**EXPLANATION**

This project is part of the State's Ten-Year Transportation Improvement Plan under the 2021 Bridge Tier 1 and 2 Maintenance and Preservation Priority List Program. This project consists of the preservation of five (5) bridges consisting of Br. No. 113/078, I-93 NB over Blair Road; Br. No. 112/079 I-93 SB over Blair Road; Br. No. 121/087 I-93 NB over US 3 & Pemigewasset River; Br. No. 121/088, I-93 SB over US 3 and Pemigewasset River; and Br. No. 133/115, I-93 SB over Mad River in the Town of Campton. The scope of work includes removal and replacement of the bridge deck pavement and barrier membrane; partial and full depth deck repairs; installation of zinc anodes; repairs to stone fascias; upgrading existing snow fence, installation of crack seals, and a compression seal expansion joint, and includes short lengths of work on the roadway approaches.

The purpose of the project is to extend the useful life of the bridges by performing bridge preservation activities. The bridge preservation work will extend the functional life of the bridges and delay regression to a lower condition state.

- Br. No. 113/078 is a 58' long concrete rigid frame built in 1963. The deck, superstructure, and substructure have ratings of 7, 7, and 7, respectively. The bridge ranked #371 on the 2021 Tier 1&2 M&P priority list. Preservation work was done in 2004 consisting of removal and replacement of pavement and membrane, partial and full depth deck repair with a concrete deck overlay and installing new bridge rail and bridge approach rail.
- Br. No. 112/079 is a 59' long concrete rigid frame built in 1967. The deck, superstructure, and substructure have ratings of 7, 7, and 8, respectively. The bridge ranked #468 on the 2021 Tier 1&2 M&P priority list. Preservation work was done in 2004 consisting of removal and replacement of pavement and membrane, partial and full depth deck repair with a concrete deck overlay and installing new bridge rail and bridge approach rail.
- Br. No. 121/087 is a 557' long four-span IB-C built in 1969. The deck, superstructure, and substructure have ratings of 6, 7, and 7, respectively. The bridge ranked #22 on the 2021 Tier 1&2 M&P priority list. Preservation work was done in 2003 consisting of removal and replacement of pavement and membrane, partial and full depth deck repair with a concrete deck overlay, replacement of expansion joints, and installing new bridge rail and bridge approach rail.
- Br. No. 121/088 is a 579' long four-span IB-C built in 1969. The deck, superstructure, and substructure have ratings of 6, 7, and 7, respectively. The bridge ranked #23 on the 2021 Tier 1&2 M&P priority list. Preservation work was done in 2004 consisting of removal and replacement of pavement and membrane, partial and full depth deck repair with a concrete deck overlay, replacement of expansion joints, and installing new bridge rail and bridge approach rail.
- Br. No. 133/115 is a 105' long single span IB-C built in 1968. The deck, superstructure, and substructure have ratings of 7, 8, and 7, respectively. The bridge ranked #257 on the 2021 Tier 1&2 M&P priority list. Preservation work was done in 2003 consisting of removal and replacement of pavement and membrane, partial and full depth deck repair with a concrete deck overlay, installation of elastomeric plug expansion joints, and installing new bridge rail and bridge approach rail.

The proposed contingency amount is 10% of the contract amount. The extent of this work has been estimated, but the full extent of the work will not be fully known until the existing asphalt and membrane are removed from the bridge. These factors increase the risk of overruns.

The Contractor has been prequalified by this Department. The Contract has been approved by the Attorney General as to form and execution, and the Department has certified that the necessary funds are available and the bid reasonably conforms to the engineer's estimate in accordance with State procedure. Copies of the fully executed contract are on file at the Secretary of State's Office and the Department of Administrative Service's Office, and subsequent to Governor and Council approval will be on file at the Department of Transportation.

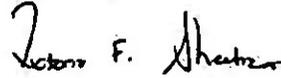

This project funding is: 80% Federal (Brdg-T1/2-M&P), with anticipated utilization of Turnpike Toll Credits for the State's 20% match, effectively using 100% Federal Funds.

## SUPPLEMENTAL PROJECT INFORMATION SHEET

**DESCRIPTION:** This project consists of the preservation of five (5) bridges consisting of Br. No. 113/078, I-93 NB over Blair Road; Br. No. 112/079 I-93 SB over Blair Road; Br. No. 121/087 I-93 NB over US 3 & Pemigewasset River; Br. No. 121/088, I-93 SB over US 3 & Pemigewasset River; and Br. No. 133/115, I-93 SB over Mad River in the Town of Campton. The work limits on the Blair Road bridges begin approximately 50 feet south of the bridges and continues approximately 160 feet to the north. The work limits on the US 3 & Pemigewasset bridges begin approximately at the south end of the bridges and continues approximately 580 feet to the north end of the bridges. The work limits on the Mad River bridge begins approximately 50 feet south of the bridge and continues approximately 210 feet to the north. The scope of work includes removal and replacement of the bridge deck pavement and barrier membrane; partial and full depth deck repairs; installation of zinc anodes; repairs to stone fascias; upgrading existing snow fence, installation of crack seals, and a compression seal expansion joint.

**FEDERAL FUNDING:** 80% (Brdg-T1/2-M&P) with anticipated utilization of Turnpike Toll Credits for the State's 20% match.

**CONTINGENCY:** The contingency amount is proposed to be 10%. The extent of this work has been estimated, but the full extent of the work won't be fully known until the existing asphalt and membrane are removed from the bridge. These factors increase the risk of overruns.

**PROJECT INITIATED:** 2021 Bridge T1&2 M&P Priority List

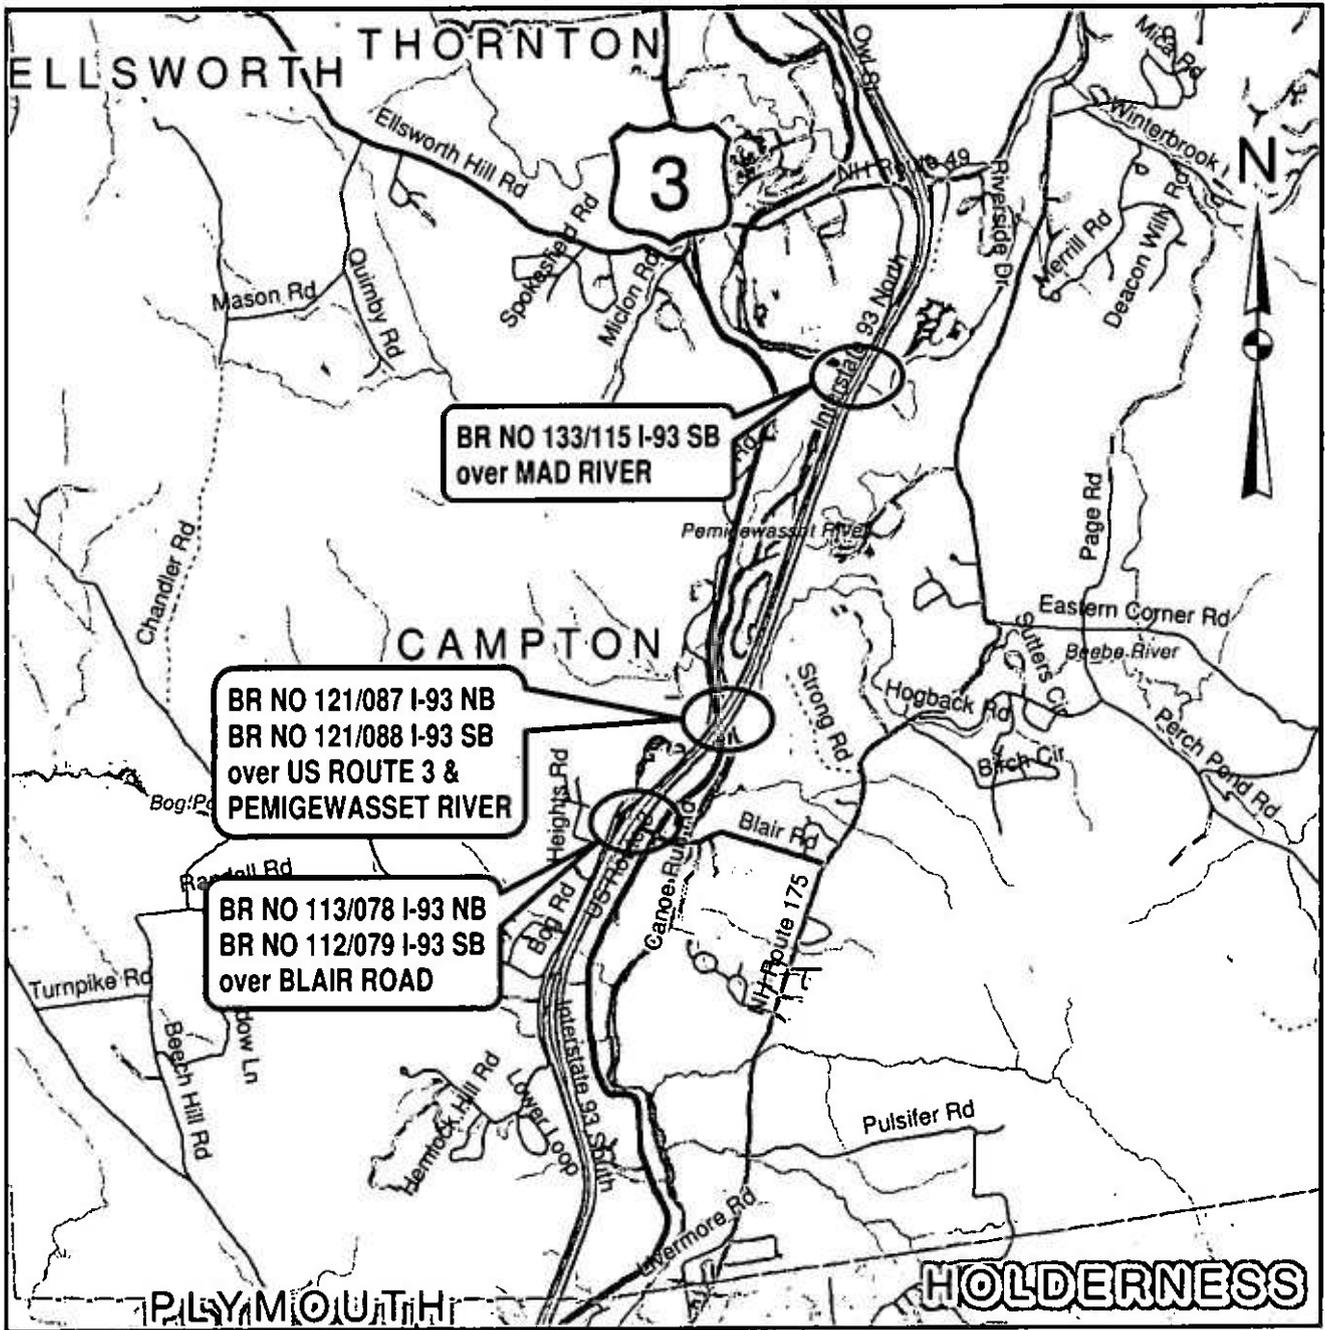

**PROJECT EXPLANATION:** The purpose of the project is to extend the useful life of the bridges by performing bridge preservation activities. The bridge preservation work will extend the functional life of the bridges and delay regression to a lower condition state.
