Funds are anticipated to be available in State Fiscal Years 2026 and 2027, upon the availability and continued appropriation of funds in the future operating budget, with the authority to adjust budget line items within the price limitation and encumbrances between state fiscal years through the Budget Office, if needed and justified.

**See attached fiscal details.**

**EXPLANATION**

The Department contracts for mental health services through these ten (10) Community Mental Health Centers, which are designated by the Department to service towns and cities within specified geographic regions, as outlined in the NH Revised Statutes Annotated (RSA) 135-C, New Hampshire Mental Health Services System, and NH Administrative Rule He-M 403, Approval and Operation of Community Mental Health Programs. This request is **Sole Source** because the Contractors are the only authorized contractors able to provide the necessary services.

The purpose of this request is to exercise available contract renewal options with the ten (10) Community Mental Health Centers to continue providing community mental health services for individuals in New Hampshire. Community Mental Health Centers provide community-based mental health services to adults, children, and families to build resiliency, promote recovery, and reduce inpatient hospital utilizations, and improve community tenure. Services provided include crisis services, including mobile crisis response and crisis stabilization, individual and group psychotherapy, targeted case management, medication services, Functional Support Services, Illness Management and Recovery, supported employment, peer services, Assertive Community Treatment, Wraparound services for children, supported housing, and acute care services to individuals experiencing psychiatric emergencies while awaiting admission to a designated receiving facility.

Contract funds enable service delivery to individuals not otherwise covered by Medicaid who are uninsured or under-insured as required in State Regulations. All contracts include provisions for Mental Health Services required by NH RSA 135-C and with State Regulations applicable to the mental health system as outlined in He-M 400, as well as in compliance with the Amanda D. Settlement Agreement (CMHA).

The populations served include children with Serious Emotional Disturbances and adults with Serious Mental Illness/Serious and Persistent Mental Illness, including individuals with Mental Illness and co-occurring substance use disorders per NH Administrative Rule He-M 401 Eligibility Determination and Individuals Service Planning.

Approximately 40,100 individuals will be served annually.

The Department will continue to monitor services by:

- Conducting annual Quality Service Reviews and utilization reviews as necessary and appropriate based on applicable licensing, certifications and service provisions.
- Meeting with the Contractor quarterly to review submitted data and reports to identify ongoing programmatic improvements.
- Reviewing monthly financial statements provided by the Contractors for ongoing evaluation of program fiscal integrity.

As referenced in Exhibit A, Revisions to Standard Agreement Provisions, of the original agreements, the parties have the option to extend the agreements for up to four (4) additional years, contingent upon satisfactory delivery of services, available funding, agreement of the

parties and Governor and Council approval. The Department is exercising its option to renew services for two (2) of the four (4) years available.

Should the Governor and Council not authorize this request, approximately 28,700 adults, and 11,400 children in the state will not have access to critical community mental health services as required by NH RSA 135-C:13. As a result, these individuals may experience an increase in symptoms causing them to seek more costly services at hospital emergency departments due to risk of harm to themselves or others and may have increased contact with law enforcement, correctional programs, or primary care physicians, none of which have the necessary services or supports available to provide necessary assistance. Lack of these services may also increase the likelihood of inpatient hospitalizations and death by suicide.

# INDEPENDENT AUDITORS' REPORT

To the Board of Directors of
Northern Human Services, Inc.

## Report on the Financial Statements

### Opinion

We have audited the accompanying financial statements of Northern Human Services, Inc. (a New Hampshire nonprofit organization), which comprise the statements of financial position as of June 30, 2023 and 2022, and the related statements of cash flows, and notes to the financial statements for the years then ended, and the related statements of activities and functional expenses for the year ended June 30, 2023.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Northern Human Services, Inc. as of June 30, 2023 and 2022, and its cash flows for the years then ended, and the changes in its net assets for the year ended June 30, 2023 in accordance with accounting principles generally accepted in the United States of America.

### Basis of Opinion

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of Northern Human Services, Inc. and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

### Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about Northern Human Services, Inc.'s ability to continue as a going concern within one year after the date that the financial statements are available to be issued.

### Auditors' Responsibility for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with generally accepted auditing standards and *Government Auditing Standards* will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions,

misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with generally accepted auditing standards and *Government Auditing Standards*, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of Northern Human Services, Inc.'s internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about Northern Human Services, Inc.'s ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

**Supplementary Information**

Our audit was conducted for the purpose of forming an opinion on the financial statements as a whole. The accompanying schedule of functional revenues and expenses on pages 28 – 36 and accompanying schedule of expenditures of federal awards, as required by Title 2 U.S. *Code of Federal Regulations* Part 200, *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* on page 37, are presented for purposes of additional analysis and are not a required part of the financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the schedule of functional revenues and expenses and schedule of expenditures of federal awards are fairly stated, in all material respects, in relation to the financial statements as a whole.

**Other Reporting Required by *Government Auditing Standards***

In accordance with *Government Auditing Standards*, we have also issued our report dated March 30, 2024, on our consideration of Northern Human Services, Inc.'s internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of Northern Human Services, Inc.'s internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering Northern Human Services, Inc.'s internal control over financial reporting and compliance.

**Report on Summarized Comparative Information**

We have previously audited Northern Human Services, Inc.'s 2022 financial statements, and we expressed an unmodified audit opinion on those audited financial statements in our report dated May 30, 2023. In our opinion, the summarized comparative information presented herein as of and for the year ended June 30, 2022, is consistent, in all material respects, with the audited financial statements from which it has been derived.

## 1. ORGANIZATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

### General
Northern Human Services, Inc. (the Organization), is a New Hampshire nonprofit corporation, and was created to develop and provide a comprehensive program of mental health, developmental disabilities, and rehabilitative care to the residents of Northern New Hampshire.

### Basis of Accounting
The financial statements of Northern Human Services, Inc. have been prepared on the accrual basis of accounting and, accordingly, reflect all significant receivables, payables and other liabilities.

### Basis of Presentation
The Organization is required to report information regarding its financial position and activities according to the following net asset classifications. The classes of net assets are determined by the presence or absence of donor restrictions.

Net assets without donor restrictions: Net assets that are not subject to donor-imposed restrictions and may be expended for any purpose in performing the primary objectives of the Organization. These net assets may be used at the discretion of the Organization's management and board of directors.

Net assets with donor restrictions: Net assets subject to stipulations imposed by donors and grantors. Some donor restrictions are temporary in nature; those restrictions will be met by actions of the Organization. Other donor restrictions are perpetual in nature, whereby the donor has stipulated the funds be maintained in perpetuity.

As of June 30, 2023 and 2022, the Organization had net assets with donor restrictions and net assets without donor restrictions.

### Accounting Estimates
The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

### Contributions
All contributions are considered to be available for use without donor restrictions unless specifically restricted by the donor. Amounts received that are restricted by the donor for future periods or for specific purposes are reported as support with donor restrictions, depending on the nature of the restrictions. However, if a restriction is fulfilled in the same period in which the contribution is received, the Organization reports the support as without donor restrictions.

### Cash Equivalents
The Organization considers all highly liquid financial instruments with original maturities of three months or less to be cash equivalents.

**Accounts Receivable**
Accounts receivable are stated at the amount management expects to collect from outstanding balances. Management provides for probable uncollectible amounts through a charge to activities and a credit to a valuation allowance based on historical account write-off patterns by the payor, adjusted as necessary to reflect current conditions. Balances that are still outstanding after management has used reasonable collection efforts are written off through a charge to the valuation allowance and a credit to accounts receivable. The Organization has no policy for charging interest on overdue accounts nor are its accounts receivable pledged as collateral.

It is the policy of the Organization to provide services to all eligible residents of Northern New Hampshire without regard to ability to pay. As a result of this policy, all charity care write-offs are recorded as reductions of revenue in the period in which services are provided. The accounts receivable allowance includes the estimated amount of charity care and contractual allowances included in the accounts receivable balances. The computation of the contractual allowance is based on historical ratios of fees charged to amounts collected.

**Property and Depreciation**
Property and equipment are recorded at cost or, if contributed, at estimated fair value at the date of contribution. Material assets with a useful life in excess of one year are capitalized. Depreciation is provided for using the straight-line method in amounts designed to amortize the cost of the assets over their estimated useful lives as follows:

| | |
|---|---|
| Vehicles | 5 – 10 years |
| Equipment | 3 – 10 years |

Costs for repairs and maintenance are expensed when incurred and betterments are capitalized. Assets sold or otherwise disposed of are removed from the accounts, along with the related accumulated depreciation, and any gain or loss is recognized.

**Investments**
Investments consist of mutual funds and interest-bearing investments and are stated at fair value on the statements of financial position based on quoted market prices. The Organization's investments are subject to various risks, such as interest rate, credit and overall market volatility, which may substantially impact the fair value of such investments at any given time.

**Accrued Earned Time**
The Organization has accrued a liability for future compensated absences that its employees have earned and which is vested with the employees.

**Refundable Advances**
Grants received in advance are recorded as refundable advances and recognized as revenue in the period in which the related services are provided or costs are incurred.

**Program Service Fee Revenue**
The Organization has agreements with third-party payors that provide for payments to the Organization at amounts different from its established rates. Payment arrangements include reimbursed costs, discounted charges, and per diem payments. Program service fee revenue is reported at the estimated net realizable amounts from clients, third-party payors, and others for services rendered, including estimated retroactive adjustments under reimbursement agreements with the third-party payors. Retroactive adjustments are accrued on an estimated basis in the

period the related services are rendered and adjusted in future periods as final settlements are determined.

**Advertising**
The Organization expenses advertising costs as incurred.

**Summarized Financial Information**
The financial statements include certain prior year summarized comparative information in total but not by net asset class. Such information does not include sufficient detail to constitute a presentation in conformity with accounting principles generally accepted in the United States of America. Accordingly, such information should be read in conjunction with the Organization's financial statements for the year ended June 30, 2022, from which the summarized information was derived.

**Functional Allocation of Expenses**
The costs of providing the various programs and other activities have been summarized on a functional basis. Natural expenses are defined by their nature, such as salaries, rent, supplies, etc. Functional expenses are classified by the type of activity for which expenses are incurred, such as management and general and direct program costs. Expenses are allocated by function using a reasonable and consistent approach that is primarily based on function and use. The costs of providing certain program and supporting services have been directly charged.

**Income Taxes**
The Organization is exempt from federal income taxes under Section 501(c)(3) of the Internal Revenue Code. In addition, the Organization qualifies for the charitable contribution deduction under Section 170(b)(1)(a) and has been classified as an organization that is not a private foundation.

FASB ASC 740, Accounting for Income Taxes, establishes the minimum threshold for recognizing, and a system for measuring, the benefits of tax return positions in financial statements, and is effective for Northern Human Services' current year. Management has analyzed Northern Human Services' tax positions taken on its information returns for all open tax years (three years) and has concluded that no additional provision for income tax is required in the Organization's financial statements.

**New Accounting Pronouncement**
In February 2016, the Financial Accounting Standards Board (FASB) issued ASU 2016-02, *Leases*, to increase transparency and comparability among organizations by recognizing lease assets and lease liabilities on the statement of financial position and disclosing key information about leasing arrangements for lessees and lessors. The standard applies a right of use model that requires all leases with a lease term of more than 12 months to recognize an asset representing its right to use the underlying asset for the lease term and liability to make lease payments to be recorded. The Organization elected not to restate the comparative period. The Organization also elected not to reassess at adoption (i) expired or existing contracts to determine whether they are or contain a lease, (ii) the lease classification of any existing leases, (iii) initial direct costs for existing leases. The adoption of ASU 2016-02 resulted in the recognition of an operating right of use assets and operating lease liabilities of $214,606 as of June 30, 2023. Results for periods beginning prior to July 1, 2022 continue to be reported in accordance with the Organization's historical accounting treatment. The adoption of ASU 2016-02 did not have a material impact on the Organization's operations or cash flows.

**Revenue Recognition**

The Organization derives revenues from services provided to its clients. Service revenue is reported at the amount that reflects consideration to which the Organization expects to be entitled in exchange for providing services. These amounts are due from clients and third-party payors. Revenue is recognized as performance obligations are satisfied. Performance obligations are determined based on the nature of the services provided by the Organization and the contract with the client or third-party and are satisfied when the service is performed.

The Organization determines the transaction price based on standard charges for goods and services provided as well as the state contract rate with third-party payors.

## 6. FAIR VALUE MEASUREMENTS

*FASB ASC Topic No. 820-10* provides a definition of fair value which focuses on an exit price rather than an entry price, establishes a framework in generally accepted accounting principles for measuring fair value which emphasizes that fair value is a market-based measurement, not an entity-specific measurement, and requires expanded disclosures about fair value measurements. In accordance with *FASB ASC 820-10*, the Organization may use valuation techniques consistent with market, income and cost approaches to measure fair value. As a basis for considering market participant assumptions in fair value measurements, *ASC Topic 820* establishes a fair value hierarchy, which prioritizes the inputs used in measuring fair values. The hierarchy gives the highest priority to Level 1 measurements and the lowest priority to Level 3 measurements. The three levels of the fair value hierarchy under *ASC Topic 820* are described as follows:

***Level 1*** - Inputs to the valuation methodology are quoted prices available in active markets for identical investments as of the reporting date.

***Level 2*** - Inputs to the valuation methodology are other than quoted market prices in active markets, which are either directly or indirectly observable as of the reporting date, and fair value can be determined through the use of models or other valuation methodologies.

***Level 3*** - Inputs to the valuation methodology are unobservable inputs in situations where there is little or no market activity for the asset or liability and the reporting entity makes estimates and assumptions related to the pricing of the asset or liability including assumptions regarding risk.

The Organization's financial instruments consist of cash, short-term receivables and payables, and refundable advances. The carrying value for all such instruments, considering the terms, approximates fair value at June 30, 2023 and 2022.

The following is a description of the valuation methodologies used for assets at fair value. There have been no changes in the methodologies used at June 30, 2023 and 2022.

*Mutual Funds*: All actively traded mutual funds are valued at the daily closing price as reported by the fund. These funds are required to publish their daily net asset value (NAV) and to transact at that price. All mutual funds held by the Organization are open-end mutual funds that are registered with the Securities and Exchange Commission.

The table below segregates all financial assets and liabilities as of June 30, 2023 and 2022 that are measured at fair value on a recurring basis (at least annually) into the most appropriate level within the fair value hierarchy based on the inputs used to determine the fair value at the measurement date:

| | 2023 | | | |
|---|---|---|---|---|
| | Level 1 | Level 2 | Level 3 | Total |
| **Money Market Funds** | $ 77,414 | $ - | $ - | $ 77,414 |

| Other funds | 2,585 | - | - | 2,585 |
| Total investments at fair value | $ 2,184,839 | $ - | $ - | $ 2,184,839 |

## 7. RETIREMENT PLAN

The Organization maintains a retirement plan for all eligible employees. Under the plan employees can make voluntary contributions to the plan of up to 100% of pretax or after tax annual compensation up to the maximum annual limit provided by the Internal Revenue Service. All employees who work one thousand hours per year are eligible to participate after one year of employment, as defined by the plan. During the year ended June 30, 2015, the Organization implemented a 2% discretionary contribution allocated each pay period. During the year ended June 30, 2020, the Organization increased the discretionary contribution from 2% to 3%. Contributions by the Organization totaled $452,001 and $437,620 for the years ended June 30, 2023 and 2022, respectively.

## 8. CONCENTRATION OF CREDIT RISK

The Organization maintains cash balances that, at times, may exceed federally insured limits. The balances are insured by the Federal Deposit Insurance Corporation (FDIC) up to $250,000 for the years ended June 30, 2023 and 2022. At June 30, 2023 and 2022, the Organization had cash balances in excess of FDIC coverage. However, in addition to FDIC coverage, the Organization maintains a tri-party collateralization agreement with its primary financial institution and a trustee. The trustee maintains mortgage-backed collateralization of 102% of the Organization's deposits at its financial institution. The Organization has not experienced any losses in such accounts and believes it is not exposed to any significant risk with respect to these accounts.

## 9. CONCENTRATION OF RISK

For the years ended June 30, 2023 and 2022, approximately 85% and 89% of the total revenue was derived from Medicaid, respectively. The future existence of the Organization is dependent upon continued support from Medicaid.

In order for the Organization to receive Medicaid funding, they must be formally approved by the State of New Hampshire, Department of Health and Human Services, Division of Community Based Care Services, Bureau of Behavioral Health, and Bureau of Developmental Services as the provider of services for individuals with mental health illnesses and developmentally disabled individuals, for that region. During the year ended June 30, 2017, the Organization was reapproved as a provider of mental health services with the Bureau of Behavioral Health.

Medicaid receivables comprise approximately 90% and 89% of the total accounts receivable balances at June 30, 2023 and 2022, respectively.

## 10. LEASE COMMITMENTS

On July 1, 2022, the Organization was required to adopt ASU 2016-02, Leases (Topic 842). As part of implementing ASU 2016-02, the Organization evaluated current contracts to determine which met the criteria of a lease. The right of use (ROU) assets represent the Organization's right to use underlying assets for the lease term, and the lease liabilities represent the Organization's obligation to make lease payments arising from these leases. The ROU assets and lease liabilities, all of which arise from operating leases, were calculated based on the present value of future lease payments over the lease terms. The Organization has elected to discount future cash flows at the risk free borrowing rates commensurate with the lease terms, which was 4.27% at June 30, 2023. At June 30, 2023, the right of use asset and lease liability is $214,606. Common expenses, classified as occupancy costs in the accompanying financial statements, are considered a non-lease component under FASB ASC 842 and are recognized as costs are incurred. The Organization's operating leases are described below:

The Organization has entered into various operating lease agreements to rent certain facilities and office equipment. The terms of these leases range from one to five years. Monthly lease payments range from $290 to $12,755. Rent expense incurred under the lease agreements aggregated $1,047,770 and $995,792 for the years ended June 30, 2023 and 2022, respectively.

The Organization elected to use the risk free rate of 4.27% on all operating leases. The weighted average discount rate is 4.27%; the weighted average remaining lease term for operating lease obligations is 2.89 years.

Lease liability maturities as of June 30, 2023 were as follows:

| Year Ended June 30 | Amount |
|---|---|
| 2024 | $ 61,320 |
| 2025 | 59,317 |
| 2026 | 57,816 |
| 2027 | 42,254 |
| 2028 | 12,991 |
| Total undiscounted lease liability | 233,698 |
| Less imputed interest | 19,092 |
| Total lease liability | $ 214,606 |

The scheduled future minimum lease payments for operating leases under one year in duration are $847,224 for the year ending June 30, 2024.

See Note 11 for information regarding lease agreements with a related party.

## 11. RELATED PARTY TRANSACTIONS

The Organization is related to the nonprofit corporation Shallow River Properties, Inc. (Shallow River) as a result of common board membership. Shallow River was incorporated under the laws of the State of New Hampshire on September 13, 1988, for the purpose of owning, maintaining, managing, selling, and leasing real property associated with the provision of residential, treatment, and administrative services for the clients and staff of the Organization.

The Organization has transactions with Shallow River during its normal course of operations. The significant related party transactions are as follows:

### Due to/from Related Party

The Organization had a receivable due from Shallow River balance in the amount of $91,582 at June 30, 2023 and a payable due to Shallow River balance in the amount of $422,343 at June 30, 2022, respectively.

### Rental Expense

The Organization leases various properties, including office space, and properties occupied by the Organization's clients from Shallow River under the terms of tenant at will agreements. The Organization has the perpetual right to extend the leases. Total rental expense paid under the terms of the leases was $770,034 for each of the years ended June 30, 2023 and 2022. The Organization also leases space from a board member for $1,200 per month.

### Management Fee

The Organization charges Shallow River for administrative expenses incurred on its behalf. Management fee revenue aggregated $74,649 for each of the years ended June 30, 2023 and 2022.

**Donation**

Although not required by agreement between Shallow River and the Organization, Shallow River generally donates the excess of its revenues over expenses to the Organization. For the year ended June 30, 2023, Shallow River did not make a donation to the Organization but retained its surplus of $405,007 due to future plans of acquiring a new building and for use in future renovation projects and maintenance costs. For the year ended June 30, 2022, Shallow River had a net loss of $247,951 and therefore had no surplus to donate.

## 12. REFUNDABLE ADVANCES, MAINTENANCE OF EFFORT

The Organization maintains contracted arrangements with multiple Medicaid managed care organizations (MCOs) that provide a set per member per month payment for health care services provided. This system helps manage costs, utilization, and quality of services. The Organization is paid prior to services being provided each month and is required to maintain certain levels of performance. A reconciliation is calculated at year end between the Organization and the MCOs to determine if the Organization has been overpaid compared to actual utilization and services performed, which the Organization would then be required to repay. At June 30, 2023 and 2022, the outstanding capitated payment liability totaled $101,803 and $631,469, respectively.

## 13. COMMITMENTS AND CONTINGENCIES

The Organization receives funding under various state and federal grants. Under the terms of these grants, the Organization is required to use the money within the grant period for purposes specified in the grant proposal. If expenditures for the grant were found not to have been made in compliance with the proposal, the Organization may be required to repay the grantor's funds.

Excess funds generated from state and/or Medicaid funded programs may be expended, at the Organization's discretion, to increase or improve service delivery within the program. The excess funds may not be used to increase spending for personnel, professional fees, fringe benefits, or capital expenditures without prior written approval of the State of New Hampshire.

The Organization has contracts with certain third-party payors requiring specific performance to supervise and document certain events relating to client treatment. These agencies periodically audit the performance of the Organization in fulfilling these requirements. If the payments were found not to have been made in compliance with the contracts, the Organization may be required to repay the funds received under the contract.

The Organization ensures its medical malpractice risks on a claims-made basis under a policy, which covers all of its employees. The Organization intends to renew coverage on a claims-made basis and anticipates that such coverage will be available.

Contracts with the State of New Hampshire and various federal agencies require that the properties supported be used for certain programs and/or to serve specified client populations. If Shallow River or the Organization should stop using the property to provide services acceptable to these grantors, the grantors would be entitled to all or part of the proceeds from the disposition of the property. These stipulations affect substantially all of the properties owned by Shallow River. The affected amount and the disposition are determined by negotiation with the granting authority at the time the property is sold.

## 14. NET ASSETS WITH DONOR RESTRICTIONS

At June 30, 2023 and 2022, net assets with donor restrictions consisted of the following:

| | 2023 | 2022 |
|---|---|---|
| Certificates of Deposit – Memorial Fund | $ 252,417 | $ 252,417 |
| Dream Team Fund | 2,736 | 2,963 |
| Income earned on the Memorial Fund | 2,305 | 2,052 |
| Total net assets with donor restrictions | $ 257,458 | $ 257,432 |

## 15. ENDOWMENT FUND AND NET ASSETS WITH DONOR RESTRICTIONS

As a result of the June 30, 2006 merger of The Center of Hope for Developmental Disabilities, Inc. (Center of Hope), with and into the Organization, the Organization assumed responsibility for certain assets of Center of Hope that are subject to charitable restrictions and designated for particular purposes, namely the Memorial Fund (the Fund).

The Fund was created by the Center of Hope in 1989 for the purpose of seeking out and funding experiences that make life more interesting and full for people with disabilities. In or around 1992, additional funds were added to the Fund as a result of a testamentary bequest of Dorothy M. Walters, for the purpose of providing "maintenance funds" for programs for individuals with mental and developmental disabilities. The Center of Hope interpreted the terms of this bequest as consistent with the purpose of the Fund, and the bequest meets the definition of an endowment fund.

The Not-for-Profit Entities Topic of the *FASB ASC (ASC 958-205* and subsections) intends to improve the quality of consistency of financial reporting of endowments held by not-for-profit organizations. This Topic provides guidance on classifying the net assets associated with donor-restricted endowment funds held by organizations that are subject to an enacted version of the Uniform Prudent Management Institutional Funds Act (UPMIFA). New Hampshire has adopted UPMIFA. The Topic also requires additional financial statement disclosures on endowments and related net assets.

The Organization has followed an investment and spending policy to ensure a total return (income plus capital change) necessary to preserve the principal of the fund and at the same time, provide a dependable source of support for life-enhancing activities of eligible individuals. The Organization will only distribute income generated by the Fund, leaving the original corpus intact.

In recognition of the prudence required of fiduciaries, the Organization only invests the Fund in certificates of deposits, which ensures that a majority of the balance of the Fund is covered by the FDIC. The Organization has taken a risk adverse approach to managing the Fund in order to mitigate financial market risk such as interest rate, credit and overall market volatility, which could substantially impact the fair value of the Fund at any given time.

As of June 30, 2023 and 2022, the endowment was entirely composed of net assets with donor restrictions.

Changes in endowment net assets (at fair value) as of June 30, 2023 and June 30, 2022 were as follows:

| | 2023 | 2022 |
|---|---|---|
| Certificates of deposit, beginning of year | $ 252,417 | $ 252,417 |
| Interest income | 253 | 322 |
| Withdrawals | (253) | (322) |
| Certificates of deposit end of year | $ 252,417 | $ 252,417 |

## 16. AMERICAN RESCUE PLAN ACT

During March 2022, the Organization received funds from the State of New Hampshire Department of Health and Human Services from the American Rescue Plan Act to be used for Recruitment, Retention, and Training Programs (RRTP) for direct support workers (DSWs), direct support professionals (DSPs), and immediate supervisors. These were funds allocated for case management agencies for their employees and to pass funds through to subcontractors. During the year ended June 30, 2023, the Organization received and expended $1,303,648 under the grant through payroll and subcontractor expenses. A liability of $1,077,811 related to the program has been recorded in other grants payable on the statement of financial position at June 30, 2023. During the year ended June 30, 2022, the Organization received and expended $802,680 under the grant through payroll and subcontractor expenses. A liability of $1,896,698 related to the program has been recorded in other grants payable on the statement of financial position at June 30, 2022.

## 17. RECLASSIFICATION

Certain amounts and accounts from the prior year's financial statements were reclassified to enhance comparability with the current year's financial statements.

## 18. SUBSEQUENT EVENTS

Subsequent events are events or transactions that occur after the statement of financial position date, but before financial statements are available to be issued. ## INDEPENDENT AUDITORS' REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH *GOVERNMENT AUDITING STANDARDS*

To the Board of Directors of
Northern Human Services, Inc.

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of Northern Human Services, Inc. (a New Hampshire nonprofit organization), which comprise the statement of financial position as of June 30, 2023, and the related statements of activities, cash flows, and functional expenses for the year then ended, and the related notes to the financial statements, and have issued our report thereon dated March 30, 2024.

**Report on Internal Control Over Financial Reporting**
In planning and performing our audit of the financial statements, we considered Northern Human Services, Inc.'s internal control over financial reporting (internal control) as a basis for designing audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of Northern Human Services, Inc.'s internal control. Accordingly, we do not express an opinion on the effectiveness of Northern Human Services, Inc.'s internal control.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A *material weakness* is a deficiency, or combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected, on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of the internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies and therefore, material weaknesses or significant deficiencies may exist that have not been identified. We did identify a deficiency in internal control, described in the accompanying schedule of findings and questioned costs as item 2023-001 that we consider to be a material weakness.

**Report on Compliance and Other Matters**
As part of obtaining reasonable assurance about whether Northern Human Services, Inc.'s financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the financial statements. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

**Northern Human Services, Inc.'s Response to Findings**
*Government Auditing Standards* requires the auditor to perform limited procedures on Northern Human Services, Inc.'s response to the findings identified in our audit and described in the accompanying schedule of findings and questioned costs. Northern Human Services, Inc.'s response was not subjected to the auditing procedures applied in the audit of the financial statements and, accordingly, we express no opinion on it.

**Purpose of This Report**
The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the Organization's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the Organization's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

## INDEPENDENT AUDITORS' REPORT ON COMPLIANCE FOR EACH MAJOR PROGRAM AND ON INTERNAL CONTROL OVER COMPLIANCE REQUIRED BY THE UNIFORM GUIDANCE

To the Board of Directors of
Northern Human Services, Inc.

### Report on Compliance for Each Major Federal Program

**Opinion on Each Major Federal Program**
We have audited Northern Human Services, Inc.'s (a New Hampshire nonprofit organization) compliance with the types of compliance requirements described in the *OMB Compliance Supplement* that could have a direct and material effect on each of Northern Human Services, Inc.'s major federal programs for the year ended June 30, 2023. Northern Human Services, Inc.'s major federal programs are identified in the summary of auditors' results section of the accompanying schedule of findings and questioned costs.

In our opinion, Northern Human Services, Inc. complied, in all material respects, with the compliance requirements referred to above that could have a direct and material effect on each of its major federal programs for the year ended June 30, 2023.

**Basis for Opinion on Each Major Federal Program**
We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and the audit requirements of Title 2 U.S. *Code of Federal Regulations* Part 200, *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* (Uniform Guidance). Our responsibilities under those standards and the Uniform Guidance are further described in the Auditors' Responsibilities for the Audit of Compliance section of our report.

We are required to be independent of Northern Human Services, Inc. and to meet our other ethical responsibilities, in accordance with relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion on compliance for each major federal program. Our audit does not provide a legal determination of Northern Human Services, Inc.'s compliance with the compliance requirements referred to above.

**Responsibilities of Management for Compliance**
Management is responsible for compliance with the requirements referred to above and for the design, implementation, and maintenance of effective internal control over compliance with the requirements of laws, statutes, regulations, rules, and provisions of contracts or grant agreements applicable to Northern Human Services, Inc.'s federal programs.

**Auditors' Responsibilities for the Audit of Compliance**
Our objectives are to obtain reasonable assurance about whether material noncompliance with the compliance requirements referred to above occurred, whether due to fraud or error, and express an opinion on Northern Human Services, Inc.'s compliance based on our audit. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with generally accepted auditing standards, *Government Auditing Standards*, and the Uniform Guidance will always detect material noncompliance when it exists. The risk of not detecting material noncompliance resulting from fraud is higher than for that resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Noncompliance with the compliance requirements referred to above is considered material if there is a substantial likelihood that, individually or in the aggregate, it would influence the judgment

made by a reasonable user of the report on compliance about Northern Human Services, Inc.'s compliance with the requirements of each major federal program as a whole.

In performing an audit in accordance with generally accepted auditing standards, *Government Auditing Standards*, and the Uniform Guidance, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material noncompliance, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding Northern Human Services, Inc.'s compliance with the compliance requirements referred to above and performing such other procedures as we considered necessary in the circumstances.
- Obtain an understanding of Northern Human Services, Inc.'s internal control over compliance relevant to the audit in order to design audit procedures that are appropriate in the circumstances and to test and report on internal control over compliance in accordance with the Uniform Guidance, but not for the purpose of expressing an opinion on the effectiveness of Northern Human Services, Inc.'s internal control over compliance. Accordingly, no such opinion is expressed.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and any significant deficiencies and material weaknesses in internal control over compliance that we identified during the audit.

**Other Matters**
The results of our auditing procedures disclosed instances of noncompliance which are required to be reported in accordance with the Uniform Guidance and which are described in the accompanying schedule of findings and questioned costs as item 2023-002. Our opinion on each major federal program is not modified with respect to these matters.

*Government Auditing Standards* requires the auditor to perform limited procedures on Northern Human Services, Inc.'s response to the noncompliance finding identified in our compliance audit described in the accompanying schedule of findings and questioned costs. Northern Human Services, Inc.'s response was not subjected to the other auditing procedures applied in the audit of compliance and, accordingly, we express no opinion on the response.

**Report on Internal Control Over Compliance**
A *deficiency in internal control over compliance* exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with a type of compliance requirement of a federal program on a timely basis. A *material weakness in internal control over compliance* is a deficiency, or a combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of a federal program will not be prevented, or detected and corrected, on a timely basis. A *significant deficiency in internal control over compliance* is a deficiency, or a combination of deficiencies, in internal control over compliance with a type of compliance requirement of a federal program that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance.

Our consideration of internal control over compliance was for the limited purpose described in the Auditors' Responsibilities for the Audit of Compliance section above and was not designed to identify all deficiencies in internal control over compliance that might be material weaknesses or significant deficiencies in internal control over compliance. Given these limitations, during our audit we did not identify any deficiencies in internal control over compliance that we consider to be material weaknesses, as defined above. However, material weaknesses or significant deficiencies in internal control over compliance may exist that were not identified.

Our audit was not designed for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, no such opinion is expressed.

The purpose of this report on internal control over compliance is solely to describe the scope of our testing of internal control over compliance and the results of that testing based on the requirements of the Uniform Guidance. Accordingly, this report is not suitable for any other purpose.

### FINDINGS - FINANCIAL STATEMENTS AUDIT

#### MATERIAL WEAKNESS

**2023-001 - Reconciliation process and month end close**

**Criteria:** Internal controls should be in place to ensure that all accounts are reconciled every month in a timely manner.

**Condition:** Significant entries and additional audit procedures were required as timely reconciliations were not being kept as part of the financial statement close process each month and at year end.

**Cause:** Internal controls were not in place to ensure that monthly reconciliations are prepared in a timely manner each month. In addition, there was substantial turnover in the accounting department during the fiscal year.

**Effect:** Financial statement information utilized by management in making decisions may not be timely or accurate; errors found in preparing reconciliations and during audit procedures that required significant journal entries were not found until several months after year end.

**Recommendation:** Procedures should be implemented to ensure that monthly reconciliations for all accounts are being performed in a timely manner.

**Views of Responsible Officials:**

The reason reconciliations had not been completed in a timely manner was due to the 9-month absence of a CFO and full-time controller. There were also 2 accounting staff vacancies that supported Mental Health and Developmental Disability side of business. These vacancies caused delays in bank reconciliations, expense verifications, and accounting procedures that support month end closing.

The CFO position was filled in July 2022 and our controller position was filled in September 2022. We have promoted internal staff to fill the two vacant accounting positions and filled all positions for both account receivables (A/R) and account payables (A/P). The CFO and controller have created a monthly closing process that helps support bank reconciliation in a timely manner. The Finance department is working to update all fiscal policies and crosstraining finance staff to ensure future vacant positions will not cause delay in the reconciliation process that supports month end closing.

Moving forward the bank reconciliation will be completed monthly prior to month end closing. Monthly closing detail is reviewed by the CFO, controller, and A/R manager to ensure accuracy and support follow-up monitoring in areas of concern.

**FINDINGS AND QUESTIONED COSTS - MAJOR FEDERAL AWARD PROGRAMS AUDIT**

**2023-002**

**Condition**: The 2022 data collection was filed late.

**Criteria**: The audit is required to be submitted to the Federal Audit Clearinghouse within 30 days of issuance of the report or nine months after year end, whichever is earlier.

**Cause**: The audit was completed after the data collection due date.

**Effect**: The Organization was not in compliance with certain grant requirements.

**Recommendation**: Auditors recommend that the Organization be prepared for the auditors to perform and complete the audit early enough to allow for the data collection to be completed and filed timely.

**Response**: The Organization will attempt to be more prepared to ensure timely filing moving forward.

**EXPLANATION**

This request is **Sole Source** because MOP 150 requires all amendments to agreements originally approved as sole source to be identified as sole source. The Contractors are the only authorized contractors able to provide the necessary services. The Department contracts for mental health services through these Community Mental Health Centers, which are designated by the Department to service towns and cities within specified geographic regions, as outlined in the NH Revised Statutes Annotated (RSA) 135-C, New Hampshire Mental Health Services System, and NH Administrative Rule He-M 403, Approval and Operation of Community Mental Health Programs.

The purpose of this request is to correct the payment terms for the Assertive Community Treatment and Modular Approach to Therapy for Children services to ensure the Department can reimburse the Contractors for these services. The current payment terms for these services only allow payments to be drawn down on the prior State Fiscal Year and not for the full term of the contract. The Department is requesting to revise the payment terms to remove references to prior SFYs. This will allow the Contractors to invoice for payments through the contract completion date. The funding for the Contractors' payments is already encumbered in their individual price limitations.

The Assertive Community Treatment program offers treatment, rehabilitation, and support services using a person-centered, recovery-based approach to individuals who have been diagnosed with severe and persistent mental illness. The Contractors are paid for these services based on active participation in the monthly consultation and skill training events or for completion of a fidelity measures reviewed by the Department. The Modular Approach to Therapy for Children program is an industry standard treatment that employs a cognitive-behavioral framework to address common childhood behavioral health concerns including depression, anxiety, conduct problems, and trauma for youth ages 6-12. This modularized approach allows for flexibility and encourages clinicians to tailor treatment to individual treatment needs. The Contractors are paid for these services based on a per person rate. The Assertive Community Treatment and Modular Approach to Therapy for Children program scope provisions align with Mental Health Services required by NH RSA 135-C and with State Regulations applicable to the mental health system as outlined in He-M 400, as well as in compliance with the Community Mental Health Agreement (CMHA).

Approximately 20,700 individuals are served annually by the Contractors listed above. The populations served include children with Serious Emotional Disturbances and adults with Serious Mental Illness/Serious and Persistent Mental Illness, including individuals with Mental Illness and co-occurring substance use disorders per NH Administrative Rule He-M 401 Eligibility Determination and Individuals Service Planning.

The Department will continue to monitor services by:

- Conducting performance reviews and utilization reviews as necessary and appropriate based on applicable licensing, certifications, and service provisions.
- Conducting quarterly meetings to review submitted quarterly data and reports to identify ongoing programmatic improvements.
- Reviewing monthly financial statements provided by the Contractors for ongoing evaluation of program fiscal integrity.

Should the Governor and Executive Council not authorize this request, the Department will be unable to reimburse the Contractors for Assertive Community Treatment and Modular Approach to Therapy for Children services, which aligns with the scope of services.

Respectfully submitted,

Lori A. Weaver
Commissioner

**See attached fiscal details.**

**EXPLANATION**

This request is **Sole Source** because the Contractors are the only authorized contractors able to provide the necessary services. The Department contracts for mental health services through these ten (10) Community Mental Health Centers, which are designated by the Department to service towns and cities within specified geographic regions, as outlined in the NH Revised Statutes Annotated (RSA) 135-C, New Hampshire Mental Health Services System, and NH Administrative Rule He-M 403, Approval and Operation of Community Mental Health Programs.

The purpose of this request is to provide community mental health services for individuals in New Hampshire. Community Mental Health Centers provide community-based mental health services to adults, children, and families to build resiliency, promote recovery, and reduce inpatient hospital utilizations, and improve community tenure. These contracts provide both Federal grant funds and General Funds that enable delivery of services not otherwise covered by Medicaid. For example, technology, training, and system upgrades, delivery of some Assertive Community Treatment services, and care coordination with other systems such as the Division of Children, Youth, and Families, Department of Education, and Division of Long Term Supports and Services. The majority of the General Funds are allocated to ensure that individuals who are uninsured have full access to NH Rapid Response crisis services.

Approximately 20,700 individuals will be served annually.

The populations served include children with Serious Emotional Disturbances and adults with Serious Mental Illness/Serious and Persistent Mental Illness, including individuals with Mental Illness and co-occurring substance use disorders per NH Administrative Rule He-M 401 Eligibility Determination and Individuals Service Planning.

The Contractors will provide crisis services, individual and group psychotherapy, targeted case management, medication services, Functional Support Services; Illness Management and Recovery, supported employment, Assertive Community Treatment, Wraparound services for children, community residential services, and acute care services to individuals experiencing psychiatric emergencies while awaiting admission to a designated receiving facility. All contracts include provisions for Mental Health Services required by NH RSA 135-C and with State Regulations applicable to the mental health system as outlined in He-M 400, as well as in compliance with the Community Mental Health Agreement (CMHA).

The Department will monitor services by:

- Conducting performance reviews and utilization reviews as necessary and appropriate based on applicable licensing, certifications and service provisions.
- Conducting quarterly meetings to review submitted quarterly data and reports to identify ongoing programmatic improvements.
- Reviewing monthly financial statements provided by the Contractors for ongoing evaluation of program fiscal integrity.

As referenced in Exhibit A, Revisions to Standard Agreement Provisions Section 1, Revisions to Form P-37, General Provisions, Subsection 1.2 of the attached agreements, the parties have the option to extend the agreements for up to four (4) additional years, contingent upon satisfactory delivery of services, available funding, agreement of the parties, and Governor and Council approval.

Should the Governor and Council not authorize this request, approximately 12,300 adults, and 8,400 children in the state will not have access to critical community mental health services as required by NH RSA 135-C:13. As a result, these individuals may experience an increase in symptoms causing them to seek more costly services at hospital emergency departments due to risk of harm to themselves or others and may have increased contact with law enforcement, correctional programs, or primary care physicians, none of which have the necessary services or supports available to provide necessary assistance. Lack of these services may also increase the likelihood of inpatient hospitalizations and death by suicide.

Source of Federal Funds: Assistance Listing Number #93.243, FAIN # H79SM080245; Assistance Listing Number #93.958, FAIN # B09SM087375; Assistance Listing Number #93.043, FAIN #2201NHOAPH; Assistance Listing Number #93.959, FAIN # TI085821; Assistance Listing Number #93.829, FAIN # H79SM087622.

In the event that the Federal Funds become no longer available, additional General Funds will not be requested to support this program.

Respectfully submitted,

Lori A. Weaver
Interim Commissioner

The State of New Hampshire, acting through the agency identified in block 1.1 ("State"), engages contractor identified in block 1.3 ("Contractor") to perform, and the Contractor shall perform, the work or sale of goods, or both, identified and more particularly described in the attached EXHIBIT B which is incorporated herein by reference ("Services").

3. EFFECTIVE DATE/COMPLETION OF SERVICES.

3.1 Notwithstanding any provision of this Agreement to the contrary, and subject to the approval of the Governor and Executive Council of the State of New Hampshire, if applicable, this Agreement, and all obligations of the parties hereunder, shall become effective on the date the Governor and Executive Council approve this Agreement as indicated in block 1.17, unless no such approval is required, in which case the Agreement shall become effective on the date the Agreement is signed by the State Agency as shown in block 1.13 ("Effective Date").

3.2 If the Contractor commences the Services prior to the Effective Date, all Services performed by the Contractor prior to the Effective Date shall be performed at the sole risk of the Contractor, and in the event that this Agreement does not become effective, the State shall have no liability to the Contractor, including without limitation, any obligation to pay the Contractor for any costs incurred or Services performed. Contractor must complete all Services by the Completion Date specified in block 1.7.

In no event shall the State be liable for any payments hereunder in excess of such available appropriated funds. In the event of a reduction or termination of appropriated funds, the State shall have the right to withhold payment until such funds become available, if ever, and shall have the right to reduce or terminate the Services under this Agreement immediately upon giving the Contractor notice of such reduction or termination. The State shall not be required to transfer funds from any other account or source to the Account identified in block 1.6 in the event funds in that Account are reduced or unavailable.

5.1 The contract price, method of payment, and terms of payment are identified and more particularly described in EXHIBIT C which is incorporated herein by reference.

5.2 The payment by the State of the contract price shall be the only and the complete reimbursement to the Contractor for all expenses, of whatever nature incurred by the Contractor in the performance hereof, and shall be the only and the complete compensation to the Contractor for the Services. The State shall have no liability to the Contractor other than the contract price.

5.3 The State reserves the right to offset from any amounts otherwise payable to the Contractor under this Agreement those liquidated amounts required or permitted by N.H. RSA 80:7 through RSA 80:7-c or any other provision of law.

Contractors using this form should send it to:

## CERTIFICATION REGARDING DEBARMENT, SUSPENSION AND OTHER RESPONSIBILITY MATTERS

The Contractor identified in Section 1.3 of the General Provisions agrees to comply with the provisions of Executive Office of the President, Executive Order 12549 and 45 CFR Part 76 regarding Debarment, Suspension, and Other Responsibility Matters, and further agrees to have the Contractor's representative, as identified in Sections 1.11 and 1.12 of the General Provisions execute the following Certification:

INSTRUCTIONS FOR CERTIFICATION

1. By signing and submitting this proposal (contract), the prospective primary participant is providing the certification set out below.
2. The inability of a person to provide the certification required below will not necessarily result in denial of participation in this covered transaction. If necessary, the prospective participant shall submit an explanation of why it cannot provide the certification. The certification or explanation will be considered in connection with the NH Department of Health and Human Services' (DHHS) determination whether to enter into this transaction. However, failure of the prospective primary participant to furnish a certification or an explanation shall disqualify such person from participation in this transaction.
3. The certification in this clause is a material representation of fact upon which reliance was placed when DHHS determined to enter into this transaction. If it is later determined that the prospective primary participant knowingly rendered an erroneous certification, in addition to other remedies available to the Federal Government, DHHS may terminate this transaction for cause or default.
4. The prospective primary participant shall provide immediate written notice to the DHHS agency to whom this proposal (contract) is submitted if at any time the prospective primary participant learns that its certification was erroneous when submitted or has become erroneous by reason of changed circumstances.

6. The prospective primary participant agrees by submitting this proposal (contract) that, should the proposed covered transaction be entered into, it shall not knowingly enter into any lower tier covered transaction with a person who is debarred, suspended, declared ineligible, or voluntarily excluded from participation in this covered transaction, unless authorized by DHHS.
7. The prospective primary participant further agrees by submitting this proposal that it will include the clause titled "Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion - Lower Tier Covered Transactions," provided by DHHS, without modification, in all lower tier covered transactions and in all solicitations for lower tier covered transactions.
8. A participant in a covered transaction may rely upon a certification of a prospective participant in a lower tier covered transaction that it is not debarred, suspended, ineligible, or involuntarily excluded from the covered transaction, unless it knows that the certification is erroneous. A participant may decide the method and frequency by which it determines the eligibility of its principals. Each participant may, but is not required to, check the Nonprocurement List (of excluded parties).
9. Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render in good faith the certification required by this clause. The knowledge and

information of a participant is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.

Except for transactions authorized under paragraph 6 of these instructions, if a participant in a covered transaction knowingly enters into a lower tier covered transaction with a person who is suspended, debarred, ineligible, or voluntarily excluded from participation in this transaction, in addition to other remedies available to the Federal government, DHHS may terminate this transaction for cause or default.

# INDEPENDENT AUDITOR'S REPORT

To the Board of Directors
West Central Services, Inc.
d/b/a West Central Behavioral Health

## Opinion

We have audited the accompanying financial statements of West Central Services, Inc. (a nonprofit organization), which comprise the statement of financial position as of June 30, 2023 and 2022, and the related statements of operations and cash flows for the years then ended, and the related notes to the financial statements.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of West Central Services, Inc. as of June 30, 2023 and 2022, and the changes in its net assets and its cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

## Basis for Opinion

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of West Central Services, Inc. and to meet our other ethical responsibilities in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

## Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error. In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about West Central Services, Inc.'s ability to continue as a going concern within one year after the date that the financial statements are available to be issued.

DocuSign Envelope ID: 22783F89-ECBE-4977-8F46-C94CDAC44757

**Auditor's Responsibilities for the Audit of the Financial Statements**

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with generally accepted auditing standards will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with generally accepted auditing standards, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of West Central Services, Inc.'s internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events considered in the aggregate, that raise substantial doubt about West Central Services, Inc.'s ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control related matters that we identified during the audit.

**Report on Supplementary Information**

Our audit was conducted for the purpose of forming an opinion on the financial statements as a whole. The supplementary information on pages 16-19 is presented for the purposes of additional analysis and is not a required part of the financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated in all material respects in relation to the financial statements as a whole.

## NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Organization

West Central Services, Inc. d/b/a West Central Behavioral Health (the Center) is a not-for-profit corporation, organized under New Hampshire law to provide services in the areas of mental health and related non-mental health programs; it is exempt from income taxes under Section 501(c)(3) of the Internal Revenue Code (Code). In addition, the Center qualifies for the charitable contribution deduction under Section 170(b)(1)(a) and has been classified as an organization that is not a private foundation under Section 509(a)(2).

Income Taxes

The Center is exempt from federal income tax under Internal Revenue Code Section 501(c)(3) and is not a private foundation. Therefore, no provision for income tax expense has been reflected in these financial statements.

Consideration has been given to uncertain tax positions. The federal income tax returns for the years ended after June 30, 2020, remain open for potential examination by major tax jurisdictions generally for three years after they were filed.

Basis of Presentation

The financial statements have been prepared on the accrual basis in accordance with accounting principles generally accepted in the United States of America. The financial statements are presented in accordance with Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 958 dated August 2016, and the provisions of the American Institute of Certified Public Accountants (AICPA) "Audit and Accounting Guide for Not-for-Profit Organizations" (the "Guide"). (ASC) 958-205 was effective January 1, 2018.

Under the provisions of the Guide, net assets and revenues and gains and losses are classified based on the existence or absence of donor-imposed restrictions. Accordingly, the net assets of the Center and changes therein are classified as follows:

Net assets without donor restrictions: Net assets that are not subject to donor-imposed restrictions and may be expended for any purpose in performing the primary objectives of the Center. The Center's board may designate assets without restrictions for specific operational purposes from time to time.

Net assets with donor restrictions: Net assets subject to stipulations imposed by donors and grantors. Some donor restrictions are temporary in nature; those restrictions will be met by actions of the Non-Profit Organization or by the passage of time. Other donor restrictions are perpetual in nature, whereby the donor has stipulated the funds be maintained in perpetuity.

Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results could differ from those estimates.

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Cash and Cash Equivalents
The Center considers cash on hand, cash in banks and all highly liquid debt instruments purchased with a maturity of three months or less to be cash and cash equivalents.

Investments
CD's purchased with a maturity of more than three months are classified as "held to maturity" and reported in the financial statements at amortized cost.

All equity securities held by the Center have readily determinable fair market values and are reported at fair value. Realized gains and losses are determined using the first-in, first-out (FIFO) method. Both realized and unrealized gains and losses on equity securities are reported in net income.

Accounts Receivable
Accounts receivable are recorded based on the amount billed for services provided, net of respective allowances.

Policy for Evaluating Collectability of Accounts Receivable
In evaluating the collectability of accounts receivable, the Center analyzes past results and identifies trends for each major payer source of revenue for the purpose of estimating the appropriate amounts of the allowance for doubtful accounts. Data in each major payer source is regularly reviewed to evaluate the adequacy of the allowance for doubtful accounts. Specifically, for receivables relating to services provided to clients having third-party coverage, an allowance for doubtful accounts and a corresponding provision for bad debts are established for amounts outstanding for an extended period of time and for third-party payers experiencing financial difficulties; for receivables relating to self-pay clients, a provision for bad debts is made in the period services are rendered based on experience indicating the inability or unwillingness of clients to pay amounts for which they are financially responsible.

Based on management's assessment, the Center provides for estimated uncollectible amounts through a charge to earnings and a credit to a valuation allowance. Balances that remain outstanding after the Center has used reasonable collection efforts are written off through a change to the valuation allowance and a credit to accounts receivable.

During 2023, the Center decreased its estimated percentage in the allowance for doubtful accounts to 26% from 31% of the total patient receivables. The allowance for doubtful accounts decreased to $127,629 as of June 30, 2023 from $157,842 as of June 30, 2022.

Property and Equipment
All property and equipment is recorded at cost, or estimated fair value at date of acquisition. The Center follows the policy of charging to costs and expenses annual amounts of depreciation, which allocates the cost of property and equipment over estimated useful lives. The Center has a policy of capitalizing assets with a cost in excess of $1,000 and a life greater than one year. The Center uses the straight-line method for determining the annual charge for depreciation. Asset lives range from 2-40 years.

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Expenditures for repairs and maintenance are expensed when incurred and betterments are capitalized.

The Center reviews the carrying value of property and equipment for impairment whenever events and circumstances indicate that the carrying value of an asset may not be recoverable from the estimated future cash flows expected to result from its use and eventual disposition.

In cases where undiscounted expected future cash flows are less than the carrying value, an impairment loss is recognized equal to an amount by which the carrying value exceeds the fair value of assets. The factors considered by management in performing this assessment include current operating results, trends and prospects, as well as the effects of obsolescence, demand, competition and other economic factors.

Client Service Revenue
On July 1, 2020, the Center adopted ASC Topic 606 with no significant impact to its financial position or operations, using the modified retrospective method.

Client Service Revenue is reported at the amount that reflects the consideration the corporation expects to receive in exchange for the services provided. These amounts are due from patients or third-party payers and include variable consideration for retroactive adjustments, if any, under reimbursement programs. Performance obligations are determined based on the nature of the services provided. Client service revenue is recognized as performance obligations are satisfied. The Center recognized revenue for mental health services in accordance with ASC 606, Revenue for contracts with Customers. The Center has determined that these services included under the daily or monthly fee have the same timing and pattern of transfer and are a series of distinct services that are considered one performance obligation which is satisfied over time. The Center receives revenues for services under various third-party payer programs which include Medicaid and other third-party payers. The transaction price is based on standard charges for services provided to clients, reduced by applicable contractual adjustments, discounts, and implicit pricing concessions. The estimates of contractual adjustments and discounts are based on contractual agreements, discount policy, and historical collection experience. The corporation estimates the transaction price based on the terms of the contract with the payer, correspondence with the payer and historical trends.

Client service revenue (net of contractual allowances and discounts but before taking account of the provision for bad debts) recognized during the year ended June 30, 2023 totaled $7,673,526, of which $7,633,265 was revenue from third-party payers and $40,261 was revenue from self-pay clients.

Third-Party Contractual Arrangements
A significant portion of patient revenue is derived from services to patients insured by third-party payers. The Center receives payment from Medicare, Medicaid, Blue Cross and other third-party payers at defined rates for services rendered to patients covered by these programs. The difference between the established billing rates and the actual rate of payment is recorded as allowances when received and/or billed. A provision for estimated contractual allowances is provided on outstanding patient receivables at the balance sheet date.

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

State Grants
The Center receives a number of grants from and has entered into various contracts with the State of New Hampshire related to the delivery of mental health services.

Functional Allocation of Expenses
The costs of providing the various programs and other activities has been summarized on a functional basis in the statement of activities. Accordingly, certain costs have been allocated among the programs and supporting services benefited.

Vacation Pay and Fringe Benefits
Annual vacation allotments are granted to employees that are regularly scheduled to work 20 or more hours per week, if an employee works less than 37.5 hours per week the time earned will be prorated based on their FTE. Eligible employees are able to accrue hours starting at the beginning of each calendar year and accrued time is to be utilized by December 31st; with the exception of up to 5 days that is allowed to be carried over into the new calendar year. Fringe benefits are allocated to the appropriate program expense based on the percentage of actual time spent on the program.

Advertising
Advertising costs are expensed to operating expenses as incurred. Advertising expense for the years ended June 30, 2023, and 2022 was $36,524 and $32,770, respectively.

Concentration of Credit Risk
The Center maintains cash balances at several financial institutions. Accounts at financial institutions are insured by the Federal Deposit Insurance Corporation up to $250,000. At times throughout the year, cash balances with these institutions exceed that amount. The Center has not incurred any losses related to uninsured cash.

NOTE 2 CLIENT SERVICE REVENUES FROM THIRD PARTY PAYORS

The Center has agreements with third-party payors that provide payments to the Center at established rates. These payments include:

New Hampshire and Managed Medicaid
The Center is reimbursed for services from the State of New Hampshire and Managed Care Organizations (MCOs) for services rendered to Medicaid clients. The majority of the payments for these services are received in the form of monthly capitation amounts that are predetermined in a contractual agreement with the MCOs. Additionally, there are payments for services rendered to other Medicaid clients on the basis of fixed Fee for Service rates.

Approximately 93% and 90% of program service fees is from participation in the State and Managed Care Organization sponsored Medicaid programs for the years ended June 30, 2023 and 2022, respectively. Laws and regulations governing the Medicaid programs are complex and subject to interpretation and change. As a result, it is reasonably possible that recorded estimates could change materially in the near term.

DocuSign Envelope ID: 22783F89-ECBE-4977-8F46-C94CDAC44757

NOTE 2 CLIENT SERVICE REVENUES FROM THIRD PARTY PAYORS (continued)

As part of the contractual arrangement with the MCOs, the Center is required to provide a specific amount of services under an arrangement referred to as a Maintenance of Effort (MOE). Under the MOE, if levels of service are not met the Center may be subject to repayment of a portion of the revenue received. The MOE calculation is subject to interpretation and a source of continued debate and negotiations with MCOs. This MOE calculation may result in a liability that would require a payback to the MCOs. The Center has accrued an estimated payback of $278,507 and $426,863 for the years ended June 30, 2023 and 2022, respectively. These liabilities are included in other current liabilities on the statement of financial position.

## NOTE 7 FAIR VALUE MEASUREMENTS

Professional accounting standards established a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurement) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy are described below:

Basis of Fair Value Measurement

Level 1 Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities.

Level 2 Quoted prices in markets that are not considered to be active or financial instruments for which all significant inputs are observable, either directly or indirectly.

Level 3 Prices or valuations that require inputs that are both significant to the fair value measurement and unobservable.

All investments recorded at fair value are categorized as Level 1 and recorded at fair value, as of June 30, 2023. As required by professional accounting standards, investment assets are classified in their entirety based upon the lowest level of input that is significant to the fair value measurement.

## NOTE 14 OPERATING LEASES

The Center leases real estate and equipment under various operating leases. The determination of whether an arrangement is a lease is made at the inception of the lease. Under ASC 842, a contract is (or contains) a lease if it conveys the right to control the use of an identified asset for a period of time in exchange for consideration. Control is defined under the standard as having both the right to obtain substantially all of the economic benefits from the use of the asset and the right to direct the use of the asset. Management only reassesses its determination if the terms and conditions of the contract are changed in a way that eliminates their rights. The allocation of consideration in the contract is recognized on a straight line basis over the term of the lease.

The Center adopted FASB ASC 842 effective July 1, 2022. The Center has elected to apply the short-term lease cost exception to all leases with a term of one year or less. The Center has also elected not to restate comparative periods or separate lease and non-lease components by class of underlying assets.

The adoption of the standard resulted in an increase in operating lease right-of-use (ROU) asset of $1,700,141, an increase in rent expense of $20,209, and an increase in lease liability of $1,720,350.

As of June 30, 2023, the ROU asset had a balance of $1,718,961, as shown in noncurrent assets on the balance sheet, the lease liability is included in current liabilities for $598,987 and long-term liabilities for $1,140,187. The lease asset and liability were calculated utilizing the incremental borrowing rate at the inception of the lease.

Certain lease agreements include variable payments which are not determinable at the lease commencement and are not included in the measurement of the lease asset and liabilities. Lease agreements do not contain any material residual value guarantees or material restrictive covenants.

**EXPLANATION**

This request is **Sole Source** because MOP 150 requires all amendments to agreements originally approved as sole source to be identified as sole source. The Contractors are the only authorized contractors able to provide the necessary services. The Department contracts for mental health services through these Community Mental Health Centers, which are designated by the Department to service towns and cities within specified geographic regions, as outlined in the NH Revised Statutes Annotated (RSA) 135-C, New Hampshire Mental Health Services System, and NH Administrative Rule He-M 403, Approval and Operation of Community Mental Health Programs.

The purpose of this request is to correct the payment terms for the Assertive Community Treatment and Modular Approach to Therapy for Children services to ensure the Department can reimburse the Contractors for these services. The current payment terms for these services only allow payments to be drawn down on the prior State Fiscal Year and not for the full term of the contract. The Department is requesting to revise the payment terms to remove references to prior SFYs. This will allow the Contractors to invoice for payments through the contract completion date. The funding for the Contractors' payments is already encumbered in their individual price limitations.

The Assertive Community Treatment program offers treatment, rehabilitation, and support services using a person-centered, recovery-based approach to individuals who have been diagnosed with severe and persistent mental illness. The Contractors are paid for these services based on active participation in the monthly consultation and skill training events or for completion of a fidelity measures reviewed by the Department. The Modular Approach to Therapy for Children program is an industry standard treatment that employs a cognitive-behavioral framework to address common childhood behavioral health concerns including depression, anxiety, conduct problems, and trauma for youth ages 6-12. This modularized approach allows for flexibility and encourages clinicians to tailor treatment to individual treatment needs. The Contractors are paid for these services based on a per person rate. The Assertive Community Treatment and Modular Approach to Therapy for Children program scope provisions align with Mental Health Services required by NH RSA 135-C and with State Regulations applicable to the mental health system as outlined in He-M 400, as well as in compliance with the Community Mental Health Agreement (CMHA).

Approximately 20,700 individuals are served annually by the Contractors listed above. The populations served include children with Serious Emotional Disturbances and adults with Serious Mental Illness/Serious and Persistent Mental Illness, including individuals with Mental Illness and co-occurring substance use disorders per NH Administrative Rule He-M 401 Eligibility Determination and Individuals Service Planning.

The Department will continue to monitor services by:

- Conducting performance reviews and utilization reviews as necessary and appropriate based on applicable licensing, certifications, and service provisions.
- Conducting quarterly meetings to review submitted quarterly data and reports to identify ongoing programmatic improvements.
- Reviewing monthly financial statements provided by the Contractors for ongoing evaluation of program fiscal integrity.

Should the Governor and Executive Council not authorize this request, the Department will be unable to reimburse the Contractors for Assertive Community Treatment and Modular Approach to Therapy for Children services, which aligns with the scope of services.

Respectfully submitted,

Lori A. Weaver
Commissioner

Funds are available in the following accounts for State Fiscal Years 2023 and 2024, and are anticipated to be available in State Fiscal Year 2025, upon the availability and continued appropriation of funds in the future operating budget, with the authority to adjust budget line items within the price limitation and encumbrances between state fiscal years through the Budget Office, if needed and justified.

**See attached fiscal details.**

**EXPLANATION**

This request is **Sole Source** because the Contractors are the only authorized contractors able to provide the necessary services. The Department contracts for mental health services through these ten (10) Community Mental Health Centers, which are designated by the Department to service towns and cities within specified geographic regions, as outlined in the NH Revised Statutes Annotated (RSA) 135-C, New Hampshire Mental Health Services System, and NH Administrative Rule He-M 403, Approval and Operation of Community Mental Health Programs.

The purpose of this request is to provide community mental health services for individuals in New Hampshire. Community Mental Health Centers provide community-based mental health services to adults, children, and families to build resiliency, promote recovery, and reduce inpatient hospital utilizations, and improve community tenure. These contracts provide both Federal grant funds and General Funds that enable delivery of services not otherwise covered by Medicaid. For example, technology, training, and system upgrades, delivery of some Assertive Community Treatment services, and care coordination with other systems such as the Division of Children, Youth, and Families, Department of Education, and Division of Long Term Supports and Services. The majority of the General Funds are allocated to ensure that individuals who are uninsured have full access to NH Rapid Response crisis services.

Approximately 20,700 individuals will be served annually.

The populations served include children with Serious Emotional Disturbances and adults with Serious Mental Illness/Serious and Persistent Mental Illness, including individuals with Mental Illness and co-occurring substance use disorders per NH Administrative Rule He-M 401 Eligibility Determination and Individuals Service Planning.

The Contractors will provide crisis services, individual and group psychotherapy, targeted case management, medication services, Functional Support Services, Illness Management and Recovery, supported employment, Assertive Community Treatment, Wraparound services for children, community residential services, and acute care services to individuals experiencing psychiatric emergencies while awaiting admission to a designated receiving facility. All contracts include provisions for Mental Health Services required by NH RSA 135-C and with State Regulations applicable to the mental health system as outlined in He-M 400, as well as in compliance with the Community Mental Health Agreement (CMHA).

The Department will monitor services by:

- Conducting performance reviews and utilization reviews as necessary and appropriate based on applicable licensing, certifications and service provisions.
- Conducting quarterly meetings to review submitted quarterly data and reports to identify ongoing programmatic improvements.
- Reviewing monthly financial statements provided by the Contractors for ongoing evaluation of program fiscal integrity.

As referenced in Exhibit A, Revisions to Standard Agreement Provisions Section 1, Revisions to Form P-37, General Provisions, Subsection 1.2 of the attached agreements, the parties have the option to extend the agreements for up to four (4) additional years, contingent upon satisfactory delivery of services, available funding, agreement of the parties, and Governor and Council approval.

Should the Governor and Council not authorize this request, approximately 12,300 adults, and 8,400 children in the state will not have access to critical community mental health services as required by NH RSA 135-C:13. As a result, these individuals may experience an increase in symptoms causing them to seek more costly services at hospital emergency departments due to risk of harm to themselves or others and may have increased contact with law enforcement, correctional programs, or primary care physicians, none of which have the necessary services or supports available to provide necessary assistance. Lack of these services may also increase the likelihood of inpatient hospitalizations and death by suicide.

Source of Federal Funds: Assistance Listing Number #93.243, FAIN # H79SM080245; Assistance Listing Number #93.958, FAIN # B09SM087375; Assistance Listing Number #93.043, FAIN #2201NHOAPH; Assistance Listing Number #93.959, FAIN # TI085821; Assistance Listing Number #93.829, FAIN # H79SM087622.

In the event that the Federal Funds become no longer available, additional General Funds will not be requested to support this program.

Respectfully submitted,

Lori A. Weaver
Interim Commissioner

2. SERVICES TO BE PERFORMED. The State of New Hampshire, acting through the agency identified in block 1.1 ("State"), engages contractor identified in block 1.3 ("Contractor") to perform, and the Contractor shall perform, the work or sale of goods, or both, identified and more particularly described in the attached EXHIBIT B which is incorporated herein by reference ("Services").

3. EFFECTIVE DATE/COMPLETION OF SERVICES.

3.1 Notwithstanding any provision of this Agreement to the contrary, and subject to the approval of the Governor and Executive Council of the State of New Hampshire, if applicable, this Agreement, and all obligations of the parties hereunder, shall become effective on the date the Governor and Executive Council approve this Agreement as indicated in block 1.17, unless no such approval is required, in which case the Agreement shall become effective on the date the Agreement is signed by the State Agency as shown in block 1.13 ("Effective Date").

3.2 If the Contractor commences the Services prior to the Effective Date, all Services performed by the Contractor prior to the Effective Date shall be performed at the sole risk of the Contractor, and in the event that this Agreement does not become effective, the State shall have no liability to the Contractor, including without limitation, any obligation to pay the Contractor for any costs incurred or Services performed. Contractor must complete all Services by the Completion Date specified in block 1.7.

4. CONDITIONAL NATURE OF AGREEMENT.

Notwithstanding any provision of this Agreement to the contrary, all obligations of the State hereunder, including, without limitation, the continuance of payments hereunder, are contingent upon the availability and continued appropriation of funds affected by any state or federal legislative or executive action that reduces, eliminates or otherwise modifies the appropriation or availability of funding for this Agreement and the Scope for Services provided in EXHIBIT B, in whole or in part. In no event shall the State be liable for any payments hereunder in excess of such available appropriated funds. In the event of a reduction or termination of appropriated funds, the State shall have the right to withhold payment until such funds become available, if ever, and shall have the right to reduce or terminate the Services under this Agreement immediately upon giving the Contractor notice of such reduction or termination. The State shall not be required to transfer funds from any other account or source to the Account identified in block 1.6 in the event funds in that Account are reduced or unavailable.

5. CONTRACT PRICE/PRICE LIMITATION/ PAYMENT.

5.1 The contract price, method of payment, and terms of payment are identified and more particularly described in EXHIBIT C which is incorporated herein by reference.

5.2 The payment by the State of the contract price shall be the only and the complete reimbursement to the Contractor for all expenses, of whatever nature incurred by the Contractor in the performance hereof, and shall be the only and the complete compensation to the Contractor for the Services. The State shall have no liability to the Contractor other than the contract price.

5.3 The State reserves the right to offset from any amounts otherwise payable to the Contractor under this Agreement those liquidated amounts required or permitted by N.H. RSA 80:7 through RSA 80:7-c or any other provision of law.

5.4 Notwithstanding any provision in this Agreement to the contrary, and notwithstanding unexpected circumstances, in no event shall the total of all payments authorized, or actually made hereunder, exceed the Price Limitation set forth in block 1.8.

6. COMPLIANCE BY CONTRACTOR WITH LAWS AND REGULATIONS/ EQUAL EMPLOYMENT OPPORTUNITY.

6.1 In connection with the performance of the Services, the Contractor shall comply with all applicable statutes, laws, regulations, and orders of federal, state, county or municipal authorities which impose any obligation or duty upon the Contractor, including, but not limited to, civil rights and equal employment opportunity laws. In addition, if this Agreement is funded in any part by monies of the United States, the Contractor shall comply with all federal executive orders, rules, regulations and statutes, and with any rules, regulations and guidelines as the State or the United States issue to implement these regulations. The Contractor shall also comply with all applicable intellectual property laws.

6.2 During the term of this Agreement, the Contractor shall not discriminate against employees or applicants for employment because of race, color, religion, creed, age, sex, handicap, sexual orientation, or national origin and will take affirmative action to prevent such discrimination.

6.3. The Contractor agrees to permit the State or United States access to any of the Contractor's books, records and accounts for the purpose of ascertaining compliance with all rules, regulations and orders, and the covenants, terms and conditions of this Agreement.

7. PERSONNEL.

7.1 The Contractor shall at its own expense provide all personnel necessary to perform the Services. The Contractor warrants that all personnel engaged in the Services shall be qualified to perform the Services, and shall be properly licensed and otherwise authorized to do so under all applicable laws.

7.2 Unless otherwise authorized in writing, during the term of this Agreement, and for a period of six (6) months after the Completion Date in block 1.7, the Contractor shall not hire, and shall not permit any subcontractor or other person, firm or corporation with whom it is engaged in a combined effort to perform the Services to hire, any person who is a State employee or official, who is materially involved in the procurement, administration or performance of this Agreement. This provision shall survive termination of this Agreement.

**8. EVENT OF DEFAULT/REMEDIES.**

8.1 Any one or more of the following acts or omissions of the Contractor shall constitute an event of default hereunder ("Event of Default"):

8.1.1 failure to perform the Services satisfactorily or on schedule;

8.1.2 failure to submit any report required hereunder; and/or

8.1.3 failure to perform any other covenant, term or condition of this Agreement.

8.2 Upon the occurrence of any Event of Default, the State may take any one, or more, or all, of the following actions:

8.2.1 give the Contractor a written notice specifying the Event of Default and requiring it to be remedied within, in the absence of a greater or lesser specification of time, thirty (30) days from the date of the notice; and if the Event of Default is not timely cured, terminate this Agreement, effective two (2) days after giving the Contractor notice of termination;

8.2.2 give the Contractor a written notice specifying the Event of Default and suspending all payments to be made under this Agreement and ordering that the portion of the contract price which would otherwise accrue to the Contractor during the period from the date of such notice until such time as the State determines that the Contractor has cured the Event of Default shall never be paid to the Contractor;

8.2.3 give the Contractor a written notice specifying the Event of Default and set off against any other obligations the State may owe to the Contractor any damages the State suffers by reason of any Event of Default; and/or

8.2.4 give the Contractor a written notice specifying the Event of Default, treat the Agreement as breached, terminate the Agreement and pursue any of its remedies at law or in equity, or both.

8.3 No failure by the State to enforce any provisions hereof after any Event of Default shall be deemed a waiver of its rights with regard to that Event of Default, or any subsequent Event of Default. No express failure to enforce any Event of Default shall be deemed a waiver of the right of the State to enforce each and all of the provisions hereof upon any further or other Event of Default on the part of the Contractor.

**9. TERMINATION.**

9.1 Notwithstanding paragraph 8, the State may, at its sole discretion, terminate the Agreement for any reason, in whole or in part, by thirty (30) days written notice to the Contractor that the State is exercising its option to terminate the Agreement.

9.2 In the event of an early termination of this Agreement for any reason other than the completion of the Services, the Contractor shall, at the State's discretion, deliver to the Contracting Officer, not later than fifteen (15) days after the date of termination, a report ("Termination Report") describing in detail all Services performed, and the contract price earned, to and including the date of termination. The form, subject matter, content, and number of copies of the Termination Report shall be identical to those of any Final Report described in the attached EXHIBIT B. INSTRUCTIONS FOR CERTIFICATION

1. By signing and submitting this proposal (contract), the prospective primary participant is providing the certification set out below.

2. The inability of a person to provide the certification required below will not necessarily result in denial of participation in this covered transaction. If necessary, the prospective participant shall submit an explanation of why it cannot provide the certification. The certification or explanation will be considered in connection with the NH Department of Health and Human Services' (DHHS) determination whether to enter into this transaction. However, failure of the prospective primary participant to furnish a certification or an explanation shall disqualify such person from participation in this transaction.

3. The certification in this clause is a material representation of fact upon which reliance was placed when DHHS determined to enter into this transaction. If it is later determined that the prospective primary participant knowingly rendered an erroneous certification, in addition to other remedies available to the Federal Government, DHHS may terminate this transaction for cause or default.

4. The prospective primary participant shall provide immediate written notice to the DHHS agency to whom this proposal (contract) is submitted if at any time the prospective primary participant learns that its certification was erroneous when submitted or has become erroneous by reason of changed circumstances.

5. The terms "covered transaction," "debarred," "suspended," "ineligible," "lower tier covered transaction," "participant," "person," "primary covered transaction," "principal," "proposal," and "voluntarily excluded," as used in this clause, have the meanings set out in the Definitions and Coverage sections of the rules implementing Executive Order 12549: 45 CFR Part 76. See the attached definitions.

6. The prospective primary participant agrees by submitting this proposal (contract) that, should the proposed covered transaction be entered into, it shall not knowingly enter into any lower tier covered transaction with a person who is debarred, suspended, declared ineligible, or voluntarily excluded from participation in this covered transaction, unless authorized by DHHS.

7. The prospective primary participant further agrees by submitting this proposal that it will include the clause titled "Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion - Lower Tier Covered Transactions," provided by DHHS, without modification, in all lower tier covered transactions and in all solicitations for lower tier covered transactions.

8. A participant in a covered transaction may rely upon a certification of a prospective participant in a lower tier covered transaction that it is not debarred, suspended, ineligible, or involuntarily excluded from the covered transaction, unless it knows that the certification is erroneous. A participant may decide the method and frequency by which it determines the eligibility of its principals. Each participant may, but is not required to, check the Nonprocurement List (of excluded parties).

9. Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render in good faith the certification required by this clause. The knowledge and

information of a participant is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.

10. Except for transactions authorized under paragraph 6 of these instructions, if a participant in a covered transaction knowingly enters into a lower tier covered transaction with a person who is suspended, debarred, ineligible, or voluntarily excluded from participation in this transaction, in addition to other remedies available to the Federal government, DHHS may terminate this transaction for cause or default.

# INDEPENDENT AUDITOR'S REPORT

To the Board of Directors
of The Lakes Region Mental Health Center, Inc.

## Opinion

We have audited the accompanying financial statements of The Lakes Region Mental Health Center Inc. (a nonprofit organization), which comprise the statement of financial position as of June 30, 2024, and the related statements of activities and changes in net assets and cash flows for the year then ended, and the related notes to the financial statements.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of The Lakes Region Mental Health Center Inc. as of June 30, 2024, and the changes in its net assets and its cash flows for the year then ended in accordance with accounting principles generally accepted in the United States of America.

## Basis for Opinion

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of The Lakes Region Mental Health Center Inc. and to meet our other ethical responsibilities in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

## Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error. In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about The Lakes Region Mental Health Center Inc.'s ability to continue as a going concern within one year after the date that the financial statements are available to be issued.

**Auditor's Responsibilities for the Audit of the Financial Statements**

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with generally accepted auditing standards will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with generally accepted auditing standards, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of The Lakes Region Mental Health Center Inc.'s internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about The Lakes Region Mental Health Center Inc.'s ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control related matters that we identified during the audit.

**Report on Supplementary Information**

Our audit was conducted for the purpose of forming an opinion on the financial statements as a whole. The Analysis of Accounts Receivables, the Analysis of BBH Revenues, Receipts & Receivables and schedules of functional public support, revenues, and expenses on pages 15-18 is presented for purposes of additional analysis and is not a required part of the financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated in all material respects in relation to the financial statements as a whole.

## NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Organization
The Lakes Region Mental Health Center, Inc. (the Center) is a not-for-profit corporation, organized under New Hampshire law to provide services in the areas of mental health, and related non-mental health programs; it is exempt from income taxes under Section 501 (c)(3) of the Internal Revenue Code. In addition, the Center qualifies for the charitable contribution deduction under Section 170 (b)(1)(a) and has been classified as an organization that is not a private foundation under Section 509(a)(2).

Estimates
The preparation of financial statements in conformity with generally accepted accounting principles require management to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results could differ from those estimates.

Depreciation
The cost of property, equipment and leasehold improvements is depreciated over the estimated useful life of the assets using the straight line method. Estimated useful lives range from 3 to 40 years.

State Grants
The Center receives a number of grants from and has entered into various contracts with the State of New Hampshire related to the delivery of mental health services.

Vacation Pay and Fringe Benefits
Vacation pay is accrued and charged to the programs when earned by the employee. Fringe benefits are allocated on a pro-rated basis to the programs.

Income Taxes
Consideration has been given to uncertain tax positions. The federal income tax returns for the years ended after June 30, 2021, remain open for potential examination by major tax jurisdictions, generally for three years after they were filed.

Revenue
Revenue from federal, state and other sources is recognized in the period earned.

Client Service Revenue
The Center recognizes client service revenue in accordance with ASC Topic 606. Client Service Revenue is reported at the amount that reflects the consideration the corporation expects to receive in exchange for the services provided. These amounts are due from patients or third party payers and include variable consideration for retroactive adjustments, if any, under reimbursement programs. Performance obligations are determined based on the nature of the services provided. Client service revenue is recognized as performance obligations are satisfied. The Center recognized revenue for mental health services in accordance with ASC 606, Revenue for contracts with Customers. The Center has determined that these services included under the daily or monthly fee have the same timing and pattern of transfer and are a series of distinct services that are considered one performance obligation which is satisfied over time.

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Client Service Revenue (continued)
The Center receives revenues for services under various third-party payer programs which include Medicaid and other third-party payers. The transaction price is based on standard charges for services provided to residents, reduced by applicable contractual adjustments, discounts, and implicit pricing concessions. The estimates of contractual adjustments and discounts are based on contractual agreements, discount policy, and historical collection experience. The corporation estimates the transaction price based on the terms of the contract with the payer, correspondence with the payer and historical trends.

Client service revenue (net of contractual allowances and discounts but before taking account of the provision for bad debts) recognized during the year ended June 30, 2024 totaled $12,288,840, of which $12,030,409 was revenue from third-party payers and $258,431 was revenue from self-pay clients.

Third Party Contractual Arrangements
A significant portion of patient revenue is derived from services to patients insured by third-party payors. The center receives reimbursement from Medicare, Medicaid, Blue Cross, and other third-party insurers at defined rates for services rendered to patients covered by these programs. The difference between the established billing rates and the actual rate of reimbursement is recorded as allowances when recorded. A provision for estimated contractual allowances is provided on outstanding patient receivables at the balance sheet date.

Basis for Presentation
The financial statements of the Center have been prepared on the accrual basis in accordance with accounting principles generally accepted in the United States of America. The financial statements are presented in accordance with Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 958 dated August 2016, and the provisions of the American Institute of Certified Public Accountants (AICPA) "Audit and Accounting Guide for Not-for-Profit Organizations" (the "Guide"). (ASC) 958-205 was effective January 1, 2018.

Under the provisions of the Guide, net assets and revenues and gains and losses are classified based on the existence or absence of donor-imposed restrictions. Accordingly, the net asset of the Center and changes therein are classified as follows:

Net assets without donor restrictions: Net assets that are not subject to donor imposed restrictions and may be expended for any purpose in performing the primary objectives of the Center. The Center's board may designate assets without restrictions for specific operational purposes from time to time.

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Net assets with donor restrictions: Net assets subject to stipulations imposed by donors and grantors. Some donor restrictions are temporary in nature; those restrictions will be met by actions of the Center or by the passage of time. Other donor restrictions are perpetual in nature, whereby the donor has stipulated the funds be maintained in perpetuity.

Accounts Receivable
Accounts receivable are recorded based on the amount billed for services provided, net of respective allowances.

Advertising
Advertising costs are expensed as incurred. Total costs were $98,123 at June 30, 2024 and consisted of $40,043 for recruitment and $58,080 for agency advertising.

New Accounting Standards - Adoption of FASB ASU 2016-13 and Related Standards
On July 1, 2023, the Center adopted FASB ASU 2016-03, Financial Instruments – Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments, as amended, which modifies the measurement of expected credit losses on certain financial instruments. The Center adopted this new guidance utilizing the modified retrospective transition method. The adoption of this Standard did not have a material impact on the center's financial statements but did change how the allowance for doubtful accounts and credit losses is determined.

Accounts Receivable and Allowance for Credit Losses
In evaluating the collectability of accounts receivable, the Center uses relevant available information, from internal and external sources, relating to past events, current conditions, reasonable and supportable forecasts, and analyzes trends for each major payer source of revenue for the purpose of estimating the appropriate amounts of the allowance for doubtful accounts. Data in each major payer source is regularly reviewed to evaluate the adequacy of the allowance for doubtful accounts. Specifically, for receivables relating to services provided to clients having third-party coverage, an allowance for doubtful accounts and a corresponding provision for bad debts are established for amounts outstanding for an extended period of time and for third-party payers experiencing financial difficulties; for receivables relating to self-pay clients, a provision for bad debts is made in the period services are rendered based on experience indicating the inability or unwillingness of clients to pay amounts for which they are financially responsible.

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

The Center has tracked historical loss information for its accounts receivable and compiled historical credit loss percentages for different aging categories (current, 1-30 days past due, 31-60 days past due, 61-90 days past due, and more than 90 days past due). The center believes the historical loss information it has compiled is a reasonable base on which to determine expected credit losses for accounts receivable held at June 30, 2024 because the compositions of the accounts receivable at those dates are consistent with that used in developing the historical credit-loss percentages (i.e., the similar risk characteristics of its services provided to clients have not changed significantly over time). Additionally, the center has determined that the current and reasonable and supportable forecasted economic conditions are consistent with the economic conditions included in the historical information. As a result, the historical loss rates have not been adjusted for differences in current conditions or forecasted changes. Accordingly, the allowance for doubtful accounts was $1,135,000 for the year ended June 30, 2024.

Total patient accounts receivable increased to $1,508,880 as of June 30, 2024 from $972,748 at June 30, 2023. As a result of changes to payer mix present at year end the allowance as a percentage of total accounts receivable increased to 75% from 69% of total patient accounts receivable.

NOTE 2 CLIENT SERVICE REVENUES FROM THIRD PARTY PAYORS

The Center has agreements with third-party payors that provide payments to the Center at established rates. These payments include:

New Hampshire and Managed Medicaid
The Center is reimbursed for services from the State of New Hampshire and Managed Care Organizations (MCOs) for services rendered to Medicaid clients. Payments for these services are received in the form of monthly capitation amounts that are predetermined in a contractual agreement with the MCOs.

Approximately 84% of program service fees is from participation in the State and Managed Care Organization sponsored Medicaid programs for the year ended June 30, 2024.

Laws and regulations governing the Medicaid programs are complex and subject to interpretation and change. As a result, it is reasonably possible that recorded estimates could change materially in the near term.

NOTE 2 CLIENT SERVICE REVENUES FROM THIRD PARTY PAYORS (continued)

As part of the contractual arrangement with the MCOs, the Center is required to provide a specific amount of services under an arrangement referred to as a Maintenance of Effort (MOE). Under the MOE, if levels of service are not met the Center may be subject to repayment of a portion of the revenue received. The MOE calculation is subject to interpretation and a source of continued debate and negotiations with MCOs. This MOE calculation may result in a liability that would require a payback to the MCOs. For the year ended June 30, 2024, the Center has estimated that it missed one of three MOE requirements with the MCO's and has estimated a total payback of $100,000 which is recorded as an accrued expense. The total payback also includes an amount due from missing one of the three MOE requirements with the MCO's from June 30, 2023.

NOTE 3 INVESTMENTS

Investments consist of amounts invested in various Vanguard Equity and Bond Funds. At June 30, 2024, the status of these funds were as follows:

| | Cost | Unrealized Gain (Loss) | Market |
|---|---|---|---|
| Large Blend | $ 680,773 | $ 463,649 | $ 1,144,422 |
| Health | 423,789 | 78,794 | 502,583 |
| Large Growth | 189,933 | (9,542) | 180,391 |
| Mid-Cap Value | 320,337 | 294,216 | 614,553 |
| Short-Term Bond | 359,850 | 101,152 | 461,002 |
| | $ 1,974,682 | $ 928,269 | $ 2,902,951 |

The related unrealized gain (losses) have been included in the investment income line on the accompanying statement of activities. Investment income is as follows:

| | |
|---|---|
| Interest and Dividends | $ 40,082 |
| Realized Gains | 123,316 |
| Unrealized Gains | 245,834 |
| | $ 409,232 |

## NOTE 4 FAIR VALUE MEASUREMENTS

Professional accounting standards require a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value.

The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy under these professional accounting standards are described below:

Basis of Fair Value Measurement

Level 1 Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities.
Level 2 Quoted prices in markets that are not considered to be active or financial instruments for which all significant inputs are observable, either directly or indirectly.
Level 3 Prices or valuations that require inputs that are both significant to the fair value measurement and unobservable.

A financial instrument's level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. All investments are categorized as Level 1 and recorded at fair value, as of June 30, 2024. As required by professional accounting standards, investment assets are classified in their entirety based upon the lowest level of input that is significant to the fair value measurement.

**EXPLANATION**

This request is **Sole Source** because MOP 150 requires all amendments to agreements originally approved as sole source to be identified as sole source. The Contractors are the only authorized contractors able to provide the necessary services. The Department contracts for mental health services through these Community Mental Health Centers, which are designated by the Department to service towns and cities within specified geographic regions, as outlined in the NH Revised Statutes Annotated (RSA) 135-C, New Hampshire Mental Health Services System, and NH Administrative Rule He-M 403, Approval and Operation of Community Mental Health Programs.

The purpose of this request is to correct the payment terms for the Assertive Community Treatment and Modular Approach to Therapy for Children services to ensure the Department can reimburse the Contractors for these services. The current payment terms for these services only allow payments to be drawn down on the prior State Fiscal Year and not for the full term of the contract. The Department is requesting to revise the payment terms to remove references to prior SFYs. This will allow the Contractors to invoice for payments through the contract completion date. The funding for the Contractors' payments is already encumbered in their individual price limitations.

The Assertive Community Treatment program offers treatment, rehabilitation, and support services using a person-centered, recovery-based approach to individuals who have been diagnosed with severe and persistent mental illness. The Contractors are paid for these services based on active participation in the monthly consultation and skill training events or for completion of a fidelity measures reviewed by the Department. The Modular Approach to Therapy for Children program is an industry standard treatment that employs a cognitive-behavioral framework to address common childhood behavioral health concerns including depression, anxiety, conduct problems, and trauma for youth ages 6-12. This modularized approach allows for flexibility and encourages clinicians to tailor treatment to individual treatment needs. The Contractors are paid for these services based on a per person rate. The Assertive Community Treatment and Modular Approach to Therapy for Children program scope provisions align with Mental Health Services required by NH RSA 135-C and with State Regulations applicable to the mental health system as outlined in He-M 400, as well as in compliance with the Community Mental Health Agreement (CMHA).

Approximately 20,700 individuals are served annually by the Contractors listed above. The populations served include children with Serious Emotional Disturbances and adults with Serious Mental Illness/Serious and Persistent Mental Illness, including individuals with Mental Illness and co-occurring substance use disorders per NH Administrative Rule He-M 401 Eligibility Determination and Individuals Service Planning.

The Department will continue to monitor services by:

- Conducting performance reviews and utilization reviews as necessary and appropriate based on applicable licensing, certifications, and service provisions.
- Conducting quarterly meetings to review submitted quarterly data and reports to identify ongoing programmatic improvements.
- Reviewing monthly financial statements provided by the Contractors for ongoing evaluation of program fiscal integrity.

Should the Governor and Executive Council not authorize this request, the Department will be unable to reimburse the Contractors for Assertive Community Treatment and Modular Approach to Therapy for Children services, which aligns with the scope of services.

Respectfully submitted,

Lori A. Weaver
Commissioner

**EXPLANATION**

This request is **Sole Source** because the Contractors are the only authorized contractors able to provide the necessary services. The Department contracts for mental health services through these ten (10) Community Mental Health Centers, which are designated by the Department to service towns and cities within specified geographic regions, as outlined in the NH Revised Statutes Annotated (RSA) 135-C, New Hampshire Mental Health Services System, and NH Administrative Rule He-M 403, Approval and Operation of Community Mental Health Programs.

The purpose of this request is to provide community mental health services for individuals in New Hampshire. Community Mental Health Centers provide community-based mental health services to adults, children, and families to build resiliency, promote recovery, and reduce inpatient hospital utilizations, and improve community tenure. These contracts provide both Federal grant funds and General Funds that enable delivery of services not otherwise covered by Medicaid. For example, technology, training, and system upgrades, delivery of some Assertive Community Treatment services, and care coordination with other systems such as the Division of Children, Youth, and Families, Department of Education, and Division of Long Term Supports and Services. The majority of the General Funds are allocated to ensure that individuals who are uninsured have full access to NH Rapid Response crisis services.

Approximately 20,700 individuals will be served annually.

The populations served include children with Serious Emotional Disturbances and adults with Serious Mental Illness/Serious and Persistent Mental Illness, including individuals with Mental Illness and co-occurring substance use disorders per NH Administrative Rule He-M 401 Eligibility Determination and Individuals Service Planning.

The Contractors will provide crisis services, individual and group psychotherapy, targeted case management, medication services, Functional Support Services, Illness Management and Recovery, supported employment, Assertive Community Treatment, Wraparound services for children, community residential services, and acute care services to individuals experiencing psychiatric emergencies while awaiting admission to a designated receiving facility. All contracts include provisions for Mental Health Services required by NH RSA 135-C and with State Regulations applicable to the mental health system as outlined in He-M 400, as well as in compliance with the Community Mental Health Agreement (CMHA).

The Department will monitor services by:

- Conducting performance reviews and utilization reviews as necessary and appropriate based on applicable licensing, certifications and service provisions.
- Conducting quarterly meetings to review submitted quarterly data and reports to identify ongoing programmatic improvements.
- Reviewing monthly financial statements provided by the Contractors for ongoing evaluation of program fiscal integrity.

As referenced in Exhibit A, Revisions to Standard Agreement Provisions Section 1, Revisions to Form P-37, General Provisions, Subsection 1.2 of the attached agreements, the parties have the option to extend the agreements for up to four (4) additional years, contingent upon satisfactory delivery of services, available funding, agreement of the parties, and Governor and Council approval.

Should the Governor and Council not authorize this request, approximately 12,300 adults, and 8,400 children in the state will not have access to critical community mental health services as required by NH RSA 135-C:13. As a result, these individuals may experience an increase in symptoms causing them to seek more costly services at hospital emergency departments due to risk of harm to themselves or others and may have increased contact with law enforcement, correctional programs, or primary care physicians, none of which have the necessary services or supports available to provide necessary assistance. Lack of these services may also increase the likelihood of inpatient hospitalizations and death by suicide.

Source of Federal Funds: Assistance Listing Number #93.243, FAIN # H79SM080245; Assistance Listing Number #93.958, FAIN # B09SM087375; Assistance Listing Number #93.043, FAIN #2201NHOAPH; Assistance Listing Number #93.959, FAIN # TI085821; Assistance Listing Number #93.829, FAIN # H79SM087622.

In the event that the Federal Funds become no longer available, additional General Funds will not be requested to support this program.

Respectfully submitted,

Lori A. Weaver
Interim Commissioner

2. **SERVICES TO BE PERFORMED.** The State of New Hampshire, acting through the agency identified in block 1.1 ("State"), engages contractor identified in block 1.3 ("Contractor") to perform, and the Contractor shall perform, the work or sale of goods, or both, identified and more particularly described in the attached EXHIBIT B which is incorporated herein by reference ("Services").

**3. EFFECTIVE DATE/COMPLETION OF SERVICES.**

3.1 Notwithstanding any provision of this Agreement to the contrary, and subject to the approval of the Governor and Executive Council of the State of New Hampshire, if applicable, this Agreement, and all obligations of the parties hereunder, shall become effective on the date the Governor and Executive Council approve this Agreement as indicated in block 1.17, unless no such approval is required, in which case the Agreement shall become effective on the date the Agreement is signed by the State Agency as shown in block 1.13 ("Effective Date").

3.2 If the Contractor commences the Services prior to the Effective Date, all Services performed by the Contractor prior to the Effective Date shall be performed at the sole risk of the Contractor, and in the event that this Agreement does not become effective, the State shall have no liability to the Contractor, including without limitation, any obligation to pay the Contractor for any costs incurred or Services performed. Contractor must complete all Services by the Completion Date specified in block 1.7.

**4. CONDITIONAL NATURE OF AGREEMENT.**

Notwithstanding any provision of this Agreement to the contrary, all obligations of the State hereunder, including, without limitation, the continuance of payments hereunder, are contingent upon the availability and continued appropriation of funds affected by any state or federal legislative or executive action that reduces, eliminates or otherwise modifies the appropriation or availability of funding for this Agreement and the Scope for Services provided in EXHIBIT B, in whole or in part. In no event shall the State be liable for any payments hereunder in excess of such available appropriated funds. In the event of a reduction or termination of appropriated funds, the State shall have the right to withhold payment until such funds become available, if ever, and shall have the right to reduce or terminate the Services under this Agreement immediately upon giving the Contractor notice of such reduction or termination. The State shall not be required to transfer funds from any other account or source to the Account identified in block 1.6 in the event funds in that Account are reduced or unavailable.

**5. CONTRACT PRICE/PRICE LIMITATION/ PAYMENT.**

5.1 The contract price, method of payment, and terms of payment are identified and more particularly described in EXHIBIT C which is incorporated herein by reference.

5.2 The payment by the State of the contract price shall be the only and the complete reimbursement to the Contractor for all expenses, of whatever nature incurred by the Contractor in the performance hereof, and shall be the only and the complete compensation to the Contractor for the Services. The State shall have no liability to the Contractor other than the contract price.

5.3 The State reserves the right to offset from any amounts otherwise payable to the Contractor under this Agreement those liquidated amounts required or permitted by N.H. RSA 80:7 through RSA 80:7-c or any other provision of law.

5.4 Notwithstanding any provision in this Agreement to the contrary, and notwithstanding unexpected circumstances, in no event shall the total of all payments authorized, or actually made hereunder, exceed the Price Limitation set forth in block 1.8.

**6. COMPLIANCE BY CONTRACTOR WITH LAWS AND REGULATIONS/ EQUAL EMPLOYMENT OPPORTUNITY.**

6.1 In connection with the performance of the Services, the Contractor shall comply with all applicable statutes, laws, regulations, and orders of federal, state, county or municipal authorities which impose any obligation or duty upon the Contractor, including, but not limited to, civil rights and equal employment opportunity laws. In addition, if this Agreement is funded in any part by monies of the United States, the Contractor shall comply with all federal executive orders, rules, regulations and statutes, and with any rules, regulations and guidelines as the State or the United States issue to implement these regulations. The Contractor shall also comply with all applicable intellectual property laws.

6.2 During the term of this Agreement, the Contractor shall not discriminate against employees or applicants for employment because of race, color, religion, creed, age, sex, handicap, sexual orientation, or national origin and will take affirmative action to prevent such discrimination.

6.3. The Contractor agrees to permit the State or United States access to any of the Contractor's books, records and accounts for the purpose of ascertaining compliance with all rules, regulations and orders, and the covenants, terms and conditions of this Agreement.

**7. PERSONNEL.**

7.1 The Contractor shall at its own expense provide all personnel necessary to perform the Services. The Contractor warrants that all personnel engaged in the Services shall be qualified to perform the Services, and shall be properly licensed and otherwise authorized to do so under all applicable laws.

## CERTIFICATION REGARDING DRUG-FREE WORKPLACE REQUIREMENTS

The Vendor identified in Section 1.3 of the General Provisions agrees to comply with the provisions of Sections 5151-5160 of the Drug-Free Workplace Act of 1988 (Pub. L. 100-690, Title V, Subtitle D; 41 U.S.C. 701 et seq.), and further agrees to have the Contractor's representative, as identified in Sections 1.11 and 1.12 of the General Provisions execute the following Certification:

**ALTERNATIVE I - FOR GRANTEES OTHER THAN INDIVIDUALS**

**US DEPARTMENT OF HEALTH AND HUMAN SERVICES - CONTRACTORS**
**US DEPARTMENT OF EDUCATION - CONTRACTORS**
**US DEPARTMENT OF AGRICULTURE - CONTRACTORS**

This certification is required by the regulations implementing Sections 5151-5160 of the Drug-Free Workplace Act of 1988 (Pub. L. 100-690, Title V, Subtitle D; 41 U.S.C. 701 et seq.). The January 31, 1989 regulations were amended and published as Part II of the May 25, 1990 Federal Register (pages 21681-21691), and require certification by grantees (and by inference, sub-grantees and sub-contractors), prior to award, that they will maintain a drug-free workplace. Section 3017.630(c) of the regulation provides that a grantee (and by inference, sub-grantees and sub-contractors) that is a State may elect to make one certification to the Department in each federal fiscal year in lieu of certificates for each grant during the federal fiscal year covered by the certification. The certificate set out below is a material representation of fact upon which reliance is placed when the agency awards the grant. False certification or violation of the certification shall be grounds for suspension of payments, suspension or termination of grants, or government wide suspension or debarment. Contractors using this form should send it to:

The certification or explanation will be considered in connection with the NH Department of Health and Human Services' (DHHS) determination whether to enter into this transaction. However, failure of the prospective primary participant to furnish a certification or an explanation shall disqualify such person from participation in this transaction.

If it is later determined that the prospective primary participant knowingly rendered an erroneous certification, in addition to other remedies available to the Federal Government, DHHS may terminate this transaction for cause or default.

A participant may decide the method and frequency by which it determines the eligibility of its principals. Each participant may, but is not required to, check the Nonprocurement List (of excluded parties).

# INDEPENDENT AUDITOR'S REPORT

To the Board of Directors of
Riverbend Community Mental Health, Inc.
Concord, New Hampshire

## Report on the Audit of the Financial Statements

### Opinion

We have audited the accompanying financial statements of Riverbend Community Mental Health, Inc. (a nonprofit organization), which comprise the statement of financial position as of June 30, 2022, and the related statements of operations and cash flows for the year then ended, and the related notes to the financial statements.

In our opinion, the financial statements present fairly, in all material respects, the financial position of Riverbend Community Mental Health, Inc. as of June 30, 2022, and the changes in its net assets and its cash flows for the year then ended in accordance with accounting principles generally accepted in the United States of America.

### Basis for Opinion

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of Riverbend Community Mental Health, Inc. and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

### Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error. In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about Riverbend Community Mental Health, Inc.'s ability to continue as a going concern within one year after the date that the financial statements are available to be issued.

**Auditor's Responsibilities for the Audit of the Financial Statements**

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with generally accepted auditing standards and Government Auditing Standards will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with generally accepted auditing standards and *Government Auditing Standards*, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of Riverbend Community Mental Health, Inc.'s internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about Riverbend Community Mental Health, Inc.'s ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

**Supplementary Information**

Our audit was conducted for the purpose of forming an opinion on the financial statements as a whole. The accompanying schedule of functional revenues, schedule of functional expenses, analysis of BBH revenues, receipts and receivables, analysis of client service fees and schedule of expenditures of federal awards, as required by Title 2 U.S. *Code of Federal Regulations* Part 200, *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards*, is presented for purposes of additional analysis and is not a required part of the financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the schedule of functional revenues, schedule of functional expenses, analysis of BBH revenues, receipts and receivables, analysis of client service fees and schedule of expenditures of federal awards are fairly stated, in all material respects, in relation to the financial statements as a whole.

**Other Reporting Required by *Government Auditing Standards***

In accordance with *Government Auditing Standards*, we have also issued our report dated January 5, 2023, on our consideration of Riverbend Community Mental Health, Inc.'s internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of Riverbend Community Mental Health, Inc.'s internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering Riverbend Community Mental Health, Inc.'s internal control over financial reporting and compliance.

Basis of Presentation

The financial statements have been prepared on the accrual basis in accordance with accounting principles generally accepted in the United States of America. The financial statements are presented in accordance with Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 958 dated August 2016, and the provisions of the American Institute of Certified Public Accountants (AICPA) "Audit and Accounting Guide for Not-for-Profit Organizations" (the "Guide"). Net assets without donor restrictions: Net assets that are not subject to donor-imposed restrictions and may be expended for any purpose in performing the primary objectives of Riverbend. Riverbend's board may designate assets without restrictions for specific operational purposes from time to time.

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Estimates
The preparation of financial statements in conformity with generally accepted accounting principles require management to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results could differ from those estimates.

Property
Property is recorded at cost or, if donated, at fair market value at the date of donation. Depreciation is provided using both straight-line and accelerated methods, over the estimated useful lives of the assets.

Depreciation
The cost of property, equipment and leasehold improvements is depreciated over the estimated useful life of the assets using the straight-line method. Estimated useful lives range from 3 to 40 years.

Grants
Riverbend receives a number of grants from and has entered into various contracts with the State of New Hampshire and the federal government related to the delivery of mental health services.

Vacation Pay and Fringe Benefits
Vacation pay is accrued and charged to the programs when earned by the employee. Fringe benefits are allocated to the appropriate program expense based on the percentage of actual time spent on the programs.

In-Kind Donations
Various public and private entities have donated facilities for Riverbend's operational use. The estimated fair value of such donated services is recorded as offsetting revenues and expenses in the accompanying statement of revenue support and expenses of general funds.

Revenue
Grant revenue received by Riverbend is deferred until the related services are provided.

Accounts Receivable
Accounts receivable are recorded based on the amount billed for services provided, net of respective allowances.

Policy for Evaluating Collectability of Accounts Receivable
In evaluating the collectability of accounts receivable, Riverbend analyzes past results and identifies trends for each major payor source of revenue for the purpose of estimating the appropriate amounts of the allowance for doubtful accounts. Data in each major payor source is regularly reviewed to evaluate the adequacy of the allowance for doubtful accounts. Specifically, for receivables relating to services provided to clients having third-party coverage, an allowance for doubtful accounts and a corresponding provision for bad debts are established for amounts outstanding for an extended period of time and for third-party payors experiencing financial difficulties; for receivables relating to self-pay clients, a provision for bad debts is made in the period services are rendered based on experience indicating the inability or unwillingness of clients to pay amounts for which they are financially responsible.

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Based on management's assessment, Riverbend provides for estimated uncollectible amounts through a charge to earnings and a credit to a valuation allowance. Balances that remain outstanding after Riverbend has used reasonable collection efforts are written off through a charge to the valuation allowance and a credit to accounts receivable.

Riverbend has recorded an estimate in the allowance for doubtful accounts of $882,275 and $1,141,701 as of June 30, 2022 and 2021, respectively. The allowance for doubtful accounts represents 59% and 55% of total client service accounts receivable as of June 30, 2022 and 2021, respectively.

Client Service Revenue

Riverbend recognizes client service revenue in accordance with ASC Topic 606. Client Service Revenue is reported at the amount that reflects the consideration the corporation expects to receive in exchange for the services provided. These amounts are due from patients or third party payers and include variable consideration for retroactive adjustments, if any, under reimbursement programs. Performance obligations are determined based on the nature of the services provided. Client service revenue is recognized as performance obligations are satisfied. Riverbend recognized revenue for mental health services in accordance with ASC 606, Revenue for contracts with Customers. Riverbend has determined that these services included under the daily or monthly fee have the same timing and pattern of transfer and are a series of distinct services that are considered one performance obligation which is satisfied over time. Riverbend receives revenues for services under various third-party payer programs which include Medicaid and other third-party payers. The transaction price is based on standard charges for services provided to residents, reduced by applicable contractual adjustments, discounts, and implicit pricing concessions. The estimates of contractual adjustments and discounts are based on contractual agreements, discount policy, and historical collection experience. The corporation estimates the transaction price based on the terms of the contract with the payer, correspondence with the payer and historical trends.

Client service revenue (net of contractual allowances and provision for bad debts) recognized during the year ended June 30, 2022 totaled $27,192,609, of which $26,309,819 was revenue from third-party payors and $885,790 was revenue from self-pay clients.

Riverbend has agreements with third-party payors that provide payments to Riverbend at established rates. These payments include:

NOTE 5 FAIR VALUE MEASUREMENTS

Professional accounting standards established a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value.

The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurement) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy are described below:

Basis of Fair Value Measurement

Level 1- Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities;

Level 2- Quoted prices in markets that are not considered to be active or financial instruments for which all significant inputs are observable, either directly or indirectly.

Level 3- Prices or valuations that require inputs that are both significant to the fair value measurement and unobservable.

All investments are categorized as Level 1 and recorded at fair value, as of June 30, 2022. As required by professional accounting standards, investment assets are classified in their entirety based upon the lowest level of input that is significant to the fair value measurement.

Capital Campaign Fund – *(Charles Schwab)*

In the spring of 2003, Riverbend Community Mental Health completed a campaign seeking to raise capital support from community leaders, families, friends, corporations, and foundations. The campaign was intended to identify urgent capital projects that could expand and improve services to a relatively underserved population of clients.

The overall campaign is also intended to provide new and improved facilities for the Riverbend community, and enhance the services provided to the patients at Riverbend Community Mental Health, Inc..

NOTE 15 NET ASSETS WITH DONOR RESTRICTIONS (continued)

The Development Fund – *(Charles Schwab)*

NOTE 16 RISKS & UNCERTAINTIES

As a result of the spread of the COVID-19 Coronavirus, economic uncertainties have arisen which are likely to negatively impact net income. Other financial impact could occur though such potential impact and the duration cannot be reasonably estimated at this time. Possible effects may include, but are not limited to, disruption to the Riverbend's customers and revenue, absenteeism in the Riverbend's labor workforce, unavailability of products and supplies used in operations, and decline in value of assets held by the Riverbend, including receivables and property and equipment.

Due to these economic uncertainties Riverbend applied for and received Federal support and aid funding through the Paycheck Protection Program (aka PPP) and the Provider Relief Fund, which was implemented as part of the Coronavirus Aid, Relief, and Economic Security Act (CARES Act). These proceeds were used to cover payroll costs, certain interest payments, rent, and utility costs. These funds were one-off unanticipated payments and any future relief is uncertain.

## NOTE 17 PAYCHECK PROTECTION PROGRAM LOAN

On April 12, 2020, Riverbend was granted a loan in the amount of $5,017,927 under the Paycheck Protection Program ("PPP") administered by the Small Business Administration ("SBA"). The loan was uncollateralized and was fully guaranteed by the Federal Government. Riverbend used the PPP loan proceeds for purposes consistent with the loan provisions and received forgiveness to grant status on August 18, 2021. For the year ended June 30, 2021, Riverbend recognized $5,017,927 as PPP Loan forgiveness in other income.

## NOTE 18 SUBSEQUENT EVENTS

On July 26, 2022, Riverbend paid the Pleasant street property mortgage payable in the amount of $1,132,442. During the year ended June 30, 2022, this amount is included in the current portion of long term debt.

In accordance with professional accounting standards, Riverbend has evaluated subsequent events through January 5, 2023, which is the date the financial statements were available to be issued. Events requiring recognition as of June 30, 2022, have been incorporated into the financial statements herein.

# INDEPENDENT AUDITOR'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH *GOVERNMENT AUDITING STANDARDS*

To the Board of Directors
Riverbend Community Mental Health, Inc.
Concord, New Hampshire

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of Riverbend Community Mental Health, Inc. (a nonprofit organization), which comprise the statement of financial position as of June 30, 2022, and the related statements of operations and cash flows for the year then ended, and the related notes to the financial statements, and have issued our report thereon dated January 5, 2023.

**Report on Internal Control over Financial Reporting**

In planning and performing our audit of the financial statements, we considered Riverbend Community Mental Health, Inc.'s internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of Riverbend Community Mental Health, Inc.'s internal control. Accordingly, we do not express an opinion on the effectiveness of Riverbend Community Mental Health, Inc.'s internal control.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected, on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

**Report on Compliance and Other Matters**

As part of obtaining reasonable assurance about whether Riverbend Community Mental Health, Inc.'s financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

**Purpose of this Report**

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the organization's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the organization's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

# INDEPENDENT AUDITOR'S REPORT ON COMPLIANCE FOR EACH MAJOR PROGRAM AND ON INTERNAL CONTROL OVER COMPLIANCE REQUIRED BY THE UNIFORM GUIDANCE

To the Board of Directors of
Riverbend Community Mental Health, Inc.
Concord, New Hampshire

## Report on Compliance for Each Major Federal Program

### Opinion on Each Major Federal Program

We have audited Riverbend Community Mental Health, Inc.'s compliance with the types of compliance requirements identified as subject to audit in the OMB *Compliance Supplement* that could have a direct and material effect on each of Riverbend Community Mental Health, Inc.'s major federal programs for the year ended June 30, 2022. Riverbend Community Mental Health, Inc.'s major federal programs are identified in the summary of auditor's results section of the accompanying schedule of findings and questioned costs.

In our opinion, Riverbend Community Mental Health, Inc. complied, in all material respects, with the types of compliance requirements referred to above that could have a direct and material effect on each of its major federal programs for the year ended June 30, 2022.

### Basis for Opinion on Each Major Federal Program

We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in Government Auditing Standards, issued by the Comptroller General of the United States; and the audit requirements of Title 2 U.S. Code of Federal Regulations Part 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards (Uniform Guidance). Our responsibilities under those standards and the Uniform Guidance are further described in the Auditor's Responsibilities for the Audit of Compliance section of our report.

We are required to be independent of Riverbend Community Mental Health, Inc. and to meet our other ethical responsibilities, in accordance with relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion on compliance for each major federal program. Our audit does not provide a legal determination of Riverbend Community Mental Health, Inc.'s compliance with the compliance requirements referred to above.

**Responsibilities of Management for Compliance**

Management is responsible for compliance with the requirements referred to above and for the design, implementation, and maintenance of effective internal control over compliance with the requirements of laws, statutes, regulations, rules, and provisions of contracts or grant agreements applicable to Riverbend Community Mental Health, Inc.'s federal programs.

**Auditor's Responsibilities for the Audit of Compliance**

Our objectives are to obtain reasonable assurance about whether material noncompliance with the compliance requirements referred to above occurred, whether due to fraud or error, and express an opinion on Riverbend Community Mental Health, Inc.'s compliance based on our audit. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with generally accepted auditing standards, *Government Auditing Standards*, and the Uniform Guidance will always detect material noncompliance when it exists. The risk of not detecting material noncompliance resulting from fraud is higher than for that resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Noncompliance with the compliance requirements referred to above is considered material if there is a substantial likelihood that, individually or in the aggregate, it would influence the judgment made by a reasonable user of the report on compliance about Riverbend Community Mental Health, Inc.'s compliance with the requirements of each major federal program as a whole.

In performing an audit in accordance with generally accepted auditing standards, *Government Auditing Standards*, and the Uniform Guidance, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material noncompliance, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding Riverbend Community Mental Health, Inc.'s compliance with the compliance requirements referred to above and performing such other procedures as we considered necessary in the circumstances.
- Obtain an understanding of Riverbend Community Mental Health, Inc.'s internal control over compliance relevant to the audit in order to design audit procedures that are appropriate in the circumstances and to test and report on internal control over compliance in accordance with the Uniform Guidance, but not for the purpose of expressing an opinion on the effectiveness of Riverbend Community Mental Health, Inc.'s internal control over compliance. Accordingly, no such opinion is expressed.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and any significant deficiencies and material weaknesses in internal control over compliance that we identified during the audit.

**Report on Internal Control Over Compliance**

A *deficiency in internal control over compliance* exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with a type of compliance requirement of a federal program on a timely basis. A *material weakness in internal control over compliance* is a deficiency, or a combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of a federal program will not be prevented, or detected and corrected, on a timely basis. A *significant deficiency in internal control over compliance* is a deficiency, or a combination of deficiencies, in internal control over compliance with a type of compliance requirement of a federal program that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance.

Our consideration of internal control over compliance was for the limited purpose described in the Auditor's Responsibilities for the Audit of Compliance section above and was not designed to identify all deficiencies in internal control over compliance that might be material weaknesses or significant deficiencies in internal control over compliance. Given these limitations, during our audit we did not identify any deficiencies in internal control over compliance that we consider to be material weaknesses, as defined above. However, material weaknesses or significant deficiencies in internal control over compliance may exist that were not identified.

Our audit was not designed for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, no such opinion is expressed.

The purpose of this report on internal control over compliance is solely to describe the scope of our testing of internal control over compliance and the results of that testing based on the requirements of the Uniform Guidance. Accordingly, this report is not suitable for any other purpose.

**EXPLANATION**

This request is **Sole Source** because MOP 150 requires all amendments to agreements originally approved as sole source to be identified as sole source. The Contractors are the only authorized contractors able to provide the necessary services. The Department contracts for mental health services through these Community Mental Health Centers, which are designated by the Department to service towns and cities within specified geographic regions, as outlined in the NH Revised Statutes Annotated (RSA) 135-C, New Hampshire Mental Health Services System, and NH Administrative Rule He-M 403, Approval and Operation of Community Mental Health Programs.

The purpose of this request is to correct the payment terms for the Assertive Community Treatment and Modular Approach to Therapy for Children services to ensure the Department can reimburse the Contractors for these services. The current payment terms for these services only allow payments to be drawn down on the prior State Fiscal Year and not for the full term of the contract. The Department is requesting to revise the payment terms to remove references to prior SFYs. This will allow the Contractors to invoice for payments through the contract completion date. The funding for the Contractors' payments is already encumbered in their individual price limitations.

The Assertive Community Treatment program offers treatment, rehabilitation, and support services using a person-centered, recovery-based approach to individuals who have been diagnosed with severe and persistent mental illness. The Contractors are paid for these services based on active participation in the monthly consultation and skill training events or for completion of a fidelity measures reviewed by the Department. The Modular Approach to Therapy for Children program is an industry standard treatment that employs a cognitive-behavioral framework to address common childhood behavioral health concerns including depression, anxiety, conduct problems, and trauma for youth ages 6-12. This modularized approach allows for flexibility and encourages clinicians to tailor treatment to individual treatment needs. The Contractors are paid for these services based on a per person rate. The Assertive Community Treatment and Modular Approach to Therapy for Children program scope provisions align with Mental Health Services required by NH RSA 135-C and with State Regulations applicable to the mental health system as outlined in He-M 400, as well as in compliance with the Community Mental Health Agreement (CMHA).

Approximately 20,700 individuals are served annually by the Contractors listed above. The populations served include children with Serious Emotional Disturbances and adults with Serious Mental Illness/Serious and Persistent Mental Illness, including individuals with Mental Illness and co-occurring substance use disorders per NH Administrative Rule He-M 401 Eligibility Determination and Individuals Service Planning.

The Department will continue to monitor services by:

- Conducting performance reviews and utilization reviews as necessary and appropriate based on applicable licensing, certifications, and service provisions.
- Conducting quarterly meetings to review submitted quarterly data and reports to identify ongoing programmatic improvements.
- Reviewing monthly financial statements provided by the Contractors for ongoing evaluation of program fiscal integrity.

Should the Governor and Executive Council not authorize this request, the Department will be unable to reimburse the Contractors for Assertive Community Treatment and Modular Approach to Therapy for Children services, which aligns with the scope of services.

Respectfully submitted,

Lori A. Weaver
Commissioner

**See attached fiscal details.**

**EXPLANATION**

This request is **Sole Source** because the Contractors are the only authorized contractors able to provide the necessary services. The Department contracts for mental health services through these ten (10) Community Mental Health Centers, which are designated by the Department to service towns and cities within specified geographic regions, as outlined in the NH Revised Statutes Annotated (RSA) 135-C, New Hampshire Mental Health Services System, and NH Administrative Rule He-M 403, Approval and Operation of Community Mental Health Programs.

The purpose of this request is to provide community mental health services for individuals in New Hampshire. Community Mental Health Centers provide community-based mental health services to adults, children, and families to build resiliency, promote recovery, and reduce inpatient hospital utilizations, and improve community tenure. These contracts provide both Federal grant funds and General Funds that enable delivery of services not otherwise covered by Medicaid. For example, technology, training, and system upgrades, delivery of some Assertive Community Treatment services, and care coordination with other systems such as the Division of Children, Youth, and Families, Department of Education, and Division of Long Term Supports and Services. The majority of the General Funds are allocated to ensure that individuals who are uninsured have full access to NH Rapid Response crisis services.

Approximately 20,700 individuals will be served annually.

The populations served include children with Serious Emotional Disturbances and adults with Serious Mental Illness/Serious and Persistent Mental Illness, including individuals with Mental Illness and co-occurring substance use disorders per NH Administrative Rule He-M 401 Eligibility Determination and Individuals Service Planning.

The Contractors will provide crisis services, individual and group psychotherapy, targeted case management, medication services, Functional Support Services, Illness Management and Recovery, supported employment, Assertive Community Treatment, Wraparound services for children, community residential services, and acute care services to individuals experiencing psychiatric emergencies while awaiting admission to a designated receiving facility. All contracts include provisions for Mental Health Services required by NH RSA 135-C and with State Regulations applicable to the mental health system as outlined in He-M 400, as well as in compliance with the Community Mental Health Agreement (CMHA).

The Department will monitor services by:

- Conducting performance reviews and utilization reviews as necessary and appropriate based on applicable licensing, certifications and service provisions.
- Conducting quarterly meetings to review submitted quarterly data and reports to identify ongoing programmatic improvements.
- Reviewing monthly financial statements provided by the Contractors for ongoing evaluation of program fiscal integrity.

As referenced in Exhibit A, Revisions to Standard Agreement Provisions Section 1, Revisions to Form P-37, General Provisions, Subsection 1.2 of the attached agreements, the parties have the option to extend the agreements for up to four (4) additional years, contingent upon satisfactory delivery of services, available funding, agreement of the parties, and Governor and Council approval.

Should the Governor and Council not authorize this request, approximately 12,300 adults, and 8,400 children in the state will not have access to critical community mental health services as required by NH RSA 135-C:13. As a result, these individuals may experience an increase in symptoms causing them to seek more costly services at hospital emergency departments due to risk of harm to themselves or others and may have increased contact with law enforcement, correctional programs, or primary care physicians, none of which have the necessary services or supports available to provide necessary assistance. Lack of these services may also increase the likelihood of inpatient hospitalizations and death by suicide.

Source of Federal Funds: Assistance Listing Number #93.243, FAIN # H79SM080245; Assistance Listing Number #93.958, FAIN # B09SM087375; Assistance Listing Number #93.043, FAIN #2201NHOAPH; Assistance Listing Number #93.959, FAIN # TI085821; Assistance Listing Number #93.829, FAIN # H79SM087622.

In the event that the Federal Funds become no longer available, additional General Funds will not be requested to support this program.

Respectfully submitted,

Lori A. Weaver
Interim Commissioner
