EXPLANATION

The Department of Environmental Services issued a request for proposals for 2023 Local Source Water Protection Grants. These grants are funded by set-asides under the Drinking Water State Revolving Loan Fund. Twenty-three proposals were received. The proposals were evaluated and ranked based on criteria included in the request for proposals, such as whether the project fulfills a component of a source water protection program, that the proposed project addresses appropriate threats, and that the project will deliver a valuable and useful product. Based on eligibility and the available federal funding, the Department determined that it could offer grants to sixteen source protection planning projects and three source security projects. See Attachment A for the full list of grants awarded and list of reviewers.

The Town of Peterborough will use the source water protection grant funds to begin the process of delineating wellhead protection areas for three of their production wells using updated geologic and land use data to more accurately determine the groundwater recharge areas surrounding their wells.

This agreement has been approved as to form, substance, and execution by the Office of the Attorney General. In the event that the federal funds are no longer available, General funds will not be requested to support this program.

We respectfully request your approval of this item.

Robert R. Scott, Commissioner

EXHIBIT B
SCOPE OF WORK

The Town of Peterborough will use New Hampshire Department of Environmental Services (NHDES) grant funds update the wellhead protection areas (WHPAs) for three town production wells. The Town will prepare information to modify WHPA delineations using updated geologic and land use data to refine the spatial extent of the area contributing groundwater to the town's wells. Project tasks will include geologic mapping and geophysical surveys of aquifer deposits, contaminant threat survey, an assessment of existing monitoring wells, and the design of a long-term pumping test program that will ultimately lead to the determination of a scientifically defensible WHPA for each production well.

Specifically, the following tasks as described in the application will be accomplished, and deliverables submitted for NHDES review:

Task 1. Development of QAPP Per NHDES/EPA Request for New England Projects Using Existing and Secondary Data

Deliverable: Obtain approved QAPP from NHDES/EPA

Task 2. Detailed Geologic Mapping

Perform detailed geologic mapping that identifies various stratified drift deposits and aquifer boundaries on the ground level.

Deliverable: Provide a letter memo describing the data sources and methodology that will be used to develop the maps and a final draft of the mapping for NHDES review.

Task 3: Geophysical Surveys

Perform geophysical surveys that evaluate the thickness and lateral extent of the aquifer deposits from which groundwater is withdrawn.

Deliverables: Final geologic maps that encompass the data from Tasks 1 and 2.

Task 4: Detailed Contaminant Threats Assessment

Conduct a detailed contaminant threat survey within 3,000 feet of each production well.

Deliverables: Provide a written summary of the threat assessment methodology together with a list of identified contaminant sources.

Grantee Initials 
Date 5/17/23

Task 5: Assessment of Available Monitoring Wells

Assess the availability and usability of existing monitoring wells and residential wells that can be used for groundwater monitoring during and upcoming long-term pumping test program.

Deliverables: Provide an assessment and list of available wells for use in revising the WHPA delineation.

Task 6: Design of Pumping Test Program

Design a long-term pumping test program that will lead to the final determination of a technically defensible WHPA for each production well, consistent with NHDES regulations regarding the delineation of WHPAs.

Deliverables: Design and copy of pumping test program elements

Task 7: Preliminary Delineation of WHPAs for Three Production Wells

Delineate WHPAs for the three production wells and prepare a summary report.

Deliverables: A draft of final summary report will be provided to NHDES for review and comment.

Quarterly progress report forms must be completed by grant recipients or their subcontractor and submitted to NHDES every three months, beginning with the first full three (3) month quarter after grant approval from Governor & Council.
