REQUESTED ACTION

Authorize the New Hampshire Department of Energy (Department) to award a grant to Continuum at North Conway, LLC, North Conway, NH (VC# 434957) in the amount of \$400,000 to install a district heating and cooling plant. The plant will utilize locally sourced wood chips and will meet 95% of thermal load, including domestic hot water. The boiler will provide renewable thermal energy for chillers to provide air conditioning, effective upon Governor and Council approval through June 30, 2025. **100% Other (Renewable Energy Fund)**

Funding is available in account Renewable Energy Fund as follows:

	<u>FY2023</u>
02-52-52-520010-18900000-073-500579 -- Grants Non-Federal	\$400,000

EXPLANATION

Pursuant to RSA 362-F:10, the Department is charged with administering the Renewable Energy Fund (REF), the purpose of which is to support thermal and electrical renewable energy initiatives. On November 3, 2022, the Department issued a Request for Proposals (RFP) #2022-004 pursuant to RSA 362-F:10, X. That statute requires the Department to issue, on an annual basis, an RFP for renewable energy projects in the nonresidential sector funded by grants from the REF.

The Department received three proposals requesting a total of \$1.2 million in funds in response to the RFP. Continuum at North Conway and one other proposal have been selected to receive a total of \$800,000 in this funding round. Additional information on the grant review and award process is provided along with a summary of all grant awards.

With these funds, Continuum at North Conway, a 356,000 square foot retirement and assisted living/mixed commercial campus, will install a wood chip fueled heating and cooling plant, providing heat and cooling to each of the six buildings on the campus. The system is expected to yield approximately 6,440 New

Hampshire Class I Thermal RECs annually. The project's technical specifications are described in Attachment 3.

The grant is contingent on sufficient REF funds being available upon the effective date of the grant agreement. The funds have been allocated for this contract and are being held in the fund. In the event that the REF funds are insufficient or are no longer available, General Funds will not be requested to support this program.

Respectfully submitted,

NONRESIDENTIAL COMPETITIVE GRANT REVIEW PROCESS AND SCORING TEAM

The Department of Energy (Department) issued a Request for Proposals (RFP) on November 3, 2022 for renewable energy projects in the nonresidential sector which would be eligible to generate Class I, Class I Thermal, or Class IV renewable energy certificates (RECs). The RFP was generally similar to that issued in the prior year. Pursuant to RSA 362-F:10, the RFP is funded with monies from the Renewable Energy Fund and issued on an annual basis.

The RFP was circulated electronically to members of the Energy Efficiency and Sustainable Energy Board (EESB Board), regular attendees at EESB Board meetings, additional stakeholders known to have an interest in energy policy and programs, and Clean Energy NH. The RFP was posted on the Department website for the full submission period, and was advertised in the New Hampshire Union Leader on November 6, 7 and 8, 2022. All responses were due by December 15, 2022. The Department received three proposals requesting a total of \$1.2 million in grant funds for projects with combined estimated total project costs of \$7.823 million.

The Department employed a two-tier grant review process to evaluate the proposals. The scoring team:

Department Non-Residential Competitive Grant Program Scoring Team			
Initial Review Team			
Name	Position	Agency	Experience
Deandra Perruccio	Administrator IV	Department of Energy	REC management
Tanya Wayland	Analyst III	Department of Energy	REC management
Azanna Wishart	Analyst II	Department of Energy	Renewable energy program management
Joe Fontaine	Technical Program Manager	Department of Environmental Services	Environmental compliance for REC facilities
Griffin Roberge	State Energy Program Manager	Department of Energy	Federal Grants
Second Review Team			
Joshua Elliott	Director of Policy & Programs	Department of Energy	DOE leadership team
Christopher Ellms, Jr.	Deputy Commissioner	Department of Energy	DOE leadership team
Jared Chicoine	Commissioner	Department of Energy	DOE leadership team

The initial review team scored the three proposals using the scoring criteria set forth in the RFP and those requirements set forth in N.H. Code of Administrative Rules Puc 2508.02 (b) and (c), and developed a score for each proposal from 0-100 points, and assigned values for the factors outlined in the RFP which resulted in the final scores, ranks, and funding recommendations. Based on proposal scores and the program budget, the initial review team recommended funding the full requested amount of two applicants.

The Sustainable Energy Administrator submitted a funding recommendation memorandum and met with the second review team to brief them on the proposals and recommendations. The second review team was provided with project scores, descriptions, and recommendations for funding, and had an opportunity to ask questions. The second review team reviewed the initial recommendation to endorse grant awards for the two highest scoring proposals. The second review team approved grant funding for two renewable energy projects in the total amount of \$800,000.

Facts and Figures

Continuum at North Conway, LLC is a 356,000 square foot retirement and assisted living/mixed commercial campus comprised of six buildings and a district heating/cooling plant. The plant will utilize 3,500 tons of locally sourced wood chips annually. The wood chip fueled system will be designed to meet 95% of thermal load, including domestic hot water. The boiler will provide renewable thermal energy for chillers to provide summer air conditioning. The total facility capacity is 1,750 kW and once they are fully operational, they are expected to increase the production of Class I Thermal RECs by approximately 6,440 RECs annually.

Facility Size: Biomass Boiler 6 MMBtu/hr (1,750 kW)

Grant Cost Effectivenessⁱ: \$6.21/REC (over 10 years)

Funding Analysis:

Total Project Cost:	\$5,500,000
Leveraged Funds:	\$5,100,000
Grant Amount:	\$400,000

Financial and Environmental Benefits:

Energy Generation:	21,978 MMBtu/year
Generation Value ⁱⁱ :	\$179,032/year REC sales
20-Year LCOE ⁱⁱⁱ :	\$0.0336/kWh
Life Expectancy:	30 years
CO ₂ Avoided:	1,105 tons/year

Renewable Portfolio Standard RSA 362-F:1 Criteria:

- Generates 6,440 additional Class I renewable energy certificates (RECs) per year
- Supports fuel diversity and keeps energy dollars in state
- Provides energy savings to North Conway businesses and residents
- Reduces the amount of greenhouse gases, nitrogen oxides and particulate matter emissions compared to fuel oil; thereby improving air quality and public health

ⁱ The Department of Energy used a metric defined as the requested grant amount divided by the total number of RECs over 10 years of operation as a key criteria in evaluating and choosing grantees.

ⁱⁱ Generation value is based on the Alternative Compliance Payment (ACP) value for the project's estimated annual REC generation. The ACP rate for Class I is \$27.80/MWh in 2023; therefore, 6,440 RECs/year is equivalent to \$179,032 in Generation Value.
