EXPLANATION

This grant will assist the Division in converting criminal justice information services (CJIS) data passed through the State Message Platform (SMP) to the required eXtensible Markup Language (“XML”) standard. Nlets has chosen eXtensible Markup Language (“XML”) as the standard for interstate sharing of data. The purpose of this project is to update the State’s Nlets interface to the currently available Nlets XML standards. This project will bring the State closer to compliance with the Nlets mandate to sunset legacy, non-standard dot delimited text formats (herein referred to as “legacy format”).

Upgrading to XML data standards will ensure New Hampshire law enforcement agencies maintain access to up-to-date criminal justice information in the most efficient, cost effective, and reliable manner. Availability of criminal justice information protects the citizens of New Hampshire, keeps NH law enforcement safe, and shares sensitive information with partner in-state, out-of-state, and federal agencies.

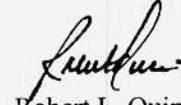

Funds are to be budgeted as follows:

Funds in Class 103, Contracts for Operation Services, are needed to assist in paying a contract as outlined above.
