EXPLANATION

The Environmental Protection Agency (EPA) published regulatory revisions to the National Primary Drinking Water Regulation (NPDWR) for lead and copper under the authority of the Safe Drinking Water Act (SDWA). These revised requirements provide greater and more effective protection of public health by reducing exposure to lead and copper in drinking water.

In April 2025, NHDES released a solicitation for Large Public Water System Lead Service Line Inventory Grant applications to assist public water systems with identifying the material of service lines and updating a service line inventory per federal requirements set by the EPA's Lead and Copper Rule Revisions (LCRR) and Lead and Copper Rule Improvements (LCRI). A total of 48 communities, serving greater than 1,000 service connections with service lines listed as "unknown" in the initial inventory, were identified as potential candidates for this grant (see Attachment A for a complete list). Funding for these grants was established from the Infrastructure Investment and Jobs Act (IIJA) funding. The grants are being awarded on a rolling basis.

The Town of Milford will use the funding to update their water distribution system's lead service line inventory. The project will improve water quality and assist the Town with meeting federal requirements.

In the event grant funds become no longer available, general funds will not be requested to support this program. The grant agreement has been approved by the Attorney General's Office as to form, substance, and execution.

We respectfully request your approval of this item.

Robert R. Scott
Commissioner
