His Excellency, Governor Christopher T. Sununu
and the Honorable Council
State House
Concord, New Hampshire 03301

Your Excellency and Members of the Council:

REQUESTED ACTION

Authorize the Department of Justice (DOJ) to enter into a **sole source** contract with CCVC, Inc., Highlands Ranch, CO (Vendor #393784), in an amount not to exceed \$68,540, for the purpose of maintaining the Sexual Assault Evidence Kit tracking (Kit), a custom, web-based software product designed for use by the State of New Hampshire to track the life cycle of sexual assault evidence kits, with the option to renew for an additional five (5) year period, effective upon approval of the Governor and Executive Council through November 30, 2028. 100% Agency Income.

Funding is available as follows:

02-20-20-200010-8575	<u>FY 2024</u>
Victims Fund	
038-500175, Technology Software	\$68,540

EXPLANATION

This is **sole source** because CCVC, Inc. custom developed this software, and the Department has been working with this Vendor since 1994 on other victim assistance software. The Vendor is very familiar with the victim service portion of the office and systems to track sexual assault kits (Kits).

As the State of New Hampshire's chief law enforcement agency, the Department is obligated to ensure the enforcement of laws including the laws against sexual assault. The

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
December 1, 2023

Department has determined that the ability to track the use of Kits is critical in its performance of its constitutional, statutory, and moral obligation.

When a victim of sexual assault gives a statement, the responding officials begin an investigation of the reported crime. The victim is seen by a health care provider who will, as part of medical treatment for the victim, assign a Kit and use that Kit to collect forensic evidence of the crime. That Kit will then be forwarded to a forensic laboratory for analysis of evidence contained therein.

When the laboratory has completed its analysis, it will send the Kit, together with a report detailing the results of the lab's analysis, to the law enforcement agency that is investigating the crime. The law enforcement agency will use the data gathered by the laboratory in their efforts to identify the perpetrator and to arrest, charge and prosecute the person or persons to obtain justice for the victim and to deter such criminal acts.

In 2022, the DOJ purchased this custom software, from CCVC, Inc., that uses a unique identifier and a QR code attached to the Kit. These codes allow everyone in the investigatory chain, who uses the Kit, to log its whereabouts. The QR code is the login credential and because it is attached to the Kit, only those who have the currently have the kit would be able to enter data related to its whereabouts. This method provides extra protection for the victim and allows the Department instant access to the Kit's evidence trail.

Data is stored on a secure, encrypted, cloud-based database. This data is only available to designated DOJ staff. These members track the progress of each Kit and generate reports related to all aspects of the handling and processing of the Kits. It is important to note, however, that no personally identifiable information is stored on this system, meaning that no information regarding the victim and any suspects will be part of this system. The Department only tracks the whereabouts and progress of the individual Kits. In short, this is an inventory tracking system to assure that all Kits are being processed to completion. In order to continue with this protection, it is necessary to provide maintenance to the software.

Please let me know if you have any questions concerning this request. Thank you for your consideration of this request.

Respectfully submitted,

John M. Formella
Attorney General
