REQUESTED ACTION

EXPLANATION

The Department of Environmental Services issued a request for proposals for 2025 Local Source Water Protection Grants. These grants are funded by set-asides under the Drinking Water State Revolving Loan Fund. Fourteen proposals were received. The proposals were evaluated and ranked based on criteria included in the request for proposals, such as whether the project fulfills a component of a source water protection program, that the proposed project addresses appropriate threats, and that the project will deliver a valuable and useful product. Based on eligibility and the available federal funding, the Department determined that it could offer grants to eight source protection planning projects and four source security projects. See Attachment A for the full list of grants awarded and list of reviewers.

The Lake Winnepesaukee Association will use grant funds to support stormwater management improvements at Resort on the Bay, a property located along Paugus Bay. These improvements focus on reducing stormwater runoff into Paugus Bay, enhancing water quality in Langley Cove, and protecting Paugus Bay from excess sedimentation and nutrient loading that can increase risk of cyanobacteria blooms.

This agreement has been approved as to form, substance, and execution by the Office of the Attorney General. In the event federal funds are no longer available, general funds will not be requested to support this program.

We respectfully request your approval of this item.

Robert R. Scott, Commissioner

SCOPE OF WORK

Lake Winnepesaukee Alliance (LWA) will use New Hampshire Department of Environmental Services (NHDES) grant funds to support stormwater management improvements along Paugus Bay, the source of drinking water for the City of Laconia. The proposed improvements focus on reducing stormwater runoff into Paugus Bay, enhancing water quality in Langley Cove, and protecting Paugus Bay from excessive sedimentation and nutrient loading. This project will help to limit nutrient runoff into Paugus Bay which will help to maintain access for recreational opportunities as well as prevent increased nutrient loading that can increase the risk of cyanobacteria blooms.

Specifically, the following tasks, as described in the application submitted to NHDES, will be accomplished:

Task 1. Preliminary Planning and Project Management

1a. LWA to review design, scope of work, and timeline with Resort on the Bay and Laconia Department of Public Works.

1b. Resort on the Bay to obtain necessary permits.

1c. LWA to issue a request for bids (RFB). All construction/installation work must conform to the plans and specifications noted on the design plans completed by Moser Engineering (dated September 2020, or as revised). If revised, final plans will be sent to NHDES.

Deliverables: Provide NHDES with scope of work, approved permits, and related documents.

Task 2. Construction of Best Management Practices

A series of photos and/or videos will be captured to document the “before” and “after” construction conditions to highlight improvements.

2a. Contractor to begin work on Lot 3 by installing silt fence and checking dams prior to start of earthwork.

2b. Contractor to cut back sand beach by approximately 50%, install stormwater conveyance swale and infiltration basin on Lot 3.

2c. Inspections and maintenance of the system to be completed by Resort on the Bay. Complete documentation (photos, etc.) as part of at least one inspection during a storm event and maintenance required and completed.

3b. LWA will feature the project in their newsletter and social media. LWA will attempt to video stormwater improvements to demonstrate functionality of the new design.

Deliverables: Press release, photos/video/agenda from open house showcasing BMPs installed.

Task 4. Pollutant Load Reduction Modeling

LWA will complete pollutant load modeling calculations using Region 5 or the Simple Model.

Deliverables: Detailed report of pollutant load reduction estimates for this project.

Task 5: Final Grant Report

LWA will submit a final report to summarize this project.

Deliverables: Final report including description of the work completed, pollutant load reductions, and photos of the installed BMPs.
