EXPLANATION

The Department of Environmental Services issued a request for proposals for 2022 Local Source Water Protection Grants. These grants are funded by set-asides under the Drinking Water State Revolving Loan Fund. Eighteen proposals were received. The proposals were evaluated and ranked based on criteria included in the request for proposals, such as whether the project fulfills a component of a source water protection program, that the proposed project addresses appropriate threats, and that the project will deliver a valuable and useful product. Based on eligibility and the available loan management fee funding, the Department determined that it could offer grants to ten source protection planning projects and three source security projects. See Attachment A for the full list of grants awarded and list of reviewers.

Manchester Water Works will use the source water protection grant funds to design practices that will stabilize erosion along a city-owned road in Auburn that is discharging into their source, Lake Massabesic. The project will also design a stormwater retention pond to allow treatment of stormwater prior to discharge into the source.

This agreement has been approved as to form, substance, and execution by the Office of the Attorney General. In the event that the fee funds are no longer available, General funds will not be requested to support this program.

We respectfully request your approval of this item.

Robert R. Scott, Commissioner

SPECIAL TERMS AND CONDITIONS

City of Manchester Water Works:

Paragraph 17 of the General Provisions shall not apply to this Agreement. The comprehensive public liability insurance against all claims of bodily injuries, death, or property damage under Subparagraph 17.1.2 of the General Provisions shall be reduced from \$2,000,000 to \$1,000,000 for bodily injury or death in any one incident. EXHIBIT B
SCOPE OF WORK

The City of Manchester's Water Works will use New Hampshire Department of Environmental Services (NHDES) grant funds to complete stormwater design plans to address stormwater and soil erosion problems along a shoreline area along Lake Massabesic, the City's primary drinking water supply. The designs will address roadway erosion and prevent untreated stormwater from being discharged into the lake.

Specifically, the following tasks, as described in the application submitted to NHDES, will be accomplished:

Task 1. Initial Stormwater Improvement Designs

As a separate process (outside of this agreement), the City will engage a qualified engineering firm to complete final (stamped) designs for stormwater practices and related road improvements to address erosion and stormwater discharge from the area along Chester Road (State Route 121).

Stormwater practice designs may include retention/treatment pond, diversion ditches, and roadway grading and armoring, to control and treat stormwater as determined by the engineer. Sediment and erosion controls, proposed stormwater treatment and control practices, inspection and maintenance of stormwater best management practices, and other aspects of the design shall be in accordance with the criteria listed in the NH Stormwater Manual, (December 2008), except as noted in the state Alteration of Terrain state regulations, as follows:

- 1a. Depth of precipitation for design storm events shall be in accordance with Env-Wq 1504.09(b)(1).
- 1b. Stormwater treatment practices shall be designed to treat the Water Quality Volume (WQV), or Water Quality Flow (WQF) as required.
- 1c. The design shall be in accordance with Env-Wq 1507.05, Channel Protection Requirements and,
- 1d. Env-Wq 1507.06, Peak Runoff Control Requirements.

Initial draft design plans will indicate all anticipated state and federal regulatory compliance issues involving wetlands, shoreland or other state administrative rules that apply based on the location and work that will be involved install the stormwater practices. Draft plans will be submitted to NHDES for review.

Deliverables: Final stormwater designs (electronic form, PDF) will be submitted for NHDES for review and comment. Comments will be addressed to revise the plan(s) or to be addressed in a technical memo response from the engineer.

Task 2. Final Stormwater Improvement Designs and Calculated Budgets

- 2a. Create detailed, phased construction budgets for each stormwater practice or improvement (as well as any alternative designs that may be suggested) as found in the final design(s), citing current construction estimation tools and methods.
- 2b. The City will provide a written memo response to indicate a timeline for installation of the designed stormwater improvements and identify city, state or federal financial resources to be dedicated to pay for planned maintenance of the stormwater practices as designed on the submitted plans.

Deliverables: Provide a detailed cost estimate for each design, funding sources to install practices and maintenance schedule as described above and submit to NHDES for review and comment. NHDES comments forwarded to the City will be addressed on the plans, cost estimates and maintenance plans.

Quarterly progress report forms must be completed by grant recipients or their subcontractor and submitted to NHDES every three months, beginning with the first full three (3) month quarter after grant approval from Governor & Council.
