Dept. Environmental Services, Nashua/Litchfield Interconnection, Grants Non-Federal	\$410,190

EXPLANATION

The Nashua-Litchfield Watermain Interconnection (NLW) funding was established by Chapter 79, Laws of 2023 to make a public water supply available to public water systems and residents on private wells impacted by per- and polyfluorinated alkyl substances (PFAS) contamination in southern New Hampshire. The Bill appropriated \$9.7 million to fund water supply improvements between the towns of Nashua and Litchfield, including new drinking water transmission main between the existing Nashua Core water distribution system and the existing Litchfield water distribution system, and all ancillary projects needed, including but not limited to booster pumping stations, directional drilling under the Merrimack River, and associated design and construction permits.

NHDES approved grant funding up to \$410,190 for Pennichuck Water Works, Inc. (Pennichuck) to assess potential Merrimack River crossing locations for water main construction. This will include multiple surveys of the Merrimack River, underwater dive inspections, post data processing and a summary report, coordination of stakeholder meetings, geotechnical evaluations, environmental due diligence, preliminary design for the river and railroad crossing, and other associated eligible project costs.
