GEORGE N. COPADIS, COMMISSIONER
 RICHARD J. LAVERS, DEPUTY COMMISSIONER

February 5, 2025

Her Excellency, Governor Kelly A. Ayotte
 and the Honorable Council
 State House
 Concord, NH 03301

REQUESTED ACTION

To authorize New Hampshire Employment Security ("NHES" or "Department"), in conjunction with the Department of Information Technology, to enter into a cooperative project agreement with TRN Digital, LLC, of 200 Portland Street, Boston, MA, utilizing Statewide contract 802852 under the Department of Administrative Services Statewide Master Agreement for Microsoft/Office 365/Azure Cloud Solutions in an amount not to exceed \$193,250.00, to provide a solution supported by Microsoft Power Automate that will aid in automating the business process of compiling appeals records within the Department, from the date of Governor & Council approval or March 1, 2025, whichever is later, for a period of six (6) months. 100% Federal funds.

Funds are available in the following account for Fiscal Year 2025, contingent upon the availability and continued appropriation of funds in the future operating budgets, with the authority to adjust encumbrances between fiscal years within the price limitation through the Budget Office, if needed and justified.

02-27-27-270010-80400000	DEPT OF EMPLOYMENT SECURITY	SFY 2025
038-509038	Technology, Software	\$193,250.00

EXPLANATION

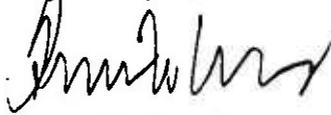

NHES is requesting approval of the contract with TRN Digital, LLC to obtain a solution that will support automation of the process of compiling thousands of records needed for unemployment insurance benefit appeals. Automation of this process is expected to streamline the appeal process through the elimination of time-consuming manual tasks.

The NHES Appeals Unit alone had over 3,200 first level appeals for which records had to be generated in 2024. Each record currently requires a three-level manual process to compile. The solution contemplated by this contract would automate the process of compiling records from multiple locations within the NH Unemployment Insurance System ("NHUIS"), categorize the records and make them available as completed work product to multiple individuals within the Department.

The project will utilize several "bots" to compile and create completed records for appeals and store them in a secure location on the system which can be accessed by authorized NHES staff and outside parties to the appeal. The bots will also update appeal records with newly provided information up to the date of the hearing. This will replace the current manual process which involves physically printing appeal records, creating paper files, and sending copies to staff and parties to the appeal. In addition to the first level appeals, the automated process will be used for second level appeals under RSA 282-A:60, and third level appeals to the NHES Appellate Board.

Bringing automation to the process of compiling and maintaining records will not only eliminate several time-consuming steps and create efficiencies, but it will also serve the needs of claimants and employers who will benefit by having access to electronic records. The cost of the project will be more than covered in the savings of hundreds of hours of manual work, which time is better spent serving the Department's customers.

Respectfully submitted,

George N. Copadis,
Commissioner

Commissioner

December 13, 2024

George N. Copadis, Commissioner
New Hampshire Employment Security
State of New Hampshire
45 S. Fruit Street
Concord, NH 03301

Dear Commissioner Copadis:

This letter represents formal notification that the Department of Information Technology (DoIT) has approved your agency's request to enter into a contract with TrnDigital, as described below and referenced as DoIT No. 2025-005.

The purpose of this request is to provide a solution aimed at automating the process of compiling appeals records, from multiple locations, categorize them and make them accessible to authorized individuals within the unemployment insurance system.

The Total Price Limitation shall be \$193,250, effective upon Governor and Council approval for a six-month period.

A copy of this letter must accompany New Hampshire Employment Security's submission to the Governor and Executive Council for approval.

Sincerely,

Denis Goulet

1. The State of New Hampshire engages the firm or individual ("the Vendor") to perform the services and/or sale of goods, described in the attached State Proposal and the Vendor's proposal, bid or quotation, any of which are incorporated herein by reference.

2. **COMPLIANCE BY VENDOR WITH LAWS AND REGULATIONS.** In connection with the performance of this agreement, the Vendor shall comply with all statutes, laws, regulations, and orders of federal, state, county or municipal authorities which shall impose any obligation or duty upon the Vendor, including, but not limited to civil rights and equal opportunity laws. In addition, the Vendor shall comply with all applicable copyright laws.

3. **TERM.** The contract and all obligations of the parties thereunder, shall become effective on a specified date and shall be completed in their entirety prior to a specified date. Any work undertaken by the Vendor prior to the effective date shall be at his sole risk and, in the event that the contract shall not become effective, the State shall be under no obligation to reimburse the Vendor for any such work.

4. **CONTRACT PRICE.** The contract price, a payment schedule and a maximum limitation of price shall be as specified by the proposal or bid invitation and the Vendor's response. All payments shall be conditioned upon receipt, and approval by the State, of appropriate vouchers and upon satisfactory performance by the Vendor, as determined by the State. The payment by the State of the Contract Price shall constitute complete reimbursement to the Vendor for all expenses of any nature incurred by the Vendor in the performance by the contractor and complete payment for the Services. The State shall have no other liability to the Vendor.

5. **DELIVERY.** If the Vendor fails to furnish items and/or services in accordance with all requirements, including delivery, the state may repurchase similar items from any other source without competitive process, and the original Vendor may be liable to the state for any excess costs.

If a Vendor is unable to complete delivery by the date specified, he must contact the using branch and or agency. However, the branch and or agency is not required to accept a delay to the original delivery date. All deliveries are subject to inspection and receiving procedure rules as established by the State of New Hampshire. Deliveries are not considered accepted until compliance with these rules has been established. State personnel signatures on shipping documents shall signify only the receipt of shipment.

6. **INVOICING.** All invoices must be in triplicate showing Order Number, Unit and Extension Prices and discounts allowed. A separate invoice shall be submitted for each order. Unless otherwise noted on the proposal or purchase order, payment will not be due until thirty(30) days after all services have been completed, or all items have been delivered, inspected and accepted or the invoice has been received, whichever is later.

7. **PERSONNEL.**

7.1. The Vendor shall disclose in writing the names of all owners (5% or more), directors, officers, employees, agents or subcontractors who are also officials or employees of the State of New Hampshire. Any change in this information shall be reported in writing within fifteen (15) days of their occurrence.

7.2. The person signing this agreement on behalf of the State, or his or her delegee ("Contracting Officer") shall be the State's representative for purposes of this agreement. In the event of any dispute concerning the interpretation of this agreement, the Contracting Officer's decision shall be final.

8. **EVENT OF DEFAULT; REMEDIES.**

8.1. Any one or more of the following acts or omissions of the Vendor shall constitute an event of default hereunder ("Events of Default").

- 8.1.1. failure to deliver the goods or services satisfactorily or on schedule; or
- 8.1.2. failure to submit any report required hereunder; or
- 8.1.3. failure to perform any of the other covenants and conditions of this agreement.

8.2. Upon the occurrence of any Event of Default, the State may take any one, or more, or all, of the following actions:

8.2.1. give the Vendor a written notice specifying the Event of Default and requiring it to be remedied within, in the absence of a greater or lesser specification of time, thirty(30) days from the date of the notice; and if the Event of Default is not timely remedied, terminate this agreement, effective two (2) days after giving the Vendor notice of termination; and

8.2.2. give the Vendor a written notice specifying the Event of Default and suspending all payments to be made under this agreement and ordering that the portion of the Contract Price, which would otherwise accrue to the Vendor during the period from the date of such notice until such time as the State determines that the Vendor has cured the Event of Default, shall never be paid to the Vendor; and

8.2.3. set off against any other obligation the State may owe to the Vendor any damages the State suffers by reason of any Event of Default; and

8.2.4. treat the agreement as breached and pursue any of its remedies at law or in equity, or both.

9. **WAIVER OF BREACH.** No failure by the State to enforce any provisions hereof after any Event of Default shall be deemed a waiver of its rights with regard to that Event, or any subsequent Event. No express failure of any Event of Default shall be deemed a waiver of any provision hereof. No such failure or waiver shall be deemed a waiver of the right of the State to enforce each and all of the provisions hereof regarding any further or other default on the part of the Vendor.

10. **VENDOR'S RELATION TO THE STATE.** In the performance of this agreement the Vendor is in all respects an independent contractor, and is neither an agent nor an employee of the State. Neither the Vendor nor any of its officers, employees, agents or members shall have authority to bind the State nor are they entitled to any of the benefits, workmen's compensation or emoluments provided by the State to its employees.

11. **ASSIGNMENT AND SUBCONTRACTS.** The Vendor shall not assign, or otherwise transfer any interest in this agreement without the prior written consent of the State. No work required by this contract shall be subcontracted without the prior written consent of the State.

12. **INDEMNIFICATION.** The Vendor shall defend, indemnify and hold harmless the State, its officers and employees, from and against any and all losses suffered by the State, its officers and employees, and any and all claims, liabilities or penalties asserted against the state, its officers and employees, by or on behalf of any person, on account of, based on, resulting from, arising out of (or which may be claimed to arise out of) the acts or omissions of the Vendor. Notwithstanding the foregoing, nothing herein contained shall be deemed to constitute a waiver of the sovereign immunity of the State, which immunity is hereby reserved to the State. This covenant shall survive the termination of this agreement.

12.1. **PATENT PROTECTION.** The Vendor agrees to indemnify and defend the State of New Hampshire from alleged and actual patent infringements and further agrees to hold the State of New Hampshire harmless from any liability arising under RSA 382-A:2-312(3). (Uniform Commercial Code).

13. **TOXIC SUBSTANCES.** In compliance with RSA 277-A known as the Workers Right to Know Act, the Vendor shall provide Material Safety Data Sheets with the delivery of any and all products covered by said law.

14. **NOTICE.** Any notice by a party hereto to the other party shall be deemed to have been duly delivered or given at the time of mailing by certified mail, postage prepaid, in a United States Post Office addressed to the parties at the addresses given below.

15. **AMENDMENT.** This agreement may be amended, waived or discharged only by an instrument in writing signed by the parties hereto.

16. **CONSTRUCTION OF AGREEMENT AND TERMS.** This agreement shall be construed in accordance with the laws of the State of New Hampshire, and is binding upon and inures to the benefit of the parties and their respective successors and assigns.

17. **ADDITIONAL PROVISIONS.** The additional provisions (if any) have been set forth as Exhibit "A" hereto.

18. **ENTIRE AGREEMENT.** This agreement, which may be executed in a number of counterparts, each of which shall be deemed an original, constitutes the entire agreement and understanding between the parties, and supersedes all prior agreements and understandings relating hereto.

EXHIBIT A

ADDITIONAL PROVISIONS

1. TERMINATION

Section 9.1 of Form P-37, General Provisions, is amended as follows:

Either party may terminate this agreement at any time. The party requesting termination must give the other party written notice, by certified mail, to so terminate at least sixty (60) days prior to effective date of termination.

2. CONFIDENTIALITY AND CRIMINAL RECORD

Contractor and each of its employees working on NHES property will be required to sign and submit **STATEMENT OF CONFIDENTIALITY OF RECORDS FORM** and a **CRIMINAL RECORD AUTHORIZATION FORM** prior to the start of any work. There is a fee for each background check required, which must be paid by the Contractor.

3. NH CERTIFICATE OF GOOD STANDING

Contractor must provide a **CERTIFICATE OF GOOD STANDING** from the NH Secretary of State.

4. CERTIFICATION REGARDING DEBARMENT, SUSPENSION AND OTHER RESPONSIBILITY MATTERS IN PRIMARY COVERED TRANSACTIONS

Contractor certifies that the primary participant, and its principals, to the best of its knowledge and belief, are not presently debarred, suspended, proposed for debarment, declared ineligible or voluntarily excluded from covered transactions by any Federal department or State agency. Contractor will inform NH Employment Security of any changes in the status regarding this statement.

5. DAVIS-BACON ACT (if applicable)

Davis-Bacon Act and Related Acts, apply to contractors and subcontractors performing on federally funded/assisted contracts in excess of \$2,000 for construction, alteration, or repair (including painting and decorating) of public buildings or public works. Under these Acts, contractors and sub-contractors must pay laborers and mechanics prevailing wages and fringe benefits for corresponding work on similar projects in the area as determined by the Department of Labor. When there is no Davis-Bacon assignment, applicable Wage Determination is realized by using the lowest skilled craft above laborer, excluding power equipment rate.

STATE OF NEW HAMPSHIRE

PURCHASE ORDER 1103670

6. AMERICANS WITH DISABILITIES ACT

The undersigned Contractor agrees to comply with all Federal, State and Local ADA rules and regulations.

7. DAMAGE (if applicable)

Contractor will agree that any damage to building(s), materials, equipment and/or other property during the performance of service will be repaired at Contractor's expense. Contractor agrees to return all building(s), materials, equipment and/or property to its original or better condition and with acceptance by a representative of NHES. Contractor agrees to obtain approval of NHES representative assigned to project for any sub-contractor performing such repair work.

8. PAYMENT BOND/MILLER ACT (if applicable)

Contractor agrees to comply with The Miller Act bond requirement and NH RSA 447:16. A payment bond, with surety satisfactory for protection of all persons supplying labor and materials in carrying out construction, alteration, or repair work provided for in the contract may be required. Amount of payment bond will equal total amount payable by terms of contract unless officer awarding contract determines, in writing, that a payment bond in that amount is impractical, in which case contracting officer will set amount of payment bond. Amount of bond will not be less than total amount of contract. A Payment Bond is required for contracts \$30,000 or greater. A Performance Bond is required for contracts totaling \$100,000 or greater.

9. NON-DISCRIMINATION

In connection with the furnishing of services under the Contract, the Contractor agrees to comply with all laws, regulations, and orders of federal, state, county or municipal authority which impose any obligations or duties upon the Contractor, including but not limited to civil rights laws, non-discrimination laws and equal opportunity laws. During the term of the Contract, Contractor shall not discriminate against any employee or applicant for employment because of race, color, religion, creed, age, sex, sexual orientation, disability, national origin, marital status or veteran status, and will take appropriate steps to prevent such discrimination.

10. VENDOR APPLICATION/ALTERNATE W-9

In connection with this Contract, the Contractor shall have completed and filed a Vendor Application and Alternate W-9 Form with the New Hampshire Bureau of Purchase and Property.

11. CONTRACT WORK HOURS AND SAFETY STANDARDS ACT (if applicable)

For contracts in excess of \$100,000 that involve the employment of mechanics or laborers, the Contractor agrees to comply with 40 U.S.C. 3702 and 3704, as supplemented by Department of

Contractor Initials 
Date 2/4/2025

PURCHASE ORDER 1103670

Labor regulations (29 CFR Part 5). Under 40 U.S.C. 3702 of the Act, the Contractor is required to compute the wages of every mechanic and laborer on the basis of a standard work week of 40 hours. Work in excess of the standard work week is permissible provided that the worker is compensated at a rate of not less than one and a half times the basic rate of pay for all hours worked in excess of 40 hours in the work week. The requirements of 40 U.S.C. 3704 are applicable to construction work and provide that no laborer or mechanic must be required to work in surroundings or under working conditions which are unsanitary, hazardous or dangerous.

12. RIGHTS TO INVENTIONS MADE UNDER A CONTRACT OR AGREEMENT (if applicable)

Contractor agrees to comply with the requirements of 37 CFR Part 401, "Rights to Inventions Made by Nonprofit Organizations and Small Business Firms Under Government Grants, Contracts and Cooperative Agreements," and any implementing regulations issued by the awarding agency.

13. CLEAN AIR ACT AND THE FEDERAL WATER POLLUTION CONTROL ACT (if applicable)

For contracts in excess of \$150,000, the Contractor agrees to comply with all applicable standards, orders or regulations issued pursuant to the Clean Air Act (42 U.S.C. 7401-7671q) and the Federal Water Pollution Control Act as amended (33 U.S.C. 1251-1387). Violations must be reported to the Federal awarding agency and the Regional Office of the Environmental Protection Agency (EPA).

14. BYRD ANTI-LOBBYING AMENDMENT (if applicable)

For contracts in excess of \$100,000, the Contractor certifies it will not and has not used Federal appropriated funds to pay any person or organization for influencing or attempting to influence an officer or employee of any agency, a member of Congress, officer or employee of Congress, or an employee of a member of Congress in connection with obtaining any Federal contract, grant or any other award covered by 31 U.S.C. 1352. Contractor must also disclose any lobbying with non-Federal funds that takes place in connection with obtaining any Federal award/contract.

15. NEVER CONTRACT WITH THE ENEMY

Pursuant to 2 CFR 183.300, none of the funds received under contract with NHES shall be provided directly or indirectly to a person or entity who is actively opposing the United States or coalition forces involved in a contingency operation in which members of the Armed Forces are actively engaged in hostilities.

16. PROHIBITION ON CERTAIN TELECOMMUNICATIONS AND VIDEO SURVEILLANCE SERVICES AND EQUIPMENT

Pursuant to 2 CFR 200.216, none of the funds received under contract with NHES shall be used to procure or obtain equipment, services, or systems that use(s) covered telecommunications equipment or services as a substantial or essential component of any system, or as critical technology as part of any system. As described in Public Law 115-232, section 889, covered telecommunications equipment is telecommunication equipment produced by Huawei Technologies Company or ZTE Corporation (or any subsidiary or affiliate of such entities).

17. STEVENS AMENDMENT

This contract with NHES may be supported in part or in whole by the Employment and Training Administration (ETA) of the United States Department of Labor (USDOL) as part of awards received.

1. Executive Summary

1.1. Overview of Proposal

TrnDigital is pleased to propose a solution to New Hampshire Employment Security (NHES) for automating their appeals record compilation process based on Microsoft Power Automate.

To ensure compliance with the evaluation criteria mentioned in the RFQ we have accommodated corresponding sections in this RFQ response document. Please refer to the below table that identifies corresponding sections to the RFQ criteria.

#	RFQ Evaluation Criteria	Corresponding section in this response document
1.	Ability to meet "Statement of Work and Milestones"	Section 1.2 <u>Key Differentiators</u> Section 2.3 <u>Our Enterprise Automation COE</u> Section 3. <u>Understanding of Requirements</u>
2.	Ability to meet "Key Staff Required with Subject Matter Expertise"	Section 2.2 <u>Relevant Experience and Expertise</u> Section 5. <u>Project Team</u> Section 7. <u>Case studies</u>
3.	Clarity of Work plan and timeline for implementation of the solution	Section 4. <u>Proposed Solution</u>
4.	Vendor response to Deliverables and Requirement	Section 3.2 <u>Alignment with NHES's Goals and Objectives</u> Section 4. <u>Proposed Solution</u>
5.	Total Cost	Section 6. <u>Commercials</u>

Our solution focuses on improving the efficiency and accuracy of the appeals record compilation process, transitioning to 100% electronic appeal records, and automating the dissemination of appeal exhibits to interested parties. By leveraging the capabilities of Microsoft Power Platform suite of products, we aim to significantly reduce manual effort and time spent on repetitive tasks, ensuring compliance with legal and regulatory standards. Our approach includes storing categorized records in a centralized database accessible to authorized individuals and providing real-time updates on the status of appeals. This comprehensive solution will streamline operations, enhance productivity, and ensure that NHES remains at the forefront of technological modernization in appeals management.

1.2. Key Differentiators

Specialized Expertise

- ✓ **Early adopter of Power Platform COE:** Since 2018
- ✓ **Clients served:** 100+ organizations
- ✓ **Business users trained:** 1,000+ users trained
- ✓ **Applications developed & Support:** 2000+
- ✓ **Repeat engagements with clients:** 90% of clients engage in multiple projects or long-term partnerships

New Hampshire Experience

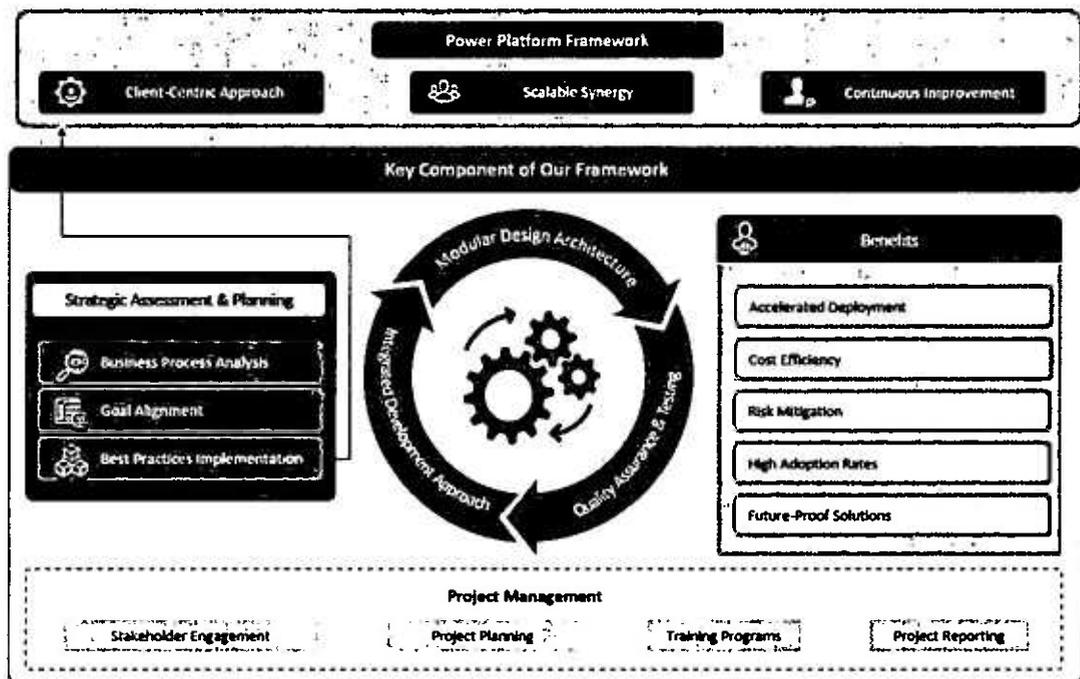

- ✓ Successfully implemented solutions at State of New Hampshire
- ✓ We know the stakeholders
- ✓ We know the environment
- ✓ We know the work quality expected
- ✓ We understand your requirement

- a) **Leveraging our existing engagement with DHHS:** TrnDigital is an empaneled vendor of the State of New Hampshire for **Microsoft 365/Azure Cloud Solutions Professional Services**. We successfully implemented a Microsoft SharePoint solution for DHHS which helped them with improved collaboration, communication, and streamlined business systems access throughout the organization. Having been actively engaged with DHHS we understand the organization and its people very well and we also understand the quality of work expected from us as a service provider.

We have extensive experience in setting up Power Platform Development and Test environments, as well as defining the change management process for Power Apps deployments at the Department of Health and Human Services (DHHS). Our involvement included facilitating communications and assisting the business team with User Acceptance Testing (UAT). Additionally, we are well-versed in the Data Governance policies established by the Department of Information Technology (DOIT).

- b) **Early Adoption and Expertise:** TrnDigital was an early adopter of the Power Platform Suite since its launch in **2018**. Since its inception, we have **successfully executed multiple Power Platform clients** including SMB's and Enterprise organizations across the US and developed and supported over **2000+** apps. We also successfully set up the **Power Platform Center of Excellence (COE)** for **2 large organizations** in the US, one a Data Center company and the other a Biotech giant. We have developed numerous applications and automated various business processes using Power Apps, Power Automate, Power BI, and Power Virtual Agents. This extensive experience ensures that TrnDigital has a deep understanding of the platform's capabilities and can leverage them effectively for NHES' needs.

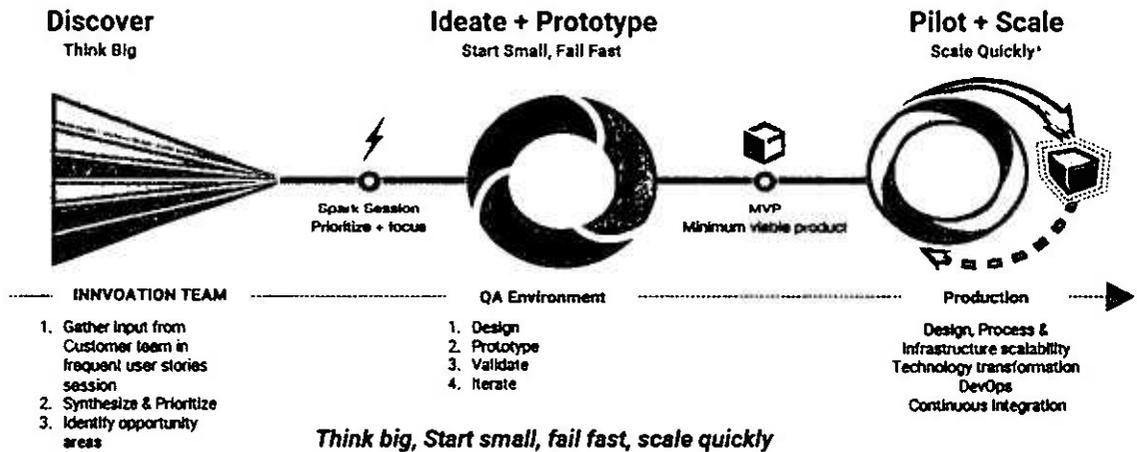

- c) **Comprehensive Service Offerings:** TrnDigital provides a one-stop shop set of offerings around the Power Platform. Our services cover consultancy, training, solution build, legacy migration, and platform development. This comprehensive approach ensures that all aspects of the project are covered, from initial consultation to final implementation and beyond.
- d) **Successful Implementations:** TrnDigital has a proven history of successfully serving over 100 Power Platform clients. Our distinctive edge lies in our **proprietary Power Platform Framework**, which has been instrumental in optimizing processes, reducing manual effort, and accelerating development. This framework is the cornerstone of our ability to deliver efficient, high-impact solutions. We have engaged with and **trained more than 1000 users** on Power Platform and have enabled an equal number of citizen developers to effectively utilize the platform. We were instrumental in developing specialized applications for a large Data Center organization for their design review process and cloud alliance sales process. This history of success demonstrates our ability to deliver high-quality solutions that meet customer requirements.

- e) **User Centricity and Implementation Approach:** TrnDigital places a strong focus on **User Experience** and **Citizen Developers** while implementing Power Platform projects. We empower business users to build solutions by providing operational readiness support and ensuring best practice adoption to scale. To support and inspire Citizen Developers, TrnDigital shares the art of the possible, drives reusability, and provides lifecycle support.

While we do possess expertise in Power Platform implementations using the water fall method, as required for this project, we are also adept at deploying the Agile and Iterative approach to Power Platform implementation, which emphasizes flexibility, continuous improvement, and user-centric design

Using a human-centered **Design Thinking** approach, a managed innovation methodology for ideation, solution creation, and prototyping to rapidly move from idea to working prototype to implementation and scale.

- f) **Focus on Business Benefits:** The biggest advantages of the Power Platform for businesses include accelerating app development, streamlining workflows, data visualization and analytics, improving customer engagement, empowering data-driven decisions, driving operational efficiency, and fostering employee productivity. These benefits align closely with the goals of enhancing the appeals record compilation process.
- g) **Innovation and Continuous Improvement:** TrnDigital is committed to continuous improvement and innovation. We regularly update our offerings and stay abreast of the latest developments in the Power Platform ecosystem. This ensures that our solutions are always innovative and optimized for performance.
- h) **Microsoft Relationship:** Through our partnership with Microsoft, TrnDigital has been assigned a dedicated Account Manager to manage any client issues that fall outside our service scope. Additionally, as a Microsoft Premier Support Partner, our clients have access to Microsoft's highest level of support for their products, services, and platforms.

2. About TrnDigital

2.1. Overview

TrnDigital is an empaneled vendor with the State of New Hampshire for Microsoft 365 and Azure Cloud Professional Services. We are a leading IT service provider with a strong emphasis on Microsoft technologies. We have been recognized as the Microsoft Partner of the Year 2023, outshining over 4,000 global competitors.

Charter Partner of the Microsoft Content Services Partner Program

Microsoft Solutions Partner Security

Microsoft Solutions Partner Modern Work

Microsoft Solutions Partner Digital & App Innovation Azure

Microsoft Solutions Partner Data & AI Azure

We possess extensive experience with Microsoft's Power Platform suite of products, including Power Automate, Power Apps, Power BI, Power Virtual Agents, and Power Pages. We provide end-to-end services, from consultancy and training to solution build, legacy migration, and platform development.

Microsoft

2023 Microsoft Partner of the Year

Finalist

Microsoft is proud to recognize

TRNDIGITAL
Compliance Award

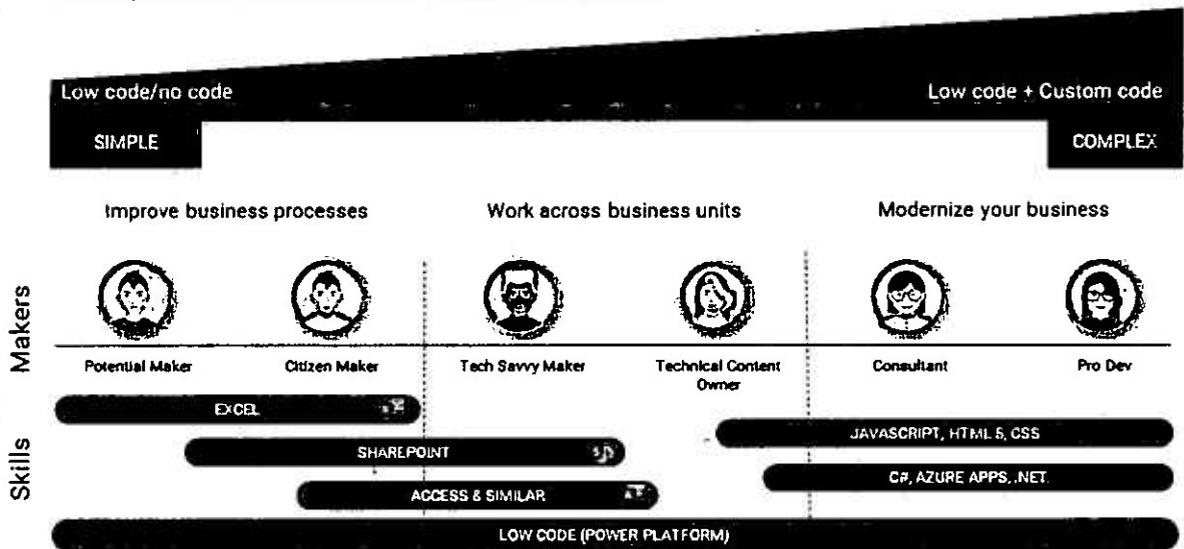

With gratitude,

Michelle Dupon
Chief Partner Officer and Corporate Vice President
Global Partner Solutions
Microsoft Corporation

TrnDigital was identified as one of the top 2 finalists from a total of 4000 entries for the 2023 Microsoft Partner of The Year Award

Our approach to implementing low code/no code solutions entails an overarching approach involving the right stakeholders across your organization.

Accelerate innovation with Low Code

© 2024 TrnDigital

Confidential

TrnDigital is dedicated to delivering high-quality solutions that enhance

efficiency, reduce manual effort, and ensure compliance with legal and regulatory standards. Our expertise in the Power Platform and other Microsoft technologies enables us to provide comprehensive and innovative solutions to meet our clients' needs.

2.2. Relevant Experience and Expertise

TrnDigital has extensive experience in delivering innovative solutions using Microsoft Power Platform Suite, which includes Power Automate, Power Apps, and Power BI. Our team of experts is adept at leveraging these tools to streamline business processes, enhance productivity, and drive digital transformation for our clients.

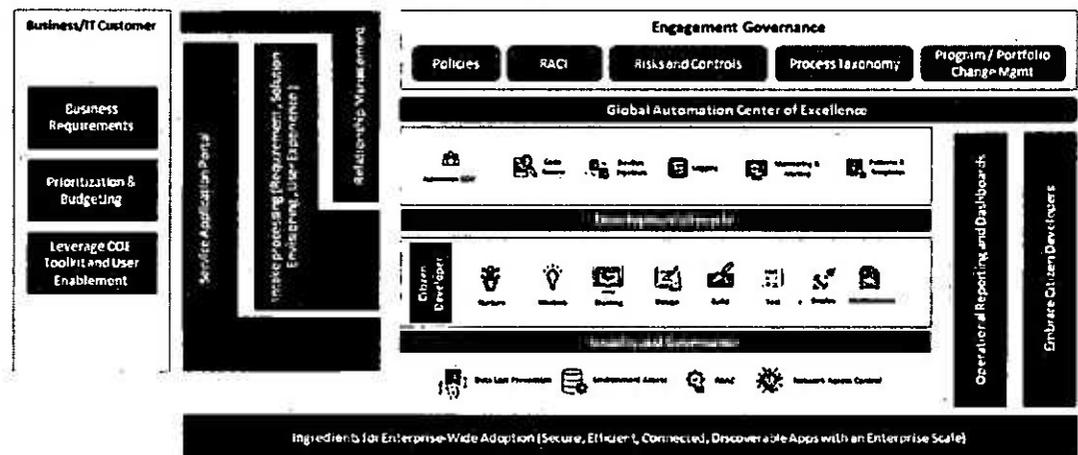

We have successfully implemented numerous Power Platform projects across various industries, demonstrating our ability to tailor solutions to meet the unique needs of each client. Our expertise includes developing custom Power Apps to automate workflows, creating Power Automate flows to integrate disparate systems, and utilizing Power BI to provide actionable insights through data visualization.

Our approach is centered around understanding our clients' business objectives and delivering solutions that are not only technically sound but also aligned with their strategic goals. We emphasize user adoption and change management to ensure that the solutions we implement are embraced by end-users and deliver long-term value.

TrnDigital's commitment to excellence is reflected in our recognition as a Finalist at the Microsoft Partner of the Year 2023. Our team stays abreast of the latest advancements in the Power Platform, ensuring that our clients benefit from innovative solutions that drive efficiency and innovation.

2.3. Our Enterprise Automation Center of Excellence (COE) Model.

Enterprise Automation COE – Reference Model

© 2024 TrnDigital

Confidential

With an aim to effectively implement Automation Projects based on solutions like Microsoft power Platform, TrnDigital has designed its own Enterprise Automation Reference Model based on its years of experience on Power Platform projects.

The Enterprise Automation Center of Excellence (COE) serves as the central hub for driving and sustaining automation initiatives across the organization. Its primary goal is to streamline operations, enhance efficiency, and foster a culture of continuous improvement through the strategic application of automation technologies. The COE operates as a strategic partner to business units, offering expertise, governance, and support to ensure the successful implementation and scaling of automation solutions.

Engagement Governance: This involves setting up a framework to manage and oversee the engagement of various stakeholders in the automation process. It ensures that all parties are aligned and working towards common goals.

Program/Portfolio Change Management: This component focuses on managing changes within the automation programs and portfolios. It ensures that any changes are systematically planned, evaluated, and implemented to minimize disruption and maximize benefits.

Policies: Establishing clear policies is crucial for guiding the automation efforts. These policies define the rules and guidelines that need to be followed to ensure consistency and compliance.

Development Lifecycle: This outlines the stages involved in developing automation solutions, from initial planning and design to implementation and maintenance. It ensures a structured approach to development.

Embrace Citizen Developers: The model encourages the involvement of citizen developers, who are non-professional developers within the organization. This helps in leveraging the skills and knowledge of a broader group of employees.

Relationship Management: Effective relationship management is essential for maintaining good communication and collaboration between different stakeholders, including business and IT customers.

Service Application Portal: This portal serves as a central hub for managing and accessing various automation services and applications. It streamlines the process of requesting and delivering automation solutions.

Process Taxonomy: This involves categorizing and organizing the various processes within the organization to ensure a clear understanding and efficient management of automation efforts.

Prioritization & Budgeting: This component focuses on prioritizing automation projects and allocating budgets accordingly. It ensures that resources are used effectively and that the most critical projects are addressed first.

Business Requirements: Clearly defining business requirements is essential for developing effective automation solutions. This involves understanding the needs and objectives of the business and translating them into technical specifications.

Leverage COE Toolkit and User Enablement: The COE toolkit provides various tools and resources to support the automation efforts. User enablement focuses on training and empowering employees to effectively use these tools.

Risks and Controls: Identifying and managing risks is crucial for the success of automation projects. This involves implementing controls to mitigate risks and ensure the security and reliability of automation solutions.

Security and Governance: Ensuring the security and governance of automation solutions is essential for protecting sensitive data and maintaining compliance with regulations.

Operational Reporting and Dashboards: This involves setting up reporting and dashboard systems to monitor the performance and impact of automation solutions. It provides insights into the effectiveness of automation efforts and helps in making informed decisions.

3. Understanding of Requirements

3.1. Analysis of RFP Requirements

Having thoroughly analyzed the RFQ we understand that New Hampshire Employment Security (NHES) is looking at implementing a comprehensive project aimed at automating the process of compiling appeals records using the Microsoft Power Platform suite of products.

The project deliverables include a list of required licenses, a detailed functional requirements document, a system design document, the actual software program, instruction, and guidance to NHES personnel, a test plan with validation reports, and user training and handover. The project milestones are set over a timeline of four and a half months, with specific durations for each phase.

The objectives of the project are to enhance the efficiency and accuracy of the appeals record compilation process, transition to 100% electronic appeal records, automate the dissemination of appeal exhibits, reduce manual effort, ensure compliance with legal and regulatory standards, and provide real-time updates to authorized individuals. The solution must interface with the Oracle database, New Hampshire Unemployment Insurance System (NHUIS), and NHUIS Appeals Modules.

3.2. Alignment with NHES's Goals and Objectives

Our approach is closely aligned with your objectives to enhance the efficiency and accuracy of the appeals record compilation process while transitioning to 100% electronic appeal records.

By leveraging Microsoft's Power Platform suite, we can effectively address each of your goals:

Enhance Efficiency and Accuracy: We will utilize Power Automate to streamline workflows and automate repetitive tasks associated with the appeals record compilation. This will significantly reduce manual effort, minimize errors, and ensure that all records are compiled accurately and efficiently.

Transition to 100% Electronic Appeal Records: Power Platform will be leveraged to digitize and manage all appeal records. This will facilitate a smooth transition to electronic records, eliminating the need for physical documentation and enabling easy access and management.

Automate Dissemination of Appeal Exhibits: Power Automate will also manage the automation of disseminating appeal exhibits to interested parties. Custom

workflows will ensure that all relevant parties receive timely updates and necessary documents without manual intervention.

Reduce Manual Effort and Time: By automating repetitive tasks and integrating data sources, Power Automate will reduce the time and manual effort required for managing appeals records, allowing your team to focus on higher-value tasks.

Ensure Compliance with Legal and Regulatory Standards: Microsoft's suite of products offers robust security and compliance features. We will configure the system to adhere to legal and regulatory standards, ensuring that all records are stored, managed, and accessed in compliance with relevant guidelines.

Centralized Record Storage: Dataverse will be used to create a centralized database for storing categorized records. This centralized approach will ensure that authorized individuals have secure and efficient access to the necessary records.

Real-Time Updates: Power BI can be employed to provide real-time updates and status tracking for appeals. Authorized individuals will be able to view the latest information and track the progress of their appeals through interactive dashboards and reports.

By integrating these Microsoft Power Platform tools, we will achieve a seamless and efficient appeals record management system that meets your objectives and exceeds your expectations.

4. Proposed Solution

4.1. Scope

- a) Conduct online working sessions with stakeholders to gather and finalize the requirements for the RPA program.
- b) Prepare a detailed functional requirements document, along with a list of required licenses.
- c) Analyze the requirements, design the solution using Microsoft's Power Platform suite of products, and create a low-level system design document.
- d) Setup a virtual machine to run the unattended RPA from. Install the Power Automate Machine Runtime App on the VM.
- e) Develop an unattended Robotic Process Automation (RPA) solution using Power Automate Desktop flow.
- f) Pull data from multiple areas within NHUIS and save the data in Dataverse tables.
- g) Create a system test cases document and conduct testing of the solution.
- h) Prepare an administrative guide explaining how to deploy and maintain the system.
- i) Conduct end-user training for 1 user.
- j) Deploy the solution for end-users to start using.

4.2. Assumptions

NHES and its vendor will be responsible for:

- a) Onboarding development team members and creating work/school accounts for them.
- b) Mapping the data points between the screens and the Dataverse.
- c) Installing Power Automate Desktop on all user machines and ensuring they have the hardware configuration required to support the solution.
- d) Providing the development team with access to all systems and infrastructure required to implement the solution.
- e) Ensuring that a Power Platform environment exists with a Microsoft Dataverse database.
- f) Ensuring that the service accounts that runs the desktop flow has access to all screens.
- g) A virtual machine with no logged-in users is recommended to run the unattended RPA. This virtual machine should be made available to the development team with local admin rights to perform configurations and setup.

- h) Requirements will be analyzed and a recommendation will be provided on the feasibility of implementing the unattended RPA.
- i) We have assumed 10 simple screens for unattended RPA solution. This number may change after the analysis phase which may have an impact on the effort estimation.

4.3. Delivery Methodology and Work Plan

Phase 1: Requirements Gathering

Objective: Gather detailed requirements for the RPA program and create a comprehensive project plan.

Activities:

1. Stakeholder Engagement:

- o **Identify Stakeholders:** List all relevant stakeholders from NHES.
- o **Conduct Interviews/Workshops:** Schedule and conduct sessions to gather requirements

2. Develop Functional Requirements Document:

- o **Define Functional Requirements:** Detail the required functionalities, data access points, and integrations.
- o **Specify Licenses:** List required licenses for NHES and provide recommendations for procurement.

3. Data Mapping and Integration Points:

- o **Data Mapping:** Collaborate on data mapping to identify key data sources and integration points within NHUIS and EDMS.
- o **Document Data Sources:** Specify the areas within NHUIS (e.g., notice of claim, wage screen) and the EDMS System.

4. Create Project Plan:

- o **Define Milestones:** Set key milestones and deliverables for each phase.
- o **Allocate Resources:** Assign roles and responsibilities.
- o **Develop Timeline:** Create a detailed project schedule with deadlines.

Duration: 2 Weeks

Deliverables:

- Functional Requirements Document
 - Project Plan
 - License Requirements List
-

Phase 2: Design

Objective: Develop a detailed design for the RPA program.

Activities:

1. Develop System Design Document:

- **Outline RPA Program Architecture:** Describe how the RPA program will be built using Microsoft's Power Platform suite.
- **Specify Technology Stack:** Document software, and tools to be used.
- **Design Workflows:** Detail the automated workflows, including data extraction, categorization, and storage processes.

2. Create Test Plan:

- **Define Testing Criteria:** Outline the criteria for validating the RPA program.
- **Develop Test Scenarios:** Create scenarios to evaluate various functionalities and integrations.

Duration: 4 Weeks

Deliverables:

- System Design Document
 - Test Plan
-

Phase 3: Software Development

Objective: Develop and configure the RPA program using Microsoft's Power Platform.

Activities:

1. Develop Automated Workflows:

- **Create Workflows:** Build workflows to automate data gathering, categorization, and storage.

- **Implement Integration Points:** Ensure connectivity to NHUIS EDMS systems, and other integrations.
2. **Set Up Test Environment:**
 - **Configure Test Environment:** Establish a testing environment to develop and test the RPA program.
 - **Populate with Test Data:** Use sample data to test functionality.
 3. **Develop and Refine Program:**
 - **Iterate Development:** Continuously refine the program based on testing feedback.
 - **Ensure Scalability:** Validate that the program can scale as needed.

Duration: 8 Weeks

Deliverables:

- Developed RPA Solution (in test environment)
-

Phase 4: Testing

Objective: Ensure the RPA program meets requirements and is free from defects.

Activities:

1. **Conduct Usability Testing:**
 - **User Feedback:** Gather feedback from end-users on ease of use and functionality.
2. **Execute Integration Testing:**
 - **Verify Integrations:** Test the integration points with NHUIS and EDMS systems.
3. **Conduct Performance Testing:**
 - **Assess Performance:** Evaluate the program's performance under various conditions.

Duration: 2 Weeks

Deliverables:

- Testing Reports
- Bug and Issue Logs

Phase 5: Deployment

Objective: Deploy the RPA program to the production environment and ensure successful handover.

Activities:

1. Install Software:

- **Production Server Setup:** Install the RPA program on the production server.

2. User Training:

- **Conduct Training Sessions:** Train users on the new system.

3. System Handover:

- **Complete Handover Documentation:** Provide all necessary documentation and support materials to stakeholders.
- **Transition Support:** Warranty support and troubleshooting assistance post-deployment.

Duration: 2 Weeks

Deliverables:

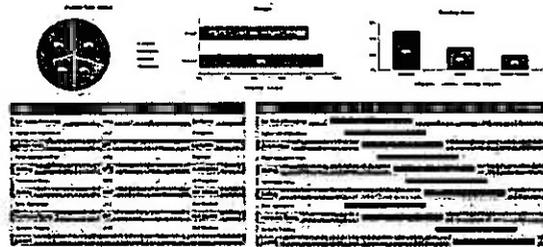

- Deployed RPA Solution
- Training Session
- Handover Documentation

Project Management:

- **Regular Updates:** Provide regular updates to stakeholders on project status.
- **Risk Management:** Monitor risks and implement mitigation strategies, as necessary.

Indicative Project Management Dashboard

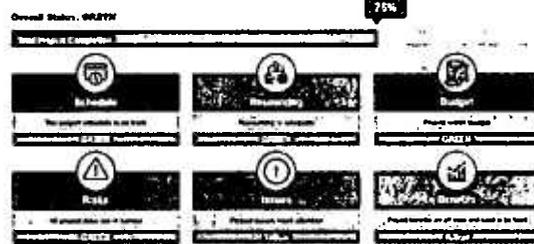

Project Management Dashboard

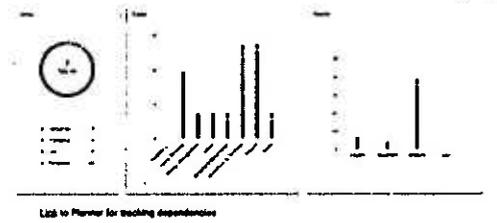

Microsoft Teams Rollout Weekly Status

Project Name	Start Date	End Date	Status	Progress (%)
Project A	2023-01-01	2023-01-15	Completed	100
Project B	2023-01-05	2023-01-20	In Progress	75

Project D	2023-01-15	2023-02-01	Not Started	0

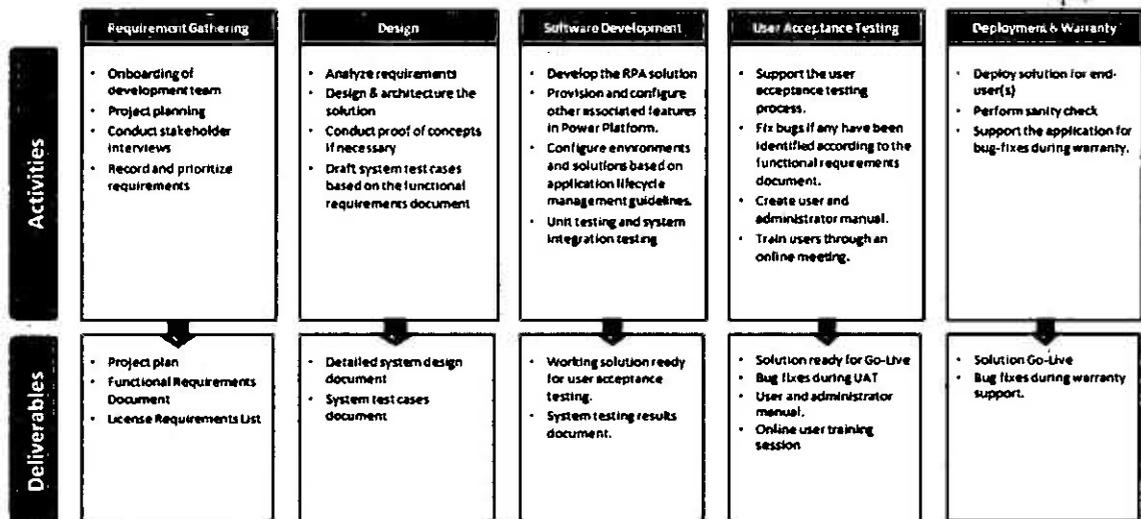

Project Health Card - Health Summary

Key Dependencies

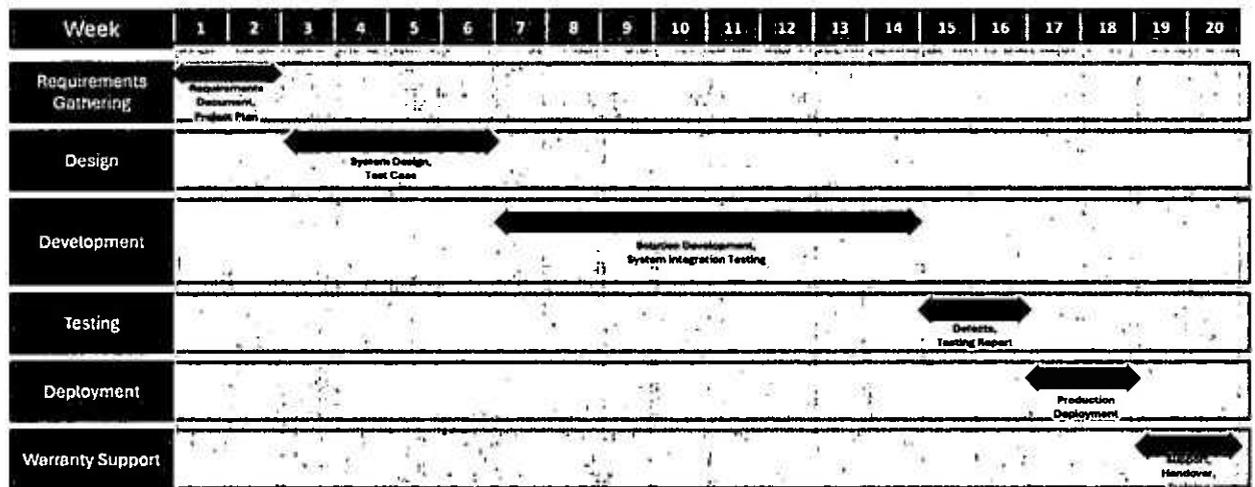

Summary of Activities and Deliverables

4.4. Proposed Project Timeline

The following timeline outlines the major phases of the project and the anticipated duration for each phase. Please note that this timeline is preliminary and subject to adjustments. A detailed project plan, including refined timelines and specific milestones, will be developed, and updated at the conclusion of the requirements gathering phase.

5. Project Team

5.1. Team Structure

The following outlines the team structure and reporting relationships for our Power Platform team.

#	Proposed Roles	Number of resources proposed
1.	Project Manager	1
2.	Business Analyst	1
3.	Lead Power Platform Developer	1
4.	Microsoft Power Automate Developer	1

Reporting Lines and Collaboration

- The Project Manager is the primary point of contact for all project-related issues and oversees the coordination of team members.
- The Business Analyst facilitates requirements-gathering sessions with stakeholders, gathers input, and translates business needs into technical specifications.
- The Power Platform Lead Developer provides technical leadership and guidance, ensuring that the solutions developed by the Developer aligns with architectural standards.
- The Microsoft Power Automate Developer works closely together, collaborating on integrations and ensuring that automated workflows function seamlessly.

5.2. Roles and Responsibilities

Role	Responsibilities
Project Manager	<ul style="list-style-type: none">• Plan, execute, and oversee projects from inception to completion.• Develop project plans, timelines, and budgets.• Coordinate cross-functional teams and manage resources effectively.• Monitor project progress and ensure timely delivery of milestones and deliverables.• Identify and mitigate project risks and issues.

	<ul style="list-style-type: none"> • Communicate project status to stakeholders and executives. • Ensure projects meet quality standards and business requirements. • Conduct post-project evaluations and implement improvements for future projects.
Business Analyst	<ul style="list-style-type: none"> • Facilitate sessions with stakeholders to document, and analyze business requirements and objectives. • Develop clear and comprehensive documentation including business requirements, functional specifications, and user stories. • Act as the liaison between stakeholders and the project team, ensuring alignment and managing expectations. • Collaborate with technical teams to ensure that developed solutions meet business needs. • Identify and recommend improvements to current processes and support the implementation of new solutions.
Lead Power Platform Developer	<ul style="list-style-type: none"> • Develop and maintain automated workflows using Microsoft Power Automate. • Design and implement custom connectors and integrations with various services and applications. • Troubleshoot and optimize existing workflows for performance and reliability. • Collaborate with stakeholders to understand and capture automation requirements. • Document workflow designs and provide training or support as needed. • Ensure compliance with data governance and security policies.
	<ul style="list-style-type: none"> • Design, develop, and customize Dynamics 365 applications and modules. • Write and maintain code in C#, JavaScript, and other relevant languages.

<p>Microsoft Power Automate Developer</p>	<ul style="list-style-type: none">• Integrate Dynamics 365 with other systems and databases.• Implement and manage Dynamics 365 workflows, plugins, and customizations.• Perform unit testing and troubleshooting of applications.• Collaborate with business analysts and stakeholders to gather requirements.• Ensure adherence to best practices and coding standards.
---	---

5.3. Proposed Licenes

5.4. Indicative Profiles

Project Manager

Manoj Chakravarthy

Project Manager USA

Overview

Manoj is a high-performance and award-winning, Delivery and Engagement leader with 20 years of experience architecting and delivering transformational client programs for multinational information technology services and consulting companies. He capitalizes on knowledge of Microsoft Security, Cloud Technologies, Enterprise tools, Automation best practices, and innovative solutions and frameworks to translate business strategy into IT solutions.

Strengths

- Microsoft 365 Security
- Data Governance & Privacy
- Enterprise Architecture
- Data Protection
- Security Strategy
- Engagement Management
- IT Portfolio Management
- Digital Transformation

Microsoft 365 Security Architecture

Data Protection

Microsoft 365 Copilot

MICROSOFT 365 Solution Architecture

Qualifications and Affiliations

- MCA, Computer Science, Sri Venkateswara College of Engineering, Tamil Nadu, India

Experience Summary

- Over 20 years of experience in architecting Microsoft 365 solutions.
- Defined and implemented various security solutions for enterprise customers.
- Successfully delivered large scale Data Protection capabilities for protecting sensitive data.
- Track record of exceptional project delivery for Microsoft 365 services including SharePoint, Power Platform, Teams and OneDrive.
- Adept at leading technical teams and effectively communicating with all impacted stakeholders to ensure a customer-focused environment.

Project Manager

Jan Wyckoff

Project Manager USA

Overview

Jan is an accomplished technical team leader and a Microsoft Service Adoption specialist. She possesses the ability to balance client collaboration and needs assessment with delivery excellence in implementing business-critical, enterprise scale technology projects. A technical strategist recognized for seamlessly aligning technical solutions with business objectives across multiple technology platforms.

Strengths

- Project Management
- Organizational Change Management
- Business Analysis and Collaboration
- Enterprise-Scale Solution Delivery
- Stakeholder Management
- Business Analysis & Collaboration
- Technical Communication
- Client Relationships/Trust

PROJECT MANAGEMENT

BUSINESS ANALYSIS

CHANGE MANAGEMENT

MICROSOFT 365 ROLLOUTS

Qualifications and Affiliations

- BACHELOR OF SCIENCE, Computer Science
- Member, National Ski Patrol - First Responder/First Aid services to ski-related injuries

Experience Summary

- Over 20 years of experience in project management, and Microsoft 365 project roll outs.
- Experience in managing and implementing simple to highly complex Microsoft 365 assignments.
- Track record of exceptional project delivery for Microsoft 365 services including SharePoint, Power Platform, Teams and OneDrive.
- Experience in implementing projects with highly demanding timelines and broad scope of services.
- Adept at leading cohesive teams and communicating technical concepts to non-technical partners to ensure a customer-focused environment.

Microsoft Power Automate Developer (Kris)

Kristofer Fox

Power Platform Lead Architect

US

Overview

Kris is a results-focused, collaborative, architect and senior M365 Engineer with over two decades of expertise, specializing in cultivating and fortifying cutting-edge Microsoft technologies. His proven track record as a decisive leader extends to steering and actualizing Microsoft 365 deployments across diverse sectors nationwide. He excels in orchestrating seamless integrations of M365, the Power Platform and state-of-the-art cloud-centric cybersecurity solutions.

Strengths

- Microsoft 365 Setup and Support
- Power Platform (Power Apps, Automate, BI)
- SharePoint On-Premise and Online
- ShareGate
- Cybersecurity

Qualifications and Certifications

Masters of Information Systems (MIS), University of Phoenix

Experience Summary

- Achieved a 65% reduction in security risk for a thriving American electric vehicle automaker by launching a robust cloud-based security architecture and monitoring environment; results were immediate.
- Revolutionized finance and procurement operations with a cutting-edge Power BI reporting system, empowering stakeholders with real-time purchasing insights and dynamic budgeting reports.
- Spearedheaded the creation of a dynamic Center of Excellence within Office 365, architecting a hybrid SharePoint solution that seamlessly supports over 40,000 employees worldwide, paving the way for innovation and collaboration at scale.

Power Platform Solution Design

Power Platform Environment Strategy

Power Platform DLP

© 2024 TrnDigital

Dynamics 365 Developer (Abhijeet)

Abhijeet Jadhav

Senior Dynamics 365 developer

Remote

Overview

Abhijeet possesses deep expertise in designing, developing, and implementing customized solutions using the Microsoft Dynamics 365 platform. His extensive career reflects a strong background in both the technical and functional aspects of Dynamics 365, including Power Platform integration. He has led multiple full-cycle implementations, upgrades, and migrations, consistently delivering solutions that align with organizational goals.

Strengths

- Extensive Power Platform
- Full-Cycle Project Implementation
- Customization and Configuration
- Power Platform Integration
- Azure Integration
- Data Management & Migration
- Project Management
- Enterprise-Scale Solution Delivery

Qualifications and Affiliations

- BACHELOR OF ENGINEERING: Computer Science, Kothapuri University
- Microsoft MVP

Experience Summary

- Over 19 years of experience working across diverse industries, providing tailored solutions for clients by leveraging knowledge of Dynamics 365, Microsoft Power Platform, Azure, and integration with third-party systems.
- Working as a liaison between technical experts and prospect customers along with architecting, implementing, and supporting a broad range of workloads including OnPrem, IaaS and PaaS cloud Solutions.
- Providing technical solutions through thought leadership to achieve business goals having impact on cost savings and process improvements.

6. Commercials

The project will be executed on **Time and Material** based on the below roles, hours, and rates.

Role	Location	Estimated Hours	Rate/Hour in USD	Estimated Cost
Lead Power Platform Developer	US based	520	\$120	\$62,400
Microsoft Power Automate developer	US based	530	\$150	\$79,500
Project Manager	US based	305	\$150	\$45,750
Business Analyst	US based	40	\$140	\$5,600
Total Cost				\$193,250

Invoices will be raised at the end of each month at actuals.

The projected indicative monthly invoices and corresponding monthly deliverables will be as below:

Month	Amount	Key Deliverables
Month 1	\$26,000	<ul style="list-style-type: none"> • Functional Requirements Document • Project Plan • License Requirements List
Month 2	\$39,000	<ul style="list-style-type: none"> • System Design Document • Test Plan
Month 3	\$51,450	<ul style="list-style-type: none"> • Developed RPA Solution (Partially Developed)
Month 4	\$52,200	<ul style="list-style-type: none"> • Developed RPA Solution (Fully Developed)
Month 5	\$24,600	<ul style="list-style-type: none"> • Testing Reports • Bug and Issue Logs • Deployed RPA Solution • Training Session • Handover Documentation

7. Case Studies

1) DHHS – SharePoint Intranet Project

Case Study

The State of New Hampshire (DHHS)

Adoption of SharePoint as Collaboration Platform

Improved
Collaboration
with Agencies

Improved
Productivity

Unified Search
with Security
enforced

Business Challenges

Outdated Technology: Dreamweaver is an older web development tool and using it for an intranet resulted in outdated features, limited customization, and lack of support. Limited Collaboration Features: Dreamweaver's collaboration features are limited compared to modern intranet platforms like SharePoint. It lacked real-time collaboration tools, version control mechanisms, and integration. Poor User Experience: The existing intranet offered a subpar user experience compared to modern intranet platforms. It lacked a responsive design, accessibility features, and intuitive navigation, resulting in decreased productivity.

Our Solution Highlights

- The Department of Health and Human Services (DHHS) of the State of New Hampshire moved to the cloud with the Microsoft 365 E3 license.
- Successfully created and launched intranet sites for more than 45 agencies, ensuring each site features a unified navigation system and a consistent design.
- TriDigital designed a comprehensive solution that included the adoption of SharePoint as a collaborative platform for sharing policies, procedures, information, and events.
- We implemented a department-wide tool to streamline and fulfill user requests, enhancing efficiency and productivity.
- Additionally, an integrated workflow solution was deployed for agency users to submit electronic forms to the help desk and other areas, replacing the need for PDFs and MS Word forms.
- A searchable central repository was created for policies, procedures, and guidelines, with search capabilities across the entire intranet based on keywords or metadata.
- The solution was designed to empower business areas with role-based permissions to maintain their content innovatively while ensuring enterprise scalability and sustainability.

Customer Benefits

- Transitioned from an out-of-date Dreamweaver intranet to a dynamic SharePoint intranet hub linking many individual sites.
- Creation of a dynamic hub with sites maintained by multiple people from across the agency instead of a single person.
- Due to the rollout of Microsoft 365 resulted in the new hub to be completely integrated so the users could find people and resources.

2) US based large Data Center provider

Case Study

US based Large Data Center Provider

Power Platform Center Of Excellent Setup & Continued Support & Maturity

\$600k+ IT Spend Savings

\$872k+ Annual Labor Savings

Business Challenges

- The client had fragmented process across business functions.
- They did not have a central repository of apps developed.
- The IT team was simply not resourced enough to create a Center of Excellence designed to foster, facilitate, and manage Microsoft Power Platform use and development.
- The IT team was overloaded trying to support "grass-roots" citizen developers.

Our Solution Highlights

- An understanding of the power platform landscape was initiated, the COE Starter Kit was deployed to gather the telemetry needed and to have an end-to-end visibility of the existing landscape.
- Worked with the stakeholders putting the right governance in place and offering recommendations. Established clear constraints and guardrails.
- An app catalog was created and is maintained with a curated list of the best apps and most common use cases.
- Training on Power platform is provided via monthly "Power Hour" events, small group tutorials, and 1:1 training sessions.
- A Viva Engage Community was set up where citizen developers can ask and answer questions. This is kept up to date by posting useful blog articles, Microsoft announcements.
- An intake and prioritization process was created to facilitate the Power Platform development process.

Customer Benefits

- The IT Team has a scalable model in place to demands of each business.
- Apps and flows are monitored to ensure governance adherence.
- Citizen Developers have multiple resources to expand and grow knowledge.
- The community that enabled citizen developers with Q&A and access to learning material and previously developed solutions.

3) US based large Biotech Company

Case Study

Large Pharmaceutical Company

Power Platform COE Setup

- 100% Increase in hours saved per user every week in the first six months.
- Speed of development within the organization - having tangible working prototypes changed from weeks to days.

Business Challenges	Our Solution Highlights	Customer Benefits
<ul style="list-style-type: none"> The client had fragmented process across business functions. They did not have a central repository of apps developed. The IT team was simply not resourced enough to create a Center of Excellence designed to foster, facilitate, and manage Microsoft Power Platform use and development. 	<ul style="list-style-type: none"> An understanding of the power platform landscape was initiated, the COE Starter Kit was deployed to gather the telemetry needed and to have an end-to-end visibility of the existing landscape. Worked with the stakeholders, putting the right governance in place and offering recommendations. Established clear constraints and guardrails. An app catalog was created with a curated list of the best apps and most common use cases. Training on Power platform was provided to the core team to understand the art of the possible. A dedicated Microsoft Teams site was also set up as a community space where citizen developers could ask and answer questions. This was kept up to date by posting useful blog articles, Microsoft announcements. 	<ul style="list-style-type: none"> The IT team got a model in place that enabled it to scale to meet the demands of each business. Apps and flows were cleaned up, if they were unused, not needed anymore. The community that enabled citizen developers with Q&A and access to learning material and previously developed solutions.

4) US based large Data Center provider

Case Study

US based Large Data Center Provider

Power Apps based rapid development for Automation of Business Process

Client Testimonial

“ The Power Platform Team has done excellent work.... Having everything built in the power platform has reduced potential manual work by 90% & time to complete registrations is reduced by at least 70% compared to our old excel workflow... ”

Business Challenges	Our Solution Highlights	Customer Benefits
<ul style="list-style-type: none"> The client faced challenges with their security review process which was time consuming, impacting their operational efficiency. The security review process required emailing of forms, manual reviews, manually triggered emails for status updates and reviews. The security review process lacked the scalability necessary to meet the client's growing needs. 	<ul style="list-style-type: none"> We leveraged our proficiency in rapid application development utilizing a low-code strategy, with the aim of reducing time and effort required for automating the process. We initiated the project with needs assessment to understand the security requirements, compliance obligations, and specific needs of the organization and involved key stakeholders, including IT, security teams, project managers, and end-users, to gather requirements and ensure buy-in. Designing the solution had 3 distinct activities: <ul style="list-style-type: none"> Process Mapping: Outline the security review process, including steps, roles, responsibilities, & workflows. Define Data Fields: Determine the data fields needed for the security review, such as project details, risk assessments, compliance checks, and approvals. User Interface Design: Design an intuitive and user-friendly interface for the Power App, considering both desktop and mobile users. We automated the workflows such as approval processes, notifications, and task assignments, using Power Automate. Integrated the Power App with other Microsoft 365 services like SharePoint for data storage, Teams for communication and Power BI for reporting. 	<ul style="list-style-type: none"> TrnDigital delivered a new and enhanced system with the below features: <ul style="list-style-type: none"> Self-attested to improve speed Targeted security guidance Improved transparency with consistent status updates. The average turn around time was brought down to 30 minutes for security reviews of new projects.

State of New Hampshire

Department of State

CERTIFICATE

I, David M. Scanlan, Secretary of State of the State of New Hampshire, do hereby certify that TRN DIGITAL LLC is a New Jersey Limited Liability Company registered to transact business in New Hampshire on July 10, 2017. I further certify that all fees and documents required by the Secretary of State's office have been received and is in good standing as far as this office is concerned.

Business ID: 774342

Certificate Number: 0007041907

IN TESTIMONY WHEREOF,

I hereto set my hand and cause to be affixed
the Seal of the State of New Hampshire,
this 4th day of February A.D. 2025.

A handwritten signature in black ink, appearing to read "David M. Scanlan".

David M. Scanlan
Secretary of State

**CORPORATE RESOLUTION
OF
TRN DIGITAL LLC**

We, the undersigned, being all the Directors of TRN DIGITAL LLC, organized and existing under the laws of New Jersey and having its principal place of business at 200 Portland Street, Floor 5, Boston, MA 02114 (the "Corporation"), hereby certify that the following is a true and correct copy of a resolution duly adopted at a meeting of the Directors of the Corporation duly held and convened on February 4, 2025, at which a quorum of the Board of Directors was present and voting throughout, and that such resolution has not been modified, rescinded or revoked, and is at present in full force and effect:

Therefore, it is resolved:

The Board of Directors of said Corporation does hereby appoint Shailendra Singh to engage in any and all business with the State of New Hampshire on behalf of said Corporation. This appointment will be for five years or until a change by a vote of the board of directors.

CERTIFICATE OF SECRETARY

The Secretary of the Corporation hereby certifies the he/she is the duly elected and qualified Secretary of TRN DIGITAL LLC and certifies that the above is a true and correct record of the resolution that was duly adopted by the of the Corporation on February 4, 2025.

I hereby certify that said vote has not been amended or repealed and remains in full force and effect as of the date of the contract/contract amendment to which this certificate is attached. This authority was valid ninety (90) days prior to and remains valid for nintey (90) days from the date of this Certificate of Authority. I further certify that it is understood that the State of New Hampshire will rely on this certificate as evidence that the person(s) listed above currently occupy the position(s) indicated and that they have full authority to bind the corporation. To the extent that there are any limits on the authority of any listed individual to bind the corporation in contracts with the State of New Hampshire, all such limitations are expressly stated herein.

REQUESTED ACTION

Authorize the Department of Administrative Services to amend an existing contract (Contract #8002852) with TRN Digital LLC d/b/a TRNDigital (VC#280281), Boston, MA for Microsoft/Office 365/Azure cloud solutions professional services, by extending the completion date from December 31, 2024 to December 31, 2025 with no change to the price limitation of \$10,000,000, effective upon Governor and Executive Council approval. The original contract was approved by Governor and Executive Council on March 31, 2021, item #78 and amended December 20, 2023, item #005X.

Funding shall be provided through individual agency expenditures, none of which shall be permitted unless there are sufficient appropriated funds to cover the expenditure.

EXPLANATION

As previously stated, the original contract (Contract #8002852) was approved by the Governor and Executive Council on March 23, 2021, item #78 and amended December 20, 2023, item #005X. The Department of Administrative Services (DAS), through the Bureau of Purchase and Property (BoPP), and in collaboration with the Department of Information Technology (DoIT), issued a request for proposal (RFP) #2312-21 on April 24, 2020, with responses due on June 11, 2020. This RFP reached 929 vendors through the NIGP electronic sourcing platform with an additional 17 directly sourced. 10 compliant responses were received, with the 7 highest scoring vendors subsequently entering into contracts through approval by the Governor and Executive Council on March 23, 2021, items #78-84; 4 of these contracts were extended one year with no change to pricing structure or price limitation on December 20, 2023, items #005U-005X.

This current contract (Contract #8002852) requires vendors to respond to a Request for Quote (RFQ) and Statement of Work (SOW). The DAS, on behalf of a requesting State agency, issues the RFQ/SOW to all contractors. Each SOW details various requirements related to the services, planning and implementation of new projects. The project engagement will be based upon the lowest cost qualified quote. Project engagements under the agreements with a dollar

value exceeding \$10,000 shall be brought before the Governor and Executive Council for approval prior to proceeding with the engagements. The DoIT has requested that the BoPP exercise the second one-year option to extend of two allowable extensions as permitted by contract terms stated in Exhibit B, Scope of Services, based on continued and anticipated increased statewide agency need for Microsoft/Office 365/Azure cloud solutions professional services. The purpose of this request is to provide statewide services to agencies requiring assistance with ongoing and future projects, including automating business processes, providing prompt responses to tracking or delivering constituent needs, refining business operations based on access to insightful data, securing information within compliance of State and Federal regulations, and deploying rapid solutions throughout the State of New Hampshire's IT Environment.

This extension will provide coverage for existing projects currently engaged, while the RFP for new contracts is being finalized, posted, and awarded. The BoPP, in collaboration with the DoIT, issued a request for information (RFI) 2024-373. This RFI reached 361 vendors through the NIGP electronic sourcing platform with an additional 18 directly sourced. 16 informational responses were received. Upon review of the submissions, it was determined that while the services would remain at the same qualification level, the price of services would result in an average of \$1,687 per hour, an increase of \$86 per hour over the current average hourly rate of pricing at \$1,601. These RFI results support the justification to extend the current contracts in place with no change to current terms or pricing as hourly rates for cloud service professionals have increased since the original contract approval.

The current, and 3 pending contract amendment extensions being requested are for:

1. Peridot Solutions, LLC of McLean, VA (Contract #8002854)
2. Spruce Technology, Inc. of Clifton, NJ (Contract #8002856)
3. Presidio Networked Solutions LLC of Woburn, MA (Contract #8002858)
4. TRN Digital LLC d/b/a TRNDigital of Boston, MA (Contract #8002852)

Contract financials	
Average hourly rate from current contract terms	\$1,601
Average hourly rate from RFI respondents	\$1,687
Average hourly cost savings achieved with extension of current contract	\$86

Based on the foregoing, I am respectfully recommending approval of the amendment to the contract with TRN Digital LLC d/b/a TRNDigital.

Respectfully submitted,

Charles M. Arlinghaus
Commissioner

Dear Commissioner Arlinghaus:

This letter represents formal notification that the Department of Information Technology (DoIT) has approved your agency's request to enter into a contract amendment with TRN Digital LLC dba TmDigital, Peridot Solutions LLC, Spruce Technology Inc, and Presidio Networked Solutions LLC, as described below and referenced as DoIT No. 2021-041B

The purpose of this request is to extend the established contracts for Microsoft/Office 365/Azure Cloud Solutions Professional Services.

The Total Price Limitation shall not change and remains \$10,000,000, effective upon Governor and Executive Council approval through December 31, 2025.

A copy of this letter must accompany the Department of Administrative Services' submission to the Governor and Executive Council for approval.

Sincerely,

Denis Goulet

SECOND AMENDMENT TO THE CONTRACT BETWEEN
TRN DIGITAL LLC DBA TRNDIGITAL
AND
THE STATE OF NEW HAMPSHIRE,
DEPARTMENT OF ADMINISTRATIVE SERVICES,
FOR MICROSOFT/OFFICE 365/AZURE CLOUD SOLUTIONS PROFESSIONAL SERVICES
CONTRACT # 8002852

This Second Amendment (hereinafter referred to as the "Amendment"), dated this 8th day of October 2024, is by and between the State of New Hampshire, Department of Administrative Services (hereinafter referred to as "the State") and TRN DIGITAL LLC DBA TRNDIGITAL (hereinafter referred to as "the Contractor") for Microsoft/Office 365/Azure Cloud Solutions professional services.

WHEREAS, pursuant to an agreement effective April 7, 2021, amended by the First Amendment on December 20, 2023, and set to expire December 31, 2024, (hereinafter referred to as "the Agreement"), the Contractor agreed to perform certain Microsoft/Office 365/Azure Cloud Solutions professional services for the State in consideration of payment by the State of certain sums as specified therein; and

WHEREAS, pursuant to Section 17 of the Agreement, the Agreement may be amended by an instrument in writing executed by both parties;

NOW, THEREFORE, for and in consideration of the mutual promises set forth in this Amendment and the underlying Agreement, the parties do mutually agree as follows:

1. Delete in its entirety Form Number P-37, item 1.7 Completion Date and substitute the following:
1.7 December 31, 2025
2. All other provisions of the Agreement, approved by the Governor and Executive Council on March 23, 2021, item #78, amended on December 20, 2023, item #5(X) shall remain in full force and effect.

Sheri L. Rockburn
Assistant Commissioner

December 20, 2023

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
State House
Concord, New Hampshire 03301

REQUESTED ACTION

Authorize the Department of Administrative Services to exercise a contract renewal option (Contract #8002852) with TRN Digital LLC d/b/a TRNDigital (VC#280281), Boston, MA for Microsoft/Office 365/Azure cloud solutions professional services, by extending the completion date from December 31, 2023 to December 31, 2024 with no increase to contract price limitation of up to and not to exceed \$10,000,000 with one available one-year renewal option effective upon Governor and Executive Council approval. The original contract (Contract #8002852) was approved by Governor and Executive Council on March 23, 2021, item #78.

Funding shall be provided through individual agency expenditures, none of which shall be permitted unless there are sufficient appropriated funds to cover the expenditure.

EXPLANATION

As previously stated, the original contract (Contract #8002852) was approved by the Governor and Executive Council on March 23, 2021, item #78.

This current contract (Contract #8002852) requires vendors to respond to a Request for Quote (RFQ) and Statement of Work (SOW). The DAS, on behalf of a requesting State agency, issues the RFQ/SOW to all contractors. Each SOW details various requirements related to the services, planning and implementation of new projects. The project engagement will be based upon the lowest cost qualified quote. Project engagements under the agreements with a dollar value exceeding \$10,000 shall be brought before the Governor and Executive Council for approval prior to proceeding with the engagements. The DoIT has requested that the BoPP exercise the first one-year renewal of two allowable extensions as permitted by contract terms stated in Exhibit B, Scope of Services, based on continued and anticipated increased statewide agency need for Microsoft/Office 365/Azure cloud solutions professional services. The purpose of this request is to provide statewide services to agencies requiring assistance with ongoing and future projects, including automating business processes, providing prompt responses to tracking or delivering constituent needs, refining business operations based on access to insightful data,

securing information within compliance of State and Federal regulations, and deploying rapid solutions throughout the State of New Hampshire's IT Environment.

For this requested amendment, the BoPP, in collaboration with the DoIT, issued a request for information (RFI) 2024-373 on August 3, 2023, with responses due on August 24, 2023. This RFI reached 361 vendors through the NIGP electronic sourcing platform with an additional 18 directly sourced. 16 informational responses were received. Upon review of the submissions, it was determined that while the services would remain at the same qualification level, the price of services would result in an average of \$1,687 per hour, an increase of \$86 per hour over the current average hourly rate of pricing at \$1,601. These RFI results support the justification to extend the current contracts in place with no change to current terms or pricing as hourly rates for cloud service professionals have increased since the original contract approval.

The current, and 3 pending contract amendment extensions being requested are for:

1. TRN Digital LLC d/b/a TRNDigital of Boston, MA (Contract #8002852)
2. Peridot Solutions, LLC of McLean, VA (Contract #8002854)
3. Spruce Technology, Inc. of Clifton, NJ (Contract #8002856)
4. Presidio Networked Solutions LLC of Woburn, MA (Contract #8002858)

Contract financials	
Average hourly rate from current contract terms	\$1,601
Average hourly rate from RFI respondents	\$1,687
Average hourly cost avoidance achieved with extension of current contract	\$86 (or 5%)

Based on the foregoing, I am respectfully recommending approval of the amendment to the contract with TRN Digital LLC d/b/a TRNDigital.

Respectfully submitted,

Charles M. Arlinghaus

Charles M. Arlinghaus, Commissioner
Department of Administrative Services
State of New Hampshire
25 Capitol Street – Room 100
Concord, NH 03301

Dear Commissioner Arlinghaus:

This letter represents formal notification that the Department of Information Technology (DoIT) has approved your agency's request to enter into a contract amendment with Peridot Solutions, LLC, Persidio Networked Solutions, LLC, Spruce Technologies, Inc., and TRN Digital, LLC, as described below and referenced as DoIT No. 2021-041A.

The purpose of this request is to provide statewide services to agencies requiring assistance with ongoing and future projects, including automating business processes, providing prompt responses to tracking or delivering constituent needs, refining business operations based on access to insightful data, securing information within compliance of State and Federal regulations, and deploying rapid solutions throughout the State of New Hampshire's IT Environment.

The Total Price Limitation will not change and shall remain \$10,000,000, effective upon Governor and Executive Council approval through December 31, 2024.

A copy of this letter must accompany the Department of Administrative Services' submission to the Governor and Executive Council for approval.

Sincerely,

Denis Goulet

**FIRST AMENDMENT TO THE CONTRACT
BETWEEN TRN DIGITAL LLC DBA TRNDIGITAL AND
THE STATE OF NEW HAMPSHIRE, DEPARTMENT OF ADMINISTRATIVE SERVICES,
FOR MICROSOFT/OFFICE 365/AZURE CLOUD SOLUTIONS PROFESSIONAL SERVICES
CONTRACT # 8002852**

This First Amendment (hereinafter referred to as the "Amendment"), dated this 20 day of October, 2023, is by and between the State of New Hampshire, Department of Administrative Services (hereinafter referred to as "the State") and TRN DIGITAL LLC DBA TRNDIGITAL (hereinafter referred to as "the Contractor") for Microsoft/Office 365/Azure Cloud Solutions Professional Services.

WHEREAS, pursuant to an agreement effective April 7, 2021 set to expire December 31, 2023, (hereinafter referred to as "the Agreement"), the Contractor agreed to perform certain Microsoft/Office 365/Azure Cloud Solutions Professional services for the State in consideration of payment by the State of certain sums as specified therein; and

WHEREAS, pursuant to Section 17 of the Agreement, the Agreement may be amended by an instrument in writing executed by both parties;

NOW, THEREFORE, for and in consideration of the mutual promises set forth in this Amendment and the underlying Agreement, the parties do mutually agree as follows:

1. Delete in its entirety Form Number P-37, item 1.7 Completion Date and substitute the following:
1.7 December 31, 2024
2. All other provisions of the Agreement, approved by the Governor and Executive Council on March 23, 2021, item#78, shall remain in full force and effect.

March 23, 2021

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
State House
Concord, New Hampshire 03301

REQUESTED ACTION

Authorize the Department of Administrative Services to enter into a contract with TRN Digital LLC of Boston, MA. (Vendor No. 280281), for an aggregate price limitation of \$10,000,000.00 among all awarded vendors, for Microsoft/Office 365/Azure Cloud Solutions Professional Services. The term shall be effective upon Governor and Council approval and ending on December 31, 2023 with the option to extend for two (2) additional one-year extension terms.

Funding shall be provided through individual agency expenditures, none of which shall be permitted unless there are sufficient appropriated funds to cover the expenditure.

EXPLANATION

The Department of Administrative Services, through the Bureau of Purchase and Property, and in collaboration with the Department of Information Technology, issued a request for proposal on April 24, 2020 with responses due on June 11, 2020. There were 10 compliant responses received.

It is the Department's intent to enter into contracts with the seven (7) highest scoring vendors where through a Request for Quote (RFQ) and Statement of Work (SOW) process the Department of Administrative Services, on behalf of a requesting State agency, will issue RFQ/SOW to all contractors. Each SOW will detail various requirements related to the services, planning and implementation of new projects. The project engagement will be based upon the lowest cost qualified quote. Project engagements under the agreements with a dollar value exceeding \$10,000 shall be brought before the Executive Council for approval prior to proceeding with the engagements.

His Excellency, Governor Christopher T. Sununu
and the Honorable Council

Page 2 of 2

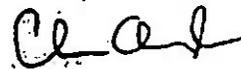

Microsoft tools, products and other cloud services have been deployed and extended to all Executive branch agencies within NH in FY2020. These deployments have enabled agencies to expand collaboration within and outside their agencies and will provide the ability to enhance business processes in ways previously not possible to support NH citizens. These capabilities have been especially beneficial given the need over the past year to increase collaboration throughout State government, while reducing the stress and agency reliance on the State's core infrastructure.

State agencies have already experienced increased productivity using technology that supports remote meetings, instant chat and messaging, project management tools and activity alert, document (storage, management, and collaboration), the ability to capture meeting videos, and many other functions. In addition, efforts are moving forward to deploy integrated email functions and other capabilities that will allow State agencies to provide citizen centric services and functions in new and creative ways.

The Microsoft 365 and other cloud platforms enable the State to react more quickly during times of crisis and provide base platforms that can be used as the State expands its future Digital Government Services that will drive process and product usage efficiencies, which will ultimately lead to improved citizen services and interoperability with NH Businesses and trusted partners. Through the proposed contracts, the State anticipates improvements in the following areas: automating business processes, providing prompt responses to tracking or delivering constituent needs, refining business operations based on access to insightful data, securing information within compliance of State and Federal regulations, and deploying rapid solutions throughout the State of New Hampshire's IT environment.

Enabling these capabilities will often require the use of expert resources that can assist the State to efficiently design, govern, maintain and provide ongoing management of these platforms in a secure, responsible and effective manner. Contracting mechanisms that shorten the "time to value" are needed to procure resources to work with State agencies and IT staff to supplement existing constrained resources that are needed to provide the skills necessary for the State to excel in its Digital Government Initiatives. Based on the foregoing, I am respectfully recommending approval of the contract with TRN Digital LLC.

Respectfully submitted,

Charles M. Arlinghaus
Commissioner

March 15, 2021

Charles M. Arlinghaus, Commissioner
Department of Administrative Services
State of New Hampshire
25 Capitol Street
Concord, NH 03301

Dear Commissioner Arlinghaus,

This letter represents formal notification that the Department of Information Technology (DoIT) has approved your agency's request to enter into seven (7) contracts as described below and referenced as DoIT No. 2021-041.

The seven (7) contracts being requested are for:

1. Peridot Solutions, LLC of McLean, VA
2. Catapult Systems, LLC of Austin, TX
3. Spruce Technology, Inc. of Clifton, NJ
4. Softchoice Corporation of Chicago, IL
5. Presidio Networked Solutions LLC of Woburn, MA
6. Windows Management Experts Inc of Bensalem, PA
7. TRN Digital LLC d/b/a TmDigital of Boston, MA

This is a request to enter into a statewide contract with seven (7) vendors to allow agencies to release RFQ's/SOW's for Microsoft/Office 365/ Azure Cloud Solutions Professional Services. These contracts will provide a mechanism for agencies requiring assistance with ongoing and future projects, including automating business processes, providing prompt responses to tracking or delivering constituent needs, refining business operations based on access to insightful data, securing information within compliance of State and Federal regulations, and deploying rapid solutions throughout the State of New Hampshire's IT Environment.

The total amount of the seven (7) contracts is not to exceed \$10,000,000, and shall become effective upon Governor and Executive Council approval through December 31, 2023.

Denis Goulet

Contractor Initials

Date  10/8/20

2. SERVICES TO BE PERFORMED. The State of New Hampshire, acting through the agency identified in block 1.1 ("State"), engages contractor identified in block 1.3 ("Contractor") to perform, and the Contractor shall perform, the work or sale of goods, or both, identified and more particularly described in the attached EXHIBIT B, which is incorporated herein by reference ("Services").

3. EFFECTIVE DATE/COMPLETION OF SERVICES.

3.1 Notwithstanding any provision of this Agreement to the contrary, and subject to the approval of the Governor and Executive Council of the State of New Hampshire, if applicable, this Agreement and all obligations of the parties hereunder, shall become effective on the date the Governor and Executive Council approve this Agreement as indicated in block 1.17, unless no such approval is required, in which case the Agreement shall become effective on the date the Agreement is signed by the State Agency as shown in block 1.13 ("Effective Date").

3.2 If the Contractor commences the Services prior to the Effective Date, all Services performed by the Contractor prior to the Effective Date shall be performed at the sole risk of the Contractor, and in the event that this Agreement does not become effective, the State shall have no liability to the Contractor, including without limitation, any obligation to pay the Contractor for any costs incurred or Services performed. Contractor must complete all Services by the Completion Date specified in block 1.7.

4. CONDITIONAL NATURE OF AGREEMENT.

Notwithstanding any provision of this Agreement to the contrary, all obligations of the State hereunder, including without limitation, the continuance of payments hereunder, are contingent upon the availability and continued appropriation of funds affected by any state or federal legislative or executive action that reduces, eliminates or otherwise modifies the appropriation or availability of funding for this Agreement and the Scope for Services provided in EXHIBIT B, in whole or in part. In no event shall the State be liable for any payments hereunder in excess of such available appropriated funds. In the event of a reduction or termination of appropriated funds, the State shall have the right to withhold payment until such funds become available, if ever, and shall have the right to reduce or terminate the Services under this Agreement immediately upon giving the Contractor notice of such reduction or termination. The State shall not be required to transfer funds from any other account or source to the Account identified in block 1.6 in the event funds in that Account are reduced or unavailable.

5. CONTRACT PRICE/PRICE LIMITATION/ PAYMENT.

5.1 The contract price, method of payment, and terms of payment are identified and more particularly described in EXHIBIT C which is incorporated herein by reference.

5.2 The payment by the State of the contract price shall be the only and the complete reimbursement to the Contractor for all expenses, of whatever nature incurred by the Contractor in the performance hereof, and shall be the only and the complete

compensation to the Contractor for the Services. The State shall have no liability to the Contractor other than the contract price.

5.3 The State reserves the right to offset from any amounts otherwise payable to the Contractor under this Agreement those liquidated amounts required or permitted by N.H. RSA 80:7 through RSA 80:7-c or any other provision of law.

5.4 Notwithstanding any provision in this Agreement to the contrary, and notwithstanding unexpected circumstances, in no event shall the total of all payments authorized, or actually made hereunder, exceed the Price Limitation set forth in block 1.8.

6. COMPLIANCE BY CONTRACTOR WITH LAWS AND REGULATIONS/ EQUAL EMPLOYMENT OPPORTUNITY.

6.1 In connection with the performance of the Services, the Contractor shall comply with all applicable statutes, laws, regulations, and orders of federal, state, county, or municipal authorities which impose any obligation or duty upon the Contractor, including but not limited to, civil rights and equal employment opportunity laws. In addition, if this Agreement is funded in any part by monies of the United States, the Contractor shall comply with all federal executive orders, rules, regulations and statutes, and with any rules, regulations and guidelines as the State or the United States issue to implement these regulations. The Contractor shall also comply with all applicable intellectual property laws.

6.2 During the term of this Agreement, the Contractor shall not discriminate against employees or applicants for employment because of race, color, religion, creed, age, sex, handicap, sexual orientation, or national origin and will take affirmative action to prevent such discrimination.

6.3 The Contractor agrees to permit the State or United States access to any of the Contractor's books, records and accounts for the purpose of ascertaining compliance with all rules, regulations and orders, and the covenants, terms and conditions of this Agreement.

7. PERSONNEL.

7.1 The Contractor shall at its own expense provide all personnel necessary to perform the Services. The Contractor warrants that all personnel engaged in the Services shall be qualified to perform the Services, and shall be properly licensed and otherwise authorized to do so under all applicable laws.

7.2 Unless otherwise authorized in writing, during the term of this Agreement, and for a period of six (6) months after the Completion Date in block 1.7, the Contractor shall not hire, and shall not permit any subcontractor or other person, firm or corporation with whom it is engaged in a combined effort to perform the Services to hire, any person who is a State employee or official, who is materially involved in the procurement, administration or performance of this Agreement. This provision shall survive termination of this Agreement.

7.3 The Contracting Officer specified in block 1.9, or his or her successor, shall be the State's representative. In the event of any dispute concerning the interpretation of this Agreement, the Contracting Officer's decision shall be final for the State.

Contractor Initials: 

Date: 11/18/20

8. EVENT OF DEFAULT/REMEDIES.

8.1 Any one or more of the following acts or omissions of the Contractor shall constitute an event of default hereunder ("Event of Default"):

8.1.1 failure to perform the Services satisfactorily or on schedule;

8.1.2 failure to submit any report required hereunder; and/or

8.1.3 failure to perform any other covenant, term or condition of this Agreement.

8.2 Upon the occurrence of any Event of Default, the State may take any one, or more, or all, of the following actions:

8.2.1 give the Contractor a written notice specifying the Event of Default and requiring it to be remedied within, in the absence of a greater or lesser specification of time, thirty (30) days from the date of the notice; and if the Event of Default is not timely cured, terminate this Agreement, effective two (2) days after giving the Contractor notice of termination;

8.2.2 give the Contractor a written notice specifying the Event of Default and suspending all payments to be made under this Agreement and ordering that the portion of the contract price which would otherwise accrue to the Contractor during the period from the date of such notice until such time as the State determines that the Contractor has cured the Event of Default shall never be paid to the Contractor;

8.2.3 give the Contractor a written notice specifying the Event of Default and set off against any other obligations the State may owe to the Contractor any damages the State suffers by reason of any Event of Default; and/or

8.2.4 give the Contractor a written notice specifying the Event of Default, treat the Agreement as breached, terminate the Agreement and pursue any of its remedies at law or in equity, or both.

8.3 No failure by the State to enforce any provisions hereof after any Event of Default shall be deemed a waiver of its rights with regard to that Event of Default or any subsequent Event of Default. No express failure to enforce any Event of Default shall be deemed a waiver of the right of the State to enforce each and all of the provisions hereof upon any further or other Event of Default on the part of the Contractor.

9. TERMINATION.

9.1 Notwithstanding paragraph 8, the State may, at its sole discretion, terminate the Agreement for any reason, in whole or in part, by thirty (30) days written notice to the Contractor that the State is exercising its option to terminate the Agreement.

9.2 In the event of an early termination of this Agreement for any reason other than the completion of the Services, the Contractor shall, at the State's discretion, deliver to the Contracting Officer, not later than fifteen (15) days after the date of termination, a report ("Termination Report") describing in detail all Services performed, and the contract price earned, to and including the date of termination. The form, subject matter, content, and number of copies of the Termination Report shall be identical to those of any Final Report described in the attached EXHIBIT B. In addition, at the State's discretion, the Contractor shall, within 15 days of notice of early termination, develop and submit to the State a Transition Plan for services under the Agreement.

10. DATA/ACCESS/CONFIDENTIALITY/PRESERVATION.

10.1 As used in this Agreement, the word "data" shall mean all information and things developed or obtained during the performance of, or acquired or developed by reason of, this Agreement, including, but not limited to, all studies, reports, files, formulas, surveys, maps, charts, sound recordings, video recordings, pictorial reproductions, drawings, analytics, graphic representations, computer programs, computer printouts, notes, letters, memoranda, papers, and documents, all whether finished or unfinished.

10.2 All data and any property which has been received from the State or purchased with funds provided for that purpose under this Agreement, shall be the property of the State, and shall be returned to the State upon demand or upon termination of this Agreement for any reason.

10.3 Confidentiality of data shall be governed by N.H. RSA chapter 91-A or other existing law. Disclosure of data requires prior written approval of the State.

11. CONTRACTOR'S RELATION TO THE STATE: In the performance of this Agreement the Contractor is, in all respects, an independent contractor, and is neither an agent nor an employee of the State. Neither the Contractor nor any of its officers, employees, agents or members shall have authority to bind the State or receive any benefits, workers' compensation or other emoluments provided by the State to its employees.

12. ASSIGNMENT/DELEGATION/SUBCONTRACTS.

12.1 The Contractor shall not assign, or otherwise transfer any interest in this Agreement without the prior written notice, which shall be provided to the State at least fifteen (15) days prior to the assignment, and a written consent of the State. For purposes of this paragraph, a Change of Control shall constitute assignment. "Change of Control" means (a) merger, consolidation, or a transaction or series of related transactions in which a third party, together with its affiliates, becomes the direct or indirect owner of fifty percent (50%) or more of the voting shares or similar equity interests, or combined voting power of the Contractor, or (b) the sale of all or substantially all of the assets of the Contractor.

12.2 None of the Services shall be subcontracted by the Contractor without prior written notice and consent of the State. The State is entitled to copies of all subcontracts and assignment agreements and shall not be bound by any provisions contained in a subcontract or an assignment agreement to which it is not a party.

13. INDEMNIFICATION. Unless otherwise exempted by law, the Contractor shall indemnify and hold harmless the State, its officers and employees, from and against any and all claims, liabilities and costs for any personal injury or property damages, patent or copyright infringement, or other claims asserted against the State, its officers or employees, which arise out of (or which may be claimed to arise out of) the acts or omission of the Contractor, or subcontractors, including but not limited to the negligence, reckless or intentional conduct. The State shall not be liable for any costs incurred by the Contractor arising under

Contractor Initials

Date

[Signature]
11/19/00

this paragraph 13. Notwithstanding the foregoing, nothing herein contained shall be deemed to constitute a waiver of the sovereign immunity of the State, which immunity is hereby reserved to the State. This covenant in paragraph 13 shall survive the termination of this Agreement.

14. INSURANCE.

14.1 The Contractor shall, at its sole expense, obtain and continuously maintain in force, and shall require any subcontractor or assignee to obtain and maintain in force, the following insurance:

14.1.1 commercial general liability insurance against all claims of bodily injury, death or property damage, in amounts of not less than \$1,000,000 per occurrence and \$2,000,000 aggregate or excess; and

14.1.2 special cause of loss coverage form covering all property subject to subparagraph 10.2 herein, in an amount not less than 80% of the whole replacement value of the property.

14.2 The policies described in subparagraph 14.1 herein shall be on policy forms and endorsements approved for use in the State of New Hampshire by the N.H. Department of Insurance, and issued by insurers licensed in the State of New Hampshire.

14.3 The Contractor shall furnish to the Contracting Officer identified in block 1.9, or his or her successor, a certificate(s) of insurance for all insurance required under this Agreement. Contractor shall also furnish to the Contracting Officer identified in block 1.9, or his or her successor, certificate(s) of insurance for all renewal(s) of insurance required under this Agreement no later than ten (10) days prior to the expiration date of each insurance policy. The certificate(s) of insurance and any renewals thereof shall be attached and are incorporated herein by reference.

15. WORKERS' COMPENSATION.

15.1 By signing this agreement, the Contractor agrees, certifies and warrants that the Contractor is in compliance with or exempt from, the requirements of N.H. RSA chapter 281-A ("Workers' Compensation").

15.2 To the extent the Contractor is subject to the requirements of N.H. RSA chapter 281-A, Contractor shall maintain and require any subcontractor or assignee to secure and maintain payment of Workers' Compensation in connection with activities which the person proposes to undertake pursuant to this Agreement. The Contractor shall furnish the Contracting Officer identified in block 1.9, or his or her successor, proof of Workers' Compensation in the manner described in N.H. RSA chapter 281-A and any applicable renewal(s) thereof, which shall be attached and are incorporated herein by reference. The State shall not be responsible for payment of any Workers' Compensation premiums or for any other claim or benefit for Contractor, or any subcontractor or employee of Contractor, which might arise under applicable State of New Hampshire Workers' Compensation laws in connection with the performance of the Services under this Agreement.

16. NOTICE. Any notice by a party hereto to the other party shall be deemed to have been duly delivered or given at the time of mailing by certified mail, postage prepaid, in a United States Post Office addressed to the parties at the addresses given in blocks 1.2 and 1.4, herein.

17. AMENDMENT. This Agreement may be amended, waived or discharged only by an instrument in writing signed by the parties hereto and only after approval of such amendment, waiver or discharge by the Governor and Executive Council of the State of New Hampshire unless no such approval is required under the circumstances pursuant to State law, rule or policy.

18. CHOICE OF LAW AND FORUM. This Agreement shall be governed, interpreted and construed in accordance with the laws of the State of New Hampshire, and is binding upon and inures to the benefit of the parties and their respective successors and assigns. The wording used in this Agreement is the wording chosen by the parties to express their mutual intent, and no rule of construction shall be applied against or in favor of any party. Any actions arising out of this Agreement shall be brought and maintained in New Hampshire Superior Court which shall have exclusive jurisdiction thereof.

19. CONFLICTING TERMS. In the event of a conflict between the terms of this P-37 form (as modified by EXHIBIT A) and/or attachments and amendment thereof, the terms of the P-37 (as modified in EXHIBIT A) shall control.

20. THIRD PARTIES. The parties hereto do not intend to benefit any third parties and this Agreement shall not be construed to confer any such benefit.

21. HEADINGS. The headings throughout the Agreement are for reference purposes only, and the words contained therein shall in no way be held to explain, modify, amplify or aid in the interpretation, construction or meaning of the provisions of this Agreement.

22. SPECIAL PROVISIONS. Additional or modifying provisions set forth in the attached EXHIBIT A are incorporated herein by reference.

23. SEVERABILITY. In the event any of the provisions of this Agreement are held by a court of competent jurisdiction to be contrary to any state or federal law, the remaining provisions of this Agreement will remain in full force and effect.

24. ENTIRE AGREEMENT. This Agreement, which may be executed in a number of counterparts, each of which shall be deemed an original, constitutes the entire agreement and understanding between the parties, and supersedes all prior agreements and understandings with respect to the subject matter hereof.

EXHIBIT A
SPECIAL PROVISIONS

1. Delete Section 13. INDEMNIFICATION in its entirety and substitute with the following:

The Contractor shall defend, indemnify and hold harmless the State, its officers and employees, from and against any and all claims, liabilities and costs for any personal injury or property damages, patent or copyright infringement, or other claims asserted against the State, its officers or employees, which arise out of (or which may be claimed to arise out of) the acts or omission of the Contractor, or subcontractors, including but not limited to the negligence, reckless or intentional conduct. The State shall not be liable for any costs incurred by the Contractor arising under this paragraph.

The Contractor shall require any subcontractor, delegates, or transferees, to agree in writing to defend, indemnify and hold harmless the State, its officers and employees from and against any and all losses suffered by the State, its officers and employees, and any and all claims, liabilities or penalties asserted against the State, its officers and employees, by or on behalf of any person, on account of, based or resulting from, arising out of (or which may be claimed to arise out of) the acts or omissions of the subcontractor, delegate, or transferee. Further, notwithstanding the foregoing, nothing herein contained shall be deemed to constitute a waiver of the sovereign immunity of the State, which immunity is hereby reserved to the State. This covenant shall survive the termination of this Agreement.

**EXHIBIT B
SCOPE OF SERVICES**

1. INTRODUCTION

This Master Agreement is entered into by and between TRN Digital LLC (hereinafter referred to as the "Contractor"), and the State of New Hampshire, (hereinafter referred to as the "State"). The Contractor hereby agrees to provide the State and its agencies with Microsoft/Office 365/Azure Cloud Solutions Professional Services in accordance to this Agreement and the terms of Request for Quotes (RFQ)/Statements of Work (SOW) to this Agreement.

2. CONTRACT DOCUMENTS

This Contract consists of the following documents ("Contract Documents"):

- a. State of New Hampshire Terms and Conditions: General Provisions Form P-37
- b. EXHIBIT A Special Provisions
- c. EXHIBIT B Scope of Services
- d. EXHIBIT C Method of Payment
- e. EXHIBIT D RFP 2312-21
- f. EXHIBIT E RFQ/SOW Worksheet

In the event of any conflict among the terms or provisions of the documents listed above, the following order of priority shall indicate which documents control: (1) Form Number P-37, as modified in Exhibit A, Special Provisions, (2) EXHIBIT B "Scope of Services," (3) EXHIBIT C "Method of Payment," (4) RFQ/SOW Worksheet, and (5) EXHIBIT D "RFP 2312-21."

3. TERM OF CONTRACT

The term of this Contract shall commence upon the approval by the Governor and Executive Council and shall continue thereafter for a period of approximately three (3) years, unless extended for additional terms.

The Contract may be extended for two (2) additional one-year extension terms thereafter upon the same terms, conditions and pricing structure the approval of the Governor and Executive Council.

The maximum term of the Contract (including all extensions) cannot exceed five (5) years.

4. SCOPE OF WORK

All SOWs that are negotiated between the Parties shall be in writing and executed by both Parties and shall be attached hereto as supplemental Exhibits, and shall be incorporated into, and governed by, this Agreement. A standard template to request a quote is attached (Exhibit E). Contractor must be capable of providing information technology professional services on Microsoft Cloud Solutions that include, but are limited to: managed services for modern Microsoft/Office 365/Azure Cloud Solutions (M365&CS) administration, operational oversight, systems maintenance, and short-term or ongoing development or integration projects.

Contractor Initials

Date

1/18/23

I. Ordering Procedures:

The Department of Administrative Services, on behalf of a requesting state agency, will issue RFQ/SOW to several vendors, including the Contractor. Each SOW will detail various requirements related to the services, planning and implementation of new projects. RFQ/SOW may require the Contractor to have:

- a) Mandatory Microsoft certifications to be awarded the work
- b) Agreement and signature on project specific Business Associate Agreements or other documents as required by the State to address statutory, regulatory, or industry compliance

If the Contractor chooses to bid on the RFQ/SOW, the Contractor shall prepare a written proposal in accordance with the terms of the RFQ and transmit to the DAS. An RFQ/SOW shall not constitute a binding order until a Purchase Order and RFQ/SOW.

The Contractor shall not proceed to commence the work under SOW/RFQ unless the Contractor is awarded the SOW.

II. Technical Requirements:

Future Projects solicited through the State's RFQ process will be conducted in cooperation with the New Hampshire Department of Information Technology (Dolt) and utilizing State agency. Dolt coordinates, reviews, and approves statewide information technology activities to ensure consistency and alignment with State strategic efforts.

A. Contractor Company and Staff Qualifications (Experience):

Contractor shall have a minimum of five (5) years of Microsoft-certified experience in provisioning modern M365&CS information technology and/or management services to government customers. Contractor staff and subcontractors must be located in the United States. During the term of this Agreement, Contractor must have and maintain administrative and technical staff of sufficient size and knowledge base to support the State in its initiatives.

B. Current Use of Contractor Solutions

When responding to a Request for Quote (RFQ/SOW), the Contractor's proposed solution must explicitly state what M365&CS licenses and any third-party applications are required.

Each RFQ/SOW may include specific requirements about the Contractor's experience in implementing a similar solution. Experience shall include requirements that include but are not limited to, how many solutions of a similar nature are implemented and operational, the size and complexity of the project, and any experience with statutory, regulatory, or industry standards. The specific Bidder-proposed functionality must be described.

Each SOW will identify award criteria. (The agency will select award criteria and point allocations.)

Data must not be removed or copied from the State's data environments or the Microsoft cloud environments without written, authorized permission of the State.

Contractor Initials JH

Date 10/2/23

C. Contractor Team

The Contractor Team must include individuals with substantial experience in:

- Each of the disciplines relating to his or her stated project role.
- Implementing Microsoft/Office 365/Azure Cloud Solutions.
- The discipline of effective Project Management.
 - Effective use of software change management best practice.
 - The discipline of effective risk and issue management.
 - Effective use of defect tracking tools that allow for reporting on test results.
- The discipline of effective M365&CS System Administration in a state government environment in the Microsoft Government Cloud Computing (GCC) environment.
 - Operational support of government entities comparable in size and complexity.
 - Compliance with the statutory and regulatory publications that is appropriate with the statement of work.
- The discipline of proper configuration for M365&CS.
 - Successful M365&CS roll-out.
 - M365&CS configurations that satisfy the unique needs of the State Agencies in New Hampshire.
 - The discipline of information architecture as related to the modern SharePoint Online experience, PowerShell, and Site Designs and Site Scripts.
 - The discipline of supporting business process with business automation with Power Apps, and Power Automate.
 - The discipline of supporting business process with business automation with Dynamics 365.
- The discipline of software development, quality assurance, and user acceptance testing activities with M365&CS third-party integrations.

D. Contractor Team Qualifications:

1. MICROSOFT ROADMAP

The Contractor must maintain a working understanding of the M365&CS roadmap. The Contractor shall use this knowledge to make informed, best practice recommendations to the State regarding M365&CS and SharePoint Online.

2. Program Support Roles

A. PROJECT MANAGER

The Contractor must have, maintain for the duration of this Agreement and engage Project Manager in any RFQ/SOW in this Agreement with the following minimum qualifications:

- Project Manager shall have, at least 5+ years of Program/Project Management experience with the Public Sector or Federal Government, and a proven track record of successfully overseeing the deployment of enterprise IT programs/projects.

B. M365&CS BUSINESS ANALYST

The Contractor must have, maintain for the duration of this Agreement and engage M365&CS Business Analyst in any RFQ/SOW in this Agreement with the following minimum qualifications:

Contractor Initials

Date

10/2/20

- M365&CS Business Analyst shall have at least 3+ years of experience with the Public Sector or Federal Government, and a proven track record with supporting the development of M365&CS solutions across enterprise IT programs/projects
- M365&CS Business Analyst shall have experience with developing user stories, use cases, business/IT requirements, process maps, standard operating procedures, and User Acceptance Testing documents
- M365&CS Business Analyst shall have experience with supporting the development of M365&CS within an Agile or DevOps environment.

3. Administration Roles | Operations

OPERATIONS are defined as the day-to-day maintenance and operational support. Any development in support of operations will be addressed in section 4: Operational Support Roles | Development below.

A. MICROSOFT/OFFICE 365 GLOBAL ADMINISTRATOR

The Contractor must have, maintain for the duration of this Agreement and engage Microsoft/Office 365 Global Administrator in any RFQ/SOW in this Agreement with the following minimum qualifications:

- Microsoft/Office 365 Global Administrator shall hold Microsoft Certifications that will be detailed in each individual RFQ/SOW
- Microsoft/Office 365 Global Administrator shall have at least 5+ years of Office 365 Administration experience with the Public Sector or Federal Government, and a proven track record of successfully overseeing the management and administration of Office 365 tools

B. COMPLIANCE ADMINISTRATOR and SECURITY & COMPLIANCE

The Contractor must have, maintain for the duration of this Agreement and engage Compliance Administrator in any RFQ/SOW in this Agreement with the following minimum qualifications:

- Compliance Administrator shall hold Microsoft certifications that will be detailed in each individual RFQ/SOW
- Compliance Administrator shall have at least 5+ years of Office 365 and Compliance Administration experience with the Public Sector or Federal Government, and a proven track record of successfully overseeing the management and administration of Exchange Online
- Compliance Administrator's experience shall be associated with direct compliance administration and data classification and sensitivity work in Office 365, Teams, OneDrive, and SharePoint Online
- Compliance Administrator shall be responsible for deliverables or techniques related to providing monitoring reports, project status updates, staff management (if applicable)

Category	Role	Description
Security & Compliance	Azure information protection admin	Manages labels for the Azure Information Protection policy, manages protection templates, and activates protection.

Contractor Initials

Date

[Handwritten Signature]
 11/27

Compliance admin	Manages regulatory requirements and eDiscovery cases, maintains data governance for locations, identities, and apps.
Customer Lockbox access approver	Manages Customer Lockbox requests, can turn Customer Lockbox on or off.
Security admin	Controls organization's security, manages security policies, reviews security analytics and reports, monitors the threat landscape.
Security operator	Investigates and responds to security alerts, manages features in Identity Protection center, monitors service health.

C. EXCHANGE ADMINISTRATOR

The Contractor must have, maintain for the duration of this Agreement and engage Exchange Administrator in any RFQ/SOW in this Agreement with the following minimum qualifications:

- Exchange Administrator shall hold Microsoft certifications that will be detailed in each individual RFQ/SOW.
- Exchange Administrator shall have at least 5+ years of Office 365 and Exchange Administration experience with the Public Sector or Federal Government, and a proven track record of successfully overseeing the management and administration of Exchange Online.
- Exchange Administrator shall be responsible for deliverables or techniques to providing system health and monitoring reports, project status updates, staff management (if applicable), resolving conflict/risk, and communicating with clients.

D. GROUPS ADMINISTRATOR

The Contractor must have, maintain for the duration of this Agreement and engage Groups Administrator in any RFQ/SOW in this Agreement with the following minimum qualifications:

- Groups Administrator shall hold Microsoft certifications that will be detailed in each individual RFQ/SOW.
- Groups Administrator shall have at least 5+ years of Office 365 and SharePoint Online Administration experience with the Public Sector or Federal Government, and a proven track record of successfully overseeing the management and administration of Office 365 Groups.
- Groups Administrator shall be responsible for deliverables or techniques to leverage when it comes to providing system health and monitoring reports, project status updates, staff management (if applicable), resolving conflict/risk, and communicating with clients.

E. SHAREPOINT ADMINISTRATOR

The Contractor must have, maintain for the duration of this Agreement and engage SharePoint Administrator in any RFQ/SOW in this Agreement with the following minimum qualifications:

- SharePoint Administrator shall hold Microsoft certifications that will be detailed in each individual RFQ/SOW.

Contractor Initials

Date

10/16/20

- SharePoint Administrator shall have at least 5+ years of Office 365 and SharePoint Administration experience with the Public Sector or Federal Government, and a proven track record of successfully overseeing the management and administration of SharePoint Online tools.
- SharePoint Administrator's experience shall be associated with direct administration of SharePoint Online
- SharePoint Administrator shall be responsible for deliverables or techniques to leverage when it comes to providing system health and monitoring reports, project status updates, staff management (if applicable), resolving conflict/risk, and communicating with clients

F. DYNAMICS 365 ADMINISTRATORS

The Contractor must have, maintain for the duration of this Agreement and engage Dynamics 365 Administrator in any RFQ/SOW in this Agreement with the following minimum qualifications:

- Dynamics 365 Administrator shall hold Microsoft certifications that will be detailed in each individual RFQ/SOW
- Dynamics 365 Administrator shall have at least 5+ years of Dynamics 365 Administration experience with the Public Sector or Federal Government, and a proven track record of successfully overseeing the management and administration of Dynamics 365 tools.
- Dynamics 365 Administrator shall be responsible for deliverables or techniques to leverage when it comes to providing system health and monitoring reports, project status updates, staff management (if applicable), resolving conflict/risk, and communicating with clients

G. TEAMS ADMINISTRATORS

The Contractor must have, maintain for the duration of this Agreement and engage Teams Administrator in any RFQ/SOW in this Agreement with the following minimum qualifications. The State does not expect a 1:1 staffing ratio:

- Teams Administrator shall hold Microsoft certifications that will be detailed in each individual RFQ/SOW
- Administrator shall have at least 5+ years of Office 365 and Teams Administration experience with the Public Sector or Federal Government, and a proven track record of successfully overseeing the management and administration of Teams
- Teams Administrator shall be responsible for deliverables or techniques to leverage when it comes to providing system health and monitoring reports, project status updates, staff management (if applicable), resolving conflict/risk, and communicating with clients?

Category	Role	Description
Collaboration	Teams communication admin	Assigns telephone numbers, creates and manages voice and meeting policies, and reads call analytics.
	Teams communication support engineer	Reads call record details for all call participants to troubleshoot communication issues.

Contractor Initials

Date

11/8/17

Teams communication support specialist
Teams service admin

Reads user call details only for a specific user to troubleshoot communication issues.

Full access to Teams & Skype admin center, manages Office 365 groups and service requests, and monitors service health.

H. ADDITIONAL ADMINISTRATIVE AND OPERATIONAL SUPPORT ROLES | DEVICES
Excluding the roles called out above, Contractor shall staff or support the following administrative roles for the daily maintenance and operation of the State's Microsoft/Office 365 tools. The State does not expect a 1:1 staffing ratio.

Category	Role	Description
Devices	Cloud device admin	Enables, disables, and deletes devices, and can read Windows 10 BitLocker keys.
	Desktop analytics admin	Can access and manage Desktop management tools and services.
	Intune admin	Full access to Intune, manages users and devices to associate policies, creates and manages groups.

I. ADDITIONAL ADMINISTRATIVE AND OPERATIONAL SUPPORT ROLES | COLLABORATION

Excluding the roles called out above, Contractor shall staff or support the following administrative roles for the daily maintenance and operation of the State's Microsoft/Office 365 tools. The State does not expect a 1:1 staffing ratio.

Category	Role	Description
	Kaizala admin	Full access to all Kaizala management features and data, manages service requests.
	Office apps admin	Manages settings, policies, and deployment of Office apps.
	Power BI admin	Full access to Power BI management tasks, manages service requests, and monitors service health.
	Power Platform admin	Full access to Microsoft Dynamics 365, PowerApps, data loss prevention policies, and Power Automate.
	Search admin	Full access to Microsoft Search, assigns the Search admin and Search editor roles, manages editorial content, monitors service health, and creates service requests.
	Search editor	Can only create, edit, and delete content for Microsoft Search, like bookmarks, Q&A, and locations.

J. ADDITIONAL ADMINISTRATIVE AND OPERATIONAL SUPPORT ROLES | READ-ONLY
Excluding the roles called out above, Contractor shall staff or support the following administrative roles for the daily maintenance and operation of the State's Microsoft/Office 365 tools. The State does not expect a 1:1 staffing ratio.

Contractor Initials

Date

10/8/20

Category	Role	Description
Read-Only	Global reader	Can view all administrative features and settings in all admin centers.
	Message Center privacy reader	Access to data privacy messages in Message Center, gets email notifications, has read-only access to users, groups, domains, and subscriptions.
	Message Center reader	Reads and shares regular messages in Message Center, gets email notifications, has read-only access to users, groups, domains, and subscriptions.
	Reports reader	Reads usage reporting data from the reports dashboard, Power BI adoption content pack, sign-in reports, and Microsoft Graph reporting API.
	Security reader	Read-only access to security features, sign-in reports, and audit logs.

K. ADDITIONAL ADMINISTRATIVE AND OPERATIONAL SUPPORT ROLES | OTHER
 Excluding the roles called out above, Contractor shall staff or support the following administrative roles for the daily maintenance and operation of the State's Microsoft/Office 365 tools. The State does not expect a 1:1 staffing ratio.

Category	Role	Description
Other	Billing admin	Makes purchases, manages subscriptions, manages service requests, and monitors service health.
	Service support admin	Creates service requests for Azure, Microsoft 365, and Office 365 services, and monitors service health.

4. Operational Support Roles | Development

DEVELOPMENT is defined as the advanced technical efforts that support the day-to-day maintenance and operations of the State's M365&CS environment. These development efforts include, but are not limited to:

- SharePoint Online
- PowerShell
- Site Designs and Site Scripts
- Scripts
- Power Apps
- Power Automate
- Third-party Integrations
- Dynamics 365

A. MICROSOFT TECHNICAL ARCHITECT(S)

The Contractor must have, maintain for the duration of this Agreement and engage Microsoft Technical Architect in any RFQ/SOW in this Agreement with the following minimum qualifications:

- Microsoft Technical Architect shall have at least 5+ years of experience with the Public Sector or Federal Government, and a proven track record of designing successful Microsoft/Office 365/Dynamics 365/Azure Cloud architecture solutions across enterprise IT programs/projects

Contractor Initials

Date

[Handwritten Signature]
 10/21/20

- Microsoft Technical Architect shall have experience with developing/designing Microsoft/Office 365, SharePoint Online, Dynamics 365, and/or Azure architecture solutions
- Microsoft Technical Architect's shall have experience with deploying Microsoft/Office 365 solutions within an Agile or DevOps environment.

B. SHAREPOINT ONLINE INFORMATION ARCHITECT

The Contractor must have, maintain for the duration of this Agreement and engage SharePoint Online Information Architect in any RFQ/SOW in this Agreement with the following minimum qualifications:

Note: The State is interested in the modern experience offered by SharePoint Online that leverages modern Office Group technology. The State is not interested in classic approaches to operating SharePoint Online.

- SharePoint Online Information Architect shall have at least 5+ years of experience with the Public Sector or Federal Government, and a proven track record with developing/managing Microsoft SharePoint Online solutions across enterprise IT programs/projects
- SharePoint Online Information Architect shall have experience with developing/designing Microsoft/Office 365
- SharePoint Online Information Architect's shall have experience with designing, configuring, and implementing the modern experience of SharePoint Online within an Agile or DevOps environment.

C. MICROSOFT LEAD PLATFORM DEVELOPERS

The State expects the various proposed lead platform developers to be proficient with Office 365, SharePoint Online, Dynamics 365, and other Microsoft Azure Cloud Solutions. The Contractor must have, maintain for the duration of this Agreement and engage Microsoft Lead Platform Developers in any RFQ/SOW in this Agreement with the following minimum qualifications:

- Lead Microsoft Lead Platform Developer shall have at least 3+ years of experience with the Public Sector or Federal Government, and a proven track record of deploying Microsoft/Office 365 solutions across enterprise IT programs/projects
- Lead Microsoft Platform Developer shall have expert proficiency with PowerShell, C#, and SPFx
- Lead Microsoft Developer shall have experience with developing/deploying Microsoft Platform solutions
- Lead Microsoft Platform Developer shall experience with deploying Microsoft/Office 365 solutions within an Agile or DevOps environment.

III. Additional Requirements

Except as otherwise provided in this Scope of Services or in SOW, all services performed under this Contract shall be performed between the hours of 8:00 A.M. and 4:00 P.M. EST, unless other arrangements are made in advance with the State. Any deviation in work hours shall be pre-approved by the Contracting Officer. The State requires ten-day advance knowledge of said work schedules to provide security and access to respective work areas. No premium charges will be paid for any off-hour work.

Contractor Initials

Date

[Handwritten Signature]
10/8/22

The State shall require correction of any defective work and the repair of any damages to any part of a building or its appurtenances caused by the Contractor or its employees, subcontractors, equipment or supplies. The Contractor must correct, repair, or replace all defective work, as needed, to complete said work in satisfactory condition, and damages so caused in order to restore the building and its appurtenances to their previous condition. Upon failure of the Contractor to proceed promptly with the necessary corrections or repairs, the State may withhold any amount necessary to correct all defective work or repair all damages from payments to the Contractor.

The work staff of the Contractor must consist of qualified persons completely familiar with the products and equipment that they will use. The Contracting Officer may require the Contractor to dismiss from the work such employees as the Contracting Officer deems incompetent, careless, insubordinate, or otherwise objectionable, or whose continued employment on the work is deemed to be contrary to the public interest or inconsistent with the best interest of security and the State.

Neither the Contractor nor its employees or subcontractors shall represent themselves as employees or agents of the State.

While on State property the Contractor, its employees, and its sub-contractors shall be subject to the authority and control of the State, but under no circumstances shall such persons be deemed to be employees of the State.

All personnel shall observe all regulations or special restrictions in effect at any State agency location at which services are to be provided.

The Contractor's personnel shall be allowed only in areas where services are to be provided. The use of State telephones by the Contractor, its employees, or its sub-contractors is prohibited.

If sub-contractors are to be utilized, Contractor shall provide information regarding the proposed sub-contractors including the name of the company, their address, contact person, and three references for clients they are currently servicing. Approval by the State must be received prior to a sub-contractor starting any work.

5. LIMITATION OF LIABILITY

Subject to applicable laws and regulations, in no event shall the Parties be liable for any consequential, special, indirect, incidental, punitive or exemplary damages. The Contractor's liability to the State for any claims, liabilities, or expenses relating to this Contract shall not exceed two times (2X) the total Contract price set forth in Contract Agreement - P-37, General Provisions, Block 1.8.

Notwithstanding the monetary limitation contained in this paragraph above, in the event a claim or action is brought against the State in which infringement, violation of Contractor's obligations under the Business Associate Agreement, and/or any third party claims for bodily injury, death, or damage to real or tangible personal property to the extent caused by the Contractor's negligence or willful misconduct are alleged, the Contractor, at its own expense, shall defend, indemnify and hold harmless the State against all such claims or actions for any expenses, costs or damages, including legal fees and expenses, incurred by the State in connection with such claims or actions.

Contractor Initials

Date

10/8/20

6. DEBARMENT, SUSPENSION, INELIGIBILITY AND VOLUNTARY EXCLUSION LOWER TIER COVERED TRANSACTIONS.

The Contractor certifies, by signature of this contract, that neither it nor its principals is presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participation in this transaction by any Federal or State Department or Agency.

7. CONFIDENTIALITY & CRIMINAL RECORD.

If requested by the using agency, the Contractor and its employees, and Sub-Contractors (if any), shall be required to sign and submit a Confidential Nature of Department Records Form and a Criminal Authorization Records Form. These forms shall be submitted to the individual using agency prior to the start of any work.

**EXHIBIT C
METHOD OF PAYMENT**

1. CONTRACT PRICE

The Contractor hereby agrees to provide Microsoft/Office 365/Azure Cloud Solutions Professional Services in complete compliance with the terms and conditions of this Agreement and any future RFQ/SOW awarded to the Contractor. The Contractor acknowledges and agrees that this is a not-to-exceed Agreement with an aggregate price limitation of \$10,000,000.00 for all future SOW. This price limitation is applicable to multiple vendors, and no funds will be paid to the Contractor once the price limitation is reached. This price limitation is not considered a guaranteed or minimum figure; however, it shall be considered a maximum figure for all future SOW from the Effective Date through the expiration date as indicated in Form P-37 Block 1.7.

2. PRICING STRUCTURE

Contractor shall provide the services at the not-to-exceed hourly rate set in the Table below. This pricing for hourly staff or Project staffing shall be effective for the term of this Contract, any extensions thereof and the Statement of Work.

POSITION	Year 1	Year 2	Year 3
	Hourly Rate	Hourly Rate	Hourly Rate
PROJECT MANAGER	\$150.00	\$150.00	\$150.00
M365&CS BUSINESS ANALYST	\$140.00	\$140.00	\$140.00
MICROSOFT/OFFICE 365 GLOBAL ADMINISTRATOR	\$120.00	\$120.00	\$120.00
COMPLIANCE ADMINISTRATOR	\$175.00	\$175.00	\$175.00
EXCHANGE ADMINISTRATOR	\$120.00	\$120.00	\$120.00
GROUPS ADMINISTRATOR	\$120.00	\$120.00	\$120.00
SHAREPOINT ADMINISTRATOR	\$120.00	\$120.00	\$120.00
DYNAMICS 365 ADMINISTRATOR	\$190.00	\$190.00	\$190.00
TEAMS ADMINISTRATOR	\$120.00	\$120.00	\$120.00

3. PRICING QUOTATIONS FOR INDIVIDUAL PROJECTS

State will request quotations by providing a RFQ/SOW describing the services required and the applicable technical qualifications. The quoted hourly rates shall not exceed the rates established under this Contract. The RFQ/SOW shall be issued to all contractors under this Contract for a quote. The project engagement will be based upon the lowest cost qualified quote.

The State reserves the right to either seek additional discounts from Contractor or to contract separately for a single purchase, if in the judgment of the State, a project required is sufficiently large, to enable the State to realize a cost savings, over and above the prices set forth in Exhibit C, Section 2, whether or not such a savings actually occurs.

4. INVOICE

Itemized invoices shall be submitted to the individual agency after the completion of the job/services and shall include a brief description of the work done along with the location of work.

Contractor shall be paid within 30 days after receipt of properly documented invoice and acceptance of the work to the State's satisfaction. Each RFQ/SOW may contain more detailed invoicing requirements.

The invoice shall be sent to the address of the using agency under agreement.

5. PAYMENT

Payments may be made via ACH or P-Card. Use the following link to enroll with the State Treasury for ACH payments: <https://www.nh.gov/treasury>

Executive Summary

We would like to thank you for this opportunity to submit our response to the NEW HAMPSHIRE DEPARTMENT OF ADMINISTRATIVE SERVICES, DIVISION OF PROCUREMENT, AND SUPPORT SERVICES for the RFP # 2312-21 MICROSOFT/OFFICE 365/AZURE CLOUD SOLUTIONS PROFESSIONAL SERVICES.

We specialize in Microsoft 365, with most of our resources having over ten years of experience working with Microsoft technologies.

- We have a successful history of supporting entities in the government sector.
- TrnDigital has the breadth and depth of experience in handling transformational projects that are aligned with Microsoft's roadmap.
- We have extensive experience in Supporting Microsoft technologies such as Microsoft 365, Office 365, Azure, Dynamics 365, and services under these umbrellas, including Azure AD, SharePoint Online, Teams, Exchange, and Security & Compliance.
- We have implemented many Consulting, Implementation, Development, and Support engagements focused on Microsoft's Cloud offerings in both the commercial and government tenants.
- As a Security Service Provider, we offer Proactive Threat Detection and Rapid Remediation services.
- We have large pools of Microsoft certified resources, and we have Gold and Silver competencies across Microsoft offerings.

Our Microsoft Services

TrnDigital's RFP Response # 2312-21 for Microsoft/Office 365/Azure Cloud Solutions Professional Services

We believe that we have a team with the prerequisite knowledge, experience, and abilities to perform the services you have outlined. We are prepared to accept the responsibilities accompanied by the award of this engagement and are confident in our abilities to meet the goals outlined in this RFQ.

Thank you again for this opportunity to submit our response. We look forward to discussing our approach and process with you in further detail.

TrnDigital's Qualifications

- Full legal company name: TRN Digital LLC d.b.a TrnDigital
- Year business started: 2017
- If applicable, information on any parent/subsidiary relationships with any other company or companies: TRN Digital LLC is the parent company of 'TrnDigital Consulting Private Limited.'
- State of incorporation: New Jersey
- Location of headquarters: **200 Portland St,
5th Floor,
Boston, MA 02114
(781) 691-4350**
- Current number of people employed: 65
- Details of any litigation your company may be a party to in which an adverse decision might result in a material change in the company's financial position or future viability: N/A
- Presence in the State of New Hampshire: Yes, registered as a Foreign LLC
- Identification of which services are provided via the bidder and those being resold or provided by a subcontractor: N/A
- Sub-contractor including company name, address, contact person and three references for clients they are currently servicing: N/A

Why TrnDigital

 <p>Proven Microsoft experience</p>	<ul style="list-style-type: none"> • Experience in executing projects in SP 2007, SP 2010, SP 2013 and SP Online • Managed multiple customers on Cloud under shared and dedicated models. • Rich experience in Microsoft consulting space to provide industry leading consulting service. Appropriate for large digital transformation involving SharePoint
 <p>Proprietary Tools & Reusable Components</p>	<ul style="list-style-type: none"> • TrnDigital's IP and frameworks ensure process-focused and continuously optimized delivery. • TrnDigital Migration Manager streamlines all aspects of Migration offering automation at every step. • TrnDigital Support Bot, shift your office 365 How-Tos to self-service Bot.

<p>Microsoft Cloud Solution Provider: Direct Partner</p> <p>Microsoft Premier Services for Partners</p> <p>Microsoft Planning Services:</p> <ul style="list-style-type: none">• SharePoint Deployment Planning Services• Desktop Deployment Planning Services• Skype for Business and Exchange Deployment Planning Services• Developer Tools Deployment Planning Services

Bidder Team Qualifications

TOPIC 1: MICROSOFT ROADMAP

As the IT landscapes become increasingly complex and harder to manage, evergreen IT has become the norm and we ensure our clients are on top of the Microsoft 365 changes.

- Your process for maintaining an up-to-date understanding of sunset, current, and expected functionality in Office/Microsoft 365/Cloud Solutions and SharePoint Online while remaining knowledgeable about Microsoft's roadmap.
- Making enterprise recommendations to clients (both short and long-term) based on the known roadmap and client business requirements.

Below is the practice we follow and recommend:

1. Center of Excellence Team's constant reviews

TrnDigital's Center of Excellence Team regularly reviews the Microsoft Message Center. We have access to Targeted Release Tenants, and we, on an ongoing basis, evaluate the Microsoft 365 Roadmap to learn about features that have been launched, are rolling out, are in development, have been canceled, or previously released.

Our Team actively participates in all Microsoft events, is part of the Microsoft Community, and leads various sessions with the tech community to share our experiences. We have also co-founded the Boston Office 365 User Group over 5 years ago and continue to support it as a Platinum Sponsor.

2. Testing

TrnDigital's Team maintains Azure virtual environments with the latest build, tests updates against customizations, and take the required action as applicable.

3. Align Release schedules

Our teams follow release cadence, which aligns with Microsoft release channels and targeted releases.

4. Evaluate and determine gaps

We work with our customers to help them adapt through our robust framework of service adoption and Change Management. We carry a periodic review of data from tenant to review the utilization of features released. We also hold executive briefings for our clients to explain upcoming changes and train users on the new features.

If any of the new releases break existing customization, we work on updating the customizations, and in extreme circumstances, we work with Microsoft for resolution.

5. Communication

TrnDigital's RFP Response # 2312-21 for Microsoft/Office 365/Azure Cloud Solutions Professional Services

All our customers receive two kinds of updates:

- a) **Scheduled Updates:** These are frequent newsletters where we keep the stakeholders informed of the upcoming changes and new features.
- b) **Critical Updates:** Any changes in functionality which may have an implication on the customer's application/process are communicated along with the recommended options available.

TOPIC 2 – PROJECT MANAGER

- Does your Project Manager have at least 5+ years of Program/Project Management experience with the Public Sector or Federal Government, and a proven track record of successfully overseeing the deployment of enterprise IT programs/projects? If yes, please elaborate.

TrnDigital's Project Managers have over 10+ years of experience in successful project management and program management across enterprise IT Programs. Our project managers hold certifications such as PMP and Certified Scrum Masters. Most TrnDigital Project Managers have also led successful Government projects, including at the state and federal level.

- Of their experience, how much of the Project Manager's experience is associated with managing the deployment of and projects related to M365&CS?

TrnDigital's Project Managers have 10+ years of experience in managing Microsoft technology deployments. Most have been involved in M365&CS since the inception and worked heavily with on-premises technologies prior. 90% of our current business is directly related to M365&CS.

- What were some of the Project Manager's successes and challenges during those Microsoft solution deployments? What did the Project Manager do to resolve or overcome those challenges, and what was the outcome?

PM challenges:

1. **Undefined Goals** – When goals are not clearly identified, the whole project and Team can suffer. Lack of the necessary technical information for planning and scheduling the tasks of the project typically leads to poor estimation. A technical project manager can provide insights and ask the right questions to establish and communicate clear goals from the outset.
2. **Scope Changes** – Also known as scope creep, this occurs when project management allows the project's scope to extend beyond its original objectives. Clients and supervisors may ask for changes to a project, and it takes a strong project manager to evaluate each request and decide how and if to implement it while communicating the effects on budget and timelines to all stakeholders.

Managing Project Issues:

All projects hit issues from time to time. We know the processes for issue management and how best to deal with problems as they arise. With our understanding of how to assess a project issue, issue management is an easy habit incorporated into the weekly routine. We set some time aside to go through your issue log each week, and find that it's an easy job to stay on top of managing problems.

Coping with Changes:

As we work with a large Program with multiple stakeholders managing changes becomes a vital aspect of Project Management. It is harder to manage the change that is aimed squarely at the project team,

TrnDigital's RFP Response # 2312-21 for Microsoft/Office 365/Azure Cloud Solutions Professional Services

upsetting the detailed project schedule and creating new work and a whole pile of documentation updates.

We have a change management process that the teams follow. Following defined steps makes it easier to manage changes because it is structured and repetitive and ensures the success of PM.

The project manager acts as a bridge between the Client and Team in setting up the requirement framework and building the work breakdown structure. We ensure each goal and milestone are well-defined with the timeline to achieve it. Timely updating the schedule; managing risks involved, involving the changes by following agile methodologies, and assessing the impact of each change in scope/budget/resource to achieve the project deliverables on time.

We have successfully delivered large scale migrations, time-critical custom applications, security, and change management projects, which were delivered on time and within budget.

- **What deliverables or techniques does your Project Manager leverage when it comes to providing budget updates, project status updates, managing staff, resolving conflict/risk, and communicating with clients?**

We maintain trackers to record any changes in terms of budget or project status and overall resource management.

Ensure each of them is centralized and can be accessed by all stakeholders; we maintain it in real-time and make sure everyone is working on the same version, which ensures efficiency overall in the project updates.

Conflict management:

There are five general techniques we deploy for resolving conflict. Each method has its place and use:

- 1) **Withdraw/avoid:** Retreating from an actual or potentially avoidable conflict situation, handling the issue when all stakeholders are in a resourceful state.
- 2) **Smooth/accommodate:** Emphasizing areas of agreement rather than areas of difference; establishing common ground and understanding of the underlying needs of all stakeholders to maintain harmony and relationships.
- 3) **Compromise/reconcile.** Searching for solutions that bring some degree of satisfaction to all parties to resolve the conflict temporarily or partially.
- 4) **Force/direct.** Taking a stand in line with the goals and objectives of the project and executive vision to resolve external influences.
- 5) **Collaborate/problem-solve:** Incorporating multiple viewpoints and insights from differing perspectives, with a cooperative attitude and open dialogue that typically leads to consensus and commitment.

Communicate with the Client effectively:

TrnDigital's RFP Response # 2312-21 for Microsoft/Office 365/Azure Cloud Solutions Professional Services

We understand the importance of remaining disciplined and send the client project progress and updates at the agreed timeframe. We highlight the following:

1. Completed tasks from the previous week.
2. Budget spent and budget remaining on each phase, e.g., design, functional specification, etc.
3. Planned tasks for the following week and who is responsible, PM, or the Client.
4. Any tasks that are slipping over schedule or over budget, and if so, why. Also, consider the potential impact on the project.

TOPIC 3 – M365&CS BUSINESS ANALYST

- Does your M365&CS Business Analyst have at least 3+ years of experience with the Public Sector or Federal Government, and a proven track record with supporting the development of M365&CS solutions across enterprise IT programs/projects? If yes, please elaborate.

Yes, TrnDigital's Business Analysts have 5+ years of experience with different agencies and have a specialist skill in Microsoft technologies.

- Does your M365&CS Business Analyst have experience with developing user stories, use cases, business/IT requirements, process maps, standard operating procedures, and User Acceptance Testing documents?

Yes, TrnDigital's Business Analyst has experience working both waterfall and agile development frameworks. They understand the INVEST principles of writing user stories, use cases, business, and technical requirements, document business processes current and to-be state, and UAT documents.

- Please describe the techniques, software tools, process, and methodology that the M365&CS Business Analyst leveraged to support the development of the Microsoft solution(s) within a Government Cloud environment. What was the business value and impact provided from those Microsoft solutions?

TrnDigital's Business Analysts are experienced in the waterfall and iterative SDLCs, GAP Analysis, Entity-Relationship Modeling, Data Flow Modeling, Business Process Modeling, and tools such as Microsoft Visio, JIRA, Rally, TFS and Azure Boards.

- Describe the M365&CS Business Analyst's experience with supporting the development of M365&CS within an Agile or DevOps environment. Please provide your approach and business value to the customer as a result of supporting the Microsoft solution(s).

TrnDigital's Business Analysts have extensive experience and understanding of Microsoft and Agile concepts. The features, sub-features, EPICs are defined based on business goals. The stories are created as per the INVEST principle and best practices. The acceptance criteria are defined based on the stakeholder interviews and reviewed and signed off.

TrnDigital's Business Analysts act as a bridge between departments to help IT members understand business objectives and help management professionals understand technological solutions. We act as tech translators for business, which creates a faster turnaround.

Along with application demos, TrnDigital's Business Analysts have also provided training to end users to facilitate adoption.

TrnDigital's RFP Response # 2312-21 for Microsoft/Office 365/Azure Cloud Solutions Professional Services

• What were some of the Microsoft/Office/Cloud Solutions 365 Business Analyst's successes and challenges during a M365&CS deployment? What did the M365&CS Business Analyst do to resolve or overcome those challenges, and what was the outcome?

With a track record of successful projects on:

- 1) Large Scale Migration projects with a mix of archived, migrated, and legacy applications rebuilt as per new versions
- 2) Custom development projects, Intranet projects; etc. with multiple agile teams working together to deliver the concept.
- 3) Successful User Acceptance Testing (UAT) with timely signoffs

TrnDigital's business analysts have the below characteristics which contributed to the success:

- 1) Understanding of specific business problems solved through Microsoft Technology
- 2) Understanding of the technology potential and limitations
- 3) Credibility based on experience
- 4) Strong dash of project management

Some of the challenges faced are:

1. Getting Stakeholders to Make Time

When the changes have been proposed by IT and not driven by a business need, it becomes difficult to get stakeholder time. BAs in this situation may end up spending a significant portion of their time chasing after stakeholders who would rather be doing something else with their time. Common examples include trying to get stakeholders to participate in UAT sessions, dealing with irregular attendance at elicitation sessions, and canceled meetings. Where users are not committed to the project, the BA has to spend extra time and effort trying to get them to do their bit.

One approach that works is ensuring that managers are copied in all communications and are carried along. Once functional managers are involved, even if it is to a small degree, team members become more willing to fall in line. The other approach is to work with the project sponsor to have the project-driven from the top.

2. Conflict Among Stakeholders

One thing that can be extremely difficult to control on any project is how stakeholders relate to one another. For instance, some stakeholders may not get along and find it difficult to work well together.

In such cases, it is essential to help stakeholders separate work issues from business concerns, manage stakeholder interactions proactively, and be sensitive to any political undertones. We reinforce the importance of working together towards a common goal and facilitate it. With our experience, we understand the importance of reducing conflict during stakeholder interactions and manage conflicting requirements.

3. Misalignment Between Business Needs and Technology

Another common issue occurs when the business wants something that the IT department simply cannot deliver – either due to the unavailability of resources or some other compelling reason. A lack of understanding of the concerns or limitations of the technical infrastructure can cause issues. This can be minimized by educating stakeholders so that they understand the technical limitations rather than just focusing on their requirements. The more stakeholders understand the big picture, the more they will be willing to accept alternative solutions that offer a practical match between their needs and the technical infrastructure.

4. Changing requirements

It is not uncommon where requirements have been agreed and signed off only for stakeholders to indicate during UAT that they want key functionalities changed. There is always a dilemma as to whether a BA should accommodate the change.

The best way is first to understand the reason for the change. If it is regulatory, then the change will most likely have to be included but at the cost of impact in the project delivery. If it is not regulatory, then a dialogue is required with the customer to understand the priority, whether it can be included in the current phase or if it could be delivered in the next phase. The best method is to do the MoSCoW analysis.

TOPIC 4: MICROSOFT/OFFICE 365 GLOBAL ADMINISTRATOR

- Does your Microsoft/Office 365 Global Administrator hold any Microsoft Certifications? If yes, please elaborate.

TrnDigital's M365/O365 Global Administrators have Microsoft Certifications including:

- MCSE: SharePoint
- MCSA: Office 365
- Microsoft 365 Certified: Security Administrator Associate

- Does your Microsoft/Office 365 Global Administrator have at least 5+ years of Office 365 Administration experience with the Public Sector or Federal Government, and a proven track record of successfully overseeing the Management and administration of Office 365 tools? If yes, please elaborate.

Yes, we have M365/O365 Global Administrators that have extensive experience with the GCC and GCC High Tenants since their inception in 2015.

- Of their experience, how much of the Microsoft/Office 365 Global Administrator's experience is associated with direct administration of M365&CS?

While many routine processes are automated via PowerShell and Azure Function Apps, many things are still directly managed on a daily basis by our Global Admins.

- What were some of the Microsoft/Office 365 Global Administrator's successes and challenges during previous Microsoft/Office 365 administration work? What did the Microsoft/Office 365 Global Administrator do to resolve or overcome those challenges, and what was the outcome?

Success

Champion the adoption of Office 365 services as appropriate for businesses through the below steps:

- Manage and monitor Office 365 services and desktop support (Laptops)
- Formulate and create Office 365 SharePoint sites for domain users and external client access
- Administer and support Office 365 Azure and Exchange policies
- Assist with the migration of data into the Office 365 cloud platform and Office 365 SharePoint
- Troubleshoot and resolve issues with user access to cloud services
- Monitor and communicate with the stakeholders on the performance of the services.

Maintain a highly secure system

- Through proper configuration and system access monitoring
- Assist with the creation of policies around the proper use of Office 365 services and support.

Deliver a consistent process for requests, incident and problem escalation along with resolution

- Administer and support Office 365 and MS Exchange policies
- Participate in gathering and analysis of business requirements for software capabilities.

TrnDigital's RFP Response # 2312-21 for Microsoft/Office 365/Azure Cloud Solutions Professional Services

- Provide AV, Teleconferencing, Video Conferencing, etc. technical assistance
- Administer and support system backup and disaster recovery processes

Maintain inventory of equipment and software licenses.

Challenges

There are some critical Office 365 challenges, many falling under the area of governance: Visibility, RBAC (role-based access control), license management, adoption, provisioning and de-provisioning, and misconfiguration — which is solved through Policy Management.

We realize that if customers do not address these Office 365 challenges, they face millions of dollars in unneeded licensing fees, suffer security vulnerabilities, and fail to maximize the investment in Office 365 productivity tools. Our Team works to optimize and "right-size" the license spend, mitigate risk by identifying security vulnerabilities, and maximize the investment in Office 365 through adoption campaigns and just-in-time learning.

What did the Microsoft/Office 365 Global Administrator do to resolve or overcome those challenges, and what was the outcome?

Visibility – Prevent and Fix Problems, Ensure Smooth Operation

- Administration and Reporting – Manage licenses in Azure
- Permissions and Delegation – Assign license pools and create remote admins to efficiently manage thousands of users across multiple regions.
- SaaS Product Adoption – Report product usage across a variety of user cross-sections
- Accounting and Chargebacks – Filter chargeback costs by department, region, etc
- Security and Compliance – Track suspicious sign-ins, email forwards, and external server attacks.
- Hybrid and Cloud – Manage Office 365 solutions across multiple deployment structures

Role-Based Access Control (RBAC) – Fine Tuning Office 365 Admin Permissions and Delegation

Create, control, and delegate admin permissions across the entire Office 365 set of applications. Granting highly granular permissions to administrators Office 365 IT to tightly control access to all the applications in Office 365 tenant. We manage the entire organization served by Office 365 by organizing into logical groups, or sub-tenants, based on Active Directory (AD) attributes. Once the organization is logically divided, regional-admins can be assigned to the sub-tenants. This granular control over permissions carries over to reporting. Here both the central IT group and regional admins can get reports on what is happening with the local users in the sub-tenant. This level of detail is critical for compliance audits, spotting trends, and troubleshooting.

License Management – Through proper Management and ongoing audit, you pay only for what you use.

- What deliverables or techniques does your Microsoft/Office 365 Global Administrator leverage when it comes to providing system health and monitoring reports, project status updates, staff management, resolving conflict/risk, and communicating with clients?

TrnDigital's RFP Response # 2312-21 for Microsoft/Office 365/Azure Cloud Solution's Professional Services

1. We ensure day-to-day business operations run smoothly with comprehensive Office 365 monitoring, our monitoring tools provide full-service Office 365 monitoring built to monitor, track, alert, and report on Office 365 usage and availability. You can view Office 365 performance and availability metrics alongside your other monitored systems and applications to achieve critical visibility and enjoy a complete Office monitoring solution.
2. Use Office 365 email monitoring to keep track of your Team's email accounts and usage we monitor exchange accounts, server, and admin portal information. We also track and generate Office 365 Exchange reports on user/shared mailbox growth, users over quota, archived mailboxes, inactive mailboxes, mobile devices, mailbox groups, and more.
3. We work towards improving collaboration between teams and boost productivity with Office 365 SharePoint with easy provisioning policies and documented SOPs. We enable policies that empower users to collaborate with any devices while balancing the risks through security policies.
4. We ensure that Management has a track of all the developments and plan the roadmap and implementation through scheduled periodic meeting for tactical and for strategic service review.

TOPIC 5: COMPLIANCE ADMINISTRATOR and SECURITY & COMPLIANCE

Our security team consists of the *Azure information protection admin, Compliance admin, Security admin and Security operator* roles.

- Does your Compliance Administrator hold any Microsoft certifications? If yes, please elaborate.

TrnDigital's Compliance Administrators have Microsoft Certifications, including:

- Microsoft Certified: Azure Security Engineer Associate
- Microsoft 365 Certified: Security Administrator Associate

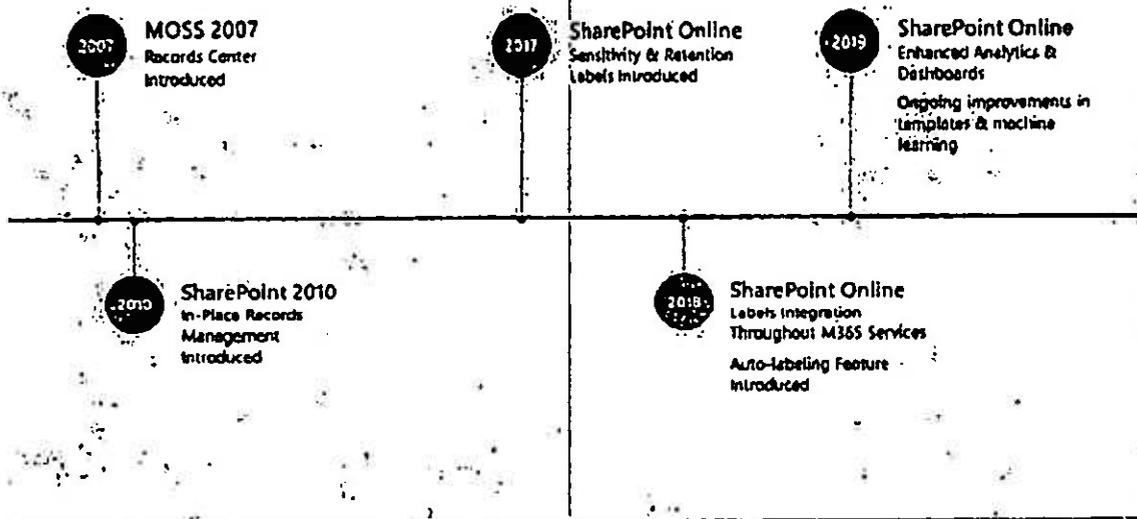

- Does your Compliance Administrator have at least 5+ years of Office 365 and Compliance administration experience with the Public Sector or Federal Government, and a proven track record of successfully overseeing the Management and administration of Exchange Online? If yes, please elaborate.

Yes, the average experience our Administrators is over 10 Years, with 5+ years of experience in Office 365 and compliance administration. Our Administrators have executed multiple security and compliance project for enterprises and agencies providing overall Office 365 security expertise including strong knowledge of Exchange Online, Azure Active Directory, Azure Information Protection, Information Rights Management, single sign-on, and multi-factor authentication and related technologies (including Microsoft Enterprise Mobility + Security)

- Of their experience, how much of the Compliance Administrator's experience is associated with direct compliance administration and data classification and sensitivity work in Office 365, Teams, OneDrive, and SharePoint Online?

Our Team has been working with SharePoint's Record Center for over 10 years and has more recently adopted Microsoft's Retention & Sensitivity Labels since they were announced in 2017. Since the initial release, Microsoft has released over 100 features & enhancements to rapidly mature the compliance features across all Office 365 Services including Teams, OneDrive, and SharePoint Online.

SharePoint / O365 Records Management History

- What were some of the Compliance Administrator's successes and challenges during previous Office 365 Compliance administration work? What did the Compliance Administrator do to resolve or overcome those challenges, and what was the outcome?

Success

- **Staying on top of new features:** Understanding functionality and the various roles integrated within the suite of features is necessary for maximum impact. New features and functions are added to the SCC regularly, so staying informed through various whitepapers and release notes is important.
- **Provide Professional Support:** Our administrators manage the data to day operations, records management, etc. and develop and maintain the project with a variety of data including analysis, compliance reports to ensure compliance at all times.

Challenges

Complicated policy management: With the zero-trust model, an organization only allows access between entities that have to communicate with each other. IT and security teams secure every communication channel and remove generic access to prevent malicious parties from eavesdropping or obtaining critical data or personally identifiable information (PII). The problem with the strategy is that implementing it in Azure Active Directory (Azure AD) is highly complicated. For instance, IT and security teams can label an employee an "Application Administrator," which gives them and anyone else with that label the ability to change different attributes. With experienced administrators implementing security best practices and role-based access control (RBAC) allows organizations to partition permissions based on job roles, resulting in far fewer, truly trusted global administrators. These global admins are augmented by a set of local, or business unit focused admins with no global access, all leading to far better protection for your O365 environment.

Mixing legacy SharePoint Records Management with Retention Labels: While Retention Labels were introduced in 2017, it took a couple of years before companies were willing to trust their retention schedules with the new technology. Prior to Retention Labels, many clients were using SharePoint's In-Place Records Management. The challenge was transitioning clients from the legacy approach to the modern approach while ensuring data integrity and ensuring original retention schedules were maintained. This was done through careful planning, execution of numerous proofs-of-concept and pilots, and through training employees on the differences of approach and functionality. Ultimately this was proven to be successful and is something that needs a lot of consideration.

Difficult with audit log and audit functions: For Microsoft Office 365 subscribers with Enterprise Plan E3 (or below), the Office 365 unified audit log retains audit events for only 90 days. Even the Office 365 Enterprise Plan E5 provides only one year of audit logs. However, many organizations are subject to regulatory mandates that require the retention of audit logs for much longer periods. Manual Export of the event logs is time-consuming, fragmented across files, and error-prone. Any misses with the manual Export will lead to the irrevocable loss of the audit data.

TrnDigital offers O365 Audit Manager, a proprietary tool with the below features

Office 365 Audit Manager

A robust tool that provides a better way to manage your Office 365 environment.

FEATURES

<p>Database Storage Extracts the enormous amount of data and stores it in a manner that it can be queried</p>	<p>Extended Retention Retain the audit logs for as long as they are required for your specific needs</p>	<p>Configurable Export Schedule the timeline you would like to have logs exported</p>	<p>Source, Target Config Choose the specific source and the location you would like to export the logs to.</p>
<p>Error Handler Provides the redundancy you need to avoid any loss of data.</p>	<p>Alert on Events Fail event alerts are sent to the administrators</p>	<p>Need Based Access Unlike out of the box requirement of admin privileges grant need-based access</p>	<p>Streamlined Deployment Easily updateable configuration choices and quick one-stop deployment.</p>

The "right to be forgotten" challenge: Compliance is a big security and economic issue. There are almost frequent incidents of fines occurring due to GDPR and other privacy regulations like CCPA. There is a lot involved in being compliant with GDPR, foremost among its statutes is the right to be forgotten. This statute states that individuals have the right to ask organizations to delete their personal data. However, as many businesses have learned, it is difficult to fulfill this requirement if the IT or security team cannot locate personal information or know how it was used.

TrnDigital's RFP Response # 2312-21 for Microsoft/Office 365/Azure Cloud Solutions Professional Services

We enable organizations to track and audit individual user accounts to make sure that they not only comply with this request but have processes in place. We have helped enterprises take proactive measures to account for their data and how it is accessed and shared externally. Thus, helping clients maintain a solid organizational security posture.

• What deliverables or techniques does your Compliance Administrator leverage when it comes to providing monitoring reports, project status updates, staff management (if applicable), resolving conflict/risk, and communicating with clients?

The Security & Compliance Center (SCC) is the heart of alerting and reporting within your O365 organization; our administrators take responsibility for managing, monitoring, and reducing risk. We ensure that Management has the track of all the developments and plan the roadmap and implementation through scheduled periodic meeting for tactical and for strategic service review.

TOPIC 6: EXCHANGE ADMINISTRATOR

- Does your Exchange Administrator hold any Microsoft certifications? If yes, please elaborate.

Yes, all our resources are required to attain technical certification across Microsoft Skills to keep them up to speed with the latest technology changes. This is one of the line items in their yearly appraisals.

Below are the certifications of our Exchange Administrators:

- Microsoft 365 Certified: Messaging Administrator Associate
- Administering Microsoft Exchange Server
- Designing and Deploying Microsoft Exchange Server

- Does your Exchange Administrator have at least 5+ years of Office 365 and Exchange Administration experience with the Public Sector or Federal Government, and a proven track record of successfully overseeing the Management and administration of Exchange Online? If yes, please elaborate.

Yes, the average experience our Exchange Administrators are over 10 Years of experience with 5+ years of experience supporting large scale enterprise, government projects, fortune 500 companies to design, configure and support messaging systems such as on-premises and hybrid Exchange Organizations, Exchange Online and establishing guidelines and standards to support of existing infrastructure

- Of their experience, how much of the Exchange Administrator's experience is associated with direct administration of Exchange Online?

The average experience our Exchange Administrators are over 10 Years of experience with 5+ years of exchange online experience.

- What were some of the Exchange Administrator's successes and challenges during previous Exchange Online administration work? What did the Exchange Administrator do to resolve or overcome those challenges, and what was the outcome?

Success:

Deliver high-quality implementation and support services:

- Our MS Exchange administrators are adept at providing day to day administration support.
- They help in setting up user accounts and mailboxes along with backup, security and restoring files, configure new users, etc.
- They perform routine server maintenance, proactively manage production environments by running diagnostics regularly.
- Responsible for helping with user queries and troubleshooting issues.
- Manage file sharing permissions to monitor mailbox quotas/space and also to check where the email has stuck and made sure that the email reaches its destination.
- Making sure that the incidents get resolved with the SLAs and ensure that the system goes through a scheduled patching process.
- Manage mail-related systems and tools
- Perform server migration along with backup and disaster recovery

Challenges:

The health of the Exchange Server also depends on the various configurations and settings used in it. Any single misconfiguration or change in the settings may cause errors that may be quite hard to remove.

Optimizing Exchange Server storage: It is very critical for an Exchange Administrator to plan Exchange Server storage depending on the performance requirements and the sizing requirements of the Exchange information store. The average performance of Exchange Server speed is counted based on Input-Output operations per second. The average IOPS value of a heavy Exchange user is 0.75, and the Exchange Administrator should plan the Infrastructure keeping the IOPS in mind.

Efficient network routing for better email flow: Sometimes, mail flow errors come due to bad routing configurations. The Exchange Administrator should get complete information on SMTP virtual server and network connectors. If an administrator manages to use the connectors efficiently, then the mail flow gets better.

Constant Exchange Server monitoring: If not properly monitored, organizations are prone to data loss and hacking. Exchange Server can send alerts at various times to monitor mailbox behavior and services. These alerts provide information about Hard disk utilization and performance, Growth of log files and Information store, CPU utilization, SMTP related parameters – health, performance, and connectivity.

Issues with antivirus: Any misconfiguration of antivirus programs may lead to the corruption of the database or loss of important data. Our experts make sure that necessary exclusions and configurations are in place for a scan on Exchange databases, log files, and important files.

- What deliverables or techniques does your Exchange Administrator leverage when it comes to providing system health and monitoring reports, project status updates, staff management (if applicable), resolving conflict/risk, and communicating with clients?

Our administrators take responsibility for managing, monitoring, and reducing risk. We ensure that Management has the track of all the developments and plan the roadmap and implementation through scheduled periodic meeting for tactical and for strategic service review.

TOPIC 7: GROUPS ADMINISTRATOR

Our Team has several group administrators, with the below qualifications.

- Does your Groups Administrator hold any Microsoft certifications? If yes, please elaborate.

Yes, all our resources are required to attain technical certification across Microsoft Skills to keep them up to speed with the latest technology changes. This is one of the line items in their yearly appraisals.

Below are the certifications of our Office 365 Groups Administrators:

- Microsoft Certified: Azure Security Engineer Associate

- Does your Groups Administrator have at least 5+ years of Office 365 and SharePoint Online Administration experience with the Public Sector or Federal Government, and a proven track record of successfully overseeing the Management and administration of Office 365 Groups? If yes, please elaborate.

Yes, the average experience our Group Administrators are over 10 Years, with 5+ years of experience in SharePoint Online. Our Administrators have written multiple re-usable Power Shell script to ease the Management and administration of Office 365 Groups, and this is offered to all our customers as a value add during our ongoing engagements.

- Of their experience, how much of the Groups Administrator's experience is associated with direct administration of Groups, Azure Active Directory, Teams, and SharePoint Online?

Most of our Administrators have 5+ years of experience in the direct administration of Groups, Azure Active Directory, Teams, and SharePoint Online. Given that Office 365 Groups tie together Azure AD, SharePoint Online Modern Team Sites, Teams, Planner, Stream, and other Office 365 Services, having a deep understanding of O365 Groups Architecture is required to be successful in all of these roles.

- What were some of the Groups Administrator's successes and challenges during previous Office 365 administration work? What did the Groups Administrator do to resolve or overcome those challenges, and what was the outcome?

The largest challenge of Office 365 Groups is their flat nature, where O365 Groups cannot be nested within other O365 Groups. This causes challenges when clients are seeking to re-use existing AD Groups within their O365 Groups. To overcome this common challenge, we have developed a set of PowerShell scripts that can keep O365 Groups in sync with Azure AD Groups or Exchange Distribution Lists.

Another challenge stems from the different permissibility models that each of the connect Office 365 Services has that are Groups-Enabled. For example, being a Member in Teams vs. in MS Stream has a very different set of privileges, but are managed from the same O365 Group. Enacting strong governance that is specific per O365 Service allows the O365 Groups to be used for the intended purposes.

- What deliverables or techniques does your Groups Administrator leverage when it comes to providing system health and monitoring reports, project status updates, staff management (if applicable), resolving conflict/risk, and communicating with clients?

TrnDigital's RFP Response # 2312-21 for Microsoft/Office 365/Azure Cloud Solutions Professional Services

Our Administrators undergo a series of Daily, Weekly, and Monthly Checks and have a weekly checkpoint with the customer team to walk them through the Status Report, any open risk or issues along with the mitigation plan.

TOPIC 8: SHAREPOINT ADMINISTRATOR

Our Team has several SharePoint administrators, with the below qualifications

- Does your SharePoint Administrator hold any Microsoft certifications? If yes, please elaborate.

Yes, all our resources are required to attain technical certification across Microsoft Skills to keep them up to speed with the latest technology changes. This is one of the line items in their yearly appraisals.

Below are the certifications of our SharePoint Administrators hold:

- MCSE: SharePoint
- Managing Microsoft SharePoint Server
- Deploying SharePoint Server Hybrid
- Enabling Office 365 Services

- Does your SharePoint Administrator have at least 5+ years of Office 365 and SharePoint Administration experience with the Public Sector or Federal Government, and a proven track record of successfully overseeing the Management and administration of SharePoint Online tools? If yes, please elaborate.

Yes, the average experience our SharePoint Administrators are over 10 Years of experience with 5+ years of experience supporting large scale enterprise, government projects, fortune 500 companies owning large SharePoint farms, leading migrations, and Supporting Online environments with thousands of sites.

- Of their experience, how much of the SharePoint Administrator's experience is associated with direct administration of SharePoint Online?

The average experience our SharePoint Administrators are over 10 Years of experience with 5+ years of SharePoint online experience.

- What were some of the SharePoint Administrator's successes and challenges during previous Office 365 Groups and SharePoint Online administration work? What did the SharePoint Administrator do to resolve or overcome those challenges, and what was the outcome?

Success:

Deliver high-quality implementation and support services:

- Provide SharePoint administration and technical support for O365 Enterprise SharePoint and on-premises environments
- Manage and maintain site Content and Structure settings, Site Hierarchy, and site collection navigation
- Work with tools for migrations of SharePoint sites and collections to the O365 SharePoint Online Environment
- Oversee activities pertaining to maintenance of SharePoint and troubleshoots issues promptly.
- Maintains records of SharePoint updates, maintenance, and activity.

TrnDigital's RFP Response # 2312-21 for Microsoft/Office 365/Azure Cloud Solutions Professional Services

- Provides technical support for SharePoint users
- Addresses questions or concerns from business owners
- Manages and revises the layout of the site
- Design, configure and maintain enterprise taxonomy; terms, and keywords for the term store, Records Management, etc. as per the client SOPs
- Schedule, plan, and performing system upgrades, including testing, rollback procedures, and risk analysis for on-premise environments.

Challenges:

Here are a few challenges that SharePoint admins commonly face

Adoption: With a focus on IT aspects and managing document storage, monitoring security risks, and ensuring employees have access to company tools, promoting user adoption takes a back seat. Our administrators focus on business goals and use analytics tools to provide Management with real-time insights into SharePoint and intranet usage. Provide reports of user activity across site pages and dig deep into granular data, which helps management plan a more engaging SharePoint experience.

Training: One of the common challenges many SharePoint admins face is a lack of training of new features and certification. TrnDigital's administrators participate and lead SharePoint community events and participate in events like Microsoft Ignite to get an early preview of the new features to come.

Monitoring: There is too much irrelevant content on SharePoint intranets. Sites can become dumping grounds for data. For example, despite revision control tools, many users still save multiple obsolete versions of files. With 1 TB of storage for each business user, a great deal of redundant information can end up on SharePoint. Our admins monitor the content stored and engage in user training, and reminders about the appropriate use of storage help avoid this issue.

- What deliverables or techniques does your SharePoint Administrator leverage when it comes to providing system health and monitoring reports, project status updates, staff management (if applicable), resolving conflict/risk, and communicating with clients?

Our administrators take responsibility for managing, monitoring, and reducing risk. We ensure that Management has a track of all the developments and plan the roadmap and implementation through scheduled periodic meeting for tactical and for strategic service review.

TOPIC 9: DYNAMICS 365 ADMINISTRATORS

- Does your Dynamics 365 Administrator hold any Microsoft certifications? If yes, please elaborate.

Yes, all our resources are required to attain technical certification across Microsoft Skills to keep them up to speed with the latest technology changes. This is one of the line items in their yearly appraisals.

Below are the certifications of our Dynamics Administrators hold:

- Microsoft Power Platform + Dynamics 365 Core
 - Dynamics 365 for customer engagement for Sales
 - Microsoft Dynamics 365 Marketing
 - Microsoft Dynamics 365: Core Finance and Operations
 - Microsoft Dynamics 365 Customer Service
- Does your Dynamics 365 Administrator have at least 5+ years of Dynamics 365 Administration experience with the Public Sector or Federal Government, and a proven track record of successfully overseeing the Management and administration of Dynamics 365 tools? If yes, please elaborate.

Yes, the average experience our Exchange Administrators is over 10 Years; with 5+ years of experience supporting large scale enterprise, government projects, fortune 500 companies. We have experience working on manage sales, services and operation, customer engagement process, finance to streamline business processes enable Growth.

- Of their experience, how much of the Dynamics 365 Administrator's experience is associated with direct administration of Dynamics 365?

The average experience our Dynamics Administrators are over 10 Years of experience with 5+ years of Dynamics experience.

- What were some of the Dynamics 365 Administrator's successes and challenges during previous Dynamics 365 administration work? What did the Dynamics 365 Administrator do to resolve or overcome those challenges, and what was the outcome?

Success:

Deliver high-quality implementation and support services:

- Enabled sales productivity with seamless implementation
- Aligned Sales and Marketing through shared data and business process
- Enabled integrations with tools already in use
- Deliver the tailored service customers expect across channels
- Simplify agent and customer experiences through one complete source of customer data
- Helped customer reduce operational expenses and drive financial decisions

Challenges:

Timelines to Implement Dynamics 365: The duration of Dynamics 365 implementation depends on a near-endless collection of business-specific factors: How many apps are being deployed? How large is the customer business? How many users do they have? Is it an upgrade or a completely new solution? Is

TrnDigital's RFP Response # 2312-21 for Microsoft/Office 365/Azure Cloud Solutions Professional Services

the client moving from on-premise to the cloud? Is there a lot of legacy data to be migrated? How much development work is necessary to make the solution meet the users' needs? With our Dynamics experts, even a customer requiring customizations and development can expect implementation in the most optimal time.

Upgrading to Dynamics 365 from an older Dynamics CRM: If customers are already using Dynamics CRM, they can upgrade to Dynamics 365. Users of cloud-ready CRM Online have the option to upgrade when their licenses are up for renewal. On-premise customers will need to decide when is the right time for them to switch to the cloud as it is a more manual process.

Clients can only upgrade to Dynamics 365 from the most recent version of their current software; they can't skip over versions and hop straight to the cloud. If a Dynamics customer is using Dynamics CRM and wants to upgrade to Dynamics 365's CRM apps, they need to be running the most recent version of Dynamics CRM to bridge over to Dynamics 365. So, if they're currently using Dynamics CRM 2011, they'll need to update to CRM 2013, then 2013 SP1, then 2015, and finally to 2016, before they can make the final jump to Dynamics 365.

- What deliverables or techniques does your Dynamics 365 Administrator leverage when it comes to providing system health and monitoring reports, project status updates, staff management (if applicable), resolving conflict/risk, and communicating with clients?

Our administrators take responsibility for managing, monitoring, and reducing risk. We ensure that Management has a track of all the developments and plan the roadmap and implementation through scheduled periodic meeting for tactical and for strategic service review.

TOPIC 10: TEAMS ADMINISTRATORS

Our Team has several Teams Administrators, who serve as Teams communication admin, Teams communication support engineer, Teams communication support specialist, Teams service admin

- Does your Teams Administrator hold any Microsoft certifications? If yes, please elaborate.

Yes, all our resources are required to attain technical certification across Microsoft Skills to keep them up to speed with the latest technology changes. This is one of the line items in their yearly appraisals.

Our administrators hold the Managing Microsoft Teams certification.

- Does your Teams Administrator have at least 5+ years of Office 365 and Teams Administration experience with the Public Sector or Federal Government, and a proven track record of successfully overseeing the Management and administration of Teams? If yes, please elaborate.

Yes, the average experience our Administrators have is over 10 Years of experience with 5+ years of experience supporting large scale enterprise, government projects, fortune 500 companies on Microsoft Skype and Microsoft Teams.

- Of their experience, how much of the Teams Administrator's experience is associated with direct administration of Teams?

Our administrators have been working on Microsoft Teams since its inception in 2017 and with Skype for Business prior to Teams.

- What were some of the Teams Administrator's successes and challenges during previous Teams administration work? What did the Teams Administrator do to resolve or overcome those challenges, and what was the outcome?

Success:

We have helped organizations move to Microsoft Teams and helped with rollout with TrnDigital's Adoption Framework.

TrnDigital Teams Adoption Framework outlines the process to optimize the results

The Adoption Framework is broken into simple steps that follow the best practices, resources, and tools for a successful adoption approach.

Successfully helped clients with their Teams productivity outcomes

Success criteria	Method		KPI Baseline	KPI Target
Increased productivity Increased adoption correlates to faster communication and decision making, shorter time to complete tasks	Quantitative Qualitative End user surveys Teams feedback	Comparison of pre and post Microsoft 365 reports will show teams activity.	5%	15%
Improved collaboration Increased cross-team and cross-location communications	Qualitative End user surveys	Number of meetings online/number of meetings Average stated employee satisfaction	10%	20%
Improved employee engagement Employees understand and are enthusiastic about the available collaboration tools and are more motivated to contribute.	Qualitative End user surveys	Employee understanding and engagement improves by 50% within 6 months of rolling out of Teams	10%	15%

Challenges:

Structure of Files confuses users: The way files are stored in Teams can be quite confusing. Everything that is uploaded to conversations is dumped in the channel root folder. If someone tries to organize the files and move them into properly named folders, the file links in the conversations break, we addressed these aspects with training and enablement sessions.

Challenges regarding permission settings: One of the key benefits with Teams is that it makes sharing so easy. Everyone who is a member of the Team automatically has access to all the channels and all the files in the Team, the same OneNote notebook, and so on. This is all great. But teamwork is not always that binary. Sometimes you want to differentiate and make permission settings more granular – which is not possible as of now. Our experts help with the best practices to be followed for security in teams.

Limited flexibility can lead to redundancies: When users start working in Teams, they do not have the structure ready from the start. They do not know which channels they need and might not know exactly what Teams you need to create. Our comprehensive governance approach helps avoid such redundancies.

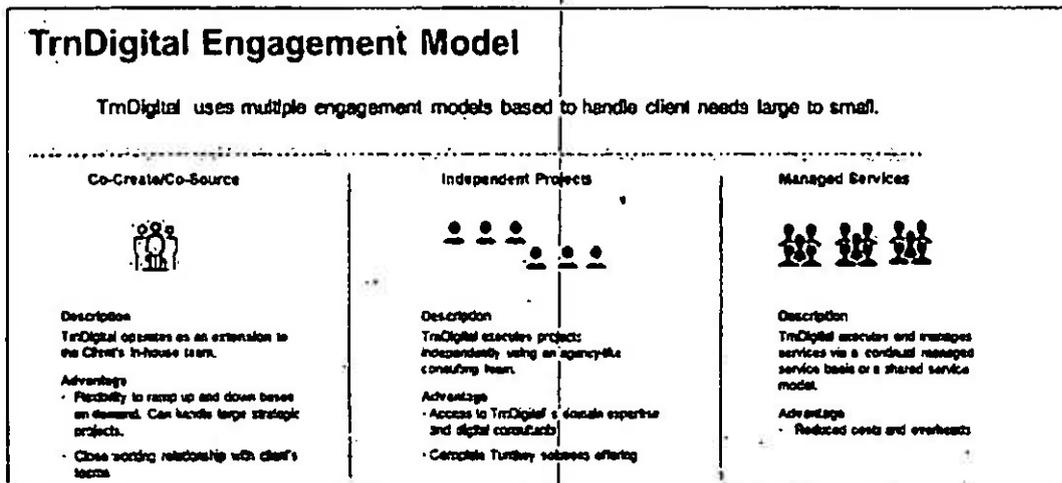

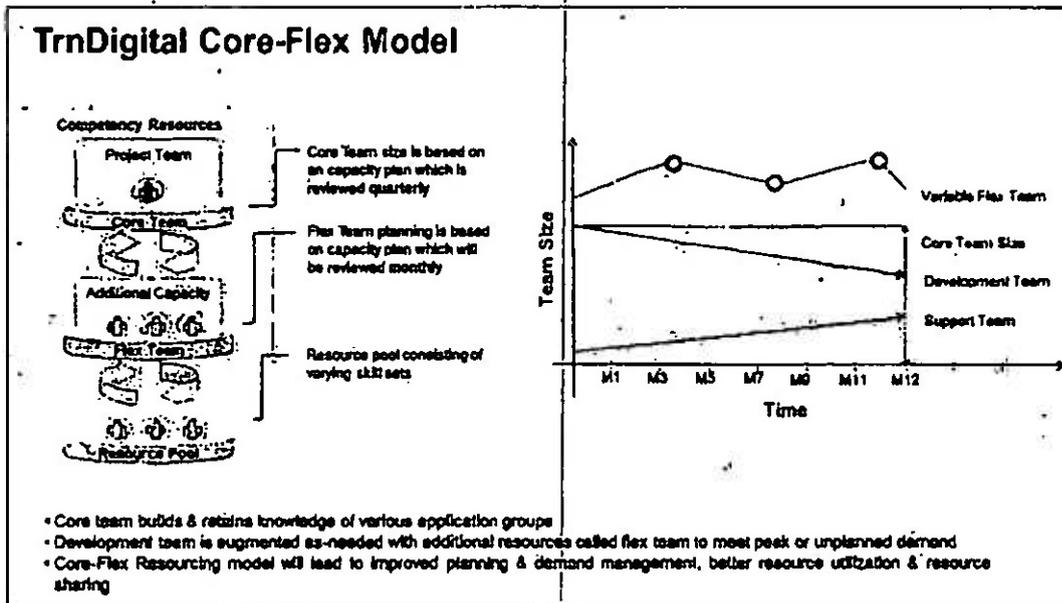

- What deliverables or techniques does your Teams Administrator leverage when it comes to providing system health and monitoring reports, project status updates, staff management (if applicable), resolving conflict/risk, and communicating with clients?

Our administrators take responsibility for managing, monitoring, and reducing risk. We ensure that Management has a track of all the developments and plan the roadmap and implementation through scheduled periodic meeting for tactical and for strategic service review.

TOPIC 11: ADDITIONAL ADMINISTRATIVE AND OPERATIONAL SUPPORT ROLES | DEVICES

How you will staff or support the following administrative roles for the daily maintenance and operation of the State's Microsoft/Office 365 tools? Cloud device admin, Desktop analytics admin, Intune admin.

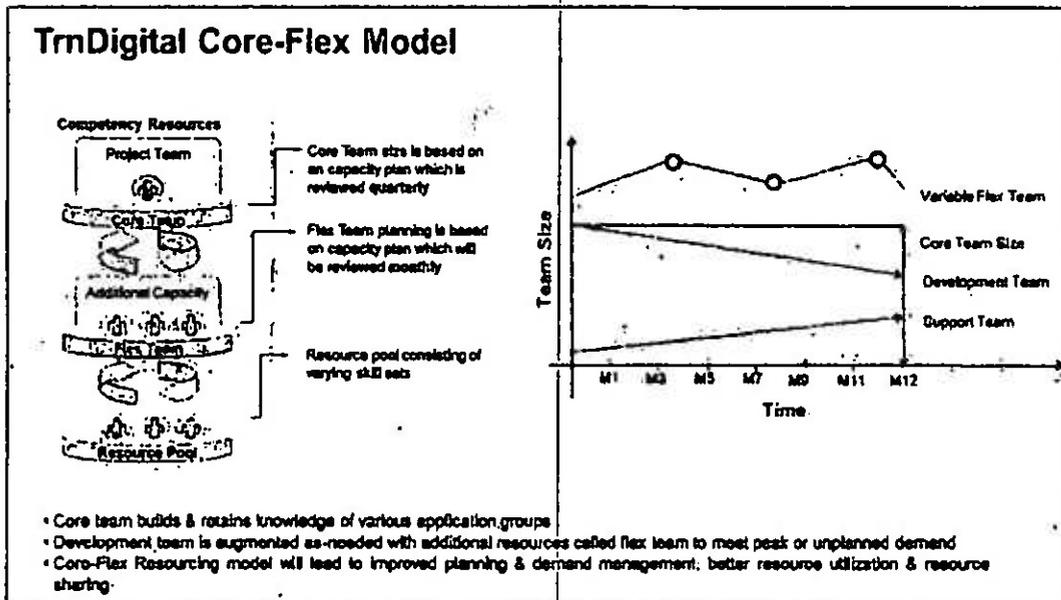

TrnDigital has a Team of Full Stack Experts who are well skilled across multiple Office 365 and Azure services. We usually recommend a Core-Flex engagement model for staffing any Office 365 / Microsoft requirement where the core team comprises of Full Stack Experts, and we bring in the flex team based on specialized skill sets and requirements. For example – During an Office 365 Migration, an Office 365 Architect and Developer will be part of the core team, and the flex team could comprise of Office 365 Security and Compliance experts who are brought in for some time to ensure the right security and compliance controls are in place. We have found this as the most optimized model for most of our customers.

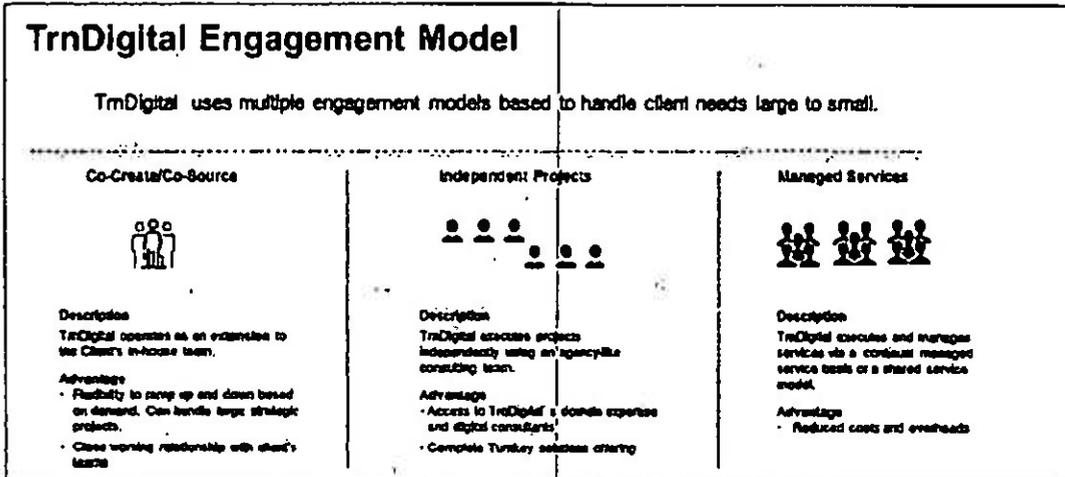

TOPIC 12: ADDITIONAL ADMINISTRATIVE AND OPERATIONAL SUPPORT ROLES | COLLABORATION

How you will staff or support the following administrative roles for the daily maintenance and operation of the State's Microsoft/Office 365 tools? Kaizala admin, Office apps admin, Power BI admin, Power Platform admin, Search admin, Search editor.

TrnDigital has a Team of Full Stack Experts who are well skilled across multiple Office 365 and Azure services. We usually recommend a Core-Flex engagement model for staffing any Office 365 / Microsoft requirement where the core team comprises of Full Stack Experts, and we bring in the flex team based on specialized skill sets and needs. For example – During an Office 365 Migration, an Office 365 Architect and Developer will be part of the core team, and the flex team could comprise Office 365 Security and Compliance experts who are brought in for some time to ensure the right security and compliance controls are in place. We have found this as the most optimized model for most of our customers.

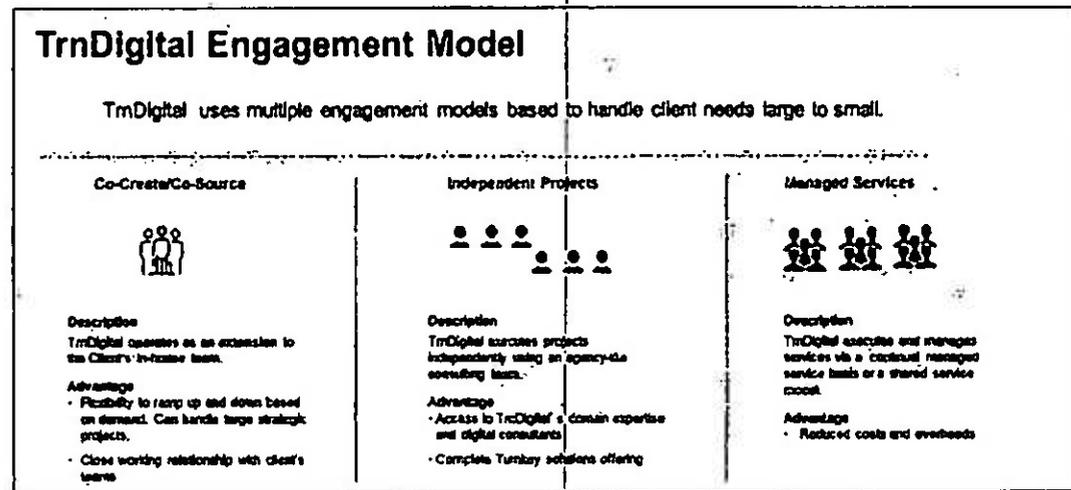

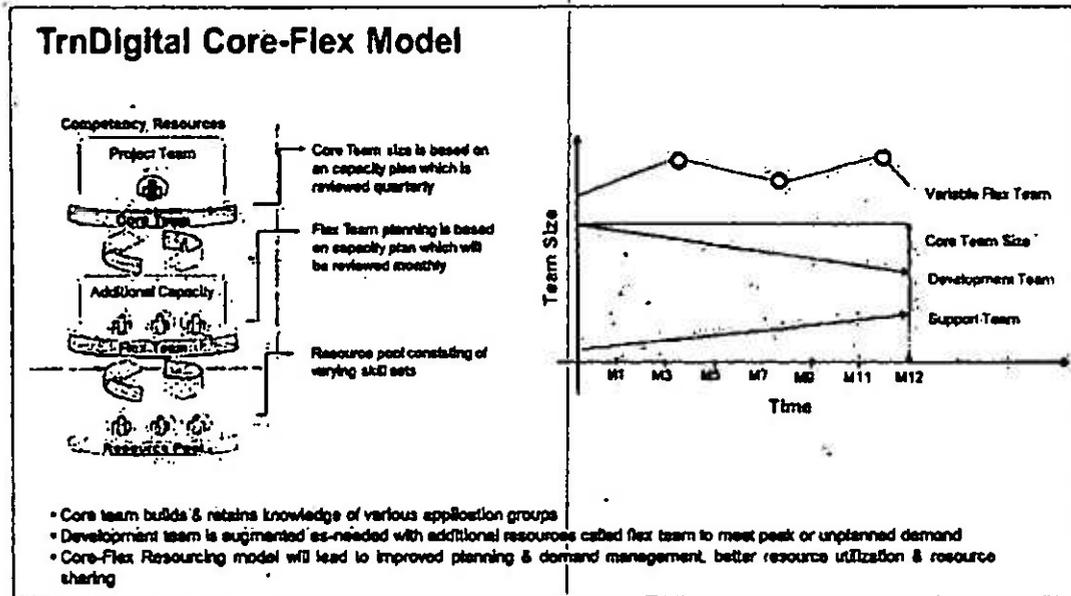

TOPIC 13: ADDITIONAL ADMINISTRATIVE AND OPERATIONAL SUPPORT ROLES | READ-ONLY

How you will staff or support the following administrative roles for the daily maintenance and operation of the State's Microsoft/Office 365 tools? Global Reader, Message Center Privacy Reader, Message Center Reader, Reports Reader, Security Reader.

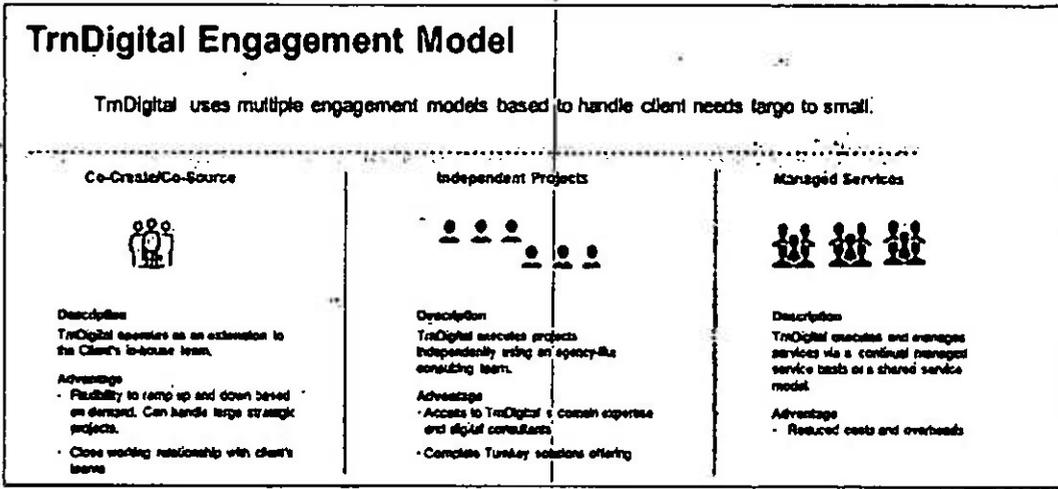

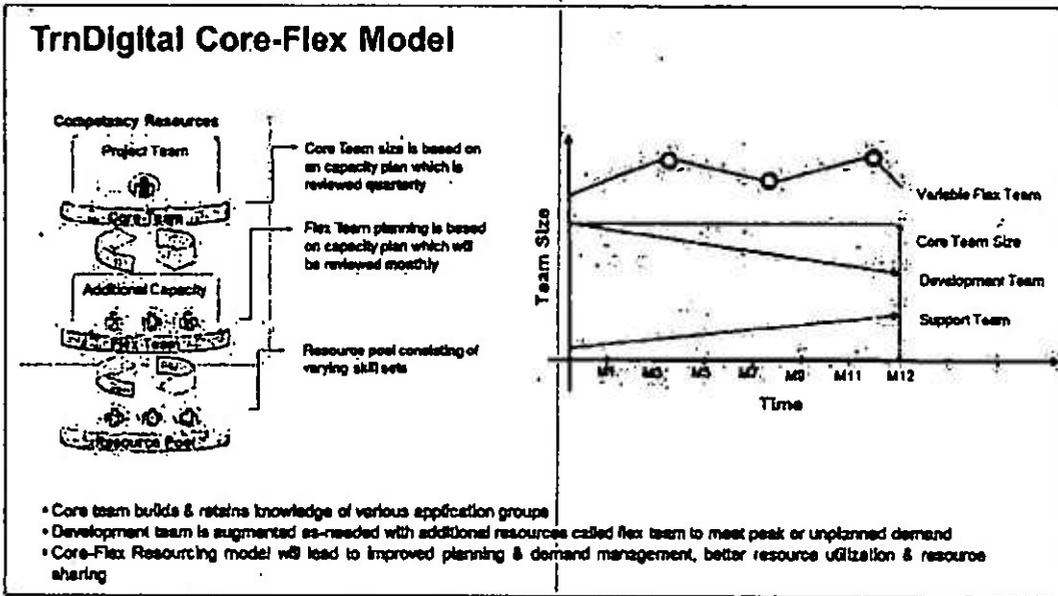

TrnDigital has a Team of Full Stack Experts who are well skilled across multiple Office 365 and Azure services. We usually recommend a Core-Flex engagement model for staffing any Office 365 / Microsoft requirement where the core team comprises of Full Stack Experts, and we bring in the flex team based on specialized skill sets and needs. For example – During an Office 365 Migration, an Office 365 Architect and Developer will be part of the core team, and the flex team could comprise Office 365 Security and Compliance experts who are brought in for some time to ensure the right security and compliance controls are in place. We have found this as the most optimized model for most of our customers.

TOPIC 14: ADDITIONAL ADMINISTRATIVE AND OPERATIONAL SUPPORT ROLES | OTHER

how you will staff or support the following administrative roles for the daily maintenance and operation of the State's Microsoft/Office 365 tools? Billing Admin, Service Support Admin.

TrnDigital has a Team of Full Stack Experts who are well skilled across multiple Office 365 and Azure services. We usually recommend a Core-Flex engagement model for staffing any Office 365 / Microsoft requirement where the core team comprises of Full Stack Experts, and we bring in the flex team based on specialized skill sets and needs. For example – During an Office 365 Migration, an Office 365 Architect and Developer will be part of the core team, and the flex team could comprise Office 365 Security and Compliance experts who are brought in for some time to ensure the right security and compliance controls are in place. We have found this as the most optimized model for most of our customers.

TOPIC 15 – MICROSOFT TECHNICAL ARCHITECT(S)

- Does your Microsoft Technical Architect have at least 5+ years of experience with the Public Sector or Federal Government, and a proven track record of designing successful Microsoft/Office 365/Dynamics 365/Azure Cloud architecture solutions across enterprise IT programs/projects? If yes, please elaborate.

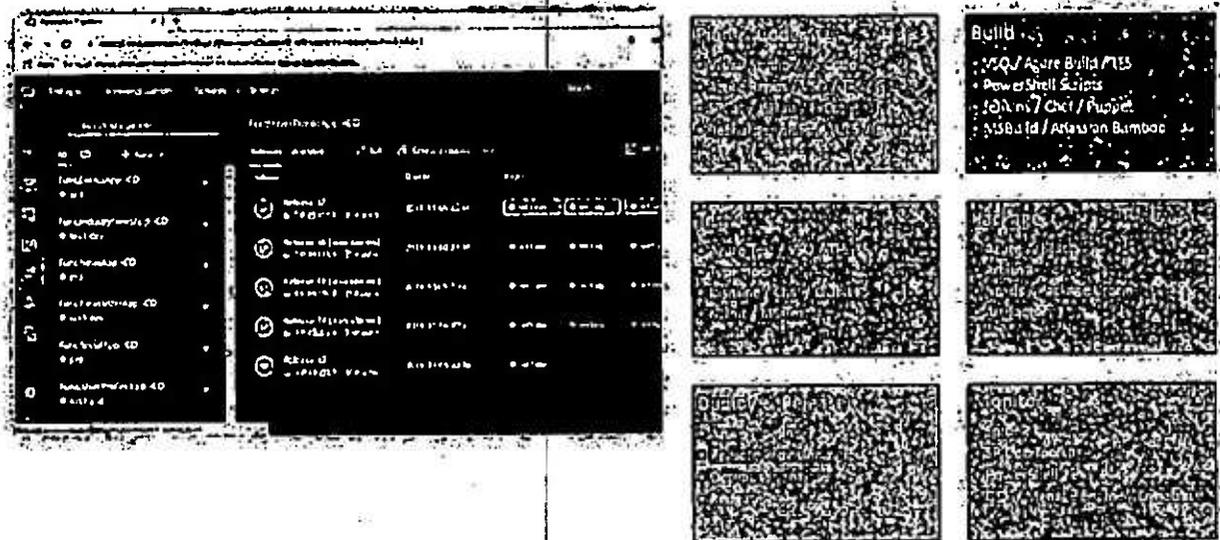

Yes, the average experience of our Microsoft Technical Architect is over 10 Years with 5+ years of experience supporting large scale enterprise, government projects, fortune 500 companies designing and implementing Microsoft/Office365, Azure Cloud Solutions.

- Does your Microsoft Technical Architect have experience with developing/designing Microsoft/Office 365, SharePoint Online, Dynamics 365, and/or Azure architecture solutions? Please describe the techniques, security features, software, process, and architecture model/methodology that the Microsoft Technical Architect leveraged to develop/design an architecture solution for Microsoft within a Government Cloud environment. What was the business value and impact provided from those Microsoft Platform solutions?

TrnDigital's Azure & Office 365 DevOps Framework accelerates establishing a set of practices, roles, and tools that allows organizations of any size to develop, deploy & maintain solutions at scale.

Using our framework, we can streamline the development methodology to deploy both Client and server-side solutions through automation.

TrnDigital Azure & Office 365 DevOps Toolset

TrnDigital's RFP Response # 2312-21 for Microsoft/Office 365/Azure Cloud Solutions Professional Services

- Were any of the deployed Microsoft Platform architecture models lift and shift (pre-existing solution to be modified for another customer)? If yes, can you please describe the approach that you took to deliver value to the customer to meet rapid delivery?

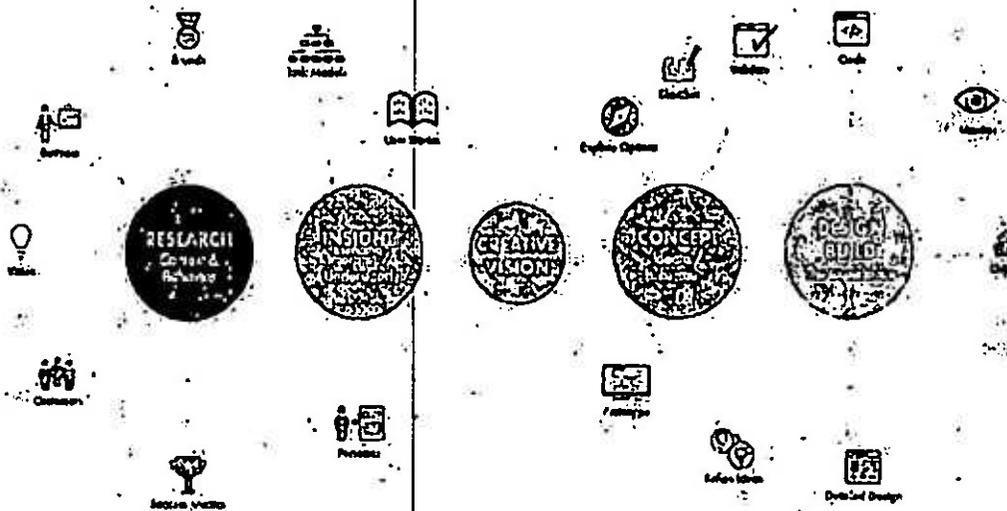

Yes, we have implemented data move for customers in a lift and shift fashion. We used custom discovery scripts to analyze the existing environment. We have migrated the data using the 'Sharegate Migration Tool,' TrnDigital's team prepared the mapping sheet from site collection to destination for migration. Having source and target mapping for the data migration makes it easy for Sharegate to run the job.

For validated data, we developed additional post-migration scripts that compare source and destination folders and report any missed items. The solution helped quality and legal teams to verify and sign off the migration quickly.

- Describe the Microsoft Technical Architect's experience with deploying Microsoft/Office 365 solutions within an Agile or DevOps environment. Please provide your approach and business value to the customer as a result of the Microsoft Platform solution(s).

Our pre-build cloud implementation solution is designed to speed up application development. It helps in bringing innovative products in the market as early as possible. CloudCore 6X Framework is designed to save time and money of our customers, using CloudCore 6X framework solutions can be implemented up to 6X faster.

TrnDigital Application Development Methodology

TrnDigital's RFP Response # 2312-21 for Microsoft/Office 365/Azure Cloud Solutions Professional Services

• What were some of the Microsoft Technical Architect's successes and challenges during a Microsoft Platform deployment? What did the Microsoft Technical Architect do to resolve or overcome those challenges, and what was the outcome?

Successes:

- We have provided deep technical expertise and support for Datacenter Transformation, Custom Applications, Data Estate Transformation (ML and AI), and Security/Compliance/Privacy.
- Delivered value via a portfolio of technical engagements optimized to accelerate IP development
- We Delivered deep level technical activities, executing on the defined learning path, and developing technical aspects of critical scenarios outlined in the technology roadmap.
- Enabled and lead activities for Envisioning Briefings, Architecture Design Session (ADS), Proof of Concept projects, architecture guidance on building solutions.
- Developed a multi-cloud technology adoption roadmap and advised partners on its execution according to business priorities

Challenges:

Training: One of the common challenges many Microsoft Technical Architects face is a lack of training of new features and certification. TrnDigital's administrators participate and lead SharePoint community events and participate in events like Microsoft Ignite to get an early preview of the new features to come.

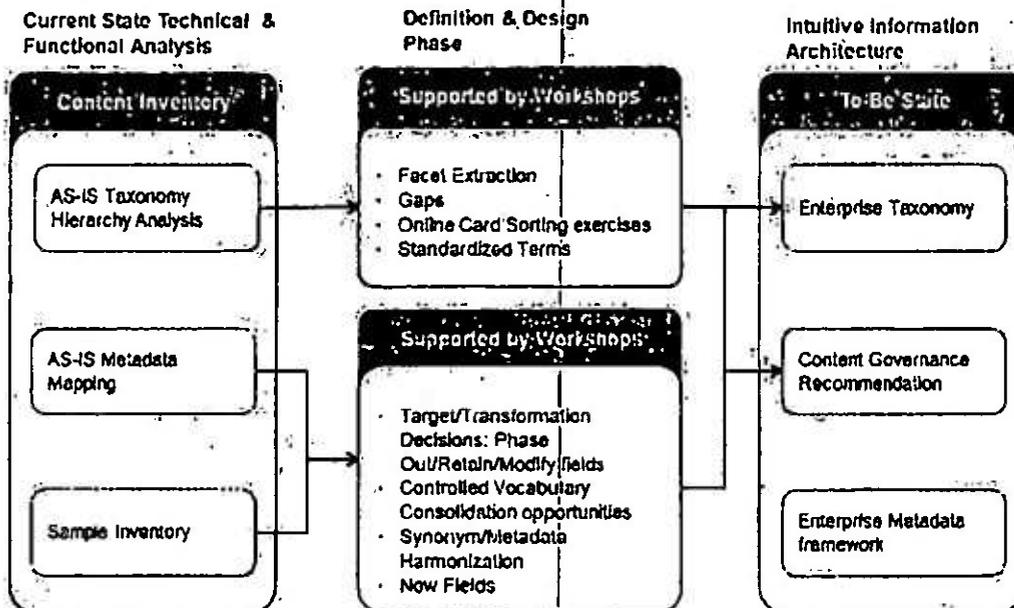

TOPIC 16 – SHAREPOINT ONLINE INFORMATION ARCHITECT

- Does your SharePoint Online Information Architect have at least 5+ years of experience with the Public Sector or Federal Government and a proven track record with developing/managing Microsoft SharePoint Online solutions across enterprise IT programs/projects? If yes, please elaborate.

Yes, the average experience our SharePoint Online Information Architect is over 10 Years of experience with 5+ years of experience supporting large scale enterprise, government projects, fortune 500 companies owning large SharePoint farms, leading migrations, and Supporting Online environments with thousands of sites.

- Does your SharePoint Online Information Architect have experience with developing/designing Microsoft/Office 365? Please describe the techniques, security features, software, process, and data model/methodology that the SharePoint Online Information Architect leveraged to design, configure, and implement modern experience SharePoint Online solutions within a Government Cloud environment. What was the business value and impact provided from those Microsoft/Office 365 data solutions?

TrnDigital has a Team of SharePoint Information Architects who are well skilled across multiple Office 365 and Azure services. Having a robust information architecture is an essential prerequisite for realizing a well-maintained and well-performing portal. Designing the optimal structure requires detailed planning; our approach is as below:

- Were any of the deployed SharePoint Online solutions lift and shift (pre-existing solution to be modified for another customer)? If yes, can you please describe the approach that you took to migrate the data and what software tools did you use? What were the end result and business value provided to the customer?

Yes, we have implemented data move for customers in a lift and shift fashion. We used custom discovery scripts to analyze the existing environment. We have migrated the data using the 'Sharegate Migration Tool,' TrnDigital's team prepared the mapping sheet from site collection to destination for migration. Having source and target mapping for the data migration makes it easy for Sharegate to run the job.

For validated data, we developed additional post-migration scripts that compare source and destination folders and report any missed items. The comparison helped quality and legal teams to verify and sign off the migration quickly.

- Describe the SharePoint Online Information Architect's experience with designing, configuring, and implementing the modern experience of SharePoint Online within an Agile or DevOps environment. Please provide your approach and business value to the customer as a result of the SharePoint Online solution(s):

DevOps is a development culture that focuses on producing a cost-efficient quality product, DevOps Provide an easy way to communicate with all the teams in one place during development. It provides an easy way of testing the deployment pipelines for your solution.

Our SharePoint Information Architect help with:

- Improving the deployment frequency
- Improve testing of the solution
- Improve mean time of recovery in case a rollback of a solution is required
- Ensure the lowest rate of failure for multiple releases

- What were some of the SharePoint Online Information Architect's successes and challenges during a Microsoft/Office 365 and SharePoint Online deployment? What did the SharePoint Online Information Architect do to resolve or overcome those challenges, and what was the outcome?

Successes:

- Recommend best-in-class solution architecture identifying functional as well as non-functional parameters.
- The DevOps Pipelines made the deployment quick and error-free compared to the legacy manual deployment process.
- Documented all architecture decisions, and best practice approaches.

Challenges:

Training: One of the common challenges many Microsoft Technical Architects face is a lack of training of new features and certification. TrnDigital's administrators participate and lead SharePoint community events and participate in events like Microsoft ignite to get an early preview of the new features to come.

TOPIC 17 – MICROSOFT LEAD PLATFORM DEVELOPERS

Our team has several Teams Administrators, who serve as Office 365, SharePoint Online, Dynamics 365, and other Microsoft Azure Cloud Solutions, developers.

- Does your Lead Microsoft Lead Platform Developer have at least 3+ years of experience with the Public Sector or Federal Government, and a proven track record of deploying Microsoft/Office 365 solutions across enterprise IT programs/projects? If yes, please elaborate.

Yes, the average experience our Microsoft Lead Platform Developers is over 10 Years of experience with 3+ years of experience supporting large scale enterprise, government projects, fortune 500 companies deploying Microsoft/Office 365 solutions.

- Does your Lead Microsoft Platform Developer have expert proficiency with PowerShell, C+, and SPFX?

Yes, TrnDigital's Lead Microsoft Platform Developers have expert proficiency with PowerShell, C++, and SPFX.

- Does your Lead Microsoft Developer have experience with developing/deploying Microsoft Platform solutions?

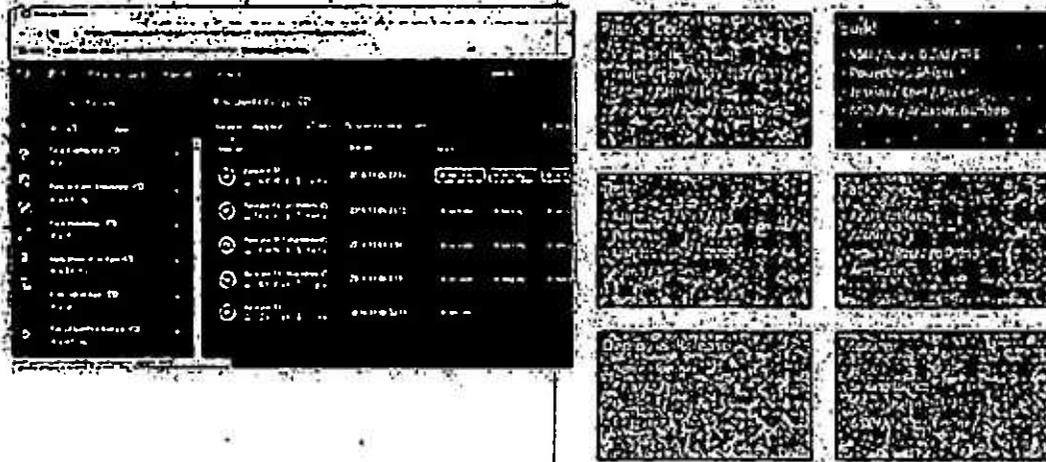

Yes, TrnDigital's Lead Microsoft Platform Developers have extensive experience developing/deploying Microsoft Platform Solutions.

TrnDigital's Azure & Office 365 DevOps Framework accelerates establishing a set of practices, roles, and tools that allows organizations of any size to develop, deploy & maintain solutions at scale.

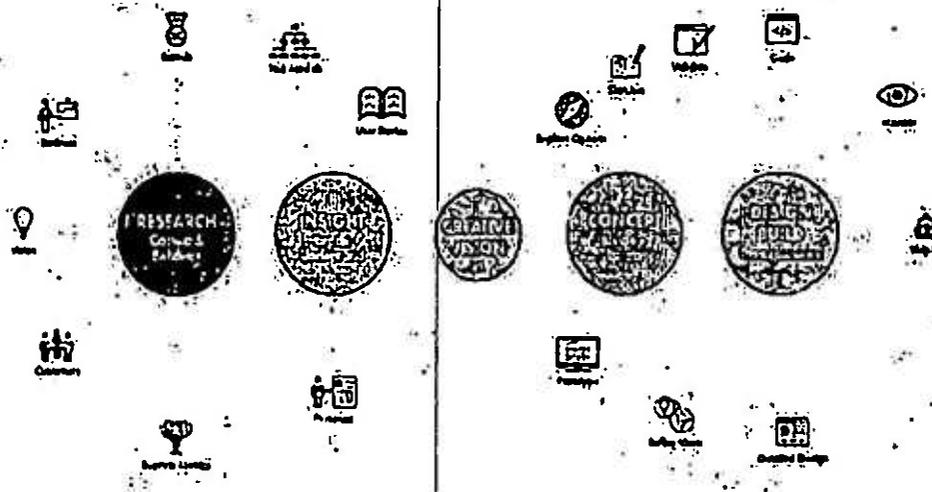

- Please describe the techniques, security features, software, process, and approach that the Lead Microsoft Platform Developer leveraged to develop/deploy these Microsoft/Office 365 solutions within a Government Cloud environment. What was the business value and impact provided from those Microsoft/Office 365 solutions?

Using our framework, we can streamline the development methodology to deploy both client and server-side solutions through automation.

TrnDigital Azure & Office 365 DevOps Toolset

TrnDigital Application Development Methodology

• Were any of the deployed Microsoft/Office 365 solutions lift and shift (pre-existing solution to be modified for another customer)? If yes, can you please describe the approach that you took to deliver value to the customer to meet rapid delivery?

Yes, we have implemented data move for customers in a lift and shift fashion. We used custom discovery scripts to analyze the existing environment. We have migrated the data using the 'Sharegate Migration Tool,' TrnDigitals team prepared the mapping sheet from site collection to destination for migration. Having source and target mapping for the data migration makes it easy for Sharegate to run the job.

For validated data, we developed additional post-migration scripts that compare source and destination folders and report any missed items. The comparison helped quality and legal teams to verify and sign off the migration quickly.

- Describe the Lead Microsoft Platform Developer's experience with deploying Microsoft/Office 365 solutions within an Agile or DevOps environment. Please provide your approach and business value to the customer as a result of the Microsoft/Office 365 solution(s).
- What were some of the Lead Microsoft Platform Developer's successes and challenges during a Microsoft/Office 365 deployment? What did the Lead Microsoft Platform Developer do to resolve or overcome those challenges, and what was the outcome?

Successes:

- Drive detailed Root Cause Analysis (RCA's) and Postmortems for critical Live Site Incidents
- Design and implement real-time telemetry pipelines and monitoring solutions on world-class big data technologies in Azure to automatically discover problems at their source
- Manage budget considerations for new asks and backfill End of Warranty and End Of Life hardware
- Design, write and deliver software to improve network automation, availability, reliability, scalability, security, resiliency, and efficiency of services that deliver specialized compute platforms to the Test Automation
- Contribute in debugging/troubleshooting the complete stack, drive analysis of issues and outages, write software and build automation to resolve production problems with durable system fixes
- Building high-quality metrics and monitoring logic to enable capacity planning, performance analysis, automated incident creation, and scale-out of distributed, multi-service workflows
- Participate actively in code reviews, bug/issue triage with the feature teams, and support well-informed decisions towards business and engineering goals
- Review and influence ongoing design, architecture, standards, and methods for operating software-defined network services and systems; assess design and code changes to drive improvements

We have automated many customer-related processes.

- Onboarding & Offboarding process: Notification emails with the Onboarding and Offboarding.
- Creation and deactivation of AD account, Assigning Phone Numbers and licensees as applicable (M365 E5; O365 E3 & E5) and Intune group.
- The automated scripts create onboarding tickets, sub-tasks, and a dashboard for monitoring.
- Created Dynamic security groups for providing access to users for SharePoint site collections based on their department.
- We developed PowerShell Scripts to identify the explicitly provided access and remove it while offboarding.

Challenges:

Training: One of the common challenges many Microsoft Technical Architects face is a lack of training of new features and certification. TrnDigital's administrators participate and lead SharePoint community events and participate in events like Microsoft Ignite to get an early preview of the new features to come.
