EXPLANATION

The Department is requesting a **sole source** contract with SaraWorks, LLC as they are the exclusive provider of this specific client engagement system, and there are no known alternatives to this service. The specialized system was developed as part of a pilot program funded by the Bureau's Federal oversight agency, the U.S. Department of Education, Rehabilitation Services Administration (RSA). The SaraWorks, LLC system is currently being utilized in eight state agencies, one federal agency (The Social Security Administration) and one non-profit all obtained via a sole-source contract directly with the vendor.

and the Honorable Council

The software as a service that supports participant engagement, data entry and documentation within a FedRAMP certified cloud environment. Using natural language processing, it can engage in intelligent, two-way communications with participants and third parties using two-way SMS (texting) and encrypted email. The system's engine can be easily taught to collect any kind of information a human could collect. It undertakes structured interviews with clients and providers to determine progress, barriers and milestones reached and can make basic decisions accordingly. The system communicates using Multimedia Messaging Service, which makes it easy for clients to send pictures of certificates, grades, etc. from their phone when requested. This documentation is directly linked to the Bureau's Federal performance indicators. All outgoing and incoming emails and text messages are automatically made part of the client case notes via a secure application programming interface (API) thus eliminating the need for transcription.

EXHIBIT B – STATEMENT OF WORK BUSINESS AND TECHNICAL REQUIREMENTS AND DELIVERABLES**

EXHIBIT B – STATEMENT OF WORK (SOW) BUSINESS AND TECHNICAL REQUIREMENTS AND DELIVERABLES

The Statement of Work, Business and Technical Requirements, and Deliverables are set forth below:

1. STATEMENT OF WORK

The Vendor will provide software as a service (SaaS) for the Bureau to enhance client engagement and case management through the SARA system. The system will integrate seamlessly with the Bureau's existing case management system via a custom file transfer process, allowing client data to be securely exchanged between systems. The Vendor is responsible for maintaining this integration and ensuring its continued functionality. Specifics regarding data formats and protocols are covered under the current integration process.

The Vendor will maintain and update the SARA system based on input from the Bureau. These updates will include improvements to the customizable rules engine and any necessary adaptations to ensure system efficiency. Updates will be implemented as needed based on feedback from the Bureau.

SARA will be hosted in a FedRAMP-approved AWS GovCloud environment, ensuring full compliance with NIST 800-53 and HIPAA standards. This hosting setup guarantees the security, confidentiality, and availability of all client data and communications.

SARA utilizes natural language processing (NLP) to facilitate intelligent, two-way communication with consumers and third parties via SMS and email. Through structured interviews, SARA collects data such as client progress, barriers to employment, and milestones reached. Based on these interactions, SARA makes basic decisions, sends reminders, flags issues, and automatically updates case notes in the Bureau's case management system. Color-coded alerts will notify staff when attention is required. These capabilities reduce administrative burdens and enable staff to focus more on client engagement.

The Vendor will provide business hour support to troubleshoot and resolve any technical issues. This includes addressing system failures and responding to inquiries within the agreed-upon business hours. SARA will automatically generate and format case notes in alignment with the standards already in place within the Bureau's case management system.

SARA includes a calendaring system that integrates with counselors' Outlook calendars, allowing for two-way syncing, appointment reminders, and automatic rescheduling. Access will be secured via Open Authorization (oAuth) tokens.

The Vendor will continue to provide ongoing system support, including applying updates, patches, and performing necessary maintenance as needed to maintain system performance and security.

Quarterly business reviews will be conducted between the Vendor and the Bureau to assess system performance, gather user feedback, and identify potential improvements. These reviews will ensure that SARA continues to meet the Bureau's evolving needs.

Attachment 1

Exhibit B defines the Business and Technical Requirements and Activity, Deliverable, or Milestones for the project. The agency will need to update the following three tables, based on the project, then the Contractor will need to complete the tables according to the instructions below. The tables completed by the Contractor will then be inserted into Exhibit B of the contract or included as an attachment to the contract. (Guidance in the contract template will indicate where to include the tables in Exhibit B)

2. Business and Technical Requirements

Please utilize the following instructions to complete all tables under 2.1 Business Requirements and 2.2 Technical Requirements and submit with your Proposal in Section III: Responses to System Requirements and Deliverables.

Criticality Column:

(M) Indicates a requirement that is "Mandatory." The State considers it to be of such great importance that it must be met for the Proposal to be accepted. If the proposer believes that there is something about their Proposal that either obviates the need for this requirement or makes it of less importance this must be explained within the comments. The State retains the right to accept a Proposal if the need of the requirement is reduced or eliminated by another feature of the Proposal.

(P) Indicates a requirement which is "Preferred." This requirement is considered by the State to be of great usefulness, but the lack of this feature is not considered serious enough to disqualify the Proposal.

(O) Indicates a requirement which is "Optional." This requirement is considered by the State to be one which is useful or potentially useful but not a central feature of the Project.

Vendor Response Column:

Enter "Yes" if the Solution can fully support ALL the functionality described in the row, without special customization. "Yes" can only be used if the delivery method is Standard (see delivery method instructions below).

Otherwise, enter "No"; "No" can only be used with delivery method Future, Custom, or Not Available/Not Proposing (see delivery method instructions below).

Vendor Delivery Method Column:

Complete the delivery method using Standard, Future, Custom, or Not Available/Not Proposing (as defined below) that indicates how the requirement will be delivered. Standard – Feature/Function is included in the proposed Solution and available in the current Solution release.

Future – Feature/Function will be available in a future release. (Provide anticipated delivery date, version, and service release in the comment area.)

Custom – Feature/Function can be provided with custom modifications. (Respondent must provide estimated hours and average billing rate or flat cost for the modification in the comment area. These cost estimates should add up to the total cost for modifications found in the cost summary table in Section X of the RFP).

Not Available/Not Proposing – Feature/Function has not been proposed by the Vendor. (Provide brief description of why this functionality was not proposed.)

Vendor Comments Column:

For all Delivery Method responses, vendors must provide a brief explanation of how the requirement will be met. Free form text can be entered into this column.
