EXPLANATION

This education will benefit the Department of Health and Human Services (DHHS) and Shaun Runyon by improving the overall efficiency of the employee's work. Shaun will enhance knowledge of network-based attacks and how to defeat them. This employee will develop the skills needed to assist with issues that require a higher level of expertise in developing Scriptlink code for electronic health systems currently being done through a 3rd party vendor, eventually reducing those added costs to the state. Completing this course is also part of Shaun's longer-term goal of obtaining a Bachelor's degree in Information Technology.

This course, *Network Security*, explores the use of intrusion detection/prevention technologies and information flow controls to protect network systems, as well as analyze security concerns related to virtual systems and networks.

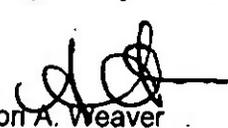

Shaun Runyon has been employed by the Department of Health and Human Services for ten (10) years, two (2) years in the current position of 15-1250 Developer and Programmer-2 with the Information Systems Department at New Hampshire Hospital. This employee is tasked with several ongoing projects to improve the electronic health record by ensuring the data required is captured accurately, while at the same time developing ways to reduce the amount of time the clinical staff spend on documentation.

The Department of Health and Human Services encourages and supports employees who wish to further their professional growth through continuing education in disciplines that are mutually advantageous. Successful completion of the courses will add to the overall strength of the Department to perform its mission to the residents of New Hampshire.

This course will not be taken on State time.

Attached is a fully executed Tuition Agreement for your review.

Respectfully submitted,
