REQUESTED ACTION

Authorize the Department of Environmental Services to award a **SOLE SOURCE** grant to the Gundalow Company (VC #159463-B001), Portsmouth, NH, in the amount of \$25,000 to conduct an on-board environmental education series at locations in the Seacoast region, effective upon Governor and Council approval through December 31, 2025. 100% Federal Funds.

Funding is available in the following account:

Dept. Environmental Services, Coastal Zone Management, Grants – Federal	\$25,000

EXPLANATION

NHDES requests approval of this **SOLE SOURCE** grant agreement to the Gundalow Company to conduct an on-board environmental education series at locations in the Seacoast region. This agreement is **SOLE SOURCE** because the nonprofit Gundalow Company is the only organization in coastal New Hampshire that offers environmental education programs onboard a historic “floating classroom” and whose mission is to protect the Piscataqua River watershed’s maritime heritage and environment. The purpose of this agreement is to enable the Gundalow Company to schedule and conduct a series of onboard coastal and marine educational programs while under sail on New Hampshire’s tidal rivers. The Gundalow Company operates a replica of the flat-bottomed gundalows of the 18th and early-19th century used to haul freight throughout the Piscataqua River and Great Bay tidal region of New Hampshire. The Gundalow Company uses the vessel for programs that target school groups, residents of the Piscataqua River’s watershed, and the public to connect New Hampshire history with contemporary coastal issues such as water quality, habitat restoration, conservation, and stewardship.

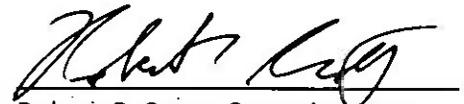

As part of its grant application to the National Oceanic and Atmospheric Administration (NOAA), the NHDES Coastal Program submits an annual work program, which is reviewed and approved by NOAA. This year’s annual work program includes a task for environmental and maritime heritage education and outreach. This agreement will provide grant funds to the Gundalow Company for educational programs designed to increase environmental literacy and public awareness of key environmental indicators affecting the water quality of the Great Bay Estuary as well as New Hampshire history while under sail

onboard the Coast Guard certified replica gundalow the *Piscataqua*. Additionally, the Gundalow Company will highlight current local coastal management and conservation efforts through its Contemporary Coastal Issues speaker events with topics such as marine debris collection, river landscaping best management practices, invasive species, and oyster habitat restoration.

Total project costs are budgeted at \$525,500. NHDES will provide \$25,000 of the project costs through its Coastal Zone federal grant. The Gundalow Company will provide \$500,500 in matching funds. A budget breakdown is provided in Attachment A. In the event that federal funds become no longer available, general funds will not be requested to support this project.

This agreement has been approved by the Office of the Attorney General as to form, execution and content.

We respectfully request your approval of this item.

Robert R. Scott, Commissioner

Exhibit B
Scope of Services

The goal this project is to conduct educational outreach programs to increase environmental literacy and public awareness of New Hampshire's coastal environments. The Gundalow Company will perform the following tasks in support of this goal:

Activity 1: The Gundalow Company will implement place-based educational outreach programs for school groups, youth groups, local residents, and the public that are designed to increase environmental literacy and public awareness of key environmental indicators affecting the water quality of the Great Bay Estuary. Gundalow Company staff will plan, schedule, publicize, teach and evaluate programs for school and youth groups while under sail onboard the Coast Guard certified replica gundalow PISCATAQUA on approximately 100 trips. Our River Rats Camp programs will also be offered five mornings a week June-August. In addition, approximately 350 public sails will be offered during the season between June 1-Oct 31. Gundalow Company staff will ensure that all onboard outreach programs are evaluated by participants. The evaluation process will measure levels of environmental and estuarine literacy among students and adults before and after participation in a program.

Activity 1.2: Gundalow Company staff will implement place-based pre-sail activities to prepare for a school visit. The activities will introduce teachers and students to the experience that the students will have onboard and will also create an opportunity to tailor the experience when on board the Piscataqua, and to share ideas about classroom activities that can be included throughout the year to reinforce the lessons learned on the Piscataqua. The pre-sail activities will be closely aligned with the National Oceanic and Atmospheric Administration's (NOAA) principles Meaningful Watershed Education Experiences, Environmental Literacy (NAAEE) and Estuarine Literacy (NERRS) and "no child left inside," as well as the management plan devised by Piscataqua Region Estuaries Partnership (PREP).

Activity 2: Gundalow Company staff will coordinate Contemporary Coastal Issues events onboard PISCATAQUA or at shore locations. The programs will highlight current local research and management/conservation efforts and provide information to motivate citizens to become informed and responsible stewards of the watershed. The Gundalow Company will deliver these place-based programs onboard the Coast Guard certified replica gundalow PISCATAQUA while under sail on the tidal rivers of New Hampshire or at public spaces such as the Gundalow Company office, Sheafe Warehouse, local Seacoast establishments, or public libraries. Topics may include marine debris collection, river landscaping BMP's, climate change and invasive species, oyster habitat restoration, etc. Participants will be encouraged to consider their role as local river stewards.

Activity 3: Gundalow Company staff will support the planning and begin to develop a Workforce Development Program. The Workforce Development Program (WDP) could include working with local high schools to gauge interest in internship programs to learn about coastal resilience and careers paths, along with hands on experience. This funding will enable a locally

relevant program to develop through formal and informal partnerships.
