EXPLANATION

The Department of Environmental Services issued a request for proposals for 2025 Local Source Water Protection Grants. These grants are funded by set-asides under the Drinking Water State Revolving Loan Fund. Fourteen proposals were received. The proposals were evaluated and ranked based on criteria included in the request for proposals, such as whether the project fulfills a component of a source water protection program, that the proposed project addresses appropriate threats, and that the project will deliver a valuable and useful product. Based on eligibility and the available federal funding, the Department determined that it could offer grants to eight source protection planning projects and four source security projects. See Attachment A for the full list of grants awarded and list of reviewers.

The Southeast Land Trust of New Hampshire is requesting funds to pay for transaction costs associated with the conservation of 56 acres of critical watershed land located in Barrington to better protect water quality in the Rochester Reservoir, a drinking water source for over 25,000 New Hampshire residents. This project will also be receiving funds from the Drinking Water and Groundwater Trust Fund to assist in purchasing the land conservation easements.

This agreement has been approved as to form, substance, and execution by the Office of the Attorney General. In the event federal funds are no longer available, general funds will not be requested to support this program.

We respectfully request your approval of this item.

Robert R. Scott, Commissioner

RE: Support for Conservation of the Gray and City of Rochester Properties in Barrington

Dear Mr. Boyd,

On behalf of Rochester Public Works, we are pleased to add our support for the "Rochester Reservoir-Gray" application for funding through the NHDES Drinking Water and Groundwater Trust Fund to protect approximately 56-acres of Rochester's watershed in Barrington through two conservation easements.

The properties, including approximately 32.1 acres owned by the Gray family and 23.5 acres owned by the City of Rochester, provide a wide array of natural resource benefits that are important to both people and the natural environment. In addition to many other conservation benefits, these properties offer significant water quality protection to Rochester Reservoir and Round Pond Reservoir. These two water sources provide drinking water to more than 21,000 people in the City of Rochester. Conserving these 55.6-acres serves to maintain quality drinking water for our residents.

Funds from Drinking Water and Groundwater Trust Fund grant program will be key to seeing this critical area of our watershed conserved and ensuring a clean and healthy water supply for Rochester's expanding drinking water customer base. It's not often the opportunity arises to conserve land in our watershed and this funding will help us realize continued protection.

Thank you for your consideration.

Sincerely,

RE: Support for conservation of the Gray and City of Rochester Properties in Barrington

Dear Mr. Boyd,

On behalf of the Town of Barrington, we are pleased to add our support for the "Rochester Reservoir-Gray" application for funding through the NHDES Drinking Water and Groundwater Trust Fund to protect approximately 56-acres in Barrington through two conservation easements.

The properties, including approximately 32.1 acres owned by the Gray family and 23.5 acres owned by the City of Rochester, provide a wide array of natural resource benefits that are important to both people and nature. In addition to many other conservation benefits, these properties offer significant water quality protection to Rochester Reservoir and Round Pond; These two water sources provide drinking water to more than 25,000 people in the City of Rochester. Conserving these 55.6-acres serves to maintain quality drinking water that is critical to preserving for residents and other towns that rely on the regional watershed. Our hope is that more conservation in the region will continue to bring protection to the Piscataqua-Salmon Falls watershed and thus benefit our region's river systems and source water areas.

Funds from Drinking Water and Groundwater Trust Fund grant program will be key to seeing these lands conserved and ensuring a clean and healthy water supply within this region. We strongly support this project and Rochester's application to the program.

Sincerely,

Doug Bogen, Chairperson
Barrington Conservation Commission
