EXPLANATION

During the fall of 2024, the Department of Environmental Services issued a solicitation for applications for the 2024 Water System Sustainability Grant Program to community water systems serving a population greater than 150 people. Through the program, twelve (12) Strategic Planning Grant applications were received, evaluated, and ranked based on criteria included in the solicitation, such as whether the project improves technical, managerial and financial capacity and provides decision makers with the best available data to implement drinking water infrastructure improvements. Out of the twelve project proposals, nine (9) were selected to be funded. See attachment A for the Strategic Planning grant application rankings and list of reviewers.

Sunapee Hills Association dba Chalk Pond Water Company will use the funds to evaluate the resiliency and sustainability for their existing well. The project will assess the well's source capacity, explore new water source locations, and identify alternatives to meet future demands while enhancing the water system's resilience.

This grant agreement has been approved by the Office of the Attorney General as to form, substance, and execution. In the event grant funds become no longer available, general funds will not be requested to support this program.

We respectfully request your approval of this item.

Test 4: Assess Source Capacity

Following completion of pumping tests of the system's sources, develop plots of pumping test results and compare current yield (rates vs. drawdown) to known historical yield for each source well. Assess and estimate the current and future demand for the water system based on current usage trends and compare the current yield to the projected future demand to determine the future source maintenance and development needs.

Test 5: Report

Summarize the results of the well records review, pumping tests, and historical water quality and provide recommendations for maximizing source capacity at the system. Submit a letter report of results and meet with the system and NHDES to review testing results and recommendations.
