EXPLANATION

The Environmental Protection Agency's (EPA) Office of Air Quality Planning & Standards announced the availability of funds and solicited applications from eligible entities to conduct ambient air monitoring of pollutants of greatest concern in communities with environmental and health outcome disparities stemming from pollution and the COVID-19 pandemic. EPA has awarded these funds to promote air quality monitoring partnerships between communities and tribal, state, and local governments.

The purpose of this grant is to advance enhanced monitoring of Particulate Matter 2.5 (PM2.5) in Laconia to better capture the impacts on the region of winter wood smoke. Specifically, NHDES will utilize these funds to establish a new permanent monitoring station in Laconia equipped with continuous PM2.5 monitors that will provide the state and the community with real-time data relative to fine particulate impacts from wood smoke. Availability of real-time data from the site will help residents reduce the risk of adverse health effects, including cancer and neurological effects.

NHDES is requesting to budget these funds as shown below:

Class 020 Current Expenses: To cover costs for supplies.

Class 024 Maintenance other than Building-Grounds: To cover maintenance and repairs of field equipment and other instrumentation.

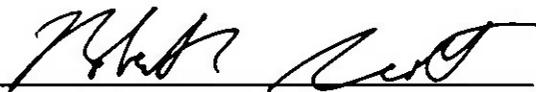

Class 030 Equipment: To cover costs for new field equipment.

Class 041 Audit Fund Set Aside: To cover the cost of Audit Set-Aside charges related to the federal program.

Class 102 Contract for Program Services: To cover costs of contracts for site preparation and concrete pad installation.

In the event that federal funds become no longer available, general funds will not be requested to support this program.

We respectfully request your approval of this item.

Robert R. Scott, Commissioner
