Dept. Environmental Services, Lakes Restoration Program, Grants-Nonfederal	\$21,590

EXPLANATION

Exotic aquatic plants have been a problem in the above-listed waterbodies for several years. NHDES grant funds are earmarked for management activities to control these exotic aquatic plants in 2024. The primary purpose of New Hampshire's Exotic Aquatic Plant Program is to prevent the introduction and further dispersal of exotic aquatic weeds and to manage or eradicate exotic aquatic weed infestations in the surface waters of the state (RSA 487:17, II). The program, initiated in 1981, has five focus areas: 1) Prevention of new infestations; 2) Monitoring for early detection of new infestations to facilitate rapid control activities; 3) Control of new and established infestations; 4) Research towards new control methods with the goal of reducing or eliminating infested areas; and 5) Regional cooperation.

NHDES received 50 requests for funding to control exotic aquatic plant growth in 2024. NHDES will award grant funds to each applicant. Please refer to Attachment B for a listing of projects that are identified to receive funding. While the Town of Bow grant award is below the \$10,000 threshold, the Town has received other grants that places it over the limit making Governor and Council approval necessary. These agreements have been approved by the Office of the Attorney General as to form, execution, and content.

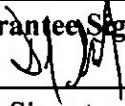

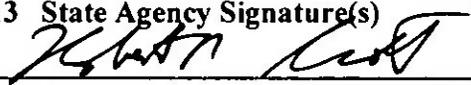

We respectfully request your approval.

Robert R. Scott, Commissioner

12.3. In the event of Termination under paragraphs 10 or 12.4 of these general provisions, the approval of such a Termination Report by the State shall in no event relieve the Grantee from any and all liability for damages sustained or incurred by the State as a result of the Grantee's breach of its obligations hereunder.

Agenda Item#: 12.C.1.

Resolution Number: R - 2024.04.10 - 63
Resolution Re: Authorization to Accept and Expend the NHDES Willand Pond Milfoil Control Grant

RESOLUTION BACKGROUND MATERIAL:

A group of concerned residents around Willand Pond formed a group called Friends of Willand Pond and reached out to NH DES about concerns of milfoil. NH DES had performed a milfoil survey during the summer of 2023, and recognized that milfoil had been spreading and per the attached map was prevalent along the entire shoreline of the pond. NH DES followed up and completed a "Long-Term Variable Milfoil Management Plan" for Willand Pond in March 2024. Due to the spread and prevalence of milfoil, NH DES recommended *"In 2024, herbicide treatment to reduce variable milfoil is recommended as a primary control effort, targeting up to 10 acres of growth in the pond. Future herbicide use will be based on field surveys to determine re-growth or persistent growth patterns."*

The Conservation Commission reviewed both the suggested of an herbicide application, along with the need for a 50% match for the treatment at their meeting of March 11, 2024. The Commission voted unanimously to *"support the milfoil treatment effort with the understanding that untreated milfoil would have a more adverse impact on Willand Pond that the herbicide application and that a long-term integrated pest management plan be developed for the Pond."* NH DES has since developed a Long-Term Management Plan (LTMP). The LTMP calls for future monitoring by "Weed Watchers" group and possible deployment of divers for hand-pulling of milfoil in 2025, following herbicide application in 2024.

Per NH DES, the proposed herbicide would be PROcellaCOR, which is termed a reduced risk herbicide, and has been used in drinking water supplies in NH (Alton Bay/Merrymeeting River in Alton, Paugus Bay in Laconia). While the City has 2 water supply wells near the shores of Willand Pond, these can be deliberately shut off for a period of time following the herbicide treatment.
