His Excellency, Governor Christopher T. Sununu  
and the Honorable Council  
State House  
Concord, New Hampshire 03301

**REQUESTED ACTION**

Authorize the New Hampshire Department of Environmental Services (NHDES) to award an Aquatic Resource Mitigation (ARM) Fund grant to the Piscataquog Land Conservancy ("PLC"), New Boston, NH (VC #167094-B001) in the amount of \$300,000 for the purpose of conserving 42-acres of land in Goffstown, effective upon Governor and Council approval through December 1, 2024. 100% ARM Funds. The Town of Goffstown Conservation Commission and Board of Selectman support this project.

Funding is available in the account as follows:

	<u>FY 23</u>

Dept. Environmental Services, In-Lieu Wetland Mitigation, Grants – Non - Federal	

**EXPLANATION**

New Hampshire RSA 482-A:3 requires a wetland permit for any proposed project that involves dredging or filling of a wetland. Before a wetland permit is issued, applicants must show that the proposed project will avoid adverse impacts to wetlands and will minimize and provide compensation for those wetland impacts which are unavoidable.

The NHDES wetlands program adopted a set of mitigation rules that establish what is necessary for an applicant to provide for wetland compensation. The current department rules spell out ratios for wetland compensation that include creating a new wetland, restoring a former wetland site, or protecting a high-quality aquatic resource by preserving adjacent upland habitat. One mitigation option is commonly referred to as an *in-lieu fee program*, is ideal for projects that have difficulty in locating an appropriate mitigation site. The ARM Fund authorizes the collection of mitigation funds in lieu of other forms of wetland mitigation as part of a Wetlands Permit Application.

NHDES issued the request for proposals for ARM Funds available in the Merrimack River Service Area in February 2022. The NHDES received six full applications within the Merrimack River Service Area and on November 7, 2022, NHDES announced the decision to fund the Clarkridge Farm project. The review of the awards by the New Hampshire Wetland Council resulted in full support of the recommendations. After consultation and reconfiguration of the conservation easement boundaries to prohibit agricultural

Engineers approved the funding request and recommendation. Attachment A lists the proposals received and ARM Fund Site Selection Committee members involved in the decision.

The Piscataquoq Land Conservancy will use the ARM Fund grant to purchase a 42-acre conservation easement on a portion of the historic Clarkridge Farm. The easement will protect prime wetlands and wildlife habitat, conserve important agricultural and forest soils, and add to an extensive mosaic of conservation land. Clarkridge Farm contains six wetland systems for a total of 20 acres, 17 acres (65%) which are designated prime wetland. The property includes a portion of the third largest prime wetland in Goffstown, which is the headwaters for Harry Brook. This project is also part of a 1,200+ acre unfragmented habitat block and the NH Fish and Game connectivity modeling indicates that this land is part of a priority corridor for wildlife movement. The parcel will build upon existing landscape connectivity efforts in the watershed and region. Attachment B includes a map of the project location.

In the event that other funds no longer become available, general funds will not be requested to support this program. This agreement has been approved as to form, content, and execution by the Attorney General's Office.

We respectfully request your approval.

Dear Lori Sommer,

The Goffstown Conservation Commission strongly supports the application for ARM grant funding to conserve the Clarkridge Farm in Goffstown, NH as submitted by the Piscataquog Land Conservancy (PLC). The Conservation Commission is working closely with the PLC on this project, and all of us are deeply committed to protecting the important wetlands this project will buffer. The Conservation Commission has sufficient funds in its Land Use Change Tax Conservation Fund to contribute towards matching funds for the grant.

This project lies within one of the highest priority areas of our Town's Open Space Conservation Plan, an area of exceptional habitat and diversity formed by a glacial drumlin field interspersed with wetlands, most of which are DES designated Prime Wetlands. It directly abuts a large portion of the Beaver Pond/Harry Brook Tributary Marsh. In the Goffstown Prime Wetland Study, this marsh scores very high for ecological integrity, important habitat for a large range of wildlife, flood control and nutrient and sediment retention. In addition, another part of the project protects land abutting wetlands that drain down into another prime wetland, the Stinson Road Marsh. This project adds to a previous 236 acres preserved by the Clark family, and is another important piece towards our goal of protecting a large continuous block of the Goffstown drumlin/wetland complex.

We are excited by the variety of important features this project will protect, including the wetlands, forested drumlins, farmland soils, meadow and hayfield habitats, a working farm and the most scenic portion of the General John Stark Scenic Byway.

Please consider supporting the Clarkridge Farm easement project to help us preserve our vital wetland systems and wildlife habitats.

Sincerely,

  
Jean Walker, Chairman  
Goffstown Conservation Commission

Dear Lori Sommer,

The Goffstown Select Board strongly supports the application for ARM grant funding to conserve the Clarkridge Farm in Goffstown, NH that was submitted by the Piscataquog Land Conservancy. Our Conservation Commission is working with the Piscataquog Land Conservancy on this project in accordance to the goals of the Goffstown Open Space Conservation Plan.

The Clarkridge farm project will protect and buffer a large portion of the Beaver Pond/Harry Brook Tributary Marsh, a DES designated Prime Wetland on the western side of the property, and will also buffer drainage on the eastern side flowing into wetlands feeding another Prime Wetland, the Stinson Road Marsh.

The land is one of the last working farms in Goffstown and it spans the most scenic location on the General John Stark Scenic Byway. Open hay fields like the ones on this property are always under intense development pressure in Goffstown. Our Town's Master Plan targets this area as important agricultural and conservation lands.

Please consider supporting the Clarkridge Farm project to help us preserve our vital wetland systems, wildlife habitats, working farms and scenic views.

Sincerely on behalf of the Goffstown Select Board,

Peter Georgantas, Select Board Chairman
