His Excellency, Governor Christopher T. Sununu
and the Honorable Council
State House
Concord, New Hampshire 03301

REQUESTED ACTION

Authorize the Department of Health and Human Services, Division of Public Health Services, to amend an existing contract with JSI Research & Training Institute, Inc. d/b/a Community Health Institute (VC#161611-B001), Bow, NH to continue providing services to the Department's Oral Health Program in order to implement activities funded through federal grants, by decreasing the price limitation by \$10,000 from \$5,070,833 to \$5,060,833 and by extending the completion date from August 31, 2023 to August 31, 2024, effective upon Governor and Council approval. 100% Federal Funds.

The original contract was approved by Governor and Council on March 13, 2019, item #12, amended on March 25, 2020, item #15, May 19, 2021, item #25, and most recently amended on April 20, 2022, item #31.

Funds are available in the following accounts for State Fiscal Year 2023, and are anticipated to be available in State Fiscal Years 2024 and 2025, upon the availability and continued appropriation of funds in the future operating budget, with the authority to adjust budget line items within the price limitation and encumbrances between state fiscal years through the Budget Office, if needed and justified.

See attached fiscal details.

EXPLANATION

The purpose of this request is to continue to provide services to the Department's Oral Health Program to design, implement and evaluate a school-based cavity prevention program statewide in New Hampshire. The Contractor has designed a pilot program that will include training four clinical teams to deliver care to over 10,000 children twice per year. They have also developed a plan to assess economic benefits of cavity prevention using this pilot approach. Funds to support the planning of this pilot project were awarded in September of 2021 and were added to this contract in April of 2022. The Department anticipates receiving approval from the federal grantor for a no-cost extension for the award that funds this contract. The Department is seeking to extend the end date of this contract to allow the Contractor to complete the pilot project and is not adding any additional scope to the contract. The Department determined that the revised price limitation will be sufficient to address anticipated service delivery needs, as the Department is able to utilize existing State Fiscal Year 2023 funding that will be carried forward to State Fiscal Years 2024 and 2025.

The target populations for these services include students and adolescents who receive oral health care in school settings. Approximately 10,000 students will be treated in school sealant programs and 94 schools will be visited through August 31, 2024.

The Department will continue to monitor services by ensuring:

- All parents and/or guardians of all eligible students who receive dental care in a school setting are contacted and referred to a dentist for follow up care and attempts to identify and address patients' barriers to accessing dental care are made.
- Express written consent from parents/guardians is obtained by the school-based program dental hygienists prior to providing any dental treatment to eligible students within a school and/or community setting.
- All contracted school and community-based oral health programs/clinics are assessed for the adherence to Infection Control Protocols and Standards as recommended by the Centers for Disease Control and Prevention and the American Dental Association.

Should the Governor and Council not authorize this request, the pilot program to deliver cost effective cavity prevention to 10,000 children in New Hampshire will end before it has been completed and evaluated.

Area served: Statewide

Source of Federal Funds: Assistance Listing Number CFDA #93.236, FAIN T12HP31859.

In the event that the Federal Funds become no longer available, additional General Funds will not be requested to support this program.

Respectfully submitted,

Lori A. Weaver
Interim Commissioner

- 1.3 million individuals impacted by statewide oral health surveillance and professional development activities intended to change systems of care.

The Department will continue to monitor services by ensuring:

- 100% of patients referred to the program by the care coordinator are contacted, or an attempt is made, to assess patients' barriers to accessing dental care;
- 100% of care coordination patients referred to the program are offered an appointment for dental care;
- 100% of eligible care coordination patients seeking care coordination program services are assessed, evaluated and appropriately discharged.

Should the Governor and Council not authorize this request, the current programs providing oral health services to children, teens and adults with low incomes, as well as uninsured families living in New Hampshire, will not be evaluated or modified as needed to ensure state and federal funds are utilized in the most efficient way to reach the maximum number of individuals.

Area served: Statewide

Source of Federal Funds: CFDA #93.354, FAIN NU90TP922144

In the event that the Federal Funds become no longer available, additional General Funds will not be requested to support this program.

Respectfully submitted,

A. LIMITATIONS: Use of the rate(s) contained in this Agreement is subject to all statutory or administrative limitations and is applicable to a given grant, contract or other agreement only to the extent that funds are available. Acceptance of the rate(s) agreed to herein is predicated upon the following conditions:

1. That no costs other than those incurred by the grantee/contractor or allocated to the grantee/contractor via an approved central service cost allocation plan were included in its indirect cost rate proposal and that such incurred costs are legal obligations of the grantee/contractor and allowable under the governing cost principles;

2. Grants/contracts providing for ceilings as to the indirect cost rate(s) or amount(s), which are indicated in Section I above, will be subject to the ceilings stipulated in the grant, contract or other agreement. The ceiling rate(s) or the rate(s) cited in this Agreement, whichever is lower, will be used to determine the maximum allowable indirect cost on the grant or contract agreement.
3. The rates hereby approved are subject to periodic review by the Government at any time their use is deemed improper or unreasonable. You are requested to advise the Government promptly of any circumstances, which could affect the applicability of the approved rates.

REQUESTED ACTION

Authorize the Department of Health and Human Services, Division of Public Health Services, to amend an existing contract with JSI Research & Training Institute, Inc. d/b/a Community Health Institute (Vendor #161611-B001), Bow, NH to continue providing professional support services to the Department's Oral Health Program in order to implement activities funded through federal grants, including access to preventive and reparative dental treatment for individuals in the statewide community-based and school-based oral health programs, by increasing the price limitation by \$2,052,788 from \$2,843,045 to \$4,895,833 and by extending the contract completion date from August 31, 2021 to August 31, 2023 effective upon Governor and Council approval, 77% Federal/23% General

The original contract was approved by Governor and Council on March 13, 2019, item #12, and most recently amended with Governor and Council approval on March 25, 2020, item #15.

Funds are anticipated to be available in the following accounts for State Fiscal Years 2022, 2023 and 2024, upon the availability and continued appropriation of funds in the future operating budget, with the authority to adjust budget line items within the price limitation and encumbrances between state fiscal years through the Budget Office, if needed and justified.

See attached financial table

EXPLANATION

The purpose of this request is to continue providing professional support services to the Department's Oral Health Program and to conduct an evaluation of the programs implemented in the original agreement to help inform future efforts and sustainability planning. In addition this amendment will expand on the scope of service to include implementation of a pilot project to increase access to and use of recommended preventive oral health care and dental pain management in an effort to reduce people's exposure to unnecessary opioids. The Contractor has been able to provide support to the oral health program and has the capacity to implement and integrate these additional services into their current contract. Due to the fact that the HRSA grant that will be funding this project is in year 3 of a 4-year grant, there was not sufficient time to put this contract out to bid and therefore it is being added to the contract with JSI.

This amendment will expand on the Contractor will provide dental care coordination to ensure access to urgent and preventive oral health care in order to reduce unnecessary opioid prescribing in the emergency department for dental pain. In addition the Contractor will ensure a care coordination process that assists individuals who present at the emergency department for non-traumatic dental conditions and who do not have a dental provider. The programs that are being continued are school-based and community-based oral health programs for children, teens, pregnant women, and adults with financial barriers to accessing care. Oral health programs

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 2 of 2

include evidence-based clinical services for tooth decay prevention, screenings, and referrals for restorative care.

The Contractor will provide care coordination services to individuals who present to the emergency department at a hospital, for non-traumatic dental conditions. The Contractor will utilize a care coordinator to provide patient outreach, assess barriers to accessing dental care, and facilitate referrals to a dental provider for follow-up care. The Department anticipates an increase in individuals who engage in routine oral health care, following vaccinations for COVID-19, which will reduce the costs associated with treating non-traumatic dental conditions in the emergency department. This will subsequently reduce the need for prescribing unnecessary opioids as a method to manage dental pain.

The following populations will be impacted from the effective date of this agreement through August 31, 2023:

- 16,470 students in schools with forty percent (40%) or more Free and Reduced Lunch Program;
- 91,440 people served by Federally Qualified Health Centers in NH annually;
- 9,500 people who use the emergency department for oral health care;
- 6,000 NH Medicaid Insured Adults that receive Substance Use Disorders treatment; and
- 1.3 million people will be impacted by oral health surveillance and professional development activities that are statewide and intended to change systems of care.

As referenced in Exhibit C-1, Revisions To General Provisions, Paragraph 3 of the original contract, the parties have the option to extend the agreement for up to two (2) additional years, contingent upon satisfactory delivery of services, available funding, agreement of the parties and Governor and Council approval. EXPLANATION

The purpose of this request is for JSI Research & Training Institute, Inc. to conduct evaluations of the programs implemented in the original agreement to help inform future efforts and sustainability planning. The programs implemented are school-based and community-based oral health programs for children, teens, pregnant women, and adults with low incomes as well as uninsured families. Oral health programs include evidence-based clinical services for caries prevention, screenings, and referrals for individuals with substance use disorders.

The following populations will be impacted from the effective date of this agreement through August 31, 2021:

His Excellency, Governor Christopher T. Sununu
and the Honorable Council

Page 2 of 3

16,470 students in schools with forty percent (40%) or more Free and Reduced Lunch Program

91,440 people served by Federally Qualified Health Centers in NH annually

9,500 people who use the emergency department for oral health care

6,000 NH Medicaid Insured Adults that receive Substance Use Disorders treatment and

1.3 million people will be impacted by oral health surveillance and professional development activities that are statewide and intended to change systems of care.

This amendment will benefit the Department by providing evaluation results for school-based oral health programs enhancement demonstration projects. The Department will evaluate the pilot project for provision of dental care coordination from Emergency Rooms to community-based dental clinics and expansion of use of substance abuse screening tools into dental clinics. The evaluation results will be reported to federal funders and will be utilized to inform how future federal funding will assist with protecting the oral health of New Hampshire citizens.

JSI Research & Training Institute, Inc (JSI) effectiveness in delivering services continues to be measured through monitoring of the following performance measures:

Specific measures that JSI will provide for the purpose of this amendment include:

- Determine through evaluation whether school-based and community based dental programs will be extended.
- Evaluations to determine sub recipient progress towards deliverables
- Conduct evaluation of programs to help inform future efforts and to help inform sustainability planning.
- An evaluation plan and written report for all required activities in the contract.

Should the Governor and Executive Council not authorize this request, the current programs that provide oral health services to children, teens, pregnant women, and adults with low incomes as well as uninsured families living in New Hampshire will not be evaluated and sustainability planning will not occur.

EXPLANATION

The purpose of this request is for Community Health Institute (CHI) to provide professional support services to the Department of Health & Human Services, Division of Public Health Services, Oral Health Program (OHP) in order to implement activities funded through general funds and federal grants that include: school-based and community-based oral health programs; dental hygienists screenings; fluoride treatments and referrals to services for individuals in substance use disorder treatment programs; assisting with project management for the Health Resources and Services Administration Oral Health Workforce grant; assisting with activities that will increase the reach of school-based oral health programs; serving schools with student participation rates of 50% or more in the Free and Reduced Lunch program; and assisting with the Third Grade Survey.

This contract will lead to gains in value for oral health services in New Hampshire (NH) through expanding the reach of programs to serve populations who experience disparities in access to and outcomes related to oral health care (e.g., schools with fifty percent (50%) or more students receiving Free and Reduced Lunch; adults in substance abuse treatment; adult Medicaid beneficiaries, etc.). The contract funding may only be used to support the delivery of evidence-based and cost-effective oral health services and may not be used for other low-value services.

Furthermore, this contract will support the completion of the NH Third Grade Survey which will provide surveillance data to evaluate the impact of services and to help inform program planning. The following health outcomes will be achieved through this contract:

- 1) reduce the proportion of children who have dental caries in their primary or permanent teeth;
- 2) reduce the proportion of children who have untreated dental decay;
- 3) reduce the proportion of adults with untreated dental decay;
- 4) increase the proportion of children and adults who have used the oral health care system in the past year; and
- 5) increase the number of children who have received dental sealants on their molar teeth. This contract will benefit the children and adults of New Hampshire through increasing access to the highest value oral health services in their local communities.

In NH, thirty-five percent (35%) of third grade students have dental caries with higher rates of decay among children who are lower income and in areas of the state with less access to oral health professionals. While untreated decay has decreased overtime, from twenty-two percent (22%) in 2001 to eight percent (8%) in 2014, disparities persist among those children who lack access to treatment, with similar higher rates among those children who are lower income and in counties with a shortage of dental professionals.

In Strafford County and Coos County, fourteen percent (14%) of children have untreated decay compared with just four percent (4%) of children in Rockingham County. Among adults in NH, there has been a steady increase in the rates of emergency department visits for non-traumatic dental conditions, from 9,000 visits in 2000 to 16,000 visits in 2009.

His Excellency Governor Christopher T. Sununu
and the Honorable Council
Page 4 of 5

The following performance standards will be used to measure the effectiveness of the agreement:

- Develop and maintain a system for establishing and monitoring agreements for the delivery of school oral health programs and community-based oral health program;
- Develop and implement a training plan and curriculum for oral health and other health professionals which shall include:
 - a. Implementation of Screening, Referral, and Brief Interventions related to substance abuse disorders;
 - b. Use of the Prescription Drug Monitoring Program for practice improvement; and
 - c. Pain management and dental care coordination for those presenting at the Emergency Department for non-traumatic dental conditions;
- Develop and implement a communications plan and related materials to increase awareness about the value and impact of school oral health services and community water fluoridation;

The following populations will be reached from the effective date of this agreement through August 31, 2021:

- 16,470 students in schools with forty percent (40%) or more Free and Reduced Lunch Program;
- 91,440 people served by Federally Qualified Health Centers in NH annually;
- 9,500 people who use the emergency department for oral health care;
- 6,000 NH Medicaid Insured Adults that receive Substance Use Disorders treatment; and
- 1.3 million people will be impacted by oral health surveillance and professional development activities that are statewide and intended to change systems of care.

CHI was selected for this project through a competitive bid process. A Request for Proposals was posted on the Department of Health and Human Services' web site from October 9, 2018 through November 6, 2018. The Department received one (1) proposal. The proposal was reviewed and scored by a team of individuals with program specific knowledge. The review included a thorough discussion of the strengths and weaknesses of the proposal. The Score Sheet is attached.

As referenced in the Request for Proposals and in Exhibit C-1 of this contract, this Agreement has the option to extend for up to two (2) additional years, contingent upon satisfactory delivery of services, available funding, agreement of the parties and approval of the Governor and Council.

Notwithstanding any other provision of the Contract to the contrary, no services shall continue after June 30, 2019, and the Department shall not be liable for any payments for services provided after June 30, 2019, unless and until an appropriation for these services has been received from the state legislature and funds encumbered for the SFY 2020-2021 and SFY 2022-2023 biennial.

Should Governor and Executive Council not authorize this request, children, teens, pregnant women, and adults from low-income, uninsured families living in New Hampshire may not receive oral health care services. NH residents may seek relief of infection and dental pain in hospital emergency departments where treatment is costly, does not resolve the dental problem, and exposes them to pain medications that could have been avoided with appropriate and timely dental treatment.

His Excellency, Governor Christopher T. Sununu
and the Honorable Council

SPECIAL PROVISIONS

Contractors Obligations: The Contractor covenants and agrees that all funds received by the Contractor under the Contract shall be used only as payment to the Contractor for services provided to eligible individuals and, in the furtherance of the aforesaid covenants, the Contractor hereby covenants and agrees as follows:

1. **Compliance with Federal and State Laws:** If the Contractor is permitted to determine the eligibility of individuals such eligibility determination shall be made in accordance with applicable federal and state laws, regulations, orders, guidelines, policies and procedures.
2. **Time and Manner of Determination:** Eligibility determinations shall be made on forms provided by the Department for that purpose and shall be made and remade at such times as are prescribed by the Department.
3. **Documentation:** In addition to the determination forms required by the Department, the Contractor shall maintain a data file on each recipient of services hereunder, which file shall include all information necessary to support an eligibility determination and such other information as the Department requests. The Contractor shall furnish the Department with all forms and documentation regarding eligibility determinations that the Department may request or require.
4. **Fair Hearings:** The Contractor understands that all applicants for services hereunder, as well as individuals declared ineligible have a right to a fair hearing regarding that determination. The Contractor hereby covenants and agrees that all applicants for services shall be permitted to fill out an application form and that each applicant or re-applicant shall be informed of his/her right to a fair hearing in accordance with Department regulations.
5. **Gratuities or Kickbacks:** The Contractor agrees that it is a breach of this Contract to accept or make a payment, gratuity or offer of employment on behalf of the Contractor, any Sub-Contractor or the State in order to influence the performance of the Scope of Work detailed in Exhibit A of this Contract. The State may terminate this Contract and any sub-contract or sub-agreement if it is determined that payments, gratuities or offers of employment of any kind were offered or received by any officials, officers, employees or agents of the Contractor or Sub-Contractor.
6. **Retroactive Payments:** Notwithstanding anything to the contrary contained in the Contract or in any other document, contract or understanding, it is expressly understood and agreed by the parties hereto, that no payments will be made hereunder to reimburse the Contractor for costs incurred for any purpose or for any services provided to any individual prior to the Effective Date of the Contract and no payments shall be made for expenses incurred by the Contractor for any services provided prior to the date on which the individual applies for services or (except as otherwise provided by the federal regulations) prior to a determination that the individual is eligible for such services.
7. **Conditions of Purchase:** Notwithstanding anything to the contrary contained in the Contract, nothing herein contained shall be deemed to obligate or require the Department to purchase services hereunder at a rate which reimburses the Contractor in excess of the Contractor's costs, at a rate which exceeds the amount reasonable and necessary to assure the quality of such service, or at a rate which exceeds the rate charged by the Contractor to ineligible individuals or other third party funders for such service. If at any time during the term of this Contract or after receipt of the Final Expenditure Report hereunder, the Department shall determine that the Contractor has used payments hereunder to reimburse him or herself of expense other than such costs, or has received payment in excess of such costs or in excess of such rates charged by the Contractor to ineligible individuals or other third party funders, the Department may elect to:
 - 7.1. Renegotiate the rates for payment hereunder, in which event new rates shall be established;
 - 7.2. Deduct from any future payment to the Contractor the amount of any prior reimbursement in excess of costs;

Within five (5) business days of receipt of a written request from Covered Entity, Business Associate shall make available during normal business hours at its offices all records, books, agreements, policies and procedures relating to the use and disclosure of PHI to the Covered Entity, for purposes of enabling Covered Entity to determine Business Associate's compliance with the terms of the Agreement.
