This parcel has been reviewed by the Department and it was determined to be surplus to our operational needs and available for disposal. The sale will include the following conditions:

- The Buyer must commission a Land Surveyor licensed in New Hampshire to prepare a perimeter boundary plan illustrating the existing right-of-way or any mutually agreed-upon adjustments. All survey work must adhere to the New Hampshire Code of Administrative Rules 503.09 and encompass all elements outlined in the NHDOT Right-of-Way Layout Plan checklist. All deflection points, PTs, and PCs shall be monumented and shown on the preliminary plan to be submitted to the Department for review and approval.

INTER-DEPARTMENT COMMUNICATION

Administrator

DATE: October 24, 2023

AT: Dept. of Transportation
Bureau of Right-of-
Way

SUBJECT: Sale of State-Owned Land in Greenville
RSA 4:39-c

TO: Representative Mark McConkey, Chairman
Long Range Capital Planning and Utilization Committee

REQUESTED ACTION

The New Hampshire Department of Transportation (Department), pursuant to RSA 4:39-c, requests authorization to sell a parcel of state-owned land on the easterly side of NH Route 31 (a/k/a Fitchburg Road) in the Town of Greenville. The sale will be direct to Michael Lamarre for \$14,100, which includes the \$1,100 administrative fee. The sale will be subject to conditions as specified in this request.

EXPLANATION

The Mr. Lamarre is in the process of subdividing his property which abuts the subject parcel. The Mr. Lamarre's surveyor discovered a portion of land thought to be owned by Mr. Lamarre is owned by the State of New Hampshire. Please reference the attached Existing Conditions Plan prepared by Fieldstone Land Consultants, PLLC depicting the area to be conveyed.

The parcel, consisting of 0.57 +/- acres is a portion of a larger parcel acquired in 1956 from William H. Doonan for the Greenville, S-52(4), S-2833 project. The Department acquired the 1.5 +/- acres, via Warranty Deed for \$100. After a departmental review, it was determined that the parcel is surplus to the Department's operational needs and available for disposal. This parcel will be conveyed with the following conditions:

- The Mr. Lamarre will be required to commission a Land Surveyor licensed in New Hampshire, to survey and prepare a Parameter Boundary Line plan depicting the limits of the right-of-way, meeting the NH Code of Administrative Rules 503.09, to be submitted to the Department for review and approval. Upon approval by the Department, the Mr. Lamarre is required to record the plan under RSA 478:1-a, in the Hillsborough County Registry of Deeds, from which the Department will prepare the conveyance deed.
- The Mr. Lamarre shall be responsible for obtaining all local and state land use approvals precedent to closing.

A Staff Appraiser from the Department evaluated the subject property and concluded it does not have an independent highest and best use. They then prepared a contributory market value appraisal using the sales comparison approach that adheres to the requirements of the Right of Way Manual and the Uniform Standards of Professional Appraisal Practice. The property's contributory market value as of September 8, 2023, was determined to be \$13,000.

Pursuant to RSA 4:39-c, the Department will solicit interest from the Town of Greenville.

Pursuant to RSA 204-D:2, the Department will also solicit interest from the New Hampshire Housing Finance Authority.

The Department respectfully requests authorization to sell the subject parcel as outlined within this request.

RIGHT-OF-WAY LAYOUT PLAN CHECKLIST

Revised 1/31/2024

NOTE: Symbol, Summary or Property Layout sheets are not required for registry plan sets

Right-of-Way alignments are defined as the alignments used to acquire lands and easements and the setting of the Right-of-Way boundaries and related easements. In areas where there has not been a prior Right-of-Way project, the construction project alignment will be used for Right-of-Way acquisitions. The Construction alignment will also be used on highway realignment projects and shall match into the original alignment at the beginning and end of the realignment.

II. RIGHT-OF-WAY GEOMETRIC LAYOUT SHEET

Right-of-Way geometric sheets are required to show the relationship between individual right-of-way alignments and construction alignments. All alignments need to be tied together geometrically and referenced to the Right-of-Way boundary. If all the geometric data can be shown on the Right-of-Way plan sheets, then the Geometric Layout Sheet may be eliminated.

A.	Plan	Done By/Date	Checked By/Date	Comments
1	ROW alignment(s) stationed every 500 feet			
2	Construction alignments stationed every 500 feet with equations tying the ROW alignment to the proposed construction alignment			
3	Route numbers and/or names of roads			
4	Town/city, county, country, and state boundaries shown and labeled			
5	Match lines (if appropriate)			
6	North arrow (grid)			
7	ROW alignment metes and bounds with PI coordinates and curve data shown as delta, length, radius, tangent and include chord bearing and distance for non-tangent curves.			
8	ROW alignment curve control points shown and labeled (PC, PT, etc.)			
9	Exclude all existing and proposed detail			
10	Exclude all property information (property lines, owner names, parcel numbers, etc.)			
11	Exclude all ROW information (existing and proposed ROW, easements, etc.)			
12	Approximate scale shown as bar scale and written			
B. Miscellaneous				
1	Sheet title border filled in completely with road/route name, "RIGHT-OF-WAY GEOMETRIC LAYOUT SHEET", "TOWN/CITY OF ..." project number, sheet number, total sheets, and model name (if used)

RIGHT-OF-WAY LAYOUT PLAN CHECKLIST

D.

	<u>Proposed Detail</u>	Done By/Date	Checked By/Date	Comments
	Summary table for each parcel shown on each sheet the parcel appears on.			
1	Areas of takes and permanent easements labeled individually on plan and listed in summary box (areas less than an acre shall be in square feet)			
2	Areas of takes and easements completely within the parcel shall be labelled exact. Areas abutting property lines or a meander line (ie: brook, river, shoreline) labelled +/-			
3	Temporary easements labelled on plan. List areas and use (ie: drive) in summary box only.			
4	Proposed ROW: label ROW, LAROW or CAROW on all cut sheets (label on inside of ROW.) Flag changes in type of ROW. For example, the transition from ROW to LAROW			
5	Proposed bounds with boxed station and offset from ROW alignment			
6	Proposed easement lines with labels. Include clearing line area in the slope easement.			
7	Projects with proposed CAROW note under the property owner's name the number of access points granted even if it is zero, check the Report of the Commissioner for points of access granted, or other agreements			
8	All proposed ROW concentric or parallel to and referenced from the ROW alignment at a whole foot offset (if practical)			
9	Do not offset spiral curves. Intersect the forward and back tangents of the simple curve with the tangent line segments.			
10	Bounds at all PC, PT, angle points etc. Limit placement of bounds to a maximum of 100'. This may be changed to project control monumentation and/or Consultant Licensed Land Surveyors standard property monumentation in lieu of bounds.			
11	Place bounds at intersection of proposed and existing ROW unless the proposed ROW terminates at a property line			
12	Where bounds cannot be set at transition points a reference bound shall be placed and noted as such			
13	Use stone bounds for Town and City Right-of-Way			
14	Label all proposed and existing right-of-way lines and permanent easements with metes and bounds. Effort shall be made to label all lines and curves directly. The use of line and curve tables is to be kept to a minimum and will require final approval by the Department.			
15	Do not include metes and bounds on temporary easements			

The plans being submitted to the registries for recording shall be legible and have no obscured annotations for all proposed and existing detail.
