State House
Concord, New Hampshire 03301

REQUESTED ACTION

Authorize the Department of Environmental Services (NHDES) to award a Cyanotoxin Monitoring Equipment and Training grant to the Lake Winnepesaukee Association (VC # 155053 B001) in the amount of \$7,020 to purchase equipment to monitor for indicators of harmful algal blooms within Paugus Bay which serves as public drinking water supply sources, effective upon Governor and Council approval through May 31, 2023. 100% Drinking Water SRF Repayment Funds.

Funding is available as follows:

03-44-44-441018-4790-073-500581

Dept. Environmental Services, DWSRF Loan Management, Grants- Non-Federal

FY2022
\$7,020

EXPLANATION

The Department offers Cyanotoxin Monitoring Equipment and Training Grants to support the development of programs to monitor the source and/or finished water of New Hampshire public water systems for indicators of cyanobacteria blooms and cyanotoxins (microcystin, anatoxin a, nodularin, and cylindrospermopsin). This grant is administered on a first come, first served basis. This is the only grant application we have received this year.

A proposal was received from the Lake Winnepesaukee Association and evaluated against the eligibility criteria established for the grant program. Based on the available funding, the Department determined that it could offer the grant to the Lake Winnepesaukee Association for the proposed cyanobacteria monitoring project.

The Lake Winnepesaukee Association will use grant funds to support cyanobacterial monitoring efforts of Paugus Bay, the city of Laconia's primary water supply by purchasing sampling equipment and conducting water sampling activities. These monitoring efforts are an integral component of the management of algal blooms, which pose a threat to the safety of public drinking water supplies.

This agreement has been approved as to form, substance, and execution by the Office of the Attorney General. In the event that federal funds no longer become available, General funds will not be requested to support this program. This grant award, while less than the \$10,000 threshold, requires G&C approval as the Lake Winnepesaukee Association has already received funds in excess of the threshold for this fiscal year.

We respectfully request your approval.

Robert R. Scott
Commissioner

- 11.2.2 Give the Grantee a written notice specifying the Event of Default and suspending all payments to be made under this Agreement and ordering that the portion of the Grant Amount which would otherwise accrue to the Grantee during the period from the date of such notice until such time as the State determines that the Grantee has cured the Event of Default shall never be paid to the Grantee; and
- 11.2.3 Set off against any other obligation the State may owe to the Grantee any damages the State suffers by reason of any Event of Default; and
- 11.2.4 Treat the agreement as breached and pursue any of its remedies at law or in equity, or both.

- 12.3. In the event of Termination under paragraphs 10 or 12.4 of these general provisions, the approval of such a Termination Report by the State shall in no event relieve the Grantee from any and all liability for damages sustained or incurred by the State as a result of the Grantee's breach of its obligations hereunder.
- 12.4. Notwithstanding anything in this Agreement to the contrary, either the State or, except where notice default has been given to the Grantee hereunder, the Grantee, may terminate this Agreement without cause upon thirty (30) days written notice.

This covenant shall survive the termination of this agreement.

 - 17.1 The Grantee shall, at its own expense, obtain and maintain in force, or shall require any subcontractor, subgrantee or assignee performing Project work to obtain and maintain in force, both for the benefit of the State, the following insurance:

EXHIBIT B
SCOPE OF WORK

The Lake Winnepesaukee Association (LWA) will use New Hampshire Department of Environmental Services (NHDES) grant funds to monitor water quality and cyanobacteria in Paugus Bay, Laconia, New Hampshire, as described in the grant application.

As Paugus Bay is the drinking water source for the City of Laconia, it is important to establish a cyanotoxin monitoring program on Paugus Bay that will document and track the occurrence and type of cyanobacteria blooms and assess waterbody/human health vulnerability to toxic blooms.

Specifically, the following tasks, as described in the application submitted to NHDES, will be accomplished:

1. Purchase of Monitoring Equipment

To implement the cyanobacteria monitoring program, the LWA will purchase a fluorometer, Abraxis cyanotoxin testing strips, an Abrascan Dipstick handheld reader, and necessary supplies to analyze water samples collected in Paugus Bay for the presence of cyanobacteria. The general time frame is to purchase the equipment this spring/early summer to begin the sampling program in June.

All data will be collected in accordance with the US EPA Cyanobacteria Monitoring Collaborative Quality Assurance Project Plan and all sampling results will be uploaded to the NHDES EMD.

Quarterly progress report forms must be completed by grant recipients or their subcontractor and submitted to NHDES every three months, beginning with the first full three (3) month quarter after grant approval from Governor & Council.
