SCOPE OF WORK

PLEASE DESCRIBE THE CURRENT BUSINESS OPERATIONS INCLUDING SERVICES BEING OFFERED IN THE GEOGRAPHIC FOCUS AREA.

McKenzie's Farm LLC grows and distributes fruits and vegetables to 10 farms, and 17 local markets in 5 New Hampshire counties. McKenzie's farm also purchases produce and meat from farms to be sold at our farm and distributed to other farms and markets. All produce is washed according to need, graded, and packed. Items needing refrigeration are placed in a cooler. This produce includes tomatoes, raspberries, strawberries, peaches, nectarines, cucumbers, lettuce, corn, summer squash, zucchini, and beans.

PLEASE DESCRIBE THE SPECIFIC NEED THAT THE REQUESTED EQUIPMENT WILL ADDRESS.

The refrigerated vehicle will allow McKenzie's Farm to maintain a higher quality of produce during the duration of transportation. No longer will produce be in the back of trucks and vans in the summer heat. This vehicle will increase the shelf life of our products, other local farms products and encourage farms and markets to increase their orders and confidence in the quality of local produce. Our delivery range will also be increased as produce will be kept at an optimal temperature during the delivery. We will have less waste and sustain an increase in production, with an increase in volume. The refrigerated vehicle will allow us to efficiently deliver more products which is a necessity when distributing to numerous markets.

PLEASE DESCRIBE THE IMPACT THIS EQUIPMENT WILL HAVE ON LOCAL AND REGIONAL PRODUCERS, MARKET OUTLETS, AND MORE.

The refrigerated truck will allow McKenzie's Farm to purchase directly from local and regional producers, relying less on produce purchased from the Boston market and relying on our ability to keep heat sensitive local produce cool and in optimal condition for resale. Local markets and outlets will also benefit from our ability to not only deliver produce grown on our farm at the correct temperature, but we will be able to aggregate produce grown by other local producers and effectively distribute to local farms, markets, grocery stores and restaurants with little to no loss in the process.

ESTIMATE THE NUMBER OF LOCAL AND REGIONAL PRODUCERS IMPACTED.

As an established grower of fruit crops for over 36 years, McKenzie's Farm prides itself as an integral part of the surrounding communities' access to locally grown produce; supplying over 30 local farms, produce markets and restaurants with sustainably grown fruits and vegetables.

McKenzie's farm is currently limited in making deliveries, adding value and strengthening the middle of the supply chain in New Hampshire due to the lack of refrigerated transportation. We are not able to increase delivery locations due to our inability to keep produce cool for extended durations. A refrigerated truck would allow us to efficiently transport these products at optimal temperature, therefore decreasing waste, maintaining our high standard of quality, and expand the reach of our deliveries in both time and location. This would allow us to serve smaller markets, including new farmers who may not yet have the ability to grow specific perennial crops, additional local retailers and restaurants; further influencing the food supply chain in New Hampshire. In addition to our own produce, we would be able to distribute for other farms as well, strengthening our already established wholesale markets.

It is our passion for growing good food and our deep gratitude for the communities that support McKenzie's Farm that inspire us to envision a better path forward for our farm and those who depend on us. We are stronger together. Thank you for your consideration.
