Her Excellency, Governor Kelly A. Ayotte  
 and The Honorable Council  
 State House  
 Concord, NH 03301

**REQUESTED ACTION**

Authorize the New Hampshire Department of Environmental Services (NHDES) to enter into an agreement with the Rockingham County Conservation District, Brentwood, NH, (VC# 177468-B011) in the amount of \$150,000 to implement stormwater control measures and bank stabilization practices on the Exeter River in Exeter, NH, effective upon Governor and Council approval through December 31, 2028. 100% Federal Funds.

Funding is available in the following account:

03-44-44-442010-2035-072-500575	<u>FY 2026</u>
Dept. Environmental Services, NPS Restoration Program, Grants-Federal	\$150,000

**EXPLANATION**

NHDES requests approval to enter into a grant agreement for \$150,000 with the Rockingham County Conservation District to complete the bank stabilization and stormwater management project on the Exeter River.

The Exeter River in Exeter, NH is experiencing severe erosion along the riverbanks due to stormwater runoff and flooding events at a heavily developed site identified in the Exeter River Geomorphic Assessment and Watershed-based Plan. This project will conduct stormwater assessments and determine the feasibility of construction for at least one project to reduce stormwater runoff to the Exeter River. Additionally, approximately 550 linear feet of riverbank will be restored by implementing living shoreline/riverbank and other riverbank stabilization measures. The project will reduce nutrient loading to the Exeter River by 126 pounds of nitrogen, 74 tons of sediment, and 63 pounds of phosphorus, annually.

NHDES issued a Request for Proposals (RFP) for the 2025 Watershed Assistance grants program in July 2024. The eleven proposals received were ranked based on the criteria included in the RFP: water quality improvement or protection; cost/benefit ratio; local capacity to complete the project; relative value or significance of the water body; consideration of the project's impact on communities; the project's incorporation of environmental risks; and, general quality and thoroughness of the proposal. Based on the

results of the selection process and available federal grant funding levels, six implementation projects were selected to receive funding. Please see Attachment B for a list of project rankings and NHDES review team members.

Watershed Assistance grants focus on the reduction of nonpoint source (NPS) pollution. NPS pollution occurs when rainfall, snowmelt, or irrigation waters travel through the ground or across land, transporting materials that are then introduced into groundwater or deposited into rivers, lakes, and coastal waters. Pollutants can include chemicals, sediments, nutrients, and toxins that often have harmful effects on drinking water supplies, recreation, fisheries, and wildlife. Land development or changes in land use can also cause NPS pollution by disrupting the natural hydrology of a water body, increasing impervious surfaces, and contributing to the loss of aquatic habitat. Watershed Assistance grants address NPS pollution by promoting responsible land use practices on the watershed scale.

The project costs are budgeted at \$250,050. NHDES will provide \$150,000 (60%) of the project costs through a federal grant, and the Rockingham County Conservation District will provide the remaining costs through cash and in-kind services. A budget estimate is provided in Attachment A.

In the event that federal funds become no longer available, general funds will not be requested to support this program. The agreement has been approved by the Office of the Attorney General as to form, execution, and substance.

We respectfully request your approval of this item.

Robert R. Scott, Commissioner

## Additional Requirements of the Agreement

### Quality Assurance

All project activities which are to be guided by a quality assurance (QA) document such as a Quality Assurance Project Plan (QAPP) or Site Specific Project Plan (SSPP) must not begin prior to NHDES/EPA approval of that QA document. In the event that sampling, modeling or other such activities precede QA document approval, the data will not be considered valid, and the grantee will forfeit the ability to receive payment for those activities.

The life span of a project shall be determined by the Grantee, tailored to the types of practices expected to be funded in this project, and agreed upon by NHDES. The Grantee shall provide NHDES with an engineering estimate of the design life of the stormwater control measure(s) (SCMs) and best management practice(s) (BMPs), or in the case of small-scale SCMs/BMPs which do not have a design life estimation completed by an engineer, the design life of that practice shall be estimated to be ten years.

Operation includes the administration, management, and performance of non-maintenance actions needed to keep the completed practice safe and functioning as intended. Maintenance includes work to prevent deterioration of the practice, repairing damage, or replacement of the practice to its original condition if one or more components fail. The Grantee shall assure that any sub-award of Section 319 funds similarly include the same condition in the sub-award. Additionally, both EPA and NHDES reserve the right to periodically inspect a practice during the life span of the project to ensure that operation and maintenance are occurring.

**Exhibit C**  
**Method of Payment and Contract Price**

The State shall pay to the Grantee the total reimbursable program costs in accordance with the following requirements:

Procurements of goods or services made with grant funds, or those credited as match, shall comply with the terms of this agreement, and must be reported to NHDES. Reimbursement requests for program costs shall be made by the Grantee using a payment request form as supplied by the State, which shall be completed and signed by the Grantee. The payment request form shall be accompanied by proper supporting documentation in the amount of each requested disbursement and required matching funds. Documentation of reimbursable and matching costs may include invoices for supplies, equipment, services, contractual services, and a report of personnel, travel, and indirect costs. For projects that demonstrate progress solely through the submission of interim progress reports, payments shall be made upon receipt, review and approval of the interim progress report and accompanying payment request form. Payments shall be made to the Grantee no more frequently than monthly.

The total reimbursement shall not exceed the grant award of \$150,000. The cumulative match value for the project shall meet or exceed the amount of grant funds received multiplied by 0.667 (e.g. \$150,000 grant X 0.667 = \$100,050 minimum match required) of non-federal cash and in-kind services.

Funding is provided through a Watershed Assistance Grant from the NH Department of Environmental Services with Clean Water Act Section 319 funds from the U.S. Environmental Protection Agency.
