Concord, N.H. 03301-2429

June 14, 2023

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
State House
Concord, NH 03301

REQUESTED ACTION

Authorize the New Hampshire Department of Energy (Department) to award a grant to Plymouth Area Renewable Energy Initiative (VC# 165224) in the amount of \$109,000 to install and operate a ground-mount that will benefit low and moderate income (LMI) residential electric customers located in the Center Harbor, NH area, effective upon Governor and Council approval through June 30, 2025. **100% Other (Renewable Energy Fund)**

Funding is available in account Renewable Energy Fund as follows:

02-52-52-520010-18900000-073-500579 – Grants Non-Federal	<u>FY2023</u> \$109,000
--	----------------------------

EXPLANATION

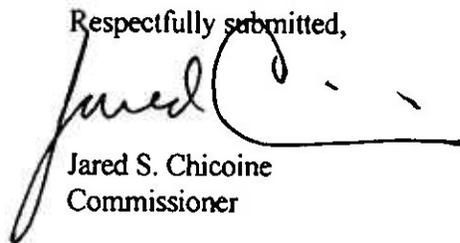

Pursuant to RSA 362-F:10, the Department is charged with administering the Renewable Energy Fund (REF), the purpose of which is to support thermal and electrical renewable energy initiatives. On November 10, 2022, the Department issued a Request for Proposals (RFP) #2022-006 pursuant to RSA 362-F:10, X. That statute requires the Department to provide no less than fifteen percent of the REF funds annually to benefit low-moderate income (LMI) residential customers through financing or leveraging of financing for, including but not limited to, the development of community solar projects in manufactured housing communities or in multi-family rental housing.

The Department received four proposals requesting a total of \$1.06 million in funds in response to the RFP, one of which was incomplete and deemed ineligible. Plymouth Area Renewable Energy Initiative and two other proposals have been selected to receive a total of \$854,188 in this funding round. Additional information on the grant review and award process is provided along with a summary of all grant awards.

With these funds, Plymouth Area Renewable Energy Initiative (PAREI) will install and operate a community solar facility. The PAREI program model is structured to maximize direct benefits to the LMI participants. PAREI will own the array and provide direct benefits from the energy generation to LMI participants in the Center Harbor area. Attachment 1, Project and Program Overview, provides a description of the project and summarizes the direct net benefits provided to LMI residential customers.

The grant is contingent on sufficient REF funds being available upon the effective date of the grant agreement. The funds have been allocated for this contract and are being held in the fund. In the event that the REF funds are insufficient or are no longer available, General Funds will not be requested to support this program.

Respectfully submitted,

**RFP 2022-006 – LOW-MODERATE INCOME COMMUNITY SOLAR COMPETITIVE GRANT
REVIEW PROCESS AND SCORING TEAM**

The Department of Energy (Department) issued a Request for Proposals (RFP) on November 10, 2022 for community solar photovoltaic (PV) projects providing direct benefits to low, moderate, or low and moderate-income (LMI) residential electric customers who reside within the same electric distribution utility service territory. Pursuant to RSA 362-F:10, X “no less than 15 percent of the funds shall annually benefit low-moderate income residential customers, including, but not limited to, the financing or leveraging of financing for low-moderate income community solar projects in manufactured housing communities or in multi-family rental housing.” The RFP required that projects result in quantifiable direct benefits to a minimum of three LMI participants.

The RFP was circulated electronically to members of the Energy Efficiency and Sustainable Energy Board (EESB Board), regular attendees at EESB Board meetings, additional stakeholders known to have an interest in energy policy and programs. The RFP was posted on the Department website for the full submission period, and was advertised in the New Hampshire Union Leader on November 15, 16, and 17, 2022. All responses were due by January 23, 2023. The Department received four proposals requesting a total of \$1.06 million in grant funds for projects with combined estimated total project costs of \$1.23 million. One proposal was deemed ineligible and therefore was not scored.

The Department employed a three-tier grant review process to evaluate the proposals. The scoring team:

Department Low-Moderate-Income Competitive Grant Program Scoring Team			
Initial Review Team			
Name	Position	Agency	Experience
Deandra Perruccio	Administrator IV	Department of Energy	REC management
Tanya Wayland	Analyst IV	Department of Energy	Renewable energy grant program management
Amanda Noonan	Administrator IV	Department of Energy	Electric assistance program
Brittany Mitchell	Weatherization Program Specialist	Department of Energy	Weatherization program
Griffin Roberge	State Energy Program Manager	Department of Energy	Federal Grants
Second Review Team			
Joshua Elliott	Director of Policy & Programs	Department of Energy	DOE leadership team
Christopher Ellms, Jr.	Deputy Commissioner	Department of Energy	DOE leadership team
Jared Chicoine	Commissioner	Department of Energy	DOE leadership team

The initial review team scored the three proposals using the scoring criteria set forth in the RFP and those requirements set forth in N.H. Code of Administrative Rules Puc 2508.02 (b) and (c), and developed a score for each proposal from 0-100 points, and assigned values for the factors outlined in the RFP which resulted in the final scores, ranks, and funding recommendations. Based on proposal scores and the program budget, the initial review team recommended funding the full requested amount of two applicants and a reduced amount for one applicant.

The Sustainable Energy staff submitted a funding recommendation memorandum and provided project scores, descriptions, and recommendations for funding, and the second review team had an opportunity to ask questions. The second review team reviewed the initial recommendation to endorse grant awards for the three highest scoring proposals. The second review team approved grant funding for three renewable energy projects in the total amount of \$854,188.

SCORING CRITERIA, SCORES AND PROPOSED AWARDEES

Three proposals were reviewed. Scoring was completed by the Department of Energy staff evaluation team.

The three highest-scoring proposals were selected for grant awards. One proposal was deemed ineligible and therefore was not scored.

Attachment 1

Plymouth Area Renewable Energy Initiative Project and Program Overview

The Plymouth Area Renewable Energy Initiative's program called NH Solar Shares is structured to build community solar PV arrays to benefit local low moderate income (LMI) families through a "solar share" credit on their electric bill. This "Solar Shares" credit will appear on the LMI participant's electric bill and will directly reduce each LMI participant's monthly electric bill by \$31 to \$34. These benefits reflect 90-100% of the solar production.

Leveraged funding was provided by private donations from the community to support this project. This project works in collaboration with the electric distribution utility, New Hampshire Electric Cooperative, providing direct on-bill credits.

Participants will be community members recruited by an advisory committee made up of low-income community support professionals including those from NH Electric Cooperative's Project Care and town employees overseeing the welfare of their residents from Moultonborough, Center Harbor, Holderness and Sandwich.

A community solar "garden" will be developed at the Lakes Region Conservation Trust (LRCT), donated by the LRCT through a 25-year no cost lease. The project will consist of a ground-mounted array and an educational solar trail around the array that will link up with a walking trail on the LRCT conservation property. The pathway will be lined with signage highlighting educational energy facts and picnic tables for participant meet ups and site up-keep volunteer work sessions.

The Project scope items that are reimbursable with grant funds hereunder includes all materials and labor required to complete the Project, including that of outside contractors, subcontractors, consultants, engineers, and other members of the Project team, and a minimum of five years' labor warranty shall be applicable.
2. Maintain all components of the Project as recommended by its manufacturer and/or engineering specifications.
3. Uphold the commitment to provide on-bill credits to approximately 12 low-moderate income participants for 20 years or for the full useful life of the Project, with 90-100% of the net benefits allocated to residential end-user LMI participating members.
4. Projects must adhere to the statutory requirements of RSA 362-F:2, X-a and provide direct benefits to LMI customers from the date of initial operation through the earlier to occur of (i) 20 years, or (ii) the end of the project's useful operational life.
5. Inform the Department promptly, in writing, if any net direct benefit(s) to participants will decrease by 10% or more from the estimated annual net benefit amount of \$376-418 per participant.
6. Uphold the commitment to ensure that there will be no costs to the LMI participants and continue to ensure that receipt of on-bill credits does not impact LMI participants eligibility to benefit from other state financial assistance programs.
7. Manage the LMI community solar program as described in the "Deliverables" section below.

8. Provide the Department with reports and status updates as specified in the "Deliverables" section below.
9. Submit a complete New Hampshire Class II Renewable Energy Source Eligibility application to the Department for the certification of the output of the Project to produce New Hampshire Class II renewable energy certificates (RECs).
10. Market the Project RECs to electricity providers in New Hampshire for compliance with the state's renewable portfolio standard law, RSA 362-F, if and when the Grantee deems it economically advantageous to do so.
11. Acknowledge the Renewable Energy Fund as a source of funds used for the project in any literature, press release, or public discussion of the Project.

4. The Grantee's reimbursement requests shall cover only the costs of materials and equipment delivered to the project site and incorporated into or to be incorporated into the project and only labor costs directly related to the design, construction and installation of the project. The Grantee's reimbursement requests shall not include the costs of any deposits or prepayments for equipment or materials ordered or procured for the project unless and until such equipment and materials are delivered to the project site and incorporated into the project, or delivered to the project site for incorporation into the project, or used at the project site for the purpose(s) obtained. The Grantee shall document all project expenditures for which reimbursement is requested with appropriate back-up documentation, including, but not limited to, receipts, invoices, bills, and other similar documents for all project vendors, contractors, and subcontractors. This includes expenses incurred by subcontractors employed on construction projects funded through the grant. At a minimum, receipts must be provided documenting labor cost, equipment cost, material cost, site work, engineering and permitting fees, and capital expenditures for all vendors, contractors and subcontractors.

8. Reimbursement requests shall be reviewed for compliance with the scope of work set forth in Exhibit B, and the reimbursement terms and conditions of this Exhibit C, and approved by the Director of the Sustainable Energy Division or her designee. Additional documentation may be requested as determined by the State.
