REQUESTED ACTION

Authorize the Department of Administrative services to exercise a **Sole Source** amendment to an existing contract (Contract #8003378) with GAC Inc. dba New England Traffic Solutions (VC #280135), Glastonbury, CT for traffic signal equipment by increasing the price limitation by \$2,324,670.62 from \$622,418.26 in an amount up to and not to exceed \$2,947,088.88 effective upon Governor and Executive Council approval with no change to the completion date of February 28, 2029. The original contract was approved by the Governor and Executive Council on February 21, 2024, item #172.

Funding shall be provided through individual agency expenditures, none of which shall be permitted unless there are sufficient appropriated funds to cover the expenditure.

EXPLANATION

As previously stated, the original contract was approved by the Governor and Executive Council on February 21, 2024, item #172.

This amendment is **Sole Source** because the requested increase to the current limitation exceeds 10% of the original contract price limitation amount. Following investigation into the contract usage reporting and Bureau of Purchase and Property (BoPP) end-user research, it was determined that the price limitation previously agreed upon by the Department of Administrative Services and GAC Inc. dba New England Traffic Solutions has reached 72% of the available price limitation with an additional four (4) years remaining of the original contract term.

The Department of Transportation has ramped up efforts to upgrade the technology at signalized intersections which has led to the need to purchase replacement/upgraded equipment with expanded locations utilizing the new technology. Previously, traffic signals were isolated and independent. A local controller in the cabinet received inputs from in-pavement sensors to detect vehicles and cycled through the light phases accordingly. On major corridors with multiple signalized intersections, the local controllers would communicate by wire to their neighbors and cycle with some coordination. Troubleshooting and adjustments would be performed by technicians at each cabinet.

There are two key technology improvements involved: remote communication and improved detection. The Department has been working to provide remote access communications with the local controllers. This remote communication is through data network connection via cell modem, cable internet, or DOT ITS network, and allows access via computer interface to monitor the status and performance of the controllers and make adjustments without visiting the sites. Additionally, vehicle detection for signals has historically been provided by in-pavement detection loops to create fixed areas where the presence of a vehicle is detected. The Department has been transitioning some intersections to video-based detection. Video detection makes use of overhead cameras to “see” and interpret activities at an intersection for a variety of purposes. The technology can provide more advanced detection of vehicles with virtual detection areas that can be programmed remotely, and many can reliably detect and differentiate motorcycles, bicycles, and pedestrians, as well. These units also can provide live video feeds of the intersection to aid in remote observation/troubleshooting and vehicle turning movement counting to support traffic data collection for performance analysis and Federal reporting.

These technology improvements both leverage remote data communications improvements, expanding what technicians can do remotely to address problems and/or adapt to special traffic situations. Remote capabilities provide a significant advantage to the Bureau of Traffic over sending crews on overtime to remote signal locations. Upgrades to enable communications include newer generation signal controllers (“the brains” in the cabinets), and network interfaces such as network switches, cell modems, and fiber optics networking. Some systems can also collect and report performance metrics for the intersection and can alert staff of potential problems before detected by the public. Priority has been to add remote communications to major corridors and at the most distant intersections, with the goal of making all signals accessible remotely in the future.

New technology brings greater capabilities but also comes at a higher cost than the equipment previously purchased by the department. As the department has improved its ability to manage signals centrally and has identified funding sources for system improvements, it has been able to purchase the necessary hardware through the various signal equipment contracts. The combinations of technology improvements in the signal industry, the Department’s improved capability of managing a more advanced system, and the availability of funding has resulted in much greater use of these contracts to purchase hardware for system improvements than envisioned.

The expansion of the traffic signal equipment contracts has allowed DOT to improve their efficiency and spend more time on expanding improvements with in-house crews, relying less on contractors and markups on equipment purchases. DOT continues to facilitate improvements to the signal systems in the State toward the goal of operating world class systems suitable for New Hampshire’s needs. The increase below reflects anticipated spend for FY 2025 through the end of the contract term.

REQUESTED ACTION

Authorize the Department of Administrative Services to enter into a contract with GAC Inc. dba New England Traffic Solutions. (VC#280135), Glastonbury, CT in an amount up to and not to exceed \$622,418.26 for traffic signal equipment, with the option to renew for an additional two years effective upon Governor and Executive Council approval for the period of March 1, 2024, through February 28, 2029.

Funding shall be provided through individual agency expenditures, none of which shall be permitted unless there are sufficient appropriated funds to cover the expenditure.

EXPLANATION

The Department of Administrative Services, through the Bureau of Purchase and Property, issued request for bid (RFB) 2825-24 for traffic signal equipment on October 3, 2023, with responses due on October 17, 2023. This bid reached 36 vendors through the NIGP electronic sourcing platform with an additional 16 vendors directly sourced. There were 5 compliant responses received for this multi-award contract with New England Traffic Solutions submitting the lowest compliant total pricing for 1 of the 7 categories. Coastal Traffic, Incorporated submitted the lowest compliant total pricing for 4 of the 7 categories. Granite Traffic Solutions, LLC submitted the lowest compliant total pricing for 1 of the 7 categories. Ocean State Signal Co. submitted the lowest compliant total pricing for 1 of the 7 categories.

The streamlined purchasing processes eliminate the need for multiple vendor quotes, whether for crash repairs or planned in-house projects. This not only saves time but also enables effective forecasting for annual inventory and budgets, while minimizing the impact of current inflation costs. Additionally, having an available State supply contract ensures ready resupply of spare parts stock, reducing the need for excessive stock levels due to uncertainty of resupply. Municipalities that maintain traffic signals can also enjoy these economic advantages.

The expiring contract (Contract #8002814) with General Traffic Equipment Co. only included Section E (Traffic Signal LED Modules) of this bid. During the review period,

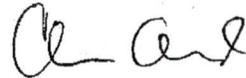

discussions with DOT revealed that it would be beneficial to expand the Traffic Signal contract resulting in 7 total sections to better serve the agency's needs. As Sections F (Cubic/Gridsmart) is new to this contract, there is no means for comparison to the expiring contract.

The forecasted spend amount is the estimated quantity that reflects statewide needs and anticipated purchases over the course of the 5-year contract term. While the 5-year contract does allow for price adjustments biannually, the initial prices remain fixed for a 2-year period. After the first 2 years, the contractor may request increases which may not exceed 5 percent. The financial data includes forecasted allowance for price adjustments beyond year 3 of the contract term. It should be noted that the contract contains a de-escalation clause whereby price decreases are effective immediately as they become available to the general trade.

Contract financials	
Estimated annual spend	\$121,983.00
Estimated term spend (5 year)	\$609,915.00
Estimated bi-annual escalation	\$12,503.26

Based on the foregoing, I am respectfully recommending approval of the contract with New England Traffic Solutions.

"Change of Control" means (a) merger, consolidation, or a transaction or series of related transactions in which a third party, together with its affiliates, becomes the direct or indirect owner of fifty percent (50%) or more of the voting shares or similar equity interests, or combined voting power of the Contractor, or (b) the sale of all or substantially all of the assets of the Contractor.

12.3 None of the Services shall be subcontracted by the Contractor without prior written notice and consent of the State.

12.4 The State is entitled to copies of all subcontracts and assignment agreements and shall not be bound by any provisions contained in a subcontract or an assignment agreement to which it is not a party.

13. INDEMNIFICATION. The Contractor shall indemnify, defend, and hold harmless the State, its officers, and employees from and against all actions, claims, damages, demands, judgments, fines, liabilities, losses, and other expenses, including, without limitation, reasonable attorneys' fees, arising out of or relating to this Agreement directly or indirectly arising from death, personal injury, property damage, intellectual property infringement, or other claims asserted against the State, its officers, or employees caused by the acts or omissions of negligence, reckless or willful misconduct, or fraud by the Contractor, its employees, agents, or subcontractors.
