REQUESTED ACTION

Authorize the Department of Environmental Services to enter into a grant agreement with the Town of Winchester, NH (VC # 159981-B001) totaling \$800 for funding of one Apple iPad to facilitate collection of stream crossing data, effective upon Governor and Council approval through February 28, 2026. 100% Federal Funds.

Funding is available in the following account:

EXPLANATION

The Department of Environmental Services (NHDES) applied for, and was awarded, an Environmental Protection Agency Wetland Program Development Grant. The focus of the grant award is stream crossings. Given the recurring flood issues that have occurred regularly in southwest New Hampshire in recent years, which have involved failure of stream crossings, the grant is focused on this region of the state, and the communities located there, including Winchester. The project incorporates the development of a municipal-based stream crossing assessment protocol based upon the existing statewide stream crossing assessment protocol in use by NHDES and partner agencies and organizations. The municipal protocol will allow municipalities to directly provide data to, and interface with, the state stream crossing database. As part of the grant process, NHDES developed a scope of work with the Town of Winchester to provide the funds necessary for the town to purchase one Apple iPad, the standard equipment used in New Hampshire to collect stream crossing field data and interface with the statewide stream crossing database.

Under this Agreement, the Town of Winchester will purchase an Apple iPad to enable Winchester municipal employees and road agents to directly interface with the statewide stream crossing assessment database. Providing municipalities the ability to directly access and edit their stream crossing data in the statewide database represents the logical next step in the evolution of the state's stream crossing assessment efforts and data management. This grant was proposed in response to requests from municipalities to develop the protocol and infrastructure to allow them direct access to the state's database of stream crossing data, which the state has developed during the past 15 years. In the long-term, direct municipal access to the database will increase efficiencies in ensuring that the state's collected stream crossing data remains accurate, given the state's investment in its collection. This data is critical to understanding the potential future flood risks, and for statewide and local municipal capital budget planning.

This agreement has been approved as to form, substance, and execution by the Office of the Attorney General. In the event federal funds are no longer available, general funds will not be requested to support this program. This
