EXPLANATION

This project consists of constructing a new vehicle fueling facility and removing the existing fueling facility at the Jefferson Shed (PS 108) located at 160 Stag Hollow Road. The Contractor shall provide all labor and materials to complete the work. The scope of work at the facility will include the installation of one (1) 4,000-gallon diesel underground storage tank (UST), one (1) one-hose suction dispenser and fueling pad with pre-manufactured pump shelter, and all other associated fueling system equipment and appurtenances. Engineered shoring for the tank excavation will be required.

The project will also include the removal of one (1) existing 3,000-gallon diesel UST, one (1) existing dispenser and associated fueling pad, and associated fueling system equipment and appurtenances (with exception of EJ Ward fuel management and Veeder-Root monitoring consoles, which will be reused). The project also includes the installation of a new 40-kW diesel fueled generator.

The Department of Transportation is required to comply with all DES rules relative to the testing and removal of all Underground Storage Tanks (USTs). The project has been identified by Fuel Distribution and Highway Maintenance as a priority project and location for the program to address.

The Contingency amount is proposed to be 5% of the contract amount. This is to account for the risks associated with any unknown conditions associated with existing facility removal and closure, as well as permitting challenges.

The Contractor has been prequalified by this Department. The Contract has been approved by the Attorney General as to form and execution, and the Department has certified that the necessary funds are available and the bid reasonably conforms to the engineer's estimate in accordance with State procedure. Copies of the fully executed contract are on file at the Secretary of State's Office and the Department of Administrative Service's Office, and subsequent to Governor and Council approval will be on file at the Department of Transportation.

This project funding is 100% Underground Fuel Tank Replacement – Capital Fund.

A copy of the Tabulation of Bids received for this project is attached along with the Contract Supplemental Sheet and a map indicating the location of the project.

Your approval of this resolution is respectfully requested.

Sincerely,

William J. Cass, P.E.
Commissioner
