**REQUESTED ACTION**

Dept. Environmental Services, DWSRF BIL Administration, Grants- Federal

FY2024

\$25,000

**EXPLANATION**

The Department of Environmental Services issued a request for proposals for 2024 Local Source Water Protection Grants. These grants are funded by set-asides under the Drinking Water State Revolving Loan Fund. Twenty-one proposals were received. The proposals were evaluated and ranked based on criteria included in the request for proposals, such as whether the project fulfills a component of a source water protection program, that the proposed project addresses appropriate threats, and that the project will deliver a valuable and useful product. Based on eligibility and the available federal funding, the Department determined that it could offer grants to thirteen source protection planning projects and two source security projects. See Attachment A for the full list of grants awarded and list of reviewers.

Moose Mountain Regional Greenways will use the source water protection grant funds to pay for transaction costs associated with the purchase of a conservation easement for the Shillaber property, located in Farmington and Strafford. Conservation of this property will ensure protection of valuable drinking water resources for the City of Rochester by creating a buffer around part of the Berry River.

This agreement has been approved as to form, substance, and execution by the Office of the Attorney General. In the event federal funds are no longer available, general funds will not be requested to support this program.

We respectfully request your approval of this item.

  - 11.2.2 Give the Grantee a written notice specifying the Event of Default and suspending all payments to be made under this Agreement and ordering that the portion of the Grant Amount which would otherwise accrue to the Grantee during the period from the date of such notice until such time as the State determines that the Grantee has cured the Event of Default shall never be paid to the Grantee; and
  - 11.2.3 Set off against any other obligation the State may owe to the Grantee any damages the State suffers by reason of any Event of Default; and
  - 11.2.4 Treat the agreement as breached and pursue any of its remedies at law or in equity, or both.
12. TERMINATION.
- 12.1. In the event of any early termination of this Agreement for any reason other than the completion of the Project, the Grantee shall deliver to the Grant Officer, not later than fifteen (15) days after the date of termination, a report (hereinafter referred to as the "Termination Report") describing in detail all Project Work performed, and the Grant Amount earned, to and including the date of termination. In the event of Termination under paragraphs 10 or 12.4 of these general provisions, the approval of such a Termination Report by the State shall entitle the Grantee to receive that portion of the Grant amount earned to and including the date of termination.
- 12.2. In the event of Termination under paragraphs 10 or 12.4 of these general provisions, the approval of such a Termination Report by the State shall in no event relieve the Grantee from any and all liability for damages sustained or incurred by the State as a result of the Grantee's breach of its obligations hereunder.

29 August 2023

Dear Mr. Boyd,

I am writing to express the support of the City of Rochester for the 2023 Drinking Water and Groundwater Trust Fund (DWGTF) Source Water Protection Grant Program application from Moose Mountains Regional Greenways (MMRG) to conserve the 200 acre Shillaber Conservation Easement project in Farmington and Strafford, NH. We demonstrate our tangible support with a pledge of \$20,000 to MMRG towards the total project cost.

Our enthusiasm for the Shillaber project is based on multiple factors. All of the property is within the Berry River watershed. The property has just over 3,200 feet of frontage along the Berry River. This river feeds all three major water reservoirs for the town of Rochester and is identified in both the Rochester and Farmington Master Plans as a key water resource. Approximately 74 (37%) acres of the property consists of freshwater wetland habitat that is partially created by the Berry River that flows through the property. Blanding's turtles have been recorded within the range of this property by the Natural Heritage Bureau database. According to the NH Fish and Game Wildlife Action Plan, nearly 100% of the property falls within Tier 1, Tier 2 and Tier 3 habitat, 65% being Tiers 1 and 2. The NH Wildlife Connectivity Model shows that nearly 100% of the parcel has high permeability for wildlife. All of these natural resource qualities make the Shillaber Conservation Easement ideal for protection.

The conservation of the Shillaber property will also provide opportunities to strengthen our conservation partnership with MMRG while achieving strategic goals for both of us.
