REQUESTED ACTION

Authorize the Department of Safety, Division of Homeland Security and Emergency Management (HSEM) to amend the grant agreement with the City of Manchester (VC# 177433-B014), 2033 South Willow St., Manchester, NH 03103, to change the scope from conducting an active threat exercise to purchasing swift water equipment. This grant was initially approved by Governor and Council on June 28, 2023, item #244. Effective upon Governor and Council approval. Funding source: 100% Federal Funds. No additional funds are being requested.

EXPLANATION

This request to change the scope of the grant is based on Manchester Fire Department's deployment in September 2024. Through the New Hampshire Department of Safety, Division of Homeland Security and Emergency Management (HSEM), Manchester Fire responded to an Emergency Management Assistance Compact (EMAC) request from the State of North Carolina following Hurricane Helene.

As part of this deployment, Manchester Fire sent its Swift Water Rescue Team and equipment to conduct life-saving search and rescue operations in the Boone, North Carolina region.

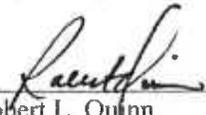

During these operations, several lessons were learned about the performance and limitations of existing equipment. These insights have led to the current request to modify the grant scope to include updated swift water rescue equipment. The requested changes aim to enhance the team's capabilities for future missions, whether in Manchester, throughout New Hampshire, or in support of EMAC deployments to other states.

HSEM has reviewed this request with the Federal Emergency Management Agency (FEMA), and it was determined that the scope change will not affect Federal Funding.

The Homeland Security Grant Program (HSGP) is 100% Federally funded by FEMA.

In the event that HSGP funds are no longer available, General Funds and/or Highway Funds will not be requested to support this program.

Respectfully submitted,

Robert L. Quinn
Commissioner of Safety

EXECUTIVE SUMMARY

Hurricane Helene – EMAC Swiftwater Rescue Response Thursday September 26, 2024 1300hrs – Monday October 7, 2024 0800hrs

After Action Review Process

The formal After-Action Review (AAR) is an in-depth and detailed review and analysis of large-scale and/or other complex or tactically challenging operation. The formal review is used to discover (learn) what happened and why, reassess direction, and review both successes and challenges. Every aspect of the incident should be carefully reviewed and analyzed to determine what went well, what could be improved, and why. The results of such analysis can suggest changes to policy, operations, and/or guidelines that may be necessary.

The AAR will seek to answer five key questions:

1. What happened? (Incident overview and conditions)
 2. What was the incident response? (List factors such as weather, manpower, ICS structure)
 3. What went well?
 4. What did not go well?
 5. What should be changed for next time?
-

This AAR is a process to examine the events that took place, the methods used to control or address the incident, and how the actions of emergency personnel contributed to the eventual outcome. It is used to help us to evaluate our strengths, weaknesses, threats and, opportunities.

Date: Thursday September 26, 2024 through Monday October 7, 2024

OUTCOME OF THE INCIDENTS / OPERATIONS

The outcomes of all mission packs and mission work ups could be deemed successful. During the initial stages of the deployment, the deployment team was successful in removing multiple people and animals from multiple life threatening situations. During other rescue and recovery mission work ups the team was successful in completing missions, meeting objectives and operating efficiently with minor equipment issues or failures and one injury.

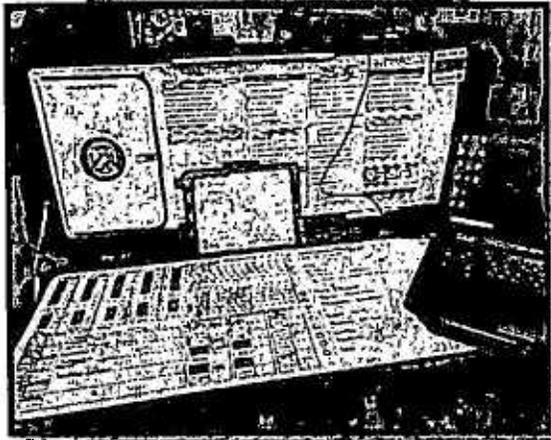

Damage to fire department equipment includes tears to rescue suits and boots, wear and tear on department vehicles and trailers due to road conditions, debris induction into jet propulsion outboard motors and damage from flying debris in high wind conditions.

Injuries were limited to one firefighter that sustained a foot injury while clearing debris to access two females and a dog trapped in their home following a catastrophic mudslide that destroyed the house and trapped them within it. The injury was reported and assessed at the local hospital, care provided and the firefighter received clearance to continue operating on the deployment.

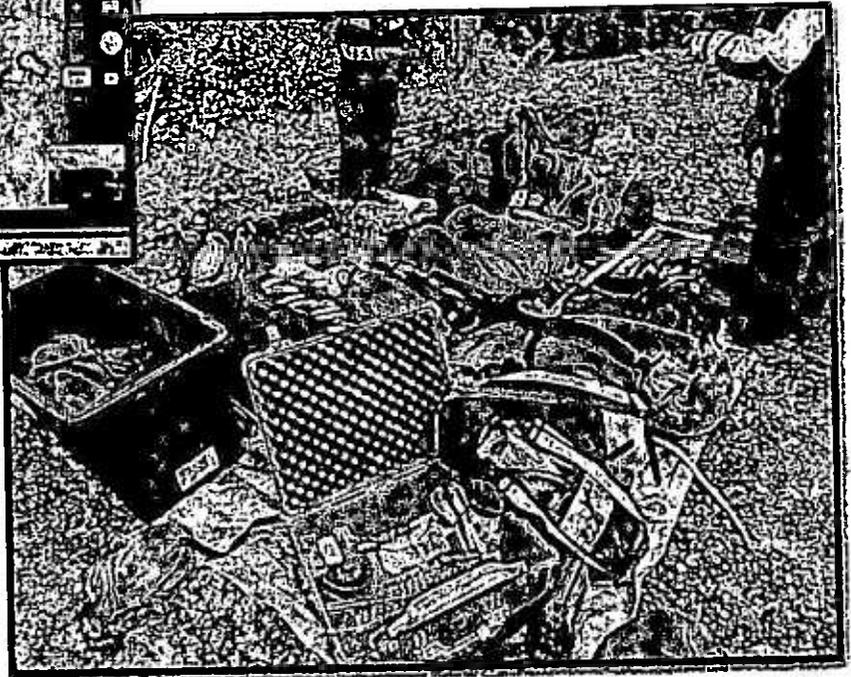

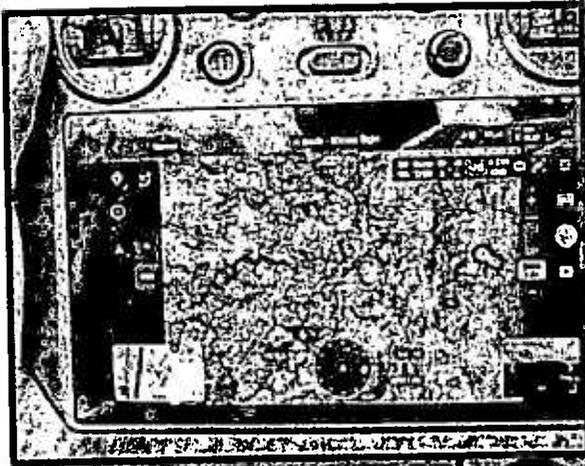

COMMON OBSTACLES / THREATS

1. Limited access to the IMT. Never able to receive IAP for daily operations, coordinated effort was difficult.
2. Used data systems to share information at times when field units had limited access to data systems including radio, cellular and internet.
3. Mapping challenges to understand area and terrain. Limited reception and required regular use of personal cell phones.
4. Assignment changes were random and without adhering to prescribed tactics or strategy.
5. Weather during the first and second operational periods caused an increase in safety needs as well as some challenging operations to be completed.
6. Debris caused challenges to driving and operating boats in water areas.
7. Challenges between wearing proper water PPE and more appropriate technical rescue attire.
8. Insufficient cache' of equipment and PPE.

WHAT DID NOT WORK WELL / WEAKNESSES

1. Communications – communications outside of the team were difficult. Without cellular or internet connections the only communication ability was via SAT phones, which we didn't have.
2. Internal Communication – while carrying out mission packs, team communications to the IC need to be increased. The tracking of activity and the safety of personnel is of utmost importance. Communication should be regular and detailed.
3. Air monitoring equipment was necessary during each mission work up and the resource was not available locally.
4. Regular use of personal cellphones was necessary for mapping and data acquisition. With broken networks this option was very limited in success.
5. Team / Equipment capability – The team has an abundance of capability and deploying as a single resource should not hamper the equipment taken or available to perform lifesaving operations.

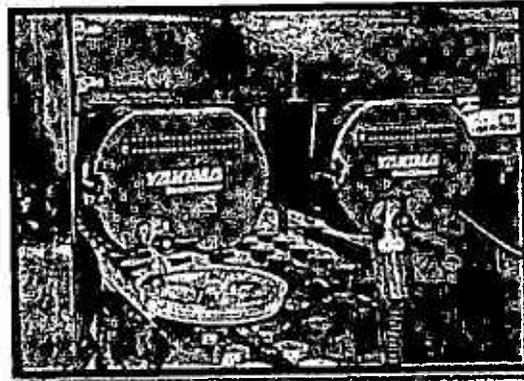

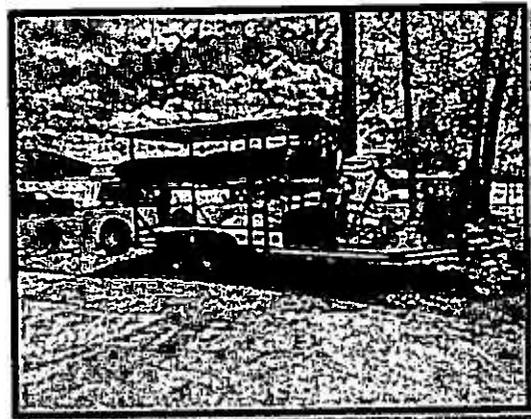

RECOMMENDATIONS / OPPORTUNITIES

1. Development of deployment policy and procedure to include Swiftwater Special Operations Deployment response procedures, program overview, mission, vision, goals, team selection, training, activation process, reporting time, pre deployment checklists, PPE, personal items, operational equipment, operational guidelines, safety plans, decontamination guideline, demobilization guideline, maintenance guideline, AAR guideline, fiscal tracking, tracking forms, applicable RSA's, etc.
2. Stock list for equipment required to be taken on deployment.
3. Stock list for what equipment is removed from in service apparatus if dedicated equipment is not available.
4. Stock list for provisions to be taken upon dispatch from MFD HQ.
5. Stock list for personal items to be taken, i.e. clothes, uniforms, toiletries, etc.
6. Box system, two boxes per person, one for personal items, one for protective equipment.
7. Equipment loading locations, diagram of how to efficiently have trailer / vehicle set up for deployment if it is not prepared previously.
8. Deploy with enough rescue equipment, plus 25% more as spare / repair equipment.
9. Consider bringing all PPE assigned to team members.
10. Mapping abilities, transportation routes, low bridges.
11. Cash availability, power outage, no credit card access.
12. Better, more appropriate tow vehicles, greater mileage plans.
13. Consider better communication devices: SAT phones, iPad with offline maps, repeater / booster for portable radio, cell devices, wifi devices, starlink hardware.
14. Trailer upgrades are needed. Trailers need upgrades to securing devices for boats and turn buckles as well as long transport securing. Trailers require lighting upgrades for back up lighting, warning lighting, marker lighting and a more appropriate light package and location.
15. Lighting upgrade for EM truck, no red warning lights and small light bar.
16. Consider portable winch capabilities that can be used on any vehicle.
17. Consider differently designed trailer / tow vehicle to include the transport and use of the side by side vehicle.

18. Consider purchase and accessibility of a drone for deployment.
19. Consider white board for briefings and mission pack build outs, could be built into deployment trailer.
20. Develop incident command work sheets for all technical rescue disciplines.
21. Consider trailer upgrades and storage of prop motors / spare motors.
22. Develop command vehicle capable of providing power to the data needs.
23. Equipment / Capability Recommendations:
 - a. Consider purchase of water proof radio or dry bag / water protective pouch for communication equipment to include cell phones, radios, and / or iPads.
 - b. Consider manufacture of exhaust snorkel for boat deployment vehicle.
 - c. Consider protective cage for jet drive systems to avoid debris intake.
 - d. Deployment team was rope negative, although deployed for swiftwater, other assignments can and should be expected. Equipping the team for most technical rescue scenarios should be considered heavily.
 - e. Consider forcible entry tools to include more than hand tools, consider hydraulic hand tools.
 - f. Kid harness and adult harness needs, even for water evacuation and boat operations.
 - g. Life jackets, non-rescue, public spec, multiple, can have dozens of "victims".
 - h. Increase saw load out, ensure saws are compatible with one another and able to be converted from one use to another.
 - i. Fuel cells. Tow vehicles were not all diesel fuel. Need for portable fuel cells for boats and vehicles. Consider larger, multi fuel cell.
 - j. Consider addition of extension ladders and step ladders to the equipment cache
 - k. Consider addition of decontamination system on trailers with water storage and battery powered pressure washer.
 - l. Consider addition of other sized dog crate(s), muzzles and vests to equipment cache.
 - m. Consider additional walking poles for equipment cache, should exceed number of team members.

- n. Consider dry bags for walking operations to allow for provision, batteries, medical equipment to be carried by team members.
- o. Consider expanding equipment cache to include spares of batteries, flash lights, head lamps, gloves, etc.
- p. Consider purchase and deployment of second raft, potential third raft.
- q. Consider heavy equipment keys.
- r. Consider iPad in water proof containers for each boat.
- s. Consider adding dirt shovels / collapsible to the equipment cache.
- t. Consider deployment medical pack out to the paramedic level.
- u. Consider electrical / communication built out of communication van.
- v. Consider addition of battery operated hand tools to equipment cache.
- w. Consider cotton coveralls for personnel working in water suits around debris piles or similar conditions.
- x. Consider acquisition of rain gear for personnel to include waterproof jackets, pants and boots.

WHAT WORKED WELL / STRENGTHS

In operations such as this the capability of the team is of utmost importance. The only thing potentially more important than team capability is team cohesion and how the team works together. While biased, I am not sure you could have built a better team to address the situations that were found or the needs of the communities we aided. Certainly, you could trade out a member of the team here or there but the team as an overall was a finely tuned machine upon putting their feet on the ground for this assignment.

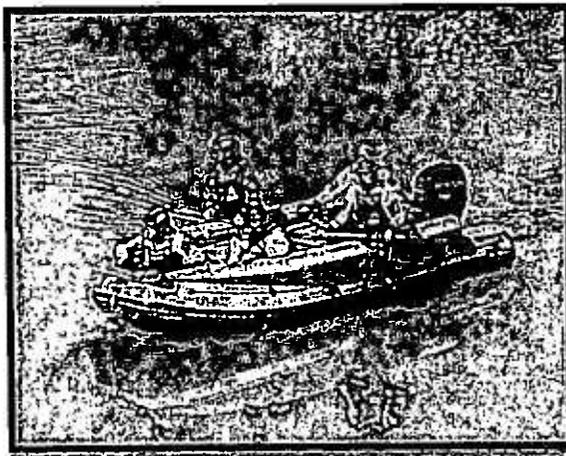

The deployment team addressed each mission pack or event without frustration even at times when it would have been warranted. The team was relentless in its desire for work ups and missions in an effort to provide assistance to any length or time needed.

The equipment that was utilized worked as designed and the team was able to demonstrate their proficiency and capability with the equipment.

The strategy, tactics and knowledge, skills and abilities of the team could not have gone unnoticed. During highly stressful situations the team was successful on all missions.

Having four vehicles allowed the team to prepare, set-up and move with fluidity. These vehicles provided good transportation capability as well as appropriate storage of equipment and provisions.

The logistical component of the deployment, even with the limitations noted, worked well. Maintaining a small cache of spare batteries, radio equipment, portable radios, flash lights and marking materials allowed for operations to continue smoothly as replacements or refreshing needs took place.

OPERATIONAL PERIODS / MISSION PACKS

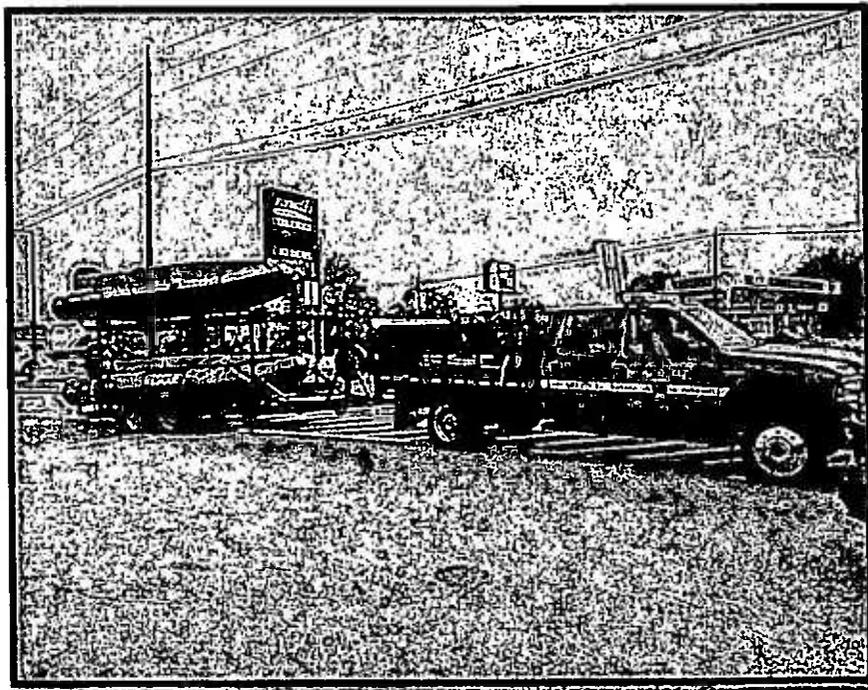

Thursday 09/26/24

The Manchester Fire Department received an EMAC activation for the deployment of a swiftwater rescue team to respond to the needs of victims effected by Hurricane Helene in the State of North Carolina.

At 1300 hours on Thursday September 26, 2024, the deployment team was activated and pre deployment activities began throughout all Divisions of the Manchester Fire Department including the Operations Division, Safety Training Division, Mechanical Division, Communications Division, Emergency Management, and Fire Administration. At 1500 hours, the deployment team dispatched from fire department headquarters for response to North Carolina. During the response, team members stopped for provisions and fuel as needed, encountered weather events, and prepared for the mission packs of the deployment.

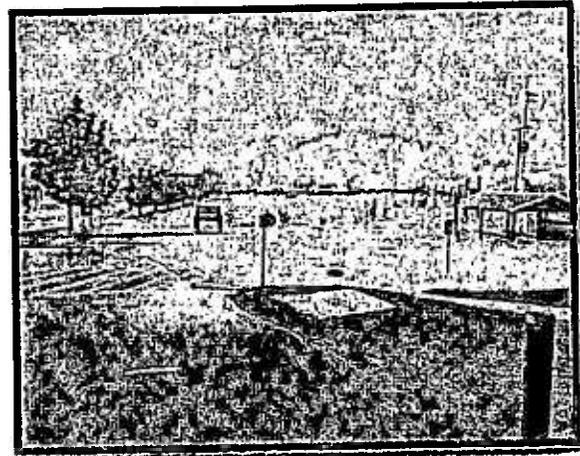

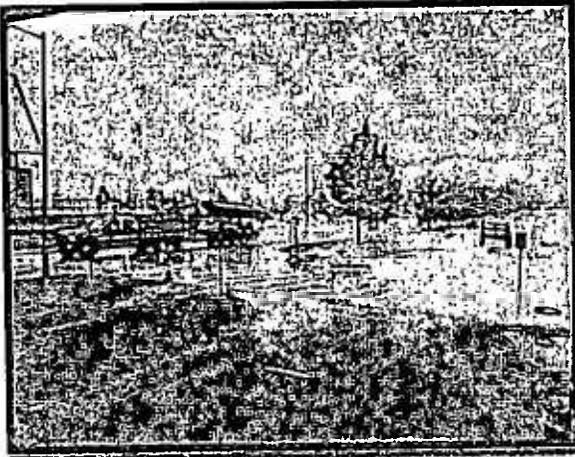

The deployment team arrived in the response area around 0600 on Friday morning after an overnight response from Manchester. Upon arrival, crews were immediately put to work. The following is the full account of all operational periods and situations found during the swiftwater rescue response.

While operational periods are normally classified in periods of time or more commonly hours, the incident command structure of this response area was not strong enough nor set up to function within a breakdown of hours but rather based on a "day" period or activities encompassing a full twenty-four hours.

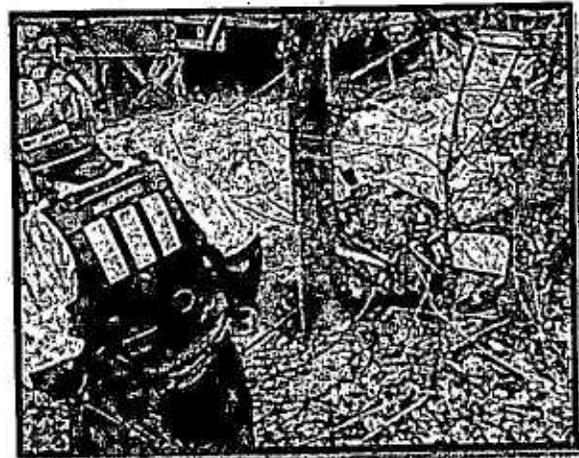

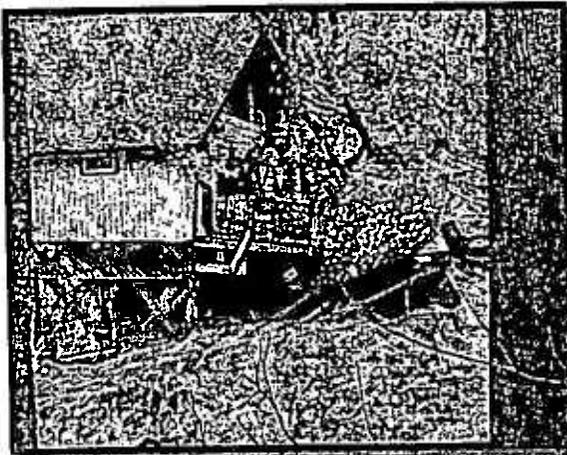

Friday 09/27/24

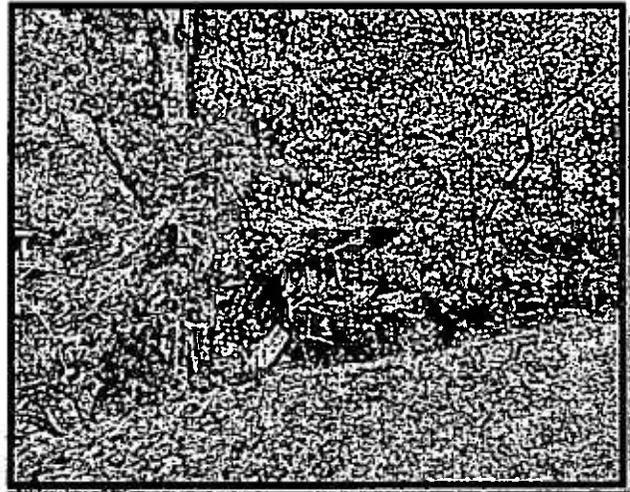

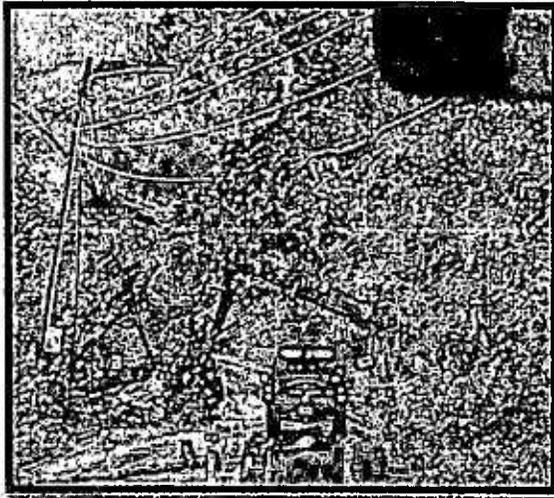

The Deployment Team quickly deployed on arrival into Boone, NC to effect the rescue of one adult female located in a large building approximately 1500 feet to the rear of the Boone Fire Department. The water ways from the South Fork New River had swollen, actively rising and flooding the area. Two boats were launched, each with a crew of four rescuers. Forcible entry was made into building and a primary search was underway when the victim appeared in an entryway. Contact was made and she was extracted to the shore. Crews had to work in currents from the flooded river heavy with large debris causing stalling issues with the jet propulsion systems.

The team then responded to an incident in Boone where a family was trapped in their home which was severely compromised from the river and another home which had a catastrophic collapse and was now a debris pile on and around the house. Members set up a basic rope system as an attachment point and made entry to structure. One adult female, one adult male and one male toddler was extricated from the structure. The elderly woman who was reported as occupying the structure that had a catastrophic collapse was not visible in the wreckage. Due to access and the unpredictable circumstances it was deemed as unsafe to work in the debris pile. The waterway was swift and full of debris with buildings above the working area being compromised.

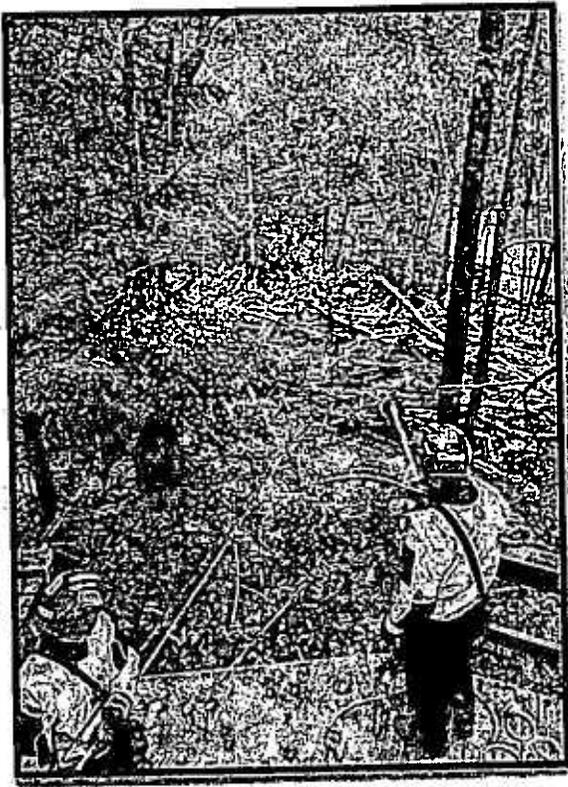

The team made its way up to Howards Creek Road to respond to a home which was compromised by a landslide. We checked a home that had been compromised from a swift moving flood and was clear of occupants. While in the area a passerby stopped us and informed us that a mother and daughter were trapped on a mountain side across a creek by a landslide. This ended up being the technical rescue that took place on Creek Road. Access to the area and recon was done during the final hours of daylight. Contact was made with the victims and all efforts were ceased for the evening with a plan of action at daylight.

Saturday 09/28/24

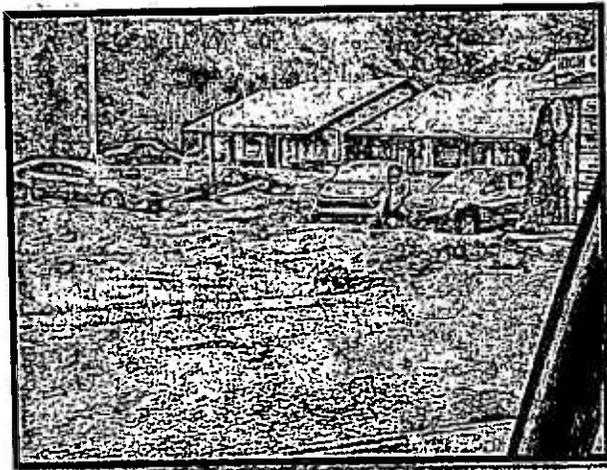

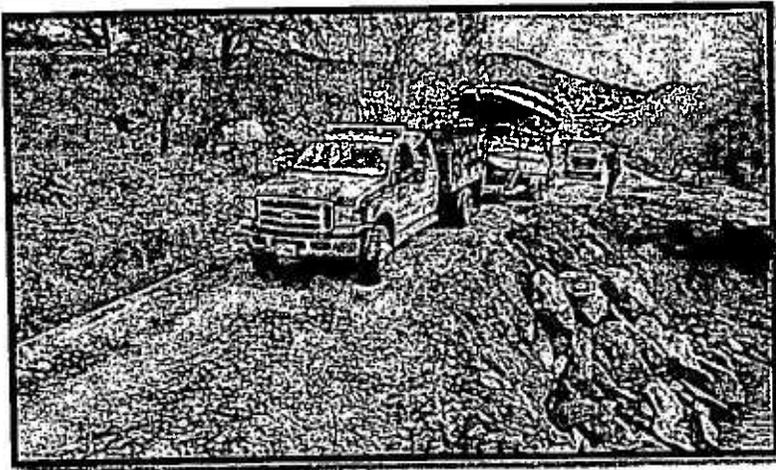

Crews staged at elementary school and the IAP was laid out for the rescue. Work teams were identified and tasks were delegated. The team made its way to the location, contact with the victims was successful with a cell phone call. MFD met with members from the State Fire Marshal's Office and the Watauga County Rescue. Three members from the Watauga County Rescue were assigned to the incident. Multiple systems were constructed for extrication; patient access was made during the system construction with an assessment of the structure. Both victims and a dog were extracted from the structure down to the debris pile and then onto another rope system over the creek and to the mainland where they were medically evaluated and turned over to family members who were waiting to receive them. The rescue took approximately 5 hours. During this time, members worked as a highly trained team with expertise and professionalism. This operation really showcased the abilities of the Manchester Fire Department's Swift Water Team. The impressions we made as a team to the family and all local responders that day will never be forgotten.

Sunday 09/29/24

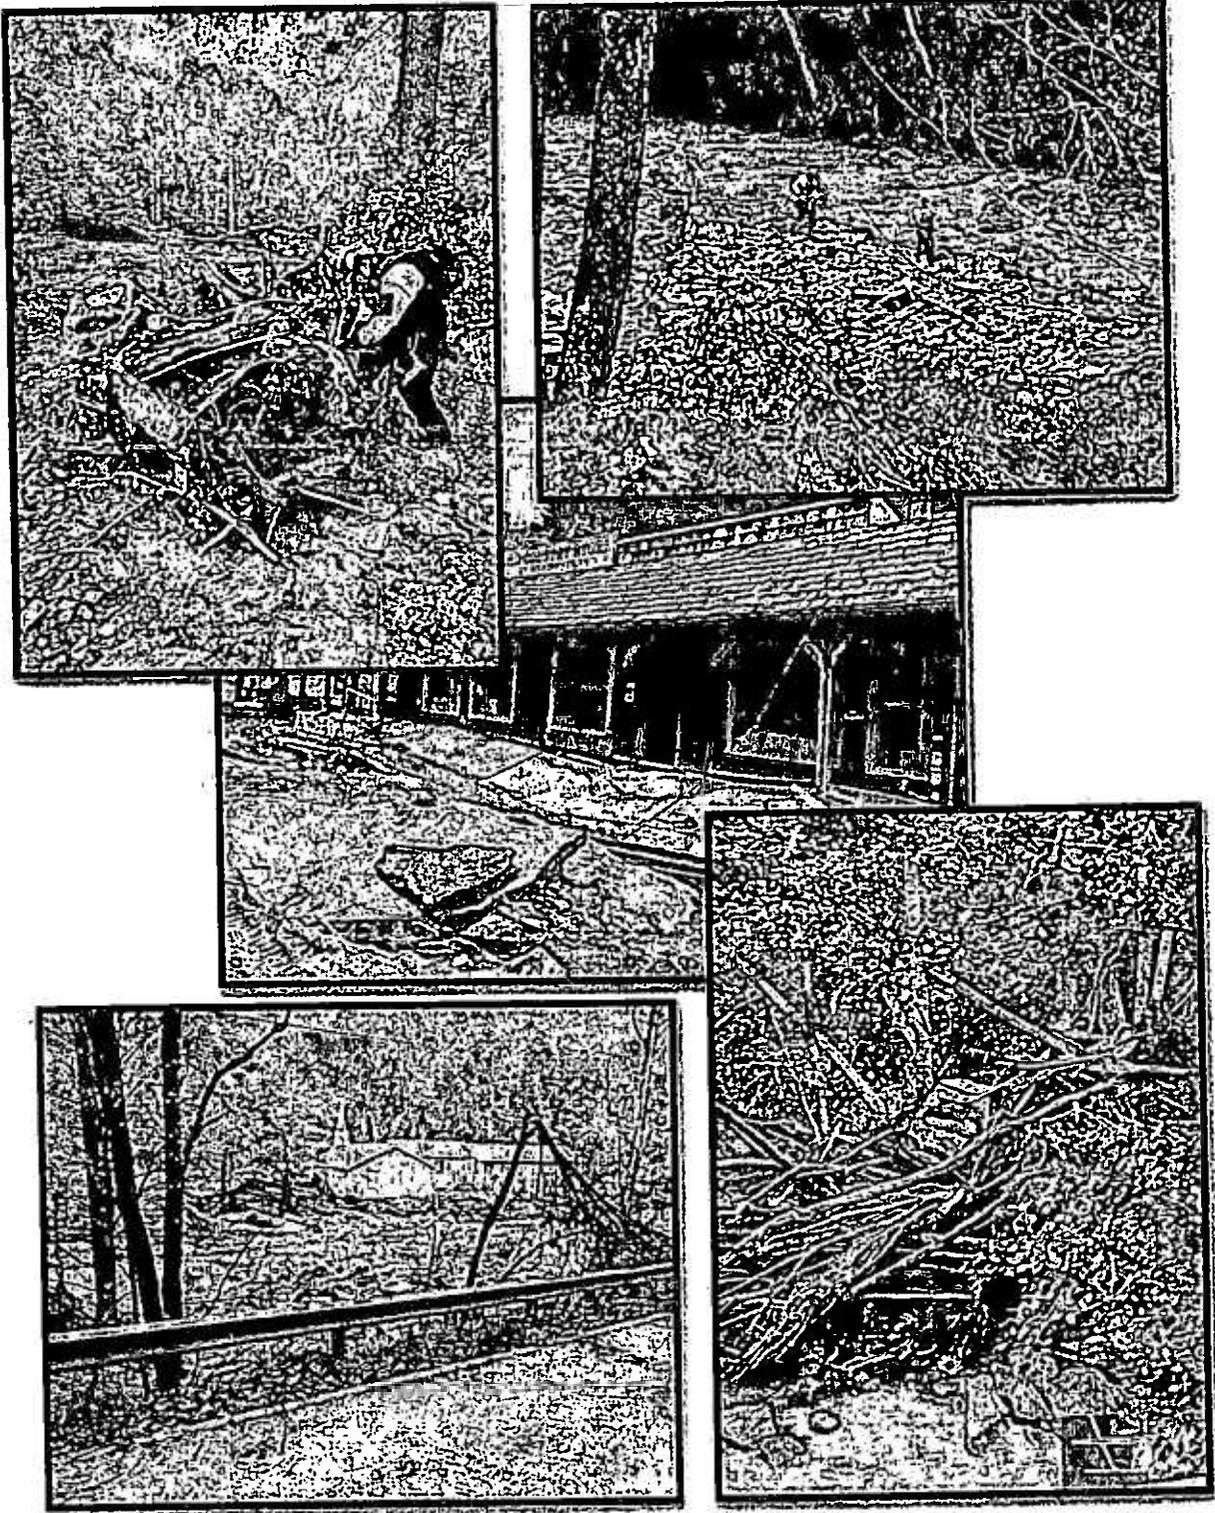

Companies were operational and waiting orders from the IMS. We were moved around to a few different locations before ultimately landing in Avery County Emergency Management Center.

The EOC in Avery County seemed overwhelmed and unorganized during this visit. They were unable to procure any viable lodging for the team. We advised them that the team was ready and willing to work a nighttime operational period. While there we met with the Michigan and Delaware Task Force teams and developed a plan to search along the Elk river covering F8, F7 on the map. and They advised us that there would be no night operations so the team made its way back down to Banner Elk FD located at 345 Shawneehaw Ave, where it was told to us that there was a place to sleep. Arrival to Banner Elk FD made. Upon assessing the station's options, it was decided that the team would not be staying there. A hotel in the area was also checked. This hotel was without power and water and did not have the room for the team. The team decided to travel back to Boone where we stayed at the Watauga Fire Rescue for the evening, arrived at location at 22:30 hours.

Monday 09/30/24

The team arrived at a location in Banner Elk and searched in and adjacent to the Elk River on foot and from vehicle. No bodies found, vehicles searched and marked.

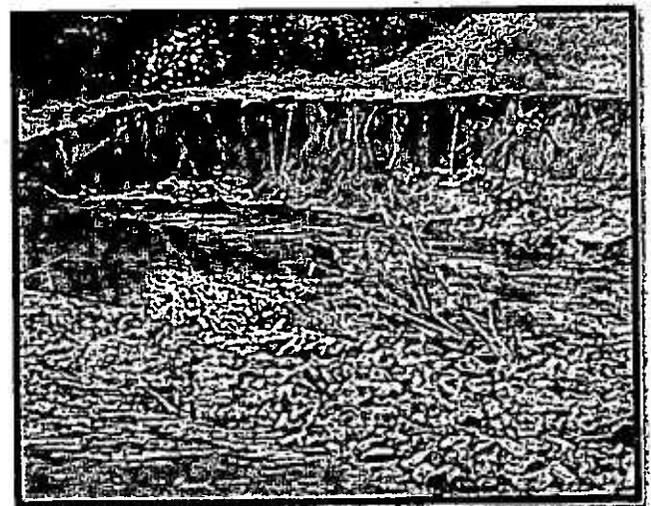

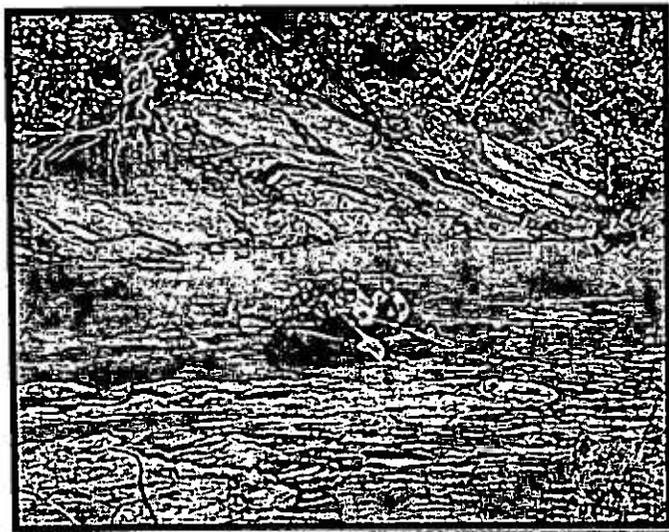

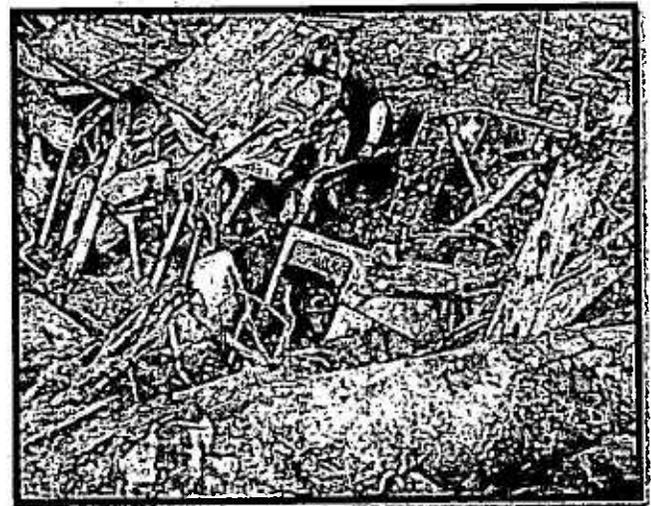

Tuesday 10/01/24

The team reported to the Green Valley Fire department. On arrival we met with the Fire Chief and members Cody and Mike. After a briefing on the area and the missing persons the team began its search. We started in the large debris pile under the bridge where there were multiple vehicles. Members tunneled into and checked vehicles with negative findings. The team then launched an inflatable with 4 members to continue down the North Toe river along with Three Mile Creek.

Other members made access and checked homes with the use of pickup truck and UTV. All vehicles/campers and houses that were compromised were checked and marked. River checked from launching point to Bend Road, referred to as Lower Bend Road by the locals. Search was terminated by boat at this location with the rest of the river checked from roadside to the point where the river meets Fairview Church Road. Negative findings for victims.

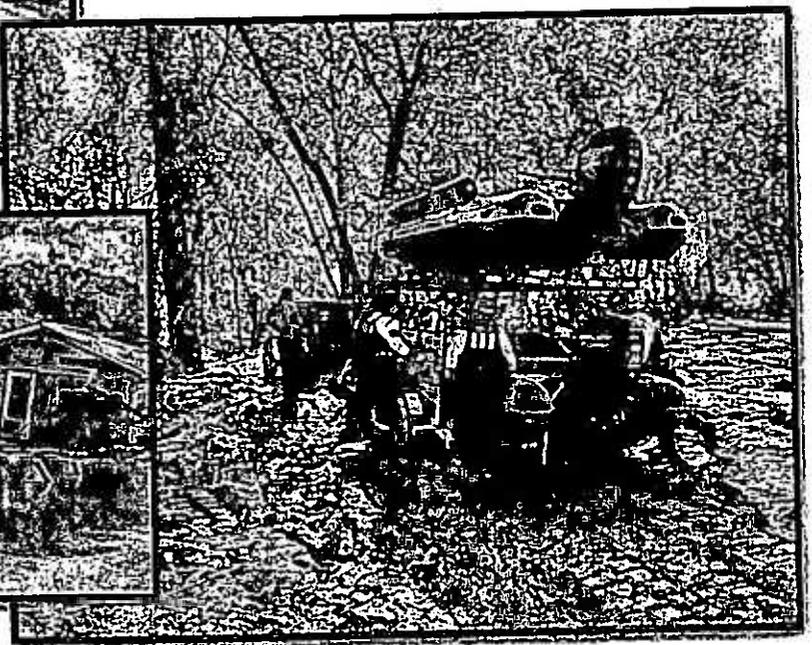

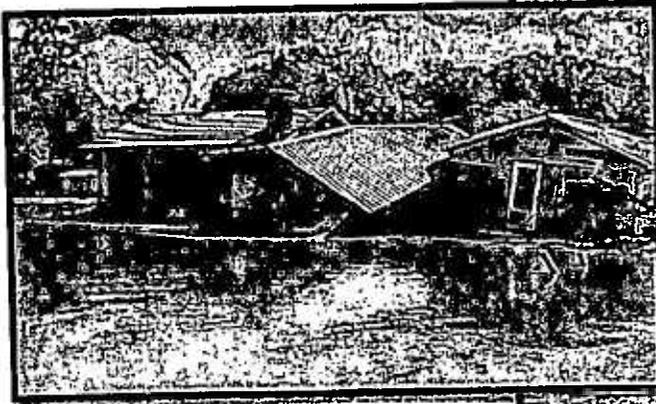

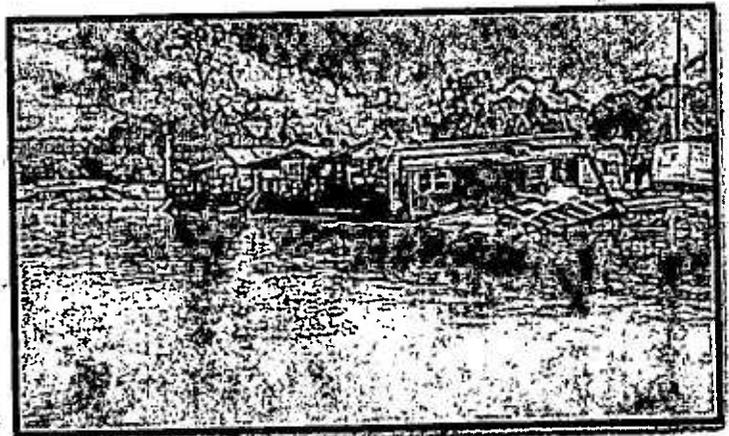

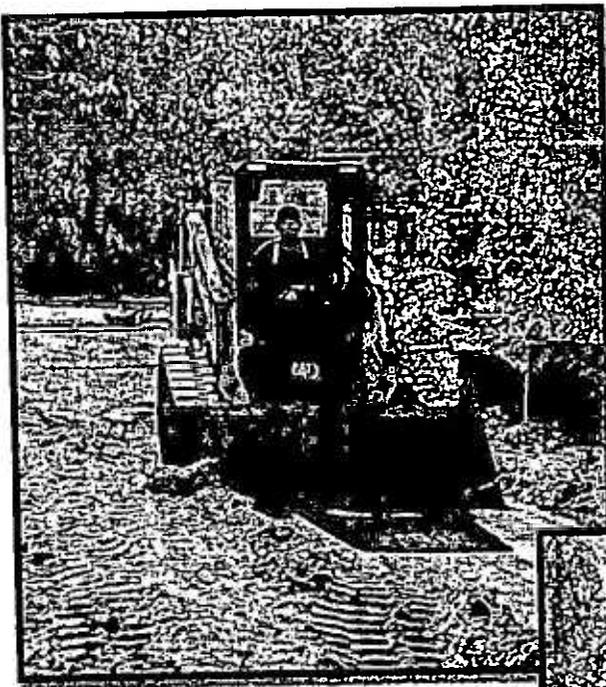

An additional area located at Winters Ln Newland, NC 28657 was also checked by vehicle. The bridge had washed out and a large debris pile was there. In the debris pile was a Toyota Tundra pickup truck. Members accessed the area and due to the vehicle being full of water we were unable to ascertain if it was occupied.

Wednesday 10/02/24

Team left the EOC in Avery with orders to search a section of the Catawba River in Marion, NC from Campers World into Lake James. The launch point was set to be at 311 Resistoflex Rd Marion, NC.

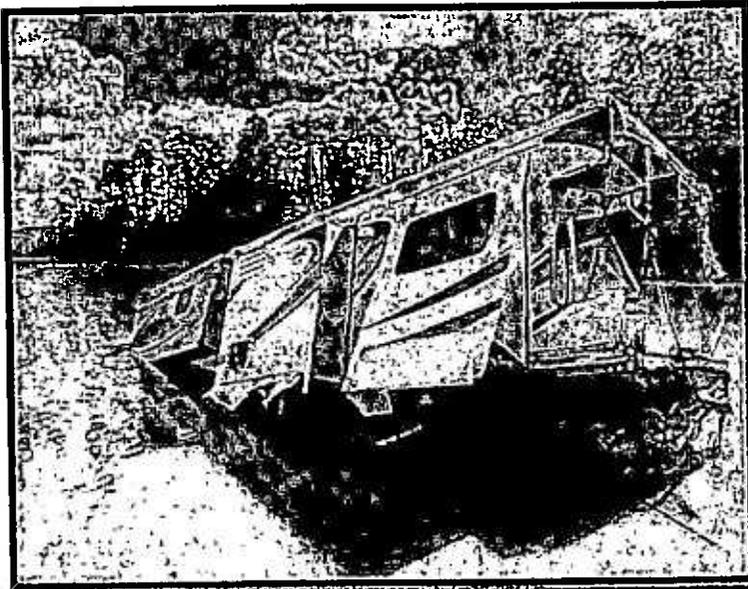

The launch area at this location was not an option as it was severely washed out. Companies checked the area and found a viable launching point. Members from the team used saws and heavy equipment to make access to the river. Two boats were launched and Search and Rescue efforts covered from the launch point at 35.68952° N, 82.04958° W. (This location is off Old Greenlee Road and is referred to as the Greenley river access) down river to take out point which was Lake James at 4040 Yancey Rd Marion, NC 28752. Members met up with the Michigan Task Force Team.

Thursday 10/03/24

Team reported to the EOC in Avery County at 0730. Met with EOC operations and laid out the team's plans to search Lake James beginning at the spillway.

This area was said to be a no go zone but the team thought it would be best to begin here to report the conditions back to the EOC for future operations. The team launched at 63 Mlc Boat Dock Dr Nebo, NC. The team launched two inflatable powered boats and searched the area of the spillway. The team searched adjacent areas of the lake and met with a Task Force at noon. From there the team worked with Greenville NC Task Force 10 to clear the remainder of the lake up to the spillway. We were assigned three sections of the lake which we cleared, negative findings. The team loaded up and returned to Meat Camp FD for the evening. Equipment was serviced and cleaned. The EOC was notified of the team's demobilization plans.

Friday 10/04/24

The Deployment Team left Meat Camp enroute to Manchester. The team travelled for about eight hours finding lodging in Wilkes-Barre Pennsylvania and bedded down for the last leg of the return trip home.

Saturday 10/05/24

The Deployment Team arrived at Manchester Fire Department Headquarters in Manchester at approximately 13:45 safely without incident.

Request Change of Scope of Existing Grant to Meet Immediate Needs

In September of 2024, Manchester Fire Department, through the New Hampshire Homeland Security & Emergency Management Agency, responded to an EMAC request for life saving assistance from the State of North Carolina during Hurricane Helene. Responding to that request, Manchester Fire deployed it's Swift Water team and equipment and performed life safety search and rescue operations in the Boone North Carolina region.

As is the case with most emergency responses and deployments of this magnitude, the personnel from Manchester Fire took back numerous lessons learned from the rescue missions. They learned what equipment worked and what needs improvement.

Those lessons learned have resulted in this grant request for swift water equipment, that can improve the capability of the team to respond to future calls for service in Manchester, regionally across the State of New Hampshire or to other states across the country through EMAC. The equipment requested will also help to increase the safety of swift water team members and potential victims requiring rescue during flooding emergencies.

Page 2 of 2

All New Hampshire communities can apply for training and exercise funding on the HSEM Resource Center website where they can review eligibility criteria, describe their project, estimate their cost, and show the work they have accomplished that prepares them for the next step in the training and exercise cycle. The Training and Exercise team at HSEM will evaluate the applications for eligibility and readiness and approve or decline the application based on a combination of grant criteria.

Due to the time required to fully execute and accept funding at the county and municipal level, combined with the timing of future Governor and Executive Council meetings, the Department of Safety, Division of Homeland Security and Emergency Management, requests authorization to enter into the grant agreements listed above using the grant agreement form attached to this request. Governor and Executive Council approval of this authorizing item will permit grant agreements to become effective after being fully executed and accepted at the county and municipal level, without requiring further action by the Governor and Executive Council. These agreements will remain subject to a review of form and execution by the Attorney General's Office prior to final execution and approval by the Department of Safety.

Highway Funds or General Funds will not be used to support this program should Federal Funds become unavailable.

Respectfully submitted,

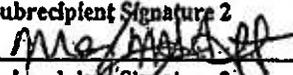

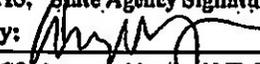

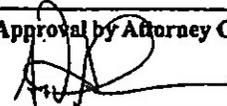

Robert L. Quinn
Commissioner of Safety

Funding may be suspended or terminated for filing a false certification in this application or other reports or document as part of this program.

Tracking of Equipment:

Subrecipient Initials: 1.) ll 2.) ll 3.) MP Date: 01/20/23

Upkeep, maintenance, and training of and for equipment procured as part of the Homeland Security Grant Program is a local and/or grantee responsibility. The inventory of this equipment is a local responsibility and the recipient of such understands that inspections, auditing, and inventory accounting of this equipment may occur as a condition of this grant either from Federal, State or other appropriate level agency and agent.

Equipment valued over \$5,000:

To comply with OMB 2 CFR 200 equipment valued at this level must inventoried and tracked locally and be reported to the State Department of Safety (DOS) — Grants Management Unit for 2 years or until the item carries a depreciated value of less than \$250. The disposition of the equipment must be reported. DOS recommends consulting with local auditor's compliance and disposition rules governing equipment procured with Federal funds.

Certification by Official Authorized to Sign

I certify that I understand and agree to comply with the general and fiscal provisions of this grant application including the terms and conditions; to comply with provisions of the regulations governing these funds and all other federal and state laws; that all information presented is correct; that there has been appropriate coordination with affected agencies; that I am duly authorized by the Applicant to perform the tasks of the Official Authorized to Sign as they relate to the requirements of this grant application; that costs incurred prior to Grantee approval may result in the expenditures being absorbed by the subrecipient; and, that the receipt of these grant funds through the Grantee will not supplant state or local funds. **CERTIFICATION: I CERTIFY THAT I AM DULY AUTHORIZED UNDER THE STATUTES OF THE STATE OF NH TO APPLY FOR, AUTHORIZE, OR ACCEPT THE HOMELAND SECURITY GRANT FUNDS / EQUIPMENT HEREIN. ***THE AUTHORIZING OFFICIAL MUST BE STATUTORILY ALLOWED TO SIGN A CONTRACT FOR THE MUNICIPALITY (i.e. Mayor, City Manager, Town Manager, Chairperson BOS, etc.) PER RSA 31:95b or RSA 37:6**

Non-Supplanting Certification: This certification, which is a required component of the New Hampshire application, affirms that federal Homeland Security grant funds will be used to supplement (add to) existing funds, and will not supplant (replace) funds that have been locally appropriated for the same purpose. Potential supplanting will be addressed in the application review as well as in the pre-award review, post award monitoring, and the audit. DHS/FEMA I.B. 379 allows as well as FP-205-402-125-1 which apply to maintenance and sustainment of grant or in some cases non-grant acquired capabilities with specific definitions. Applicants and/or grantees will be/may be required to supply documentation certifying that a reduction in non-federal resources occurred for reasons OTHER than the receipt or expected receipt of federal Homeland Security grant funds. Supplanting funds is loosely defined (for these purposes) as using federal grant money to "replace" or take the place of" existing local funding for equipment or programs. The funds are intended to provide local entities with increased or in 2021 sustained capabilities or to build capacity to address CBRNE/WMD terrorist incidents.

National Incident Management System (NIMS) Implementation

Prior to allocation of any federal preparedness awards, recipients must ensure and maintain adoption and implementation of NIMS. The list of objectives used for progress and achievement reporting is on FEMA's website at: www.fema.gov/emergency-managers/aims/implementation-training.

Please see the: Preparedness Grants Manual for more information on NIMS. Recipients should manage resources purchased or supported with FEMA grant funding according to NIMS resource management guidance. Additional information on resource management and NIMS resource typing definitions and job titles/position qualifications is on DHS/FEMA's website.
