EXPLANATION

This request is being made to accept additional grant funding and extend the ELC Advanced Molecular Detection (AMD) Sequencing Analytics Program as the CDC has awarded additional funding and an extension of this grant program thru July 31, 2027.

The New Hampshire Public Health Laboratory (PHL) will continue to work on improving its AMD capacity, by supporting staff in Next Generation Sequencing (NGS) and bioinformatics training and implementing/developing needed bioinformatics pipelines. This will be accomplished through in-person and online trainings as those opportunities become available.

The funds are to be budgeted as follows:

- Class 020 For office supplies, copier paper and shipping charges associated with laboratory reagent purchases.
- Class 041 For Audit Fund Set Aside per State requirement.
- Class 080 To attend out-of-state meetings and conferences related to the program such as NGS training, the Association of Public Health Laboratories (APHL) annual meeting, and the APHL ID Labcon meeting.
- Class 102 To create and/or continue contracts with:
 - Clear Labs for instrument repair and maintenance.
 - Illumina for instrument repair and maintenance.
 - Thiagen for expanded genomic capabilities.
 - Emory University to share protocols, conduct trainings, implement new methods at the NHPHL.
 - Maxim Staff Services for a Laboratory Assistant.
- Class 548 To purchase reagents for processing specimen testing.

REQUESTED ACTION

Pursuant to RSA 14:30-a, VI and RSA 124:15, the Department of Administrative Services (DAS) is seeking approval on behalf of State Agencies to amend the accept and expend of American Rescue Plan (ARP), the Bipartisan Infrastructure Law (BIL) and other previously enacted federal relief bills related to the COVID-19 pandemic funded requests by extending the end date for funding, new positions, and/or new Class 046-Consultants, created in relation to the acceptance of these funds, to the dates listed in Attachment A, but no later than June 30, 2025, effective upon approval of the Fiscal Committee and the Governor and Executive Council. 100% Federal Funds.

EXPLANATION

The Department of Administrative Services is seeking approval, on behalf of the State Agencies listed in Attachment A, to extend the effective date of the attached items from June 30, 2023 to the dates listed, but no later than June 30, 2025. This extension is allowable under the “procedural rules amendment” approved at the Fiscal Committee meeting held on April 21, 2023. Attachment A excludes programs approved with the acceptance of ARP State Fiscal Recovery Funds which are being presented via a separate request. All items included in Attachment A have been previously submitted by the respective state agency responsible for the program; and approved by both the Fiscal Committee and Governor and Executive Council.

This request only serves to authorize agencies’ program balances that are unspent as of June 30, 2023, as well as positions and consultants created pursuant to RSA 124:15, to carry forward into FY24. This will align programs with the completion dates authorized in the award notices. Any request to reallocate an existing budget or repurpose funds for new or existing projects will require future Fiscal Committee and Governor and Council approvals.

The Honorable Ken Weyler, Chairman
Fiscal Committee of the General Court

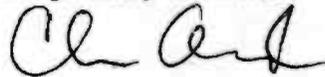

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
Page 2 of 2

If this item is not approved, the State would need to issue layoff notices to employees hired into these federally funded positions, created under the original request, and agencies would halt time sensitive projects. Further, each agency would then need to submit a retroactive request to July 1, 2023 for approval to reauthorize the positions and funding; however, the retroactive requests would not eliminate the need to issue layoff notices in June 2023.

Typically, agencies budget for known federal grants in the upcoming biennial budget; however, the budget guidance issued in August 2022 instructed agencies to exclude all COVID-related funding from their FY24-FY25 budget submissions. Although the funding is authorized by the federal government beyond June 30, 2023, including this one-time funding would have erroneously inflated the FY24-FY25 State budget.

In the event that Federal Funds are no longer available, General Funds will not be requested to support these programs. The Department of Administrative Services seeks approval of this request.

Respectfully submitted,

Charles M. Arlinghaus
Commissioner

EXPLANATION

This request is being made to accept additional grant funds available for the Advanced Molecular Detection (AMD) Sequencing and Analytics and Strengthening PHL Preparedness from the Centers of Disease Control and Prevention (CDC). The rapid emergence and global spread of SARS-CoV-2, the pathogen that causes COVID-19, highlights the threat posed by novel pathogens. One of the most versatile tools in understanding and guiding the response to these emergencies is genomic sequencing. While the ability to decode microbial genomes has existed since the 1970s, the advent of high-throughput DNA sequencing, also called next-generation sequencing, has greatly expanded the use of these technologies in public health.

The COVID -19 pandemic has highlighted many challenges within the laboratory testing infrastructure during an immense public health response. This funding opportunity includes strategies to strengthen surveillance, detection, and preparedness through the Laboratory Response Network (LRN) and at CDC. With more than 120 national, state and local laboratories, the LRN is an integral part of the National Response Framework and ensures consistent, high confidence results by developing and distributing assays, offering specialized training, and supporting data reporting.

The funds are to be budgeted as follows:

Class 020 - The funds will be used to pay for current expenses such as laboratories consumable supplies.

Class 037 - The funds will be used to pay for two laptop computers and accessories. The PHL performs whole genome sequencing for SARS-CoV-2 and foodborne disease pathogens and generates 40-50Gb sequencing data. The PHL purchased a BaseSpace Cloud account from Illumina INC to manage the sequence data. All PHL whole genome sequencing data are transferred to and stored in the BaseSpace Cloud account. The PHL also uses software programs in the BaseSpace Cloud to analyze the PHL sequencing data. Funds are requested to purchase two computers to access to the BaseSpace Cloud account. These two computers will be placed in the PHL's Molecular Diagnostics Laboratory and will be dedicated computers for performing sequencing analysis.

Class 038 - The funds will be used for LIMS integration. The PHL performs whole genome sequencing for SARS-CoV-2 and foodborne disease pathogens and generates large amounts of sequencing data. Currently, sequencing data is stored separately from the associated patient and epidemiologic data. Sharing of this data with NH Epidemiologists required a time-intensive manual combining of the two data sets. In order to use sequencing data efficiently, the PHL will work to integrate sequencing data with patient information and epidemiologic data for the automated sharing of analyzed Next Generation Sequencing (NGS) data with NH Epidemiologists. The PHL currently shares testing data (not including sequencing data) with the NH Bureau of Disease Control (BIDC) through its Horizon Laboratory Information Management System (LIMS). The NPHL will also explore the feasibility of integrating LIMS with data sharing tools and may develop other mechanisms for sharing sequencing data and epidemiology data between the PHL and the BIDC.

Class 041 - The funds will be used to pay for audit fund set aside per State requirement.

Class 102 - The funds will be used pay for contracts including a service contract on the Miseq System, Whole Genome Sequencing (WGS) data storage and computation and a courier contract to deliver specimens. The PHL purchased two MiSeq systems from Illumina INC for performing whole genome sequencing. This MiSeq system is the only system for which the CDC has a standard protocol available for state PHLs to use. Funds are requested to purchase a service and repair contract for the two MiSeq system. The PHL also purchased a BaseSpace Cloud

His Excellency, Governor Christopher T. Sununu

account from Illumina INC to manage the sequence data. Funds are requested to pay the cost of the BaseSpace Cloud account.

Class 548 - The funds will be used to pay for reagents, used in laboratory testing.

In response to the anticipated two-part question, "Can these funds be used to offset General Funds?" and "What is the compelling reason for not offsetting General Funds?" the Division offers the following information: The funds are provided for a specified purpose by the CDC as defined in the Notice of Grant Award and cannot be used to offset general funds.

Area Served: Statewide

Source of Funds: 100% Federal from the Centers for Disease Control and Prevention provided through one-time funding made available under the American Rescue Plan Act (ARP), P.L. 117-2.

Attached is the Notice of Grant Award. These funds were not added to the FY22-FY23 operating budget because these are new funds recently granted to the State to assist in the public health Coronavirus response and were not anticipated at the time the budget was developed.

In the event that these Federal Funds become no longer available, General Funds will not be requested to support this program.

Respectfully submitted,

Lori A. Shibinette
Commissioner
