EXPLANATION

This project is part of the State's Ten-Year Transportation Improvement Plan under the Betterment Program. This project consists of the bridge preservation of the bridge carrying NH 135 over the Ammonoosuc River in the Towns of Haverhill and Bath (Bath Br. No. 071/063). The work limits begin approximately 52' south of the south end of the bridge and continues 571' north across the bridge.

The scope of work includes removal and replacement of the bridge deck pavement and barrier membrane; partial and full depth deck repairs; installation of zinc anodes; and installation of crack seals. Pedestrian access across the bridge is to be maintained through all phases of construction.

Page 2

The purpose of the project is to extend the useful life of the bridge by performing bridge preservation activities. The bridge preservation work will extend the functional life of the bridges and delay regression to a lower condition state.

Bath Br. No. 071/063 is a 470' long 3-span IB-C that is 31'-7" curb-to-curb with a deck built in 1998. The deck, superstructure and substructure rating of the bridge is 6, 7, and 7, respectively. The bridge ranked #2 on the 2022 Tier 3&4 M&P priority list. The Bureau of Bridge Maintenance visited the site and made recommendations for this preservation.

The proposed contingency amount is 10% of the contract amount. The extent of this work has been estimated, but the full extent of the work won't be fully known until the existing asphalt and membrane are removed from the bridge. These factors increase the risk of overruns.

The Contractor has been prequalified by this Department. The Contract has been approved by the Attorney General as to form and execution, and the Department has certified that the necessary funds are available and the bid reasonably conforms to the engineer's estimate in accordance with State procedure. Copies of the fully executed contract are on file at the Secretary of State's Office and the Department of Administrative Service's Office, and subsequent to Governor and Council approval will be on file at the Department of Transportation.

This project funding is: 100% Betterment.

A copy of the Tabulation of Bids received for this project is attached along with the Contract Supplemental Sheet and a map indicating the location of the project.

Your approval of this resolution is respectfully requested.

Sincerely,

William J. Cass, P.E.
Commissioner

SUPPLEMENTAL PROJECT INFORMATION SHEET

DESCRIPTION: This project consists of the bridge preservation of the bridge carrying NH 135 over the Ammonoosuc River in the Towns of Haverhill and Bath (Bath Br. No. 071/063). The work limits begin approximately 52' south of the south end of the bridge and continues 571' north across the bridge.

The scope of work includes removal and replacement of the bridge deck pavement and barrier membrane; partial and full depth deck repairs; installation of zinc anodes; and installation of crack seals. Pedestrian access across the bridge is to be maintained through all phases of construction.

FEDERAL FUNDING: 0% (92% Betterment, 8% Non-Par)

CONTINGENCY: The contingency amount is proposed to be 10%. The extent of this work has been estimated, but the full extent of the work won't be fully known until the existing asphalt and membrane are removed from the bridge. These factors increase the risk of overruns.

PROJECT INITIATED: 2022 Bridge T3&4 M&P Priority List

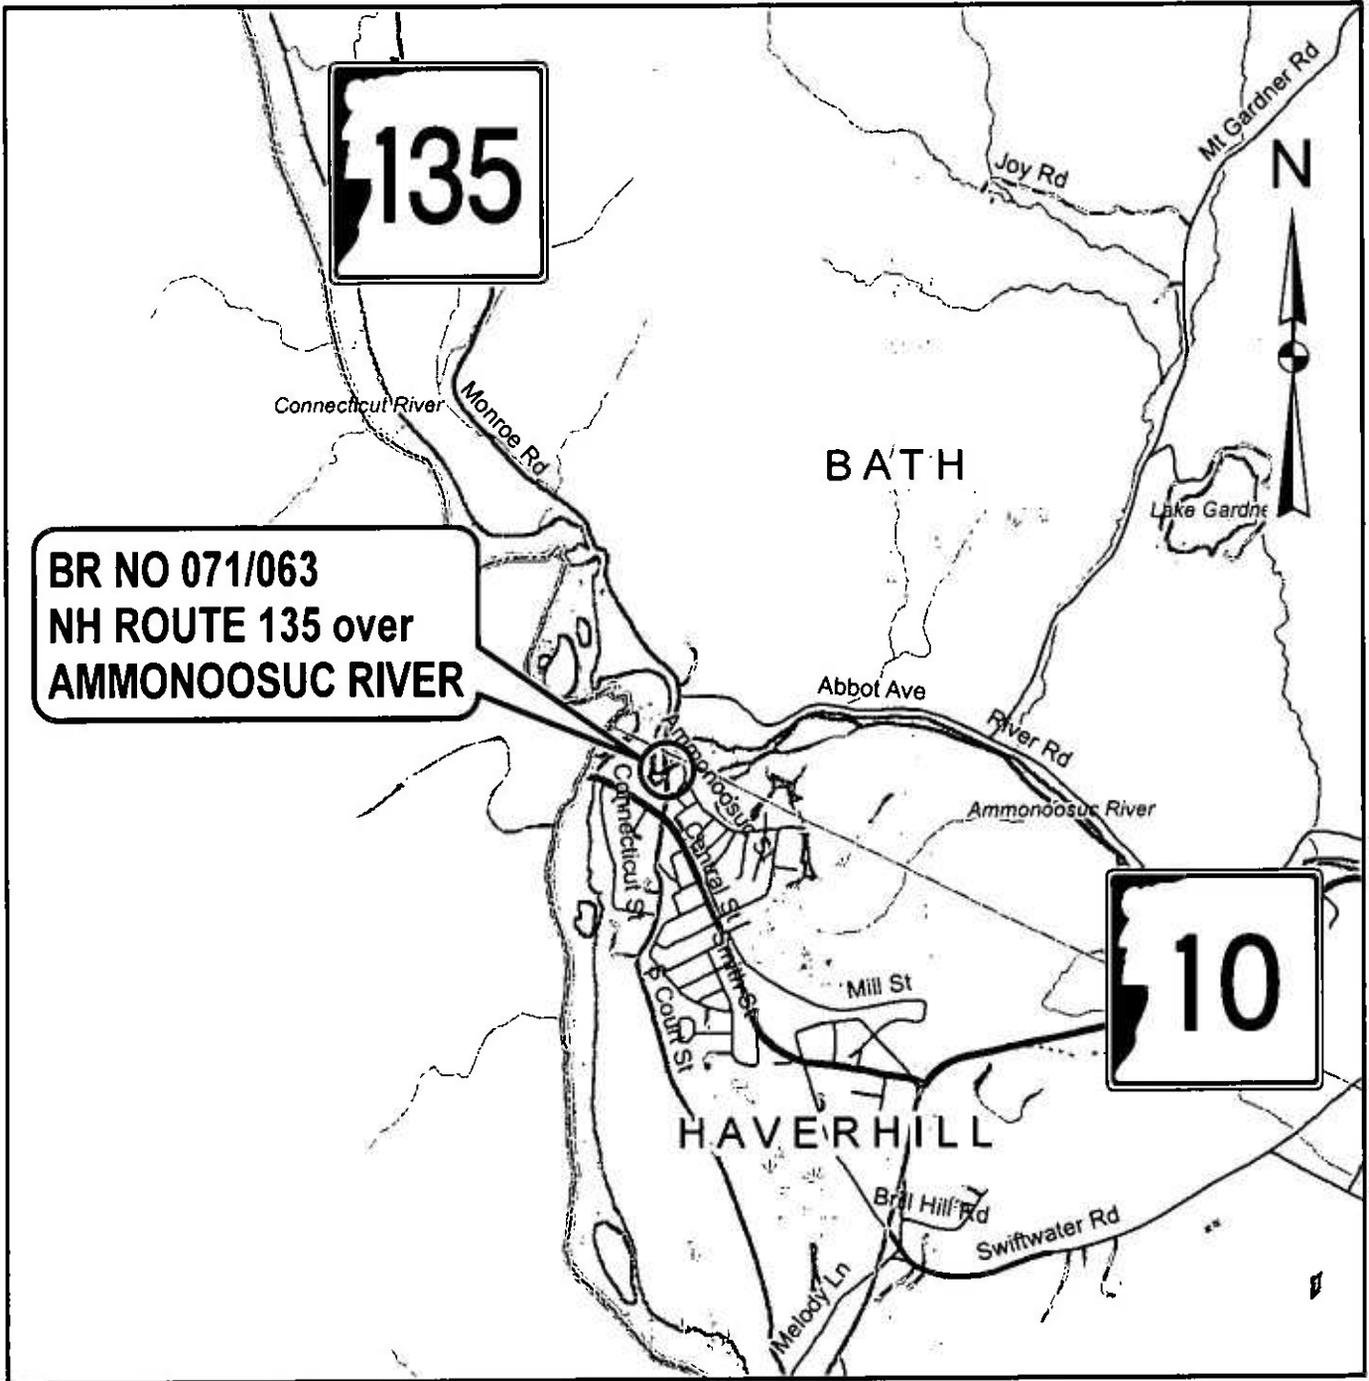

PROJECT EXPLANATION: The purpose of the project is to extend the useful life of the bridge by performing bridge preservation activities. The bridge preservation work will extend the functional life of the bridges and delay regression to a lower condition state.

Bath Br. No. 071/063 is a 470' long 3-span IB-C that is 31'-7" curb-to-curb with a deck built in 1998. The deck, superstructure and substructure rating of the bridge is 6, 7, and 7, respectively. The bridge ranked #2 on the 2022 Tier 3&4 M&P priority list. The Bureau of Bridge Maintenance visited the site and made recommendations for this preservation.

TRAFFIC IMPLICATION: One lane of alternating two-way traffic during both phases of work (approx.. 12 weeks per phase).

FINAL COMPLETION DATE: October 10, 2025.
