State House
Concord, NH 03301

REQUESTED ACTION

Authorize the New Hampshire Department of Environmental Services (NHDES) to enter into an agreement with New Hampshire Rivers Council, Concord, NH, (VC #166749-B001) in the amount of \$15,000 to complete the *Winnicut River Watershed Restoration and Management Plan: Greenland Central School multidisciplinary implementation (phase I)* project, effective upon Governor and Council approval through December 31, 2024. 100% Federal Funds.

Funding is available in the following account:

03-44-44-442010-2035-072-500575	<u>FY 2023</u>
Dept. Environmental Services, NPS Restoration Program, Grants-Federal	\$15,000

EXPLANATION

NHDES issued a Request for Proposals (RFP) for the 2022 Watershed Assistance Grants program. The thirteen proposals received were ranked based on the criteria included in the RFP: water quality improvement or protection; cost/benefit ratio; local capacity to complete the project; relative value or significance of the water body; and general quality and thoroughness of the proposal. Based on the results of the selection process and available federal grant funding levels, seven implementation projects were selected to receive funding. Please see Attachment B for a list of project rankings and NHDES review team members.

Watershed Assistance Grants focus on the reduction of nonpoint source (NPS) pollution. NPS pollution occurs when rainfall, snowmelt, or irrigation waters travel through the ground or across land, transporting materials that are then introduced into groundwater or deposited into rivers, lakes, and coastal waters. Pollutants can include chemicals, sediments, nutrients, and toxins that often have harmful effects on drinking water supplies, recreation, fisheries, and wildlife. Land development or changes in land use can also cause NPS pollution by disrupting the natural hydrology of a water body, increasing impervious surfaces, and contributing to the loss of aquatic habitat. Watershed Assistance Grants address NPS pollution by promoting responsible land use practices on the watershed scale.

The Winnicut River is one of seven major tributaries to Great Bay. The Winnicut River and several of its tributaries are listed on the NH DES 2020 303(d) report as impaired due to low levels of dissolved oxygen

and elevated levels of *E. coli*. The water quality and habitat of the Winnicut River and several of its tributaries have been degraded by increased nonpoint source (NPS) pollution resulting from rapid land development in the watershed over the past 20 years. Great Bay is a tidal estuary located in Strafford and Rockingham counties in eastern New Hampshire, and occupies over 6,000 acres. It is one of the largest estuaries on the Atlantic Coast, but it is listed on the state's 2020 303(d) list as impaired for Aquatic Life Use likely due to nutrient enrichment from nitrogen sources.

The Greenland Central School (GCS) has a large parking lot that serves the school and administrative offices. Drainage from the parking lot consists of sheet flow that discharges to a nearby road with drainage that ultimately discharges to the Winnicut River. This project will install a 400 square foot rain garden to infiltrate runoff from the school parking lot. The project described will reduce phosphorus and nitrogen pollutant loading. It is anticipated that implementation of projects described in this proposal will not only result in modest amounts of nitrogen and phosphorus reduction per year, but this project also aligns with other ongoing long-range regional efforts to reduce nitrogen loading to Great Bay.

The total project costs are budgeted at \$25,005. NHDES will provide \$15,000 (60%) of the project costs through a federal grant, and the New Hampshire Rivers Council will provide the remaining costs through cash and in-kind services. A budget is provided in Attachment A.

In the event that federal funds become no longer available, general funds will not be requested to support this program. The agreement has been approved by the Office of the Attorney General as to form, execution, and content.

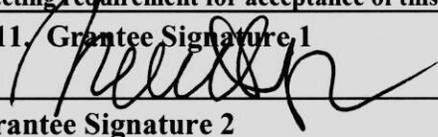

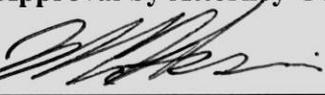

We respectfully request your approval of this item.

The semi-annual reports shall include a Pollutants Controlled Report when structural BMPs have been implemented during the reporting period. If the grantee has not completed a timely submittal of the progress reports or PCR, all further payments will be suspended until the overdue reports are submitted and approved by NHDES.

Task 12: Submit a comprehensive final report to NHDES on or before the project completion date. The final report shall include load reduction estimates, photo-documentation of installed system components when applicable, and comply with the NHDES and USEPA requirements found in the final report guidance document, including ADA compliance on the NHDES Watershed Assistance Section webpage.

Additional Requirements of the Agreement

Quality Assurance

All project activities which are to be guided by a quality assurance (QA) document such as a Quality Assurance Project Plan (QAPP) or Site Specific Project Plan (SSPP) must not begin prior to NHDES/USEPA approval of that QA document. In the event that sampling, modeling, or other such activities precede QA document approval, the data will not be considered valid, and the grantee will forfeit the ability to receive payment for those activities.

Outreach Materials

All materials produced for public distribution shall be reviewed and approved by NHDES prior to distribution and shall include the NHDES logo and the following citation: "Funding for this project was provided in part by a Watershed Assistance Grant from the NH Department of Environmental Services with Clean Water Act Section 319 funds from the U.S. Environmental Protection Agency". All final work products must meet the applicable Americans with Disabilities Act (ADA) Title II Regulations to the extent practicable and shall be guided by best practices outlined in the Revised Section 508 Standards of the Rehabilitation Act and the Web Content Accessibility Guidelines (WCAG). At minimum, final work products shall include sans-

serif fonts, underlined and descriptive text links, color best practices, captions for audio and video content, headers in tables, images with alt text, gender-neutral text, and consideration of the Plain Writing Act. Examples of final work products and outreach materials include, but are not limited to, project reports, press releases, newsletter articles, websites, videos and signage.

Operations and Maintenance

Management practices implemented as agreed upon in the scope of services of this grant agreement and with grant funds or matching funds under a Section 319 Watershed Assistance Grant, shall be properly operated and maintained for the intended purposes during the life span of the project. The life span of a project shall be determined by the Grantee, tailored to the types of practices expected to be funded in this project, and agreed upon by NHDES. The Grantee shall provide NHDES with an engineering estimate of the design life of the best management practice(s) (BMPs), or in the case of small-scale BMPs which do not have a design life estimation completed by an engineer, the design life of that practice shall be estimated to be ten years.

Operation includes the administration, management, and performance of non-maintenance actions needed to keep the completed practice safe and functioning as intended. Maintenance includes work to prevent deterioration of the practice, repairing damage, or replacement of the practice to its original condition if one or more components fail. The Grantee shall assure that any sub-award of Section 319 funds similarly include the same condition in the sub-award. Additionally, both USEPA and NHDES reserve the right to periodically inspect a practice during the life span of the project to ensure that operation and maintenance are occurring. If it is determined that the participants are not operating and maintaining these practices in an appropriate manner, NHDES may request a refund for that practice supported by the grant.

Exhibit C
Method of Payment and Contract Price

Procurements of goods or services made with grant funds, or those credited as match, shall comply with the terms of this agreement, and must be reported to NHDES.
