THE STATE OF NEW HAMPSHIRE

Assistant Commissioner

Bureau of Bridge Design
September 21, 2022

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
State House
Concord, New Hampshire 03301

REQUESTED ACTION

Authorize the Department of Transportation to **retroactively** amend Contract #4010422, with KTA-Tator, Inc., Pittsburgh, PA, (Vendor Code 167236), to provide on-call structural steel inspection services for steel bridge and structure fabrication for various bridge projects, by extending the completion date from October 1, 2022 to October 1, 2023, effective upon Governor and Council approval. The original Agreement was approved by Governor and Council on August 14, 2019, Item #14. Time extension only, no new funding.

EXPLANATION

This item is **retroactive** due to limited staffing resources which extended the time required to complete the contract adjustments.

On August 14, 2019, the Governor and Council authorized the subject on-call structural steel inspection services Agreement (Item #14; copy of Resolution attached) in the amount of \$500,000.00 to provide steel inspection services for steel bridge and structure fabrication for various bridge projects.

This amendment to the Agreement is to extend the contract's completion date in accordance with the original Governor and Council approved Item, which provides for "the option to renew for one year subject to Governor and Council approval.". KTA-Tator is agreeable to this extension. Of the original \$500,000.00 amount for this contract, there is a balance of approximately \$222,000.00 remaining (Consolidated Federal Fund, AU 3054, have been utilized to encumber funds for the current contract. Actual funding sources are determined by each particular project incurring expenses as a result of this request).

This amended Agreement has been approved by the Attorney General as to form and execution. Copies of the fully-executed Agreement are on file at the Secretary of State's Office and the Department of Administrative Services, and subsequent to Governor and Council approval will be on file at the Department of Transportation.

It is respectfully requested that authority be given to amend this Agreement for consulting services as outlined above.

Sincerely,

Victoria F. Sheehan
Commissioner

REQUESTED ACTION

Authorize the Department of Transportation to enter into an Agreement under Statewide 42490 with the firm of KTA-Tator, Inc., Pittsburgh, PA, (Vendor Code 167236) for a total amount not to exceed \$500,000.00 to provide on-call structural steel inspection services for steel bridge and structure fabrication for various bridge projects, effective upon Governor and Council approval, through October 1, 2022, with the option to renew for one year subject to Governor and Council approval.

Funds to support this request are anticipated to be available in the following accounts in FY 2020, FY 2021, FY 2022 and FY 2023 upon the availability and continued appropriation of funds in the future operating budget, with the ability to adjust encumbrances between State Fiscal Years through the Budget Office, if needed and justified.

046-500463 Engineering Consultants Non-Benefit	\$125,000.00	\$166,700.00	\$166,700.00	\$41,600.00

The Consolidated Federal Fund, AU 3054, is utilized at this time to encumber funds for this request. Actual funding sources will be determined by each particular project incurring expenses as a result of this request.

EXPLANATION

The inspection of steel bridge and structure fabrication is a specialized service essential to the Department's Bridge Construction program. The Department does not have these capabilities and, therefore, requires the services from consultants with this expertise and experience.

Consultants are needed to furnish Quality Assurance Inspection services for structural steel fabrication for bridges and structures at shops located throughout the US, and occasional field inspection services at bridge sites in the State of NH. The work requiring inspection includes furnishing, fabricating, coating, and assembling structural steel members and components for bridges and transportation-related products.

This proposed Agreement is one of three Statewide Agreements (42488, 42489, 42490), each for a period of three years and for the maximum contract amounts of \$600,000.00, \$550,000.00 and \$500,000.00 to be awarded, respectively, to the A-, B- and C- low bidders.

The contract type of fee is a specific rate of pay at the bid hourly rate for each classification of employee directly engaged in the work. The Agreements will be administered by the Bureau of Bridge Design. The Federal Highway Administration may participate in these costs depending upon the funding of individual projects undertaken.

The consultant prequalified low-bid selection process followed the Department's "Consultant Procurement Manual, Section 2.2, Statewide Low Bid Contracts, dated August 25, 2017.

The Department met on February 26, 2019, reviewed the qualifications of eight firms submitting a Letter of Interest and Statement of Qualification, and prequalified seven firms that met the Minimum Qualification requirements. Invitations to Bid were extended to these firms on February 28, 2019 for the Bid Opening on March 28, 2019.

These firms have excellent reputations and have demonstrated their capability to perform the required services in similar contracts previously with the Department.

All QA Structural Steel Inspectors working in a shop facility shall be an AWS Certified Welding Inspector (CWI) qualified and certified in accordance with the provisions of AWS QC1, unless otherwise authorized, with three years experience (minimum) inspecting bridge fabrication work conforming to AWS D1.5.

Work involving the application of paint, galvanizing, or other coatings shall require two years experience inspecting bridge coating work, and forty hours basic training (minimum) in coating inspection fundamentals, such as meeting SSPC BCI *Bridge Coating Inspector*, NACE Level I, or in-house training from a NACE Level 3 Certified Coatings Inspector with experience inspecting bridge coating work.

- b. Certified Welding Inspector (Field) (CWI-Field)

All QA Structural Steel Inspectors working at a field jobsite throughout the State of NH shall meet the same CWI qualifications as for those working in a shop facility.

Inspection work at field jobsites throughout the State of NH typically would be of relatively short duration (e.g. one day or a few days) for field welding, repairs, etc.

- c. Non-Destructive Testing Operator (Field) (NDT-Field)

NDT Operators shall be qualified and certified to Level 2 (minimum), in accordance with ASNT Recommended Practice No. SNT-TC-1A *Qualification of NDT Personnel*, for magnetic particle (MT), dye penetrant (PT), or ultrasonic testing (UT), and have three years work experience (minimum) in that discipline.

- d. Coating Inspector (Shop) (NACE 2-Shop)

A Coating Inspector shall have NACE Level 2 certification (minimum), and SSPC BCI Bridge Coating Inspector, and have two years experience (minimum) inspecting the application of sophisticated high performance coatings to bridge members.

2. A CWI may be supported by an Assistant Welding Inspector, who is qualified by training and experience to perform specific inspection functions, working under the direct, on-site or readily available active supervision of a CWI, if circumstances warrant it, and with prior approval by the DEPARTMENT.

D. CONTRACTOR DUTIES

1. The CONTRACTOR shall furnish the DEPARTMENT with a resume of qualification and experience for all inspection personnel to be engaged in inspection or testing work. Submit resume documentation a minimum of two weeks prior to the anticipated start date of work.
2. The CONTRACTOR shall ensure the competence of all inspection personnel engaged in the work and shall replace immediately any who are determined by the DEPARTMENT to be unqualified, incompetent, disorderly, intemperate, or otherwise to be performing their work in an unsatisfactory manner.
3. The CONTRACTOR shall furnish sufficient personnel within the provisions of this AGREEMENT to meet inspection needs.
4. The CONTRACTOR shall provide supervisory oversight to the Inspector, including frequent communication, technical support as needed, and periodic site visits to the shop.
5. The CONTRACTOR shall provide a copy of the applicable governing specifications, safety and personal protective equipment, and inspection instruments to the Inspector at the place of inspection, as needed.
6. The CONTRACTOR shall provide to the Inspector the means to communicate and send digital reports and images via broadband email connections to the DEPARTMENT, as necessary.

E. ASSIGNMENTS

1. The Administrator, Bureau of Bridge Design or the Administrator's authorized representative, shall notify the CONTRACTOR in writing of the authorization to proceed for each assignment and shall have the discretion to control the duration and termination of inspection and testing for the assignment. The CONTRACTOR agrees to complete all work as detailed on individual assignment letters issued by the DEPARTMENT.
2. The Inspector shall report to the Administrator or representative in the approval and conduct of inspection and testing services.
3. An Inspector, once approved by the DEPARTMENT and assigned to a specific project, shall remain on the project until it is finished, unless an alternate Inspector is approved by the DEPARTMENT upon proper notification from the CONTRACTOR.
4. The Administrator may require either full-time inspection (e.g. for primary bridge members), or part-time inspection (e.g. for ancillary products) on a case-by-case basis and at the discretion of the DEPARTMENT.
5. The Administrator may request the CONTRACTOR to perform testing and inspection services on a job-by-job basis at field locations at existing bridges and structures located throughout the State of New Hampshire, as required and as directed by the DEPARTMENT. Field inspection responsibilities shall be the same or comparable to work in a shop.
6. The Administrator shall approve the CONTRACTOR'S proposed staffing of individual Inspectors required to cover the work, considering the shop, the volume and nature of the work, any considerations involving the use of an Assistant Welding Inspector, and variations in the Fabricator's hours, shifts, and production schedule.

F. INSPECTOR DUTIES

1. The CWI shall perform all inspection responsibilities in conformance to the Contract, Governing Specifications, Special Provisions, and approved Shop Drawings for each project.
2. The Inspector shall be familiar with the Contract Documents and Governing Specifications and have them readily available at the fabrication and inspection site.
3. The Inspector shall know how to use inspection equipment and shall have them available as necessary to properly perform inspection responsibilities.
4. The Inspector shall know how to use and have available safety and personal protective equipment as required by OSHA, the Fabrication shop, Governing Specifications, or the Industry.
5. THE INSPECTOR SHALL NOT PERFORM ANY WORK ON ANY ITEM IN THE PROJECT FOR THE FABRICATOR, MILL, GENERAL CONTRACTOR, OR COATING MANUFACTURER. ANY INFRINGEMENT OF THIS CLAUSE SHALL BE SUFFICIENT CAUSE FOR THE STATE TO NULLIFY THE CONTRACT.
6. The CWI Inspector shall use, but not be limited by, the following guide list of duties:
 - a) The Inspector shall provide in-shop inspection during procedures that are considered most important, including welding, air-arc gouging, heat curving, nondestructive testing, etc. Office work, record keeping, and report preparation should be considered secondary to the inspection of in-shop fabrication.
 - b) The Inspector shall verify that materials used in the work meet the requirements of the Contract Documents by means of material inspection, material identification, and examination of laboratory test results for chemical analysis and mechanical properties (i.e. Certified Mill Test Reports).
 - c) The Inspector shall examine the welding equipment for conformance to the Specifications and Approved Welding Procedures, including the welding machines and filler metal storage ovens.
 - d) The Inspector shall verify the qualification of all welders and NDT Operators engaged on the project and shall observe the technique and performance of each for conformance to the Specifications.
 - e) The Inspector shall examine the work to make certain that preparation, fit up, and welding are in conformance with the Specifications, including edge preparation, dimensions, cleanliness, joint configuration, preheat, welding, back gouging, weld bead appearance, grinding, etc.
 - f) The Inspector shall visually inspect 100% of all welds, using suitable gauges for weld size and contour, and a strong light, magnifier, or other devices as may be helpful for detecting cracks, discontinuities, and defects.
 - g) The Inspector shall witness nondestructive testing of welds and materials as may be required by the contract documents and governing specifications.

- h) The Inspector shall inspect other fabrication procedures, including heat curving, cambering, field splice alignment, drilling, punching, reaming, control of distortion, assembly, match marking, storage, handling, and transportation.
 - i) The Coatings Inspector shall inspect coating operations, including cleaning, surface preparation, application, and galvanizing.
 - j) The Inspector shall document non-conforming and rejectable members due to material defects, workmanship deficiencies, dimensions out of tolerance, damage due to rough handling or accidents, weld defects, etc. The record shall include approved repair procedures or corrective measures taken and evidence of re-inspection and the final disposition of the structural member.
 - k) The Inspector shall be aware of additional restrictions, conditions and inspections required for a Fracture Critical Member when specified by the Contract Documents.
 - l) The Inspector does not have control over, nor charge of, and accepts no responsibility for the means, methods, techniques, sequences and procedures, safety precautions and programs, or implementation of corrective actions in connection with the work, recognizing that the Contractor remains solely responsible to supervise, direct, and control all aspects of the work.
 - m) The Inspector is not required to monitor Contractor worker-safety compliance during the project. The contract specifications require the Contractor to furnish OSHA-compliant safe access to the work, to which the Inspector will confirm the suitability of such access to work areas necessary to safely perform the Inspector's work.
7. The QA Inspector shall follow approved governing specifications and procedures to inspect painting, duplex coatings (e.g. galvanizing-powder coat), and metallizing.
