REQUESTED ACTIONS

Authorize the Department of Environmental Services (NHDES) to amend a Lead Service Line Inventory grant (PO# 9005954) to the City of Dover (VC# 177380 B005), NH by extending the completion date to December 31, 2024 from June 30, 2024, effective upon Governor and Council approval. The original grant was approved by Governor and Council on May 17, 2023, Item# 82. This is a no cost time amendment. 100% Federal Funds.

EXPLANATION

We are requesting approval of this amendment to provide the City of Dover additional time to complete water system improvements that will meet federal lead service line inventory requirements.

The City of Dover was awarded a \$75,000 grant to conduct an analysis of their current drinking water service line records to identify lead service lines, to construct a searchable database, revise their sampling plan and create a replacement plan to address any lead service lines within their distribution system. The timeline and deliverables of the Environmental Protection Agency's (EPA) Lead and Copper Rule Revision (LCRR) are being adjusted based on new regulatory updates. For this reason, NHDES requests an extension to the grant deadline and a modification to the scope to reflect EPA's new required deliverables and timelines. To date, no amount of the original \$75,000 Lead Service Line grant has been spent.

In the event grant funds become no longer available, general funds will not be requested to support this program. These grant agreements have been approved by the Attorney General's Office as to form, substance, and execution.

We respectfully request your approval of this item.

APPROVED G & C

ITEM # 82

REQUESTED ACTION

Authorize the Department of Environmental Services (NHDES) to award a Lead Service Line Inventory Grant to the City of Dover, NH (Vendor Code # 177380 B005) in the amount of \$75,000 to develop and implement a drinking water service line inventory, effective upon Governor and Council approval through June 30, 2024. 100% Federal Funds.

Funding is available in the following account:

03-44-44-441018-5564-072-500574	FY2023
Dept Environmental Services, DWSRF BIL Administration, Grants Federal	\$75,000

EXPLANATION

The Environmental Protection Agency (EPA) published regulatory revisions to the National Primary Drinking Water Regulation (NPDWR) for lead and copper under the authority of the Safe Drinking Water Act (SDWA). These revised requirements provide greater and more effective protection of public health by reducing exposure to lead and copper in drinking water.

NHDES released a solicitation for Lead Service Line Inventory, Sampling Plan and Replacement Plan Grant applications in September of 2022. A total of 30 communities were identified as potential candidates for this grant (see Attachment A for a complete list). Funding for these grants was established from the Bipartisan Infrastructure Law (BIL) funding. The grants are being awarded on a first come, first served basis. The grant amounts were determined by the number of drinking water service connections within the water system. Projects eligible to receive grant funding include in-house or outside services to create lead service line inventories, sampling plans, and replacement plans, digitizing historic records, building inspections, test pits/potholing, and water quality testing.

The City of Dover will use the funding to conduct a complete data mining of their current drinking water service line records to identify lead service lines and to construct a searchable database that will allow the City to communicate more effectively with their stakeholders. In addition, the City of Dover will

revise their sampling plan and create a replacement plan to address lead service lines within their distribution system.

In the event grant funds become no longer available, general funds will not be requested to support this program. The grant agreement has been approved by the Attorney General's Office as to form, substance, and execution.

We respectfully request your approval of this item.
