Riverside Companies) of Newington, NH (VC#539470-B001) totaling \$201,333 for partial funding for the replacement of one (1) diesel excavator, effective upon Governor and Council approval through September 30, 2025. 55% Federal funds, 45% New Hampshire Volkswagen Environmental Mitigation Trust funds.

EXPLANATION

Under the Diesel Emission Reduction Act (DERA) the U.S. Environmental Protection Agency (EPA) provides funding to states for projects that reduce harmful emissions produced by older diesel engines, including the replacement of diesel excavators. The new engines must meet more stringent emissions standards. Utilizing federal EPA funds, matched with funding from New Hampshire's VW Trust funds, NHDES has made approximately \$950,000 available for grants. The first round of the Request for Proposals was conducted from December 16, 2024 through January 24, 2025. Seven (7) entities submitted eligible proposals, all of which were selected for funding (see Attachment A for the scoring results).

Under this Agreement, EA2, LLC. will replace one (1) engine model year 1997 diesel excavator. In just under three decades of service, this excavator has accumulated over 14,450 hours of lifetime use. Due to the excavator's age and heavy usage, maintenance and repair costs have risen year over year, and are now exceeding the excavator's annual maintenance budget. Continual downtime due to the increasing need for maintenance has also presented an operational challenge for EA2. With the company's commercial pier under contract with the Portsmouth Naval Shipyard, the excavator is used for many purposes, including unloading and transporting cargo, dredging, and for habitat restoration projects. Work performed by the excavator occurs in some of the state's most sensitive marine habitats in the Great Bay National Wildlife Refuge, and its work supports state waterways and seawall and jetty construction projects. EA2's project is estimated to result in nearly double the emissions reductions benefits of any other project received during this funding round. The significant reductions in harmful smog-producing pollutants of this project would benefit the many sensitive populations located adjacent to the area served by the excavator, including schoolchildren at several nearby schools, and the elderly at nearby nursing homes. EA2, LLC. has prioritized the replacement of this excavator with a new hybrid diesel-electric model to improve facility and employee safety, reduce fuel and maintenance costs, decrease emissions outputs in the highly sensitive marine

environments they operate in, and increase operational reliability, including for their contract with the Portsmouth Naval Shipyard.

The DERA program has a mandatory minimum cost share requirement for an excavator replacement project of 75 percent. NHDES will provide a grant of \$201,333 or 25 percent, whichever is less, of the total replacement cost (estimated at \$805,335) to EA2 LLC. for the replacement of the excavator.

This Agreement has been approved as to form, substance, and execution by the Office of the Attorney General. In the event that Federal funds become no longer available, General funds will not be requested to support this program.

We respectfully request your approval.
