REQUESTED ACTIONS

1. Authorize the Department of Environmental Services (NHDES) to amend a Lead Service Line Inventory grant (PO# 9005918) to the Berlin Water Works (VC# 177362 B006), Berlin, NH by extending the completion date to December 31, 2024 from March 30, 2024, effective upon Governor and Council approval. The original grant was approved by Governor and Council on March 22, 2023, Item# 86. This is a no cost time amendment. 100% Federal Funds.
2. Authorize the Department of Environmental Services (NHDES) to amend a Lead Service Line Inventory grant (PO# 9005919) to the Central Hooksett Water Precinct (VC# 154894 B001), Hooksett, NH by extending the completion date to December 31, 2024 from March 30, 2024, effective upon Governor and Council approval. The original grant was approved by Governor and Council on March 22, 2023, Item# 87. This is a no cost time amendment. 100% Federal Funds.
3. Authorize the Department of Environmental Services (NHDES) to amend a Lead Service Line Inventory grant (PO# 9005922) to the Town of Exeter (VC# 177386 B001), NH by extending the completion date to December 31, 2024 from March 30, 2024, effective upon Governor and Council approval. The original grant was approved by Governor and Council on March 22, 2023, Item# 90. This is a no cost time amendment. 100% Federal Funds.

EXPLANATION

We are requesting approval of these amendments to provide the Berlin Water Works (Water Works), Hooksett Water Precinct (Precinct) and the Town of Exeter (Town) additional time to complete water system improvements that will meet federal lead service line inventory requirements.

The Water Works, Precinct and the Town were each awarded a \$50,000 grant to conduct an analysis of their current drinking water service line records to identify lead service lines, to construct a searchable database, revise their sampling plan and create a replacement plan to address any lead service lines within their distribution system. The timeline and deliverables of the Environmental Protection Agency's (EPA) Lead and Copper Rule Revision (LCRR) are being adjusted based on new regulatory updates. For

this reason, NHDES requests an extension to the grant deadline and a modification to the scope to reflect EPA's new required deliverables and timelines. To date, none of the Water Works', \$30,525 of the Precinct's, and none of the Town's original \$50,000 Lead Service Line grants have been spent.

In the event grant funds become no longer available, general funds will not be requested to support this program. These grant agreements have been approved by the Attorney General's Office as to form, substance, and execution.

We respectfully request your approval of this item.

Authorize the Department of Environmental Services (NHDES) to award a Lead Service Line Inventory Grant to the Berlin Water Works, Berlin, NH (Vendor Code # 177362 B006) in the amount of \$50,000 to develop and implement a drinking water service line inventory, effective upon Governor and Council approval through March 30, 2024. 100% Federal Funds.

EXPLANATION

The Environmental Protection Agency (EPA) published regulatory revisions to the National Primary Drinking Water Regulation (NPDWR) for lead and copper under the authority of the Safe Drinking Water Act (SDWA). These revised requirements provide greater and more effective protection of public health by reducing exposure to lead and copper in drinking water.

NHDES released a solicitation for Lead Service Line Inventory, Sampling Plan and Replacement Plan Grant applications in September of 2022. A total of 24 communities were identified as potential candidates for this grant (see Attachment A for a complete list). Funding for these grants was established from the Bipartisan Infrastructure Law (BIL) funding. The grants are being awarded on a first come, first served basis. The grant amounts were determined by the number of drinking water service connections within the water system. Projects eligible to receive grant funding include in-house or outside services to create lead service line inventories, sampling plans, and replacement plans, digitizing historic records, building inspections, test pits/potholing, and water quality testing.

The Berlin Water Works will use the funding to conduct a complete data mining of their current water service line records to identify lead service lines and to construct a searchable database that will allow the Berlin Water Works to communicate more effectively with their stakeholders. In addition, the Berlin

- 11.2.2 Give the Grantee a written notice specifying the Event of Default and suspending all payments to be made under this Agreement and ordering that the portion of the Grant Amount which would otherwise accrue to the Grantee during the period from the date of such notice until such time as the State determines that the Grantee has cured the Event of Default shall never be paid to the Grantee; and
- 11.2.3 Set off against any other obligation the State may owe to the Grantee any damages the State suffers by reason of any Event of Default; and
- 11.2.4 Treat the agreement as breached and pursue any of its remedies at law or in equity, or both.
12. TERMINATION.
- 12.1. In the event of any early termination of this Agreement for any reason other than the completion of the Project, the Grantee shall deliver to the Grant Officer, not later than fifteen (15) days after the date of termination, a report (hereinafter referred to as the "Termination Report") describing in detail all Project Work performed, and the Grant Amount earned, to and including the date of termination. In the event of Termination under paragraphs 10 or 12.4 of these general provisions, the approval of such a Termination Report by the State shall entitle the Grantee to receive that portion of the Grant amount earned to and including the date of termination.

REQUESTED ACTION

Authorize the Department of Environmental Services (NHDES) to award a Lead Service Line Inventory Grant to the Central Hooksett Water Precinct, Hooksett, NH (Vendor Code # 154894 B001) in the amount of \$50,000 to develop and implement a drinking water service line inventory, effective upon Governor and Council approval through March 30, 2024. 100% Federal Funds.

FY 2023

EXPLANATION

The Environmental Protection Agency (EPA) published regulatory revisions to the National Primary Drinking Water Regulation (NPDWR) for lead and copper under the authority of the Safe Drinking Water Act (SDWA). These revised requirements provide greater and more effective protection of public health by reducing exposure to lead and copper in drinking water.

NHDES released a solicitation for Lead Service Line Inventory, Sampling Plan and Replacement Plan Grant applications in September of 2022. A total of 24 communities were identified as potential candidates for this grant (see Attachment A for a complete list). Funding for these grants was established from the Bipartisan Infrastructure Law (BIL) funding. The grants are being awarded on a first come, first served basis. The grant amounts were determined by the number of drinking water service connections within the water system. Projects eligible to receive grant funding include in-house or outside services to create lead service line inventories, sampling plans, and replacement plans, digitizing historic records, building inspections, test pits/potholing, and water quality testing.

The Central Hooksett Water Precinct will use the funding to conduct a complete data mining of their current drinking water service line records to identify lead service lines and to construct a searchable database that will allow the Precinct to communicate more effectively with their stakeholders. In

addition, the Central Hooksett Water Precinct will revise their sampling plan and create a replacement plan to address lead service lines within their distribution system.

In the event grant funds become no longer available, general funds will not be requested to support this program. The grant agreement has been approved by the Attorney General's Office as to form, substance, and execution.

We respectfully request your approval of this item.

EXPLANATION

The Environmental Protection Agency (EPA) published regulatory revisions to the National Primary Drinking Water Regulation (NPDWR) for lead and copper under the authority of the Safe Drinking Water Act (SDWA). These revised requirements provide greater and more effective protection of public health by reducing exposure to lead and copper in drinking water.

NHDES released a solicitation for Lead Service Line Inventory, Sampling Plan and Replacement Plan Grant applications in September of 2022. A total of 24 communities were identified as potential candidates for this grant (see Attachment A for a complete list). Funding for these grants was established from the Bipartisan Infrastructure Law (BIL) funding. The grants are being awarded on a first come, first served basis. The grant amounts were determined by the number of drinking water service connections within the water system. Projects eligible to receive grant funding include in-house or outside services to create lead service line inventories, sampling plans, and replacement plans, digitizing historic records, building inspections, test pits/potholing, and water quality testing.

The Town of Exeter will use the funding to conduct a complete data mining of their current drinking water service line records to identify lead service lines and to construct a searchable database that will allow the Town to communicate more effectively with their stakeholders. In addition, the Town of Exeter

will revise their sampling plan and create a replacement plan to address lead service lines within their distribution system.

In the event grant funds become no longer available, general funds will not be requested to support this program. This grant agreement has been approved by the Attorney General's Office as to form, substance, and execution.

We respectfully request your approval of this item.
