### REQUESTED ACTION

Authorize the New Hampshire Department of Energy (Department) to amend a grant to DCI, Inc. (Vendor # 155385), by extending the completion date from December 31, 2023, to June 30, 2024, effective upon Governor and Executive Council approval. The original grant was approved by the Governor and Executive Council on June 16, 2021, Item #84 and amended on September 21, 2022, Item #5C. Under the grant, funds are being provided to install a new wood residue-fueled steam boiler plant which will provide 100% of DCI's thermal energy needs in the form of process heat to kilns for drying lumber and firewood, and space heating to its plant located in Lisbon, New Hampshire. No additional funding is involved in this time extension. **100% Other Funds (Renewable Energy Fund)**

### EXPLANATION

With the grant funds, DCI, Inc. will work with biomass energy system engineers, Wilson Engineering Services, in the design of the wood residue-fueled steam boiler plant that will provide 100% of DCI's thermal energy needs. DCI is a furniture manufacturer in Lisbon NH. Supply chain issues forced DCI, Inc. to change their boiler supplier, which resulted in movement to an alternate location on-site and requiring additional site preparation. Delivery of the new boiler is expected in November, followed shortly by installation and a 90-day commissioning period.

The Department therefore is requesting a six-month, no-cost extension for DCI, Inc. All other provisions of the grant remain in effect pursuant to the approved contract.

Your consideration of this request is appreciated.

Respectfully submitted,

Your consideration of this request is appreciated.

The Department therefore is requesting a twelve-month, no-cost extension for DCI, Inc. All other provisions of the grant remain in effect pursuant to the approved contract.  
With the grant funds, DCI, Inc. will work with biomass energy system engineers, Wilson Engineering Services, in the design of the wood residue-fueled steam boiler plant that will provide 100% of DCI's thermal energy needs. DCI is a furniture manufacturer in Lisbon NH. The Covid-19 pandemic had a significant impact on DCI's workforce and sales, requiring a curtailment of operations and preventing the company from being able to focus on this major renovation of their thermal system. They are now prepared to move forward with the planned system and have hired an experienced engineering firm to oversee the project.

**EXPLANATION**

Authorize the New Hampshire Department of Energy (Department) to amend a grant to DCI, Inc. (Vendor # 155185), by extending the completion date from December 31, 2022, to December 31, 2023, effective upon Governor and Executive Council approval. The original grant was approved by the Governor and Executive Council on June 16, 2021, item #84. Under the grant, funds are being provided to install a new wood residue-fueled steam boiler plant which will provide 100% of DCI's thermal energy needs in the form of process heat to kilns for drying lumber and firewood, and space heating to its plant located in Lisbon, New Hampshire. His Excellency and Honorable Councilors:

**REQUESTED ACTION**

Authorize the New Hampshire Public Utilities Commission (Commission) to award grant funds in the amount of \$500,000 to DCI, Inc., vendor number 155385, to install a new wood residue-fueled steam boiler plant which will provide 100% of DCI's thermal energy needs in the form of process heat to kilns for drying lumber and firewood, and space heating to its plant, from Governor and Council approval through December 31, 2022. Funding is 100% Renewable Energy Fund (REF), a non-lapsing special fund established pursuant to RSA 362-F:10.

**EXPLANATION**

Pursuant to RSA 362-F:10, the Commission is charged with administering the Renewable Energy Fund (REF), the purpose of which is to support thermal and electrical renewable energy initiatives. On January 8, 2021, the Commission issued a Request for Proposals (RFP) #2021-001 pursuant to RSA 362-F:10, X. That statute requires the Commission to issue, on an annual basis, an RFP for renewable energy projects in the nonresidential sector funded by grants from the REF.

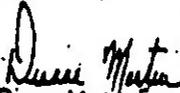

The Commission received six (6) proposals requesting a total of \$2.053 million in funds in response to the RFP. The DCI, Inc. project and three (3) other proposals have been selected to receive a total of \$1,163,000 in this funding round. Attachment 1 provides additional information on the grant review and award process, and Attachment 2 provides a summary of all grant awards.

With these funds, DCI, Inc. will install a new wood residue-fueled steam boiler plant which will provide 100% of DCI's thermal energy needs in the form of process heat to kilns for drying lumber and firewood, and space heating to its plant. The steam boiler plant is expected to yield approximately 8,580 New Hampshire Class I Thermal RECs annually. The project's technical specifications are described in Attachment 3.

The grant is contingent on sufficient REF funds being available upon the effective date of the grant agreement. The funds have been allocated for this contract, and are being held in the fund. In the event that the REF funds are insufficient or are no longer available, General Funds will not be requested to support this program.

I am available to answer any questions you may have. Thank you very much for your consideration.

Respectfully submitted,

  
Diane Martin, Esq.  
Chairwoman

## ATTACHMENT 1 - NONRESIDENTIAL COMPETITIVE GRANT REVIEW PROCESS

The Public Utilities Commission (PUC) issued a Request for Proposals (RFP) on January 8, 2021 for renewable energy projects in the nonresidential sector which would be eligible to generate Class I, Class I Thermal, or Class IV renewable energy certificates (RECs). The RFP was generally similar to that issued in the prior year. The RFP required that the project create certain classes of RECs, which would be available for use by electricity providers for compliance with the renewable portfolio standard requirements in New Hampshire. Pursuant to RSA 362-F:10, the RFP is funded with monies from the Renewable Energy Fund and issued on an annual basis.

The RFP was widely circulated electronically to members of the Energy Efficiency and Sustainable Energy Board (ESEE Board), regular attendees at ESEE Board meetings, additional stakeholders known to have an interest in energy policy and programs, and Clean Energy NH. The RFP was posted on the PUC website for the full submission period, and was advertised in the New Hampshire Union Leader on January 11 - 13, 2021. All responses were due by February 12, 2021. The Commission received six (6) proposals requesting a total of \$2.053 million in grant funds for projects with combined estimated total project costs of \$20.858 million.

The PUC employed a two-tier grant review process to evaluate the proposals. The initial review team consisted of members of the PUC, the Department of Environmental Services, and the Office of Strategic Initiatives. The second review team consisted of the PUC Commissioners.

The initial review team scored the six (6) proposals using the scoring criteria set forth in the RFP and those requirements set forth in N.H. Code of Administrative Rules Puc 2308.02 (b) and (c). Based on proposal scores and the program budget, the initial review team provided a recommendation to the Commission.

The Commissioners were provided with project scores, project descriptions, and recommendations for funding. The Commissioners approved grant funding for four (4) renewable energy projects in the total amount of \$1,163,000.

**Facts and Figures**

---

DCI, Inc. will install a new wood residue-fueled steam boiler plant which will provide 100% of DCI's thermal energy needs in the form of process heat to kilns for drying lumber and firewood, and space heating to its plant. Surplus heat will drive an existing backpressure steam generator to provide approximately 30% of DCI's electric load. An electrostatic precipitator will reduce emissions and enable the generator to certify for New Hampshire Class I Thermal RECs. The steam boiler plant is expected to yield approximately 8,580 New Hampshire Class I Thermal RECs annually.

**Facility Size:** Biomass Boiler 3 MW (300 hp)

**Grant Cost Effectiveness<sup>1</sup>:** \$5.83/REC (over 10 years)

**Funding Analysis:**

<b>Total Project Cost:</b>	\$2,863,000
<b>Leveraged Funds:</b>	\$2,363,000 (including \$250,000 USDA REAP Grant)
<b>Grant Amount:</b>	\$500,000

**Financial and Environmental Benefits:**

<b>Energy Generation:</b>	29,275 MMBtu/year (Displacing ~381,200 gallons of propane and ~850,000 kWh of electricity).
<b>Generation Value<sup>2</sup>:</b>	\$226,083/year REC sales; plus potential fuel cost savings
<b>20-Year LCOE<sup>3</sup>:</b>	\$0.135/kWh
<b>Life Expectancy:</b>	30 years
<b>CO<sub>2</sub> Avoided:</b>	2,358 tons/year

**Renewable Portfolio Standard RSA 362-F:1 Criteria:**

- Generates 8,580 Class I Thermal renewable energy certificates (RECs) per year
- Supports fuel diversity
- Provides energy savings to DCI, Inc.
- Reduces the amount of greenhouse gases, nitrogen oxides and particulate matter emissions compared to fuel oil; thereby improving air quality and public health

<sup>1</sup> The PUC used a metric defined as the requested grant amount divided by the total number of RECs over ten (10) years of operation as a key criteria in evaluating and choosing grantees.

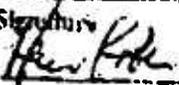

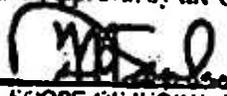

<sup>2</sup> Generation value is based on the Alternative Compliance Payment (ACP) value for the project's estimated annual REC generation. The ACP rate for Class I Thermal is \$26.35/MWh in 2021; therefore, 8,580 RECs/year is equivalent to \$226,083 in Generation Value.

<sup>3</sup> Simple Levelized Cost of Energy (LCOE) calculated using NREL's calculator at [http://www.nrel.gov/analysis/tech\\_lcoe.html](http://www.nrel.gov/analysis/tech_lcoe.html) using assumptions provided by the applicant.

The State of New Hampshire and the Grantee hereby mutually agree as follows:

Specifically, the Grantee agrees to:

1. Install and operate a wood residue-fueled steam boiler heating plant at DCI to provide thermal energy in the form of process heat to kilns for drying lumber and firewood, and space heating in its plant as described in Grantee's Proposal in response to Commission RFP #2021-001, Grants for Renewable Energy Generation Projects in the Nonresidential Sector submitted on February 12, 2021 (the Proposal), including, but not limited to, the installation of the wood residue-fueled steam boiler and all necessary electrical and mechanical upgrades to the facility (Project). The description of Project work set forth in the Proposal is incorporated herein by reference, provided that the State in its sole discretion may approve functionally equivalent substitutions for any equipment, materials, methods, or means associated with said described Project work. The Project scope reimbursable with grant funds hereunder includes all materials and labor required to complete the Project, including that of outside contractors, subcontractors, consultants, engineers, and other members of the Project team.
2. Maintain all components of the Project as recommended by its manufacturer and/or engineering specifications.
3. Provide the Commission with reports and status updates as specified in the "Deliverables" section.
4. Submit a complete New Hampshire Class I Thermal Renewable Energy Source Eligibility application in the Commission for the certification of the output of the Project to produce New Hampshire Class I Thermal renewable energy certificates (RECs).
5. Market the Project RECs to electricity providers in New Hampshire for compliance with the state's renewable portfolio standard law, RSA 362-F.
6. Acknowledge the Renewable Energy Fund as a source of funds used for the Project in any literature, press release, or public discussion of the Project.

Notwithstanding the foregoing, if any provision contained in any portion of the Proposal incorporated by reference in paragraph 1 above is contrary to or inconsistent with the terms and conditions of this grant agreement and all exhibits and attachments, then the terms and conditions of this grant agreement and all exhibits and attachments shall control and shall supersede any and all such contrary or inconsistent provisions of the Proposal.

The Grantee acknowledges and agrees that this Agreement was entered into following the coronavirus disease 2019 (COVID-19) outbreak. The Grantee agrees that to the extent the COVID-19 outbreak, or any federal, state or local orders, regulations, rules, restrictions, or emergency declarations relating to COVID-19, disrupt, delay, or otherwise impact the Scope of Services to be performed by the Grantee as set forth in EXHIBIT B of this Agreement, any such disruption, delay, or other impact was foreseeable at the time this Agreement was entered into by the Parties and does not excuse the Grantee's performance under this Agreement.
