(NH Lakes) (VC 166610-B001), Concord, NH, in the amount of \$500,000 for the *Assistance to New Hampshire lake communities to reduce the occurrence of cyanobacteria blooms* project, effective upon Governor and Council approval through August 31, 2026. 100% Federal Funds.

Funds are available in the following accounts as follows:

FY 2025

\$500,000

EXPLANATION

NHDES requests approval to enter into a grant agreement for \$500,000 with NH Lakes to complete the proposed project. The project will be funded with American Rescue Plan Act (ARPA) of 2021 funds, which were awarded to NHDES for cyanobacteria mitigation efforts. NHDES was allocated \$500,000 in ARPA funds to support the New Hampshire Lake Association's cyanobacteria mitigation efforts to reduce the number of chronic and extended cyanobacteria blooms that are a threat to the long-term health and recreational values of state waterbodies. This is an allowable use of ARPA funds under Section 602(c)(1)(D) to make necessary investments in water, sewer or broadband infrastructure.

The proposed project would provide funds to NH LAKES, a state-wide non-profit organization with a mission to restore and preserve the health of New Hampshire's lakes. NH LAKES will, in turn, use the funds to support watershed planning and nutrient load reduction projects on lakes and ponds that have experienced repetitive cyanobacteria blooms.

Cyanobacteria blooms have been increasing in frequency in the state of New Hampshire over the past decade. In 2024, 60 waterbodies had documented cyanobacteria blooms. In 2023, NHDES published a statewide cyanobacteria plan that prioritized providing financial assistance to support watershed planning and implementation of lake management efforts to reduce the occurrence of cyanobacteria blooms. Specifically, that plan recommended funds be targeted towards identifying nutrient input sources and reducing inputs that result from stormwater, septic systems, and lake bottom sediments.

The proposed project will allow NH LAKES to provide funds to nonprofit watershed lake organizations and municipalities to complete watershed-based planning and implementation projects on lakes that have experienced recurrent cyanobacteria blooms. Identification and completion of these projects will establish water quality-based nutrient targets, identify the quantity and source(s) of nutrient loads, and implement nutrient input reduction actions. In turn, the completion of these projects will reduce the likelihood of future cyanobacteria blooms. NHDES

will work closely with NH LAKES to identify waterbodies where cyanobacteria mitigation efforts are most needed and the projects that have the greatest potential for success.

The project costs are budgeted at \$500,000. NHDES will provide 100% of the project costs through an ARPA grant. A budget breakdown is provided in Attachment A. The agreement has been approved by the Office of the Attorney General as to form, execution, and content.

We respectfully request your approval of this item.

EXHIBIT B
SCOPE OF SERVICES

New Hampshire Lakes Association (NH Lakes) will use the American Rescue Plan Act (ARPA) grant funds to perform the following tasks and provide the following deliverables, as outlined in their proposal, entitled *Assistance to New Hampshire lake communities to reduce the occurrence of cyanobacteria blooms*.

Project Purpose: Cyanobacteria blooms are impacting the recreational use and ecological integrity of several New Hampshire lakes. When blooms become severe public health risks are possible. In addition, recurring blooms can negatively impact shoreline property values, tourism, and local economies. In 2023, the NHDES published a statewide cyanobacteria plan at the direction of State Legislature (NH Cyanobacteria Plan) The plan was developed, in part, based on input from a statewide advisory committee and included four focal areas. One of those focal areas prioritized increasing the financial capacity to support watershed planning and implementation of lake management efforts that prevent nutrient inputs. Further, the plan identified the sources of the nutrient inputs linked to cyanobacteria blooms were from stormwater runoff, malfunctioning septic systems, and internal loading from lake bottom sediments.

Through this project, NH LAKES will provide financial assistance for the development of watershed-based plans and implementation of the remedial actions necessary to reduce nutrient inputs. NH LAKES Staff will work closely with New Hampshire Department of Environmental Services (NHDES) staff to select high priority projects. Prioritization of projects will be based on waterbody impairment status, severity and frequency of cyanobacteria blooms, financial need, and geographic location. Preference will be given to projects focused on waterbodies that have documented long-lasting, severe, and recurring cyanobacteria blooms in the Lakes Region of New Hampshire and where there is insufficient funding to complete the proposed project from alternative sources. Eligible entities to receive funds include nonprofit lake, river, and watershed associations, and municipalities.

Project Goal: To identify the cause(s) of and reduce the impacts of cyanobacteria blooms on New Hampshire surface waters through the development of watershed-based plans and implementation of nutrient load reduction actions.

Task 1: Nutrient Reduction to NH Lakes Program Establishment

GRANTS ONLY

American Rescue Plan Act (ARPA)

A Certificate of Vote of Authorization (COV) is a certificate that states that a grantee is willing to enter into a grant agreement with the State of NH Department of Environmental Services (NHDES) and that whoever signs the Grant Agreement (provided under separate cover) has the authority to do so. Do not complete this form until you have received a Grant Agreement from NHDES. Follow the steps below:

- 1. Following a funding offer from NHDES, obtain the authority to accept grant funds and assign an Authorized Representative (AR) from the grantees governing body. This will likely require a vote at a meeting of the governing body. A vote may take place any time prior to execution of the Grant Agreement.
2. Once the Grant Agreement has been received from NHDES, someone other than the AR (who can certify actions taken at the referenced meeting) completes and signs the COV. The AR cannot sign the COV. The COV must be signed and notarized on the same date as, or within 30 days of, when the AR signs the Grant Agreement. The 30-day window applies to either side of the execution date.
