designated by the Board of Trustees to function as endowments, are classified and reported based on the existence or absence of donor-imposed restrictions.

The Board of Trustees has interpreted the NH and VT Uniform Prudent Management of Institutional Funds Acts (UPMIFA or Act) for donor-restricted endowment funds as requiring the preservation of the original value of gifts, as of the gift date, to donor-restricted endowment funds, absent explicit donor stipulations to the contrary. The Health System's net assets with donor restrictions which are to be held in perpetuity consist of (a) the original value of gifts donated to the permanent endowment, (b) the original value of subsequent gifts to be held in perpetuity, and (c) accumulations to the permanent endowment made in accordance with the direction of the applicable donor gift instrument at the time the accumulation is added to the fund, if any. Collectively these amounts are referred to as the historic dollar value of the fund.

Net assets without donor restrictions include funds designated by the Board of Trustees to function as endowments, the income from certain donor-restricted endowment funds, and any accumulated investment return thereon, which pursuant to donor intent may be expended based on trustee or management designation. Net assets with donor restrictions that are temporary in nature, either restricted by time or purpose, include funds appropriated for expenditure pursuant to endowment and investment spending policies, certain expendable endowment gifts from donors, and any retained income and appreciation on donor-restricted endowment funds, which are restricted by the donor to a specific purpose or by law. When the restrictions on these funds have been met, the funds are reclassified to net assets without donor restrictions.

In accordance with the Act, the Health System considers the following factors in making a determination to appropriate or accumulate donor-restricted endowment funds: the duration and preservation of the fund; the purposes of the donor-restricted endowment fund; general economic conditions; the possible effect of inflation and deflation; the expected total return from income and the appreciation of investments; other resources available; and investment policies.

The Health System has endowment investment and spending policies that attempt to provide a predictable stream of funding for programs supported by its endowment while ensuring that the purchasing power does not decline over time. The Health System targets a diversified asset allocation that places emphasis on investments in domestic and international equities, fixed income, private equity, and hedge fund strategies to achieve its long-term return objectives within prudent risk constraints. The Health System's Investment Committee reviews the policy portfolio asset allocations, exposures, and risk profile on an ongoing basis.

The Health System, as a policy, may appropriate for expenditure or accumulate so much of an endowment fund as the institution determines is prudent for the uses, benefits, purposes, and duration for which the endowment is established, subject to donor intent expressed in the gift instrument and the standard of prudence prescribed by the Act.

From time to time, the fair value of assets associated with individual donor-restricted endowment funds may fall below their original contributed value. Such market losses were not material as of June 30, 2020 and 2019.

Endowment net asset composition by type of fund consists of the following at June 30, 2020 and 2019:

Liability for pension	$ (279,647)	$ (237,806)

As of June 30, 2020 and 2019, the liability for pension is included in the liability for pension and other postretirement plan benefits in the accompanying consolidated balance sheets.

Amounts not yet reflected in net periodic pension expense and included in the change in net assets without donor restrictions include approximately $546,818,000 and $478,394,000 of net actuarial loss as of June 30, 2020 and 2019, respectively.

The estimated amounts to be amortized from net assets without donor restrictions into net periodic pension expense in fiscal year 2021 for net actuarial losses is $12,752,000.

The accumulated benefit obligation for the defined benefit pension plans was approximately $1,209,282 and $1,135,770,000 at June 30, 2020 and 2019, respectively.

The following table sets forth the assumptions used to determine the benefit obligation at June 30, 2020 and 2019:

	2020	2019
Discount rate	3.00% - 3.10%	4.20 % – 4.50 %
Rate of increase in compensation	N/A	N/A

The primary investment objective for the Plan's assets is to support the Pension liabilities of the Pension Plans for Employees of the Health System, by providing long-term capital appreciation and by also using a Liability Driven Investing ("LDI") strategy to partially hedge the impact fluctuating interest rates have on the value of the Plan's liabilities. As of both June 30, 2020 and 2019, it is expected that the LDI strategy will hedge approximately 60% of the interest rate risk associated with pension liabilities. To achieve the appreciation and hedging objectives, the Plans utilize a diversified structure of asset classes designed to achieve stated performance objectives measured on a total return basis, which includes income plus realized and unrealized gains and losses.

The range of target allocation percentages and the target allocations for the various investments are as follows:

	Range of Target Allocations	Target Allocations
Cash and short-term investments	0–5%	3%
U.S. government securities	0–10	5
Domestic debt securities	20–58	40
Global debt securities	6–26	7
Domestic equities	5–35	18
International equities	5–15	11
Emerging market equities	3–13	5
Real estate investment trust funds	0–5	1
Private equity funds	0–5	0
Hedge funds	5–18	10

To the extent an asset class falls outside of its target range on a quarterly basis, the Health System shall determine appropriate steps, as it deems necessary, to rebalance the asset class.

The Boards of Trustees of the Health System, as Plan Sponsors, oversee the design, structure, and prudent professional management of the Health System's Plans' assets, in accordance with Board approved investment policies, roles, responsibilities and authorities and more specifically the following:

- Establishing and modifying asset class targets with Board approved policy ranges,
- Approving the asset class rebalancing procedures,
- Hiring and terminating investment managers, and
- Monitoring performance of the investment managers, custodians and investment consultants.

The hierarchy and inputs to valuation techniques to measure fair value of the Plans' assets are the same as outlined in Note 7. In addition, the estimation of fair value of investments in private equity and hedge funds for which the underlying securities do not have a readily determinable value is made using the NAV per share or its equivalent as a practical expedient. The Health System's Plans own interests in these funds rather than in securities underlying each fund and, therefore, are generally required to consider such investments as Level 2 or 3, even though the underlying securities may not be difficult to value or may be readily marketable.

The following table sets forth the Health System's Plans' investments and deferred compensation plan assets that were accounted for at fair value as of June 30, 2020 and 2019:

There were no transfers into and out of Level 1 and 2 measurements due to changes in valuation methodologies during the years ended June 30, 2020 and 2019.

The weighted average asset allocation for the Health System's Plans at June 30, 2020 and 2019 by asset category is as follows:

	2020	2019
Cash and short-term investments	1 %	2 %
U.S. government securities	5	5

The expected long-term rate of return on plan assets is reviewed annually, taking into consideration the asset allocation, historical returns on the types of assets held, and the current economic environment. Based on these factors, it is expected that the pension assets will earn an average of 7.50% per annum.

The Health System is expected to contribute approximately $25,755,000 to the Plans in 2021 however actual contributions may vary from expected amounts.

The following benefit payments, which reflect expected future service, as appropriate, are expected to be paid for the years ending June 30 and thereafter:

(in thousands of dollars)

2021	$ 51,007
2022	53,365
2023	55,466
2024	57,470
2025	59,436
2026 – 2028	321,419

Effective May 1, 2020, the Health System terminated a defined benefit plan and settled the accumulated benefit obligation of $18,795,000 by purchasing nonparticipating annuity contracts. The plan assets at fair value were $11,836,000.

Defined Contribution Plans
The Health System has an employer-sponsored 401(a) plan for certain of its members, under which the employer makes base, transition and discretionary match contributions based on specified percentages of compensation and employee deferral amounts. Total employer contributions to the plan of approximately $51,222,000 and $40,537,000 in 2020 and 2019, respectively, are included in employee benefits in the accompanying consolidated statements of operations and changes in net assets.

Various 403(b) and tax- sheltered annuity plans are available to employees of the Health System. Plan specifications vary by member and plan. No employer contributions were made to any of these plans in 2020 and 2019 respectively.

Postretirement Medical and Life Benefits
The Health System has postretirement medical and life benefit plans covering certain of its active and former employees. The plans generally provide medical or medical and life insurance benefits to certain retired employees who meet eligibility requirements. The plans are not funded.

Net periodic postretirement medical and life benefit (income) cost is comprised of the components listed below for the years ended June 30, 2020 and 2019:

(in thousands of dollars)	2020	2019
Service cost	$ 609	$ 384
Interest cost	1,666	1,842
Net prior service income	(5,974)	(5,974)
Net loss amortization	469	10
	$ (3,230)	$ (3,738)

The following table sets forth the accumulated postretirement medical and life benefit obligation and amounts recognized in the Health System's consolidated financial statements at June 30, 2020 and 2019:

As of June 30, 2020 and 2019, the liability for postretirement medical and life benefits is included in the liability for pension and other postretirement plan benefits in the accompanying consolidated balance sheets.

Amounts not yet reflected in net periodic postretirement medical and life benefit income and included in the change in net assets without donor restrictions are as follows:

(in thousands of dollars)	2020	2019
Net prior service income	$ (3,582)	$ (9,556)
Net actuarial loss	10,335	8,386

The estimated amounts that will be amortized from net assets without donor restrictions into net periodic postretirement income in fiscal year 2021 for net prior service cost is $5,974,000.

The following future benefit payments, which reflect expected future service, as appropriate, are expected to be paid for the year ending June 30, 2021 and thereafter:

(in thousands of dollars)

2021	$	3,422
2022		3,436

In determining the accumulated postretirement medical and life benefit obligation, the Health System used a discount rate of 2.90% in 2020 and an assumed healthcare cost trend rate of 6.50%, trending down to 5.00% in 2024 and thereafter. Increasing the assumed healthcare cost trend rates by one percentage point in each year would increase the accumulated postretirement medical benefit obligation as of June 30, 2020 and 2019 by $1,772,000 and $1,601,000 and the net periodic postretirement medical benefit cost for the years then ended by $122,000 and $77,000, respectively. Decreasing the assumed healthcare cost trend rates by one percentage point in each year would decrease the accumulated postretirement medical benefit obligation as of June 30, 2020 and 2019 by $1,603,000 and $1,452,000 and the net periodic postretirement medical benefit cost for the years then ended by $108,000 and $71,000, respectively.

12. Professional and General Liability Insurance Coverage

Mary Hitchcock Memorial Hospital and Dartmouth-Hitchcock Clinic, along with Dartmouth College, Cheshire Medical Center, The New London Hospital Association, Mt. Ascutney Hospital and Health Center, and the Visiting Nurse and Hospice for VT and NH are provided professional and general liability insurance on a claims-made basis through Hamden Assurance Risk Retention Group, Inc. (RRG), a VT captive insurance company. Effective November 1, 2018 Alice Peck Day Memorial Hospital is provided professional and general liability insurance coverage through RRG. RRG reinsures the majority of this risk to Hamden Assurance Company Limited (HAC), a captive insurance company domiciled in Bermuda and to a variety of commercial reinsurers. Mary Hitchcock Memorial Hospital, Dartmouth-Hitchcock Clinic, and Dartmouth College have ownership interests in both HAC and RRG. The insurance program provides coverage to the covered institutions and named insureds on a modified claims-made basis which means coverage is triggered when claims are made. Premiums and related insurance deposits are actuarially determined based on asserted liability claims adjusted for future development. The reserves for outstanding losses are recorded on an undiscounted basis.

Selected financial data of HAC and RRG, taken from the latest available financial statements at June 30, 2020 and 2019, are summarized as follows:

13. Commitments and Contingencies

Litigation
The Health System is involved in various malpractice claims and legal proceedings of a nature considered normal to its business. The claims are in various stages and some may ultimately be brought to trial. While it is not feasible to predict or determine the outcome of any of these claims, it is the opinion of management that the final outcome of these claims will not have a material effect on the consolidated financial position of the Health System.

Lines of Credit
The Health System has entered into Loan Agreements with financial institutions establishing access to revolving loans ranging from $10,000,000 up to $30,000,000. Interest is variable and determined using LIBOR or the Wall Street Journal Prime Rate. The Loan Agreements are due to expire March 31, 2021. There was no outstanding balance under the lines of credit as of June 30, 2020 and 2019. Interest expense was approximately $20,000 and $95,000, respectively, and is included in the consolidated statements of operations and changes in net assets.

14. Functional Expenses

Operating expenses are presented by functional classification in accordance with the overall service missions of the Health System. Each functional classification displays all expenses related to the underlying operations by natural classification. Salaries, employee benefits, medical supplies and medications, and purchased services and other expenses are generally considered variable and are allocated to the mission that best aligns to the type of service provided. Medicaid enhancement tax is allocated to program services. Interest expense is allocated based on usage of debt-financed space. Depreciation and amortization is allocated based on square footage and specific identification of equipment used by department.

Operating expenses of the Health System by functional and natural basis are as follows for the year ended June 30, 2020:

	2020

Thus, certain financial assets reported on the accompanying consolidated balance sheet may not be available for general expenditure within one year of the balance sheet date.

The Health System's financial assets available at June 30, 2020 and 2019 to meet cash needs for general expenditures within one year of June 30, 2020 and 2019, are as follows:

Total financial assets available within one year	$ 1,360,080	$ 1,077,816

For the years ended June 30, 2020 and June 30, 2019, the Health System generated positive cash flow from operations of approximately $269,144,000 and $161,145,000, respectively. In addition, the Health System's liquidity management plan includes investing excess daily cash in intermediate or long term investments based on anticipated liquidity needs. The Health System has an available line of credit of up to $30,000,000 which it can draw upon as needed to meet its liquidity needs. See Note 13 for further details on the line of credit.

16. Lease Commitments

In February 2016, the FASB issued ASU 2016-02 (Topic 842) "Leases." Topic 842 supersedes the lease requirements in Accounting Standards Codification Topic 840, "Leases." Under Topic 842, lessees are required to recognize assets and liabilities on the balance sheet for most leases and provide enhanced disclosures. Leases will be classified as either finance or operating. D-HH adopted Topic 842 effective July 1, 2019.

D-HH applied Topic 842 to all leases as of July 1, 2019 with comparative periods continuing to be reported under Topic 840. We have elected the practical expedient package to not reassess at adoption (i) expired or existing contracts for whether they are or contain a lease, (ii) the lease classification of any existing leases or (iii) initial direct costs for existing leases. We have also elected the policy exemption that allows lessees to choose to not separate lease and non-lease components by class of underlying asset and are applying this expedient to all relevant asset classes.

D-HH determines if an arrangement is or contains a lease at inception of the contract. Right-of-use assets represent our right to use the underlying assets for the lease term and our lease liabilities represent our obligation to make lease payments arising from the leases. Right-of-use assets and lease liabilities are recognized at commencement date based on the present value of lease payments over the lease term. We use the implicit rate noted within the contract. If not readily available, we use our estimated incremental borrowing rate, which is derived using a collateralized borrowing rate for the same currency and term as the associated lease. A right-of-use asset and lease liability is not recognized for leases with an initial term of 12 months or less and we recognize lease expense for these leases on a straight-line basis over the lease term within lease and rental expense.

Our operating leases are primarily for real estate, including certain acute care facilities, off-campus outpatient facilities, medical office buildings, and corporate and other administrative offices. Our real estate lease agreements typically have initial terms of 5 to 10 years. These real estate leases may include one or more options to renew, with renewals that can extend the lease term from 2 to 5 years. The exercise of lease renewal options is at our sole discretion. When determining the lease term, we included options to extend or terminate the lease when it is reasonably certain that we will exercise that option.

On adoption, the Health System recognized lease liabilities and right-of-use assets of $60,269,884, respectively.

The components of lease expense for the year ended June 30, 2020 are as follows:

17. COVID - 19

In March 2020, the World Health Organization declared the COVID-19 outbreak a pandemic and the United States federal government declared COVID-19 a national emergency. The Health System quickly developed and implemented an emergency response to the situation to ensure the safety of its patients and staff across the System. A key decision was made to postpone elective and non-urgent care in mid-March. Several factors drove that decision, including efforts to reduce the spread of COVID-19; conservation of personal protective equipment ("PPE"), which was and remains in critically short supply worldwide; and at the urging of the CDC and U.S. Surgeon General who in March urged all hospitals to reduce the number of elective procedures and visits.

On March 27, 2020, the President of the United States signed into law the Coronavirus Aid, Relief, and Economic Security Act ("CARES Act") to provide economic assistance to a wide array of industries to ease the financial impact of COVID-19. As part of the CARES Act, the Centers for Medicare and Medicaid Services ("CMS") expanded its Accelerated and Advance Payment Program which allows participants to receive expedited payments during periods of national emergencies.

As of June 30, 2020, the Health System has received approximately $88,877,000 in governmental assistance including funding under the CARES Act. This includes recognition of approximately $88,725,000 of stimulus revenue recorded as a component of other operating revenue in the consolidated statements of operations and changes in net assets as a result of satisfying the conditions of general and targeted grant funding under the Provider Relief Fund established by the CARES Act. The Health System recognized revenue related to the CARES Act provider relief funding based on information contained in laws and regulations, as well as interpretations issued by the HHS, governing the funding that was publicly available as of June 30, 2020. The Health System recorded approximately $239,500,000 attributable to the Medicare Accelerated and Advance Payment Program representing working capital financing to be repaid through the provision of future services. These funds are recorded as a contract liability as a payment received before performing services. This amount is reported as a component of estimated third party settlements in the consolidated balance sheet as of June 30, 2020. Subsequent to June 30, 2020, the Health System received additional stimulus funding attributable to a targeted distribution of approximately $19,700,000 for Safety Net Hospitals and $2,500,000 for a general distribution.

Additionally, the CARES Act provides for payroll tax relief, including employee retention tax credits and the deferral of all employer Social Security tax payments to help employers in the face of economic hardship related to the COVID-19 pandemic. As of June 30, 2020, the Health System deferred approximately $13,727,000 attributable to the employer portion of Social Security taxes and $2,600,000 of employee retention tax credits. D-HH Leadership has also taken advantage of additional Federal and State programs including the Payroll Tax Deferral, Employee Retention Credit, First Responder Support, Front-Line Employees Hazard Pay Grant Program and FEMA funding to help offset some of the incremental costs being incurred to provide comprehensive and safe care during the pandemic.

18. Subsequent Events

The Health System has assessed the impact of subsequent events through November 17, 2020, the date the audited consolidated financial statements were issued, and has concluded that there were no such events that require adjustment to the audited consolidated financial statements or disclosure in the notes to the audited consolidated financial statements other than as noted below.

HHS Reporting Requirements for the CARES Act

In September 2020 and October 2020, HHS issued new reporting requirements for the CARES Act provider relief funding. The new requirements first require Hospitals to identify healthcare-related expenses attributable to the COVID-19 pandemic that remain unreimbursed by another source. If those expenses do not exceed the provider relief funding received, Hospitals will need to demonstrate that the remaining provider relief funds were used to compensate for a negative variance in year over year patient service revenue. HHS is entitled to recoup Provider Relief Funding in excess of the sum of expenses attributable to the COVID-19 pandemic that remain unreimbursed by another source and the decline in calendar year over year patient care revenue. Due to these new reporting requirements there is at least a reasonable possibility that amounts recorded under the CARES Act provider relief fund by the Health System may change in future periods.

Medicare and Medicaid Services ("CMS") expanded Accelerated and Advance Payment Program

In October 2020, new regulations were issued to revise the recoupment start date from August 2020 to April 2021.

Note Payable Amendment

In October 2020, the note payable issued to TD Bank in May 2020 was amended. Under the amended terms, the interest on the note payable is fixed at a rate of 2.56%, and matures in 2035. Repayment terms are semi-annual, interest only through July 2024, with annual principal payments to begin August 2024. The obligation can be satisfied at any time beforehand, without penalty.

EXPLANATION

The purpose of this request is to provide Substance Use Disorder Treatment and Recovery Supports Services statewide to New Hampshire residents who have income below 400% of the Federal Poverty Level, and are uninsured or underinsured.

The Contractors will provide statewide access to an array of treatment services, including individual and group outpatient services; intensive outpatient services; partial hospitalization; ambulatory withdrawal management services; transitional living services; high and low intensity residential treatment services; specialty residential services; and integrated medication assisted treatment. The Contractors will ensure individuals with a substance use disorder receive the appropriate type of treatment and have access to continued and expanded levels of care, which will increase the ability of individuals to achieve and maintain recovery. The Contractors will also assist eligible individuals with enrolling in Medicaid while receiving treatment, and the Department will serve as the payer of last resort.

Approximately 7,000 individuals will receive services over the next two years.

The Department will monitor services through monthly, quarterly, and annual reporting to ensure the Contractors:

- Provide services that reduce the negative impacts of substance misuse.
- Make continuing care, transfer and discharge decisions based on American Society of Addiction Medicine (ASAM) criteria.
- Treat individuals using Evidence Based Practices and follow best practices.
- Achieve initiation, engagement, and retention goals as required by the Department.

The Department selected the Contractors through a competitive bid process using a Request for Proposals (RFP) that was posted on the Department's website from July 20, 2021 through August 19, 2021. The Department received twelve (12) responses that were reviewed and scored by a team of qualified individuals. The Scoring Sheet is attached. This request represents ten (10) of twelve (12) contracts for Substance Use Disorder Treatment and Recovery Supports Services. The Department anticipates presenting two (2) additional contracts at a future Governor and Executive Council meeting for approval.

As referenced in Exhibit A, Revisions to Standard Agreement Provisions of the attached agreements, the parties have the option to extend the agreements for up to four (4) additional years, contingent upon satisfactory delivery of services, available funding, agreement of the parties, and Governor and Council approval.

Should the Governor and Council not authorize this request, individuals in need of Substance Use Disorder Treatment and Recovery Supports Services may not receive the treatment, tools, and education required to enhance and sustain recovery that, in some cases, prevents untimely deaths.

CERTIFICATION REGARDING DEBARMENT, SUSPENSION AND OTHER RESPONSIBILITY MATTERS

The Contractor identified in Section 1.3 of the General Provisions agrees to comply with the provisions of Executive Office of the President, Executive Order 12549 and 45 CFR Part 76 regarding Debarment, Suspension, and Other Responsibility Matters, and further agrees to have the Contractor's representative, as identified in Sections 1.11 and 1.12 of the General Provisions execute the following Certification:

INSTRUCTIONS FOR CERTIFICATION

1. By signing and submitting this proposal (contract), the prospective primary participant is providing the certification set out below.

2. The inability of a person to provide the certification required below will not necessarily result in denial of participation in this covered transaction. If necessary, the prospective participant shall submit an explanation of why it cannot provide the certification. The certification or explanation will be considered in connection with the NH Department of Health and Human Services' (DHHS) determination whether to enter into this transaction. However, failure of the prospective primary participant to furnish a certification or an explanation shall disqualify such person from participation in this transaction.

3. The certification in this clause is a material representation of fact upon which reliance was placed when DHHS determined to enter into this transaction. If it is later determined that the prospective primary participant knowingly rendered an erroneous certification, in addition to other remedies available to the Federal Government, DHHS may terminate this transaction for cause or default.

4. The prospective primary participant shall provide immediate written notice to the DHHS agency to whom this proposal (contract) is submitted if at any time the prospective primary participant learns that its certification was erroneous when submitted or has become erroneous by reason of changed circumstances.

5. The terms "covered transaction," "debarred," "suspended," "ineligible," "lower tier covered transaction," "participant," "person," "primary covered transaction," "principal," "proposal," and "voluntarily excluded," as used in this clause, have the meanings set out in the Definitions and Coverage sections of the rules implementing Executive Order 12549: 45 CFR Part 76. See the attached definitions.

6. The prospective primary participant agrees by submitting this proposal (contract) that, should the proposed covered transaction be entered into, it shall not knowingly enter into any lower tier covered transaction with a person who is debarred, suspended, declared ineligible, or voluntarily excluded from participation in this covered transaction, unless authorized by DHHS.

7. The prospective primary participant further agrees by submitting this proposal that it will include the clause titled "Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion - Lower Tier Covered Transactions," provided by DHHS, without modification, in all lower tier covered transactions and in all solicitations for lower tier covered transactions.

8. A participant in a covered transaction may rely upon a certification of a prospective participant in a lower tier covered transaction that it is not debarred, suspended, ineligible, or involuntarily excluded from the covered transaction, unless it knows that the certification is erroneous. A participant may decide the method and frequency by which it determines the eligibility of its principals. Each participant may, but is not required to, check the Nonprocurement List (of excluded parties).

9. Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render in good faith the certification required by this clause. The knowledge and

information of a participant is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.

10. Except for transactions authorized under paragraph 6 of these instructions, if a participant in a covered transaction knowingly enters into a lower tier covered transaction with a person who is suspended, debarred, ineligible, or voluntarily excluded from participation in this transaction, in addition to other remedies available to the Federal government, DHHS may terminate this transaction for cause or default.

PRIMARY COVERED TRANSACTIONS

11. The prospective primary participant certifies to the best of its knowledge and belief, that it and its principals:
    11.1. are not presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from covered transactions by any Federal department or agency;

    11.4. have not within a three-year period preceding this application/proposal had one or more public transactions (Federal, State or local) terminated for cause or default.

12. Where the prospective primary participant is unable to certify to any of the statements in this certification, such prospective participant shall attach an explanation to this proposal (contract).

LOWER TIER COVERED TRANSACTIONS

13. By signing and submitting this lower tier proposal (contract), the prospective lower tier participant, as defined in 45 CFR Part 76, certifies to the best of its knowledge and belief that it and its principals:

i. Business Associate shall document such disclosures of PHI and information related to such disclosures as would be required for Covered Entity to respond to a request by an individual for an accounting of disclosures of PHI in accordance with 45 CFR Section 164.528.

j. Within ten (10) business days of receiving a written request from Covered Entity for a request for an accounting of disclosures of PHI, Business Associate shall make available to Covered Entity such information as Covered Entity may require to fulfill its obligations to provide an accounting of disclosures with respect to PHI in accordance with 45 CFR Section 164.528.

In the event any individual requests access to, amendment of, or accounting of PHI directly from the Business Associate, the Business Associate shall within two (2) business days forward such request to Covered Entity. Covered Entity shall have the responsibility of responding to forwarded requests. However, if forwarding the individual's request to Covered Entity would cause Covered Entity or the Business Associate to violate HIPAA and the Privacy and Security Rule, the Business Associate shall instead respond to the individual's request as required by such law and notify Covered Entity of such response as soon as practicable.

l. Within ten (10) business days of termination of the Agreement, for any reason, the Business Associate shall return or destroy, as specified by Covered Entity, all PHI received from, or created or received by the Business Associate in connection with the Agreement, and shall not retain any copies or back-up tapes of such PHI. If return or destruction is not feasible, or the disposition of the PHI has been otherwise agreed to in the Agreement, Business Associate shall continue to extend the protections of the Agreement, to such PHI and limit further uses and disclosures of such PHI to those purposes that make the return or destruction infeasible, for so long as Business

Associate maintains such PHI. If Covered Entity, in its sole discretion, requires that the Business Associate destroy any or all PHI, the Business Associate shall certify to Covered Entity that the PHI has been destroyed.

(4) Obligations of Covered Entity

a. Covered Entity shall notify Business Associate of any changes or limitation(s) in its Notice of Privacy Practices provided to individuals in accordance with 45 CFR Section 164.520, to the extent that such change or limitation may affect Business Associate's use or disclosure of PHI.

c. Covered entity shall promptly notify Business Associate of any restrictions on the use or disclosure of PHI that Covered Entity has agreed to in accordance with 45 CFR 164.522, to the extent that such restriction may affect Business Associate's use or disclosure of PHI.

(5) Termination for Cause

In addition to Paragraph 10 of the standard terms and conditions (P-37) of this Agreement the Covered Entity may immediately terminate the Agreement upon Covered Entity's knowledge of a breach by Business Associate of the Business Associate Agreement set forth herein as Exhibit I. The Covered Entity may either immediately terminate the Agreement or provide an opportunity for Business Associate to cure the alleged breach within a timeframe specified by Covered Entity. If Covered Entity determines that neither termination nor cure is feasible, Covered Entity shall report the violation to the Secretary.

(6) Miscellaneous

a. Definitions and Regulatory References. All terms used, but not otherwise defined herein, shall have the same meaning as those terms in the Privacy and Security Rule, amended from time to time. A reference in the Agreement, as amended to include this Exhibit I, to a Section in the Privacy and Security Rule means the Section as in effect or as amended.

b. Amendment. Covered Entity and Business Associate agree to take such action as is necessary to amend the Agreement, from time to time as is necessary for Covered Entity to comply with the changes in the requirements of HIPAA, the Privacy and Security Rule, and applicable federal and state law.

d. Interpretation. The parties agree that any ambiguity in the Agreement shall be resolved to permit Covered Entity to comply with HIPAA, the Privacy and Security Rule.

e. Segregation. If any term or condition of this Exhibit I or the application thereof to any person(s) or circumstance is held invalid, such invalidity shall not affect other terms or conditions which can be given effect without the invalid term or condition; to this end the terms and conditions of this Exhibit I are declared severable.

f. Survival. Provisions in this Exhibit I regarding the use and disclosure of PHI, return or destruction of PHI, extensions of the protections of the Agreement in section (3) I, the defense and indemnification provisions of section (3) e and Paragraph 13 of the standard terms and conditions (P-37), shall survive the termination of the Agreement.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with U.S. generally accepted accounting principles; this includes the design, implementation and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with U.S. generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

1. Summary of Significant Accounting Policies

Recently Adopted Accounting Pronouncement

In July 2018, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2018-08, *Clarifying the Scope and the Accounting Guidance for Contributions Received and Contributions Made*, to clarify and improve the accounting guidance for contributions received and contributions made. The amendments in this ASU assist entities in (1) evaluating whether transactions should be accounted for as contributions (nonreciprocal transactions) within the scope of FASB Accounting Standards Codification (ASC) Topic 958, *Not-for-Profit Entities*, or as exchange (reciprocal) transactions subject to other accounting guidance, and (2) distinguishing between conditional contributions and unconditional contributions. This ASU was adopted by the Organization during the year ended June 30, 2020 and is reflected in the accompanying financial statements. Adoption of the ASU did not have a material impact on the Organization's financial reporting.

Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles (U.S. GAAP) requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements. Estimates also affect the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Basis of Presentation

The financial statements of the Organization have been prepared in accordance with U.S. GAAP, which require the Organization to report information regarding to its financial position and activities according to the following net asset classification:

Net assets without donor restrictions: Net assets that are not subject to donor-imposed restrictions and may be expended for any purpose in performing the primary objectives of the Organization. These net assets may be used at the discretion of the Organization's management and the Board of Directors.

DocuSign Envelope ID: C0CC27CC-EB25-40F0-8A10-2125D9FEFB49

Net assets with donor restrictions: Net assets subject to stipulations imposed by donors and grantors. Some donor restrictions are temporary in nature; those restrictions will be met by actions of the Organization or by the passage of time. Other donor restrictions are perpetual in nature, whereby the donor has stipulated the funds be maintained in perpetuity. Donor restricted contributions are reported as increases in net assets with donor restrictions. When a restriction expires, net assets are reclassified from net assets with donor restrictions to net assets without donor restrictions in the statement of activities and changes in net assets.

All contributions are considered to be available for operational use unless specifically restricted by the donor. Amounts received that are designated for future periods or restricted by the donor for specific purposes are reported as donor restricted support that increases that net asset class. When a donor restriction expires, that is, when a stipulated time restriction ends or purpose restriction is accomplished, donor restricted net assets are reclassified to net assets without donor restrictions and reported in the statement of activities and changes in net assets as net assets released from restrictions. The Organization records donor restricted contributions whose restrictions are met in the same reporting period as support without donor restrictions in the year of the gift.

The Organization reports contributions of land, buildings or equipment as support without donor restrictions, unless a donor places explicit restriction on their use. Contributions of cash or other assets that must be used to acquire long-lived assets are reported as donor restricted support and reclassified to net assets without donor restrictions when the assets are acquired and placed in service.

The financial statements include certain prior year summarized comparative information in total, but not by net asset class. Such information does not include sufficient detail to constitute a presentation in conformity with U.S. GAAP. Accordingly, such information should be read in conjunction with the Organization's June 30, 2019 financial statements, from which the summarized information was derived.

Cash and Cash Equivalents

Cash and cash equivalents include highly liquid investments with an original maturity of three months or less, excluding investments.

The Organization has cash deposits in major financial institutions which may exceed federal depository insurance limits. The Organization has not experienced any losses in such accounts. Management believes it is not exposed to any significant risk with respect to these accounts.

DocuSign Envelope ID: C0CC27CC-EB25-40F0-8A10-2125D9FEFB49

Accounts Receivable

Accounts receivable are stated at the amount management expects to collect from outstanding balances reduced by an allowance for uncollectible accounts. In evaluating the collectability of accounts receivable, the Organization monitors the amount of actual cash collected during each month against the Organization's outstanding patient accounts receivable balances, as well as the aging of balances. The Organization analyzes its past history and identifies trends for each of its major payer sources of revenue to estimate the appropriate allowance for uncollectible accounts and provision for bad debts. Management, as well as the Finance Committee of the Organization, regularly reviews the aging and collection rate of major payer sources. Balances that are still outstanding after management has used reasonable collection efforts are written off through a charge to the valuation allowance and a credit to the trade accounts receivable.

Investments

Investments in marketable securities and debt instruments with readily determined market values are carried at fair value. Fair values are based on quoted market prices, if available, or estimated using quoted market prices for similar securities.

Dividends, interest, and net realized and unrealized gains (losses) arising from investments are reported as follows:

- Increases (decreases) in net assets with donor restrictions if the terms of the gift require that they be maintained with the corpus of a donor restricted endowment fund;
- Increases (decreases) in net assets with donor restrictions if the terms of the gift or state law imposes restrictions on the use of the allocated investment income (loss); and
- Increases (decreases) in net assets without donor restrictions in all other cases.

Property and Equipment

Property and equipment are carried at cost, if purchased, or at estimated fair value at date of donation in the case of gifts, less accumulated depreciation. The Organization's policy is to capitalize assets greater than $5,000, while minor maintenance and repairs are charged to expense as incurred. Depreciation is recorded using the straight-line method over the following estimated lives as follows:

Furniture and equipment	3-10 years
Buildings and improvements	15-50 years
Computer equipment and software	3-10 years
Vehicles	5 years

Functional Allocation of Expenses

The costs of providing various programs and other activities have been summarized on a functional basis in the statements of functional revenues and expenses. Accordingly, certain costs have been allocated among the programs and supporting services benefited. Expenses are allocated based on client service revenue related to services by department.

DocuSign Envelope ID: C0CC27CC-EB25-40F0-8A10-2125D9FEFB49

Estimated Third-Party Liability

The Organization's estimated third-party liability consists of estimated amounts due to Medicaid under capitation contract agreements. During 2020, minimum threshold levels were waived by the Managed Care Organizations (MCO's) and therefore, management has not recognized a potential repayment for services provided during 2020.

During 2020, management was notified by the MCO's that the Organization did not meet the minimum threshold levels for services provided in 2019 and as a result owe the MCO's a total of $18,681.

Income Taxes

The Organization is exempt from federal income taxes under Section 501(c)(3) of the Internal Revenue Code. There was no unrelated business income tax incurred by the Organization for the years ended June 30, 2020 and 2019. Management has evaluated the Organization's tax positions and concluded the Organization has maintained its tax-exempt status, does not have any significant unrelated business income and has taken no uncertain tax positions that require adjustment to, or disclosure within, the accompanying financial statements.

Subsequent Events

For purposes of the preparation of these financial statements in conformity with U.S. GAAP, management has considered transactions or events occurring through October 28, 2020, which is the date that the financial statements were available to be issued.

2. Availability and Liquidity of Financial Assets

The Organization regularly monitors liquidity required to meet its operating needs and other contractual commitments, while also striving to optimize its available funds. The Organization has various sources of liquidity at its disposal, including cash and cash equivalents, investments and a line of credit.

For purposes of analyzing resources available to meet general expenditures over a 12-month period, the Organization considers all expenditures related to its ongoing operating activities as well as the conduct of services undertaken to support those operating activities.

In addition to financial assets available to meet general expenditures over the next 12 months, the Organization operates with a balanced budget and anticipates collecting sufficient revenue to cover expenditures not covered by donor-restricted resources or, where appropriate, borrowings. Refer to the statements of cash flows, which identifies the sources and uses of the Organization's cash and cash equivalents.

DocuSign Envelope ID: C0CC27CC-EB25-40F0-8A10-2125D9FEFB49

The following financial assets are expected to be available within one year of the statement of financial position date to meet general expenditures as of June 30:

	2020	2019
Cash and cash equivalents available for operations	$ 5,795,870	$ 1,933,201
Accounts receivable, net	2,553,814	1,327,181
Financial assets available to meet general expenditures within one year	$ 8,349,684	$ 3,260,382

Cash and cash equivalents in the statement of financial position includes amounts that are part of the endowment and board-designated funds reserved for future capital expenditures, and thus are excluded from the above table.

The Organization's Board of Directors has designated a portion of its resources without donor-imposed restrictions to act as endowment funds. These funds are invested for long-term appreciation and current income but remain available and may be spent at the discretion of the Board of Directors.

The Organization has an available line of credit of $1,000,000 which was fully available at June 30, 2020. See Note 8.

3. Program Service Fees and Concentrations of Credit Risk

Program service fees are charged at established rates and recognized as services are rendered. Discounts, allowances and other arrangements for services provided at other than established rates are recorded as an offset to program service fees. The State of New Hampshire has implemented payment reform in which certain patients covered under Medicaid were transitioned to coverage under a managed care system. Net revenues from managed care represented approximately 80% and 86% of the Organization's net program service fees for 2020 and 2019, respectively. Net revenues from the Medicaid program accounted for approximately 9% of the Organization's net program service fees for 2020 and 2019, respectively.

DocuSign Envelope ID: C0CC27CC-EB25-40F0-8A10-2125D9FEFB49

An estimated breakdown of program service fees, net of the provision for bad debt, capitation adjustments and contractual allowances, from those major sources is as follows:

	2020	2019
Private pay	$ 2,209,648	$ 2,126,075
Medicaid	1,385,623	1,884,686
Medicare	1,907,288	1,084,336
Other payers	1,186,399	809,579
Managed care	21,265,156	18,831,992
	27,954,114	24,736,668
Less: Contractual adjustments	(5,048,686)	(4,306,382)
Capitation adjustments	(7,723,915)	(6,566,431)
Provision for bad debt	(804,899)	(1,763,837)
	(13,577,500)	(12,636,650)
Program service fees, net	$ 14,376,614	$ 12,100,018

The decrease in bad debt expense in 2020 as compared to 2019 is primarily due to improved collection efforts as a result of the Organization concentrating on reducing Lapsed Medicaid exposure.

The Organization grants credit without collateral to its patients, most of whom are insured under third-party payer agreements. Following is a summary of gross accounts receivable by funding source as of June 30:

	2020	2019
Government grants	58 %	30 %
Private pay	10	24
Medicaid	11	21
Medicare	8	4
Other	6	7
Managed care	7	14
	100 %	100 %

4. Investments

Investments, which are reported at fair value, consist of the following at June 30:

	2020	2019
Common stocks	$ 744,873	$ 738,894
Equity mutual funds	215,908	258,423
U.S. Treasury bonds	503,538	487,623
Corporate bonds	244,045	255,204
Corporate bond mutual funds	109,001	113,591
	$ 1,817,365	$ 1,853,735

The Organization's investments are subject to various risks, such as interest rate, credit and overall market volatility, which may substantially impact the values of investments at any given time.

5. Fair Value of Financial Instruments

FASB ASC Topic 820, *Fair Value Measurement*, defines fair value as the exchange price that would be received to sell an asset or paid to transfer a liability (an exit price) in an orderly transaction between market participants and also establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value.

The fair value hierarchy within ASC Topic 820 distinguishes three levels of inputs that may be utilized when measuring fair value:

Level 1: Quoted prices (unadjusted) for identical assets or liabilities in active markets that the entity has the ability to access as of the measurement date.

Level 2: Significant observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities, quoted prices in markets that are not active, and other inputs that are observable or can be corroborated by observable market data.

Level 3: Significant unobservable inputs that reflect an entity's own assumptions about the assumptions that market participants would use in pricing an asset or liability.

DocuSign Envelope ID: C0CC27CC-EB25-40F0-8A10-2125D9FEFB49

The following table sets forth by level, within the fair value hierarchy, the Organization's assets measured at fair value on a recurring basis as of June 30:

	2020		
	Level 1	Level 2	Total
Common stocks	$ 744,873	$ -	$ 744,873
Equity mutual funds	215,908	-	215,908

Corporate bonds	-	244,045	244,045
Corporate bond mutual funds	109,001	-	109,001
	$ 1,573,320	$ 244,045	$ 1,817,365

	2019		
	Level 1	Level 2	Total
Common stocks	$ 738,894	$ -	$ 738,894
Equity mutual funds	258,423	-	258,423
U.S. Treasury bonds	487,623	-	487,623
Corporate bonds	-	255,204	255,204
Corporate bond mutual funds	113,591	-	113,591
	$ 1,598,531	$ 255,204	$ 1,853,735

The fair value for Level 2 assets is primarily based on market prices of comparable or underlying securities, interest rates, and credit risk, using the market approach for the Organization's investments.

6. Property and Equipment

Property and equipment consists of the following:

	2020	2019
Land, buildings and improvements	$ 5,659,096	$ 5,539,240

Less accumulated depreciation	(4,095,947)	(3,824,056)
Property and equipment, net	$ 2,926,418	$ 3,051,239

DocuSign Envelope ID: C0CC27CC-EB25-40F0-8A10-2125D9FEFB49

7. Endowment

The Organization's endowment primarily consists of funds established for certain programs provided by the Organization. Its endowment includes both donor-restricted endowment funds and funds designated by the Board of Directors to function as endowments. As required by U.S. GAAP, net assets associated with endowment funds, including funds designated by the Board of Directors to function as endowments, are classified and reported based on the existence or absence of donor-imposed restrictions.

Interpretation of Relevant Law

The Organization has interpreted the State of New Hampshire Uniform Prudent Management of Institutional Funds Act (the Act) as allowing the Organization to spend or accumulate the amount of an endowment fund that the Organization determines is prudent for the uses, benefits, purposes and duration for which the endowment fund is established, subject to the intent of the donor as expressed in the gift agreement. As a result of this interpretation, the Organization has included in net assets with perpetual donor restrictions (1) the original value of gifts donated to be maintained in perpetuity, (2) the original value of subsequent gifts to be maintained in perpetuity, and (3) the accumulation to the gifts to be maintained in perpetuity made in accordance with the direction of the applicable donor gift instrument at the time the accumulation is added to the fund. If the donor-restricted endowment assets earn investment returns beyond the amount necessary to maintain the endowment assets' contributed value, that excess is included in net assets with donor restrictions until appropriated by the Board of Directors and, if applicable, expended in accordance with the donors' restrictions. The Organization has interpreted the Act to permit spending from funds with deficiencies in accordance with the prudent measures required under the Act. Funds designated by the Board of Directors to function as endowments are classified as net assets without donor restrictions.

In accordance with the Act, the Organization considers the following factors in making a determination to appropriate or accumulate donor-restricted endowment funds:

(1) The duration and preservation of the fund;
(2) The purposes of the Organization and the donor-restricted endowment fund;
(3) General economic conditions;
(4) The possible effect of inflation and deflation;
(5) The expected total return from income and the appreciation of investments;
(6) Other resources of the Organization; and
(7) The investment policies of the Organization.

Spending Policy

Effective for the year ended June 30, 2020, the Organization implemented a total return spending rate policy which limits the amount of investment income used to support current operations. The long-term target is to limit the use of the endowment to 4% of the moving average of the market value of the investments over the previous twelve quarters ending June 30 of the prior fiscal year. In 2019, the Board of Directors elected to forego the newly adopted spending policy until 2020. In 2020 and 2019, the Board of Directors approved an appropriation of $45,017 and $40,000, respectively, to support current operations.

DocuSign Envelope ID: C0CC27CC-EB25-40F0-8A10-2125D9FEFB49

Return Objectives and Risk Parameters

The Organization has adopted investment policies, approved by the Board of Directors, for endowment assets that attempt to maintain the purchasing power of those endowment assets over the long term. Accordingly, the investment process seeks to achieve an after-cost total real rate of return, including investment income as well as capital appreciation, which exceeds the annual distribution with acceptable levels of risk. Endowment assets are invested in a well-diversified asset mix, which includes equity and debt securities, that is intended to result in a consistent inflation-protected rate of return that has sufficient liquidity to make an annual distribution of accumulated interest and dividend income to be reinvested or used as needed, while growing the funds if possible. Actual returns in any given year may vary from this amount. Investment risk is measured in terms of the total endowment fund; investment assets and allocation between asset classes and strategies are managed to reduce the exposure of the fund to unacceptable levels of risk.

Funds with Deficiencies

From time to time, the fair value of assets associated with individual donor-restricted endowment funds may fall below the level that the donor or the Act requires the Organization to retain as a fund of perpetual duration. Deficiencies result from unfavorable market fluctuations that occurred shortly after the investment of new contributions with donor-imposed restrictions to be maintained in perpetuity and continued appropriation for certain programs that was deemed prudent by the Board of Directors. The Organization has a policy that permits spending from underwater endowment funds, unless specifically prohibited by the donor or relevant laws and regulations. Any deficiencies are reported in net assets with donor-imposed restrictions. There were no deficiencies of this nature as of June 30, 2020 and 2019.

The endowment net asset composition by type of fund as of June 30, 2020 was as follows:

TD Bank requires that the Organization meet certain financial covenants. The Organization was in compliance with covenants as of June 30, 2020.

9. Commitments and Contingencies

Malpractice Insurance

The Organization insures its medical malpractice risks on a claims-made basis. At June 30, 2020, there were no known malpractice claims outstanding which, in the opinion of management, will be settled for amounts in excess of insurance coverage nor are there any unasserted claims or incidents known to management which require loss accrual. The Organization intends to renew coverage on a claims-made basis and anticipates that such coverage will be available.

10. Tax Deferred Annuity Plan

The Organization maintains a 403(b) employer-sponsored retirement plan. Employees are eligible to participate as of the date of hire. Effective July 1, 2017, the Organization established a matching contribution of 100% of employee deferrals up to 3% of eligible compensation. Effective July 1, 2019, the Organization increased the matching contribution to 100% of employee deferrals up to 5% of eligible compensation. In order to be eligible for the match, an employee must work or earn a year of service, which is defined as at least 1,000 hours during the 12-month period immediately following date of hire. In addition the Organization may elect to provide a discretionary contribution. There was no discretionary contribution made for the year ended June 30, 2020 and 2019. Expenses associated with this plan were $282,823 and $141,033 for the years ended June 30, 2020 and 2019, respectively.

11. Uncertainty

On March 11, 2020, the World Health Organization declared coronavirus disease (COVID-19) a global pandemic. Local, U.S., and world governments encouraged self-isolation to curtail the spread of COVID-19 by mandating the temporary shut-down of business in many sectors and imposing limitations on travel and the size and duration of group gatherings. Most sectors are experiencing disruption to business operations and may feel further impacts related to delayed government reimbursement. The Coronavirus Preparedness and Response Supplemental Appropriations Act of 2020 provides several relief measures to allow flexibility to providers to deliver critical care. There is unprecedented uncertainty surrounding the duration of the pandemic, its potential economic ramifications, and additional government actions to mitigate them. Accordingly, while management expects this matter to impact operating results, the related financial impact and duration cannot be reasonably estimated.

The U.S. government has responded with three phases of relief legislation, as a response to the COVID-19 outbreak. Recent legislation was enacted into law on March 27, 2020, called the CARES Act, a statute to address the economic impact of the COVID-19 outbreak. The CARES Act, among other things, 1) authorizes emergency loans to distressed businesses by establishing, and providing funding for, forgivable bridge loans, 2) provides additional funding for grants and technical assistance, and 3) delays due dates for employer payroll taxes and estimated tax payments for organizations. Management has evaluated the impact of the CARES Act on the Organization, including its potential benefits and limitations that may result from additional funding

Authorize the Department of Health and Human Services, Division for Behavioral Health, to enter into a **Retroactive** contract with the contractor listed below in an amount not to exceed $190,666 for Substance Use Disorder Treatment and Recovery Support Services, with the option to renew for up to four (4) additional years, effective retroactive to September 30, 2021, upon Governor and Council approval through September 29, 2023. 44.842% Federal Funds. 23.10% General Funds. 32.058% Other Funds (Governor's Commission).

Contractor Name	Vendor Code	Area Served	Contract Amount
Community Council of Nashua, N.H. d/b/a Greater Nashua Mental Health	154112-B001	Statewide	$190,666
		Total:	**$190,666**

Funds are available in the following accounts for State Fiscal Years 2022, 2023, and are anticipated to be available in State Fiscal Year 2024, upon the availability and continued appropriation of funds in the future operating budget, with the authority to adjust budget line items within the price limitation and encumbrances between state fiscal years through the Budget Office, if needed and justified.

See attached fiscal details.

EXPLANATION

This request is **Retroactive** because the contracting process was not completed in time to place the item on the agenda for the September 29, 2021, Governor and Executive Council meeting. The Community Council of Nashua, N.H., d/b/a Greater Nashua Mental Health agency policy requires their Board of Directors to vote on and approve all contract actions prior to contract execution. The Contractor was unable to complete this action in time to place the item on the September 29, 2021 Governor and Executive Council agenda.

The purpose of this request is to provide Substance Use Disorder Treatment and Recovery Supports Services statewide to New Hampshire residents who have income below 400% of the Federal Poverty Level, and are uninsured or underinsured.

Approximately 250 individuals will be served through this Contractor over the next 2 years.

The Contractor will provide statewide access to an array of treatment services, including individual and group outpatient services; intensive outpatient services; partial hospitalization; ambulatory withdrawal management services; transitional living services; high and low intensity residential treatment services; specialty residential services; and integrated medication assisted treatment. The Contractor will ensure individuals with a substance use disorder receive the appropriate type of treatment and have access to continued and expanded levels of care, which will increase the ability of individuals to achieve and maintain recovery. The Contractor will also assist eligible individuals with enrolling in Medicaid while receiving treatment, and the Department will serve as the payer of last resort.

The Department will monitor services through monthly, quarterly, and annual reporting to ensure the Contractor:

- Provides services that reduce the negative impacts of substance misuse.
- Makes continuing care, transfer and discharge decisions based on American Society of Addiction Medicine (ASAM) criteria.
- Treats individuals using Evidence Based Practices and follow best practices.
- Achieves initiation, engagement, and retention goals as required by the Department.

The Department selected contractors through a competitive bid process using a Request for Proposals (RFP) that was posted on the Department's website from July 20, 2021, through August 19, 2021. The Department received 12 responses that were reviewed and scored by a team of qualified individuals. The Scoring Sheet is attached. This request represents one (1) of the remaining two (2) contracts for Substance Use Disorder Treatment and Recovery Supports Services. The preceding 10 agreements are awaiting approval at the September 29, 2021, Governor and Executive Council meeting.

As referenced in Exhibit A, Revisions to Standard Agreement Provisions of the attached agreements, the parties have the option to extend the agreements for up to four (4) additional years, contingent upon satisfactory delivery of services, available funding, agreement of the parties, and Governor and Council approval.

Should the Governor and Council not authorize this request individuals in need of Substance Use Disorder Treatment and Recovery Supports Services may not receive the treatment, tools, and education required to enhance and sustain recovery that, in some cases, prevents untimely deaths.

Source of Federal Funds: Substance Abuse Prevention and Treatment Block Grant CFDA #93.959, FAIN # TI083464

In the event that the Federal or Other Funds become no longer available, General Funds will not be requested to support this program.

In no event shall the State be liable for any payments hereunder in excess of such available appropriated funds. In the event of a reduction or termination of appropriated funds, the State shall have the right to withhold payment until such funds become available, if ever, and shall have the right to reduce or terminate the Services under this Agreement immediately upon giving the Contractor notice of such reduction or termination. The State shall have no liability to the Contractor other than the contract price.

5.3 The State reserves the right to offset from any amounts otherwise payable to the Contractor under this Agreement those liquidated amounts required or permitted by N.H. RSA 80:7 through RSA 80:7-c or any other provision of law.
